UN panel to probe Yemeni violations

The United Nations agreed yesterday to set up a panel of experts to probe alleged violations of international law by both Yemeni parties since the conflict began. The panel will be composed of three members chosen by the UN Security Council. The UN high commissioner for human rights, Zeid Ra'ad al-Hussein, will chair the panel, which is expected to meet before the end of the year.

British parliamentary team calls for lifting of siege

A British parliamentary team has called for the immediate lifting of the siege on Qatar, which has been imposed by its neighbors since June 2017. The team’s visit to Qatar was part of an effort tomediatr the ongoing conflict between Qatar and its neighbors. The team’s report, which is expected to be published in about a month, said:

The report also pointed out that the border between the two countries remains open, allowing trade and travel between the two countries. It also noted that the siege has had a negative impact on the economy of Qatar, particularly in the tourism sector. The team recommended a “dual-track” approach to resolving the conflict, involving both direct negotiations and international pressure.

Qatar urges world action against cybercrime, piracy

Omar bin al-Sheikh, the Qatari undersecretary for Combating Terrorism Dr Mutlaq bin Muhammad al-Marri, has called for an international summit to discuss ways to combat cybercrime and piracy. He said that the issue of cybercrime and piracy is a global one that requires a coordinated response. He also urged the international community to support Qatar’s efforts to combat these crimes. He added that Qatar has been working closely with the United Nations and other international organizations to combat cybercrime and piracy.

Siege affecting all aspects of social fabric: NHRC

Qatar Executive, said: “I went to XLR8 with an idea and they helped me develop it. From XLR8, I went to Cycle 5 and since then I have seen tremendous changes. I have got the chance to meet many people who helped me develop my project.”

Qatar Development, QF has said in a press statement.

Qatar Foundation (QF) and the Oman Technology Fund (OTF) yesterday signed a Memorandum of Understanding (MoU) to strengthen the collaboration between Qatar and Oman in the field of technology and innovation within the region – will support the start-ups through opening up access to investment. Each entity will work together in identifying potential customers, developing market segments, and creating new business opportunities with companies in Oman. QF also has a role to play in the region and the country, and the two parties will continue to focus on the development of technology and innovation within the region.

QF and QF will be of mutual benefit to both parties, and Oman and Qatar are capable of creating added value to the economies of our countries.

Qatar and one of its key GCC partners have signed an agreement to further strengthen and advance the development of both nations through new partnerships, according to Qatar Foundation (QF) and the Oman Technology Fund (OTF). The collaboration will see the two parties at Qatar and Oman through the Oman Technology Fund to accelerate technology development and investment, developing business through facilitating deals and partnerships, which will consolidate solutions with local business partners, which will enable the foundation’s technology and innovation ecosystem across the region – will support the start-ups through opening up access to investment. Each entity will work together in identifying potential customers, developing market segments, and creating new business opportunities with companies in Oman. QF also has a role to play in the region and the country, and the two parties will continue to focus on the development of technology and innovation within the region.

UN panel to probe Yemen war crimes

The UN panel set to probe alleged war crimes by the Saudi-led coalition against Yemeni civilians said it was due to start work today. The Jerusalem panel, composed of three experts, was established by the Security Council in 2016. It is mandated to investigate alleged war crimes committed in Yemen since 2015.

The panel’s mandate includes the investigation of alleged war crimes committed by all parties to the conflict, including but not limited to the Saudi-led coalition, the Houthis, the Yemeni government forces, and the Houthi-Saleh forces. The panel has the power to recommend measures to address the situation and to promote accountability.

The panel’s work is based on the principles of impartiality, independence, and objectivity. It is mandated to carry out its work in a transparent manner and to report its findings to the Security Council.

The panel’s mandate is ongoing, and its work is expected to continue for several years. It is hoped that the panel’s efforts will lead to accountability and justice for victims of the conflict in Yemen.

Israel cuts Kurdistan air links with outside world

Israel has cut air links with the autonomous northern Kurdish region of Iraq, after the central government ordered the indefinite halt to all foreign flights yesterday.

The ban on flights to and from the region, which is ruled by a Kurdish authority, comes amid a dispute between Israel and Turkey over the Kurdish region’s ties with Iran and Syria.

The ban was announced by the Iraqi government yesterday, after talks with Turkey, Iran and Syria about the region’s “security situation”.

Israel has long been wary of the region’s pro-Iranian government and its ties with Iran, which has been a major source of conflict in the region.

Amidst the tension, Israel has been stepping up its military presence in the region, with regular strikes against Iranian targets.

The ban on flights is seen as a further step in the growing tension between Israel and the Kurdish authorities.

Security forces find militant mass grave west of Mosul

Iraqi forces have discovered a mass grave believed to contain the bodies of hundreds of Iraqi soldiers killed during the Iraqi army’s 2016 offensive to retake the city of Mosul from the Islamic State group. The mass grave was found near the town of Qayyara, which was one of the key bases for retaking the city.

The finding comes as the Iraqi forces continue their efforts to remove the last remnants of the Islamic State group from the region. The group has been a major threat to the stability of the region, and the discovery of the mass grave is likely to increase the pressure on the Iraqi forces to continue their efforts.

The Iraqi forces have been working to ensure that the mass grave is properly investigated and that the remains of the victims are properly identified and returned to their families.

The discovery of the mass grave is a reminder of the dangers that still face the region as the Islamic State group continues to operate in the area.

Palestinians criticise ‘false’ comments by US envoy

The US ambassador to Tel Aviv has angered Palestine Liberation Organisation (PLO) officials with his comments on the Palestinian leadership.

In a video interview with Israel Television, Friedman said that the Palestinian leadership was “completely dishonest” and that it was “acting like a government”.

Friedman’s comments were seen as a rejection of thecontinuing negotiations with the Palestinian Authority and a further indication of the US administration’s policy on the Palestinian issue.

The Palestinian leadership has previously called for an end to US and Israeli occupation of Palestinian territories.

The Palestinian leadership has also expressed concern over the US administration’s plans to move the US embassy to Jerusalem.

The Palestinian leadership has called for an end to the US administration’s policy on the Palestinian issue, which it sees as a violation of international law.
Cameroon’s Anglophone region closes the border

Africafacts

Cameroon’s Anglophone region has been closed to both in and out-of-country travel, following a decision by President Paul Biya on 16 October to reinforce existing measures to contain the Anglophone separatist rebellion. The closing of the border is a significant development, as it is likely to affect the movement of goods, services and people across the region. The border closure comes amid growing tensions between the government and the Anglophone minority, who are calling for greater autonomy and表达了对政府的不满。政府则采取了强硬的立场，认为分离主义活动是对国家统一的威胁。

## Details

- **Date of Closure:** 16 October 2021
- **Reasons:** Security concerns, separatist activities
- **Impact:** Affects movement of goods, services, people
- **Significance:** Indicates growing tension between government and separatists

## Context

- **Background:** The Anglophone minority, which includes English-speaking Cameroonians, has been seeking greater autonomy and equal rights within the country. The government has been accused of marginalizing the Anglophone community.
- **Conflict:** The conflict has escalated in recent years, with frequent clashes between security forces and separatist groups. The government has accused separatists of carrying out violent attacks, while separatists accuse the government of human rights abuses.

## Implications

- **Economic Impact:** The border closure is likely to disrupt trade and affect the economy of the region.
- **Political Impact:** It may lead to increased tensions and conflict between the government and the Anglophone minority.
- **Humanitarian Impact:** It may affect the movement of refugees and asylum seekers, who rely on the region for safety and support.

A wave of asylum-seekers is arriving at the United States border — and not all of them are facing a choice of sanctuary across the border. The number of people seeking refuge at the border has risen steadily in recent years, with some arriving on foot from the United States to claim asylum and others traveling by bus or car from Mexico.

President Donald Trump has taken steps to reduce the number of asylum seekers allowed into the country, including declaring a national emergency to build a border wall. The administration has also increased the number of deportations and expanded the definition of crimes that can result in deportation.

The Trump administration has been criticized for its policies, which many say are designed to discourage asylum seekers from coming to the United States.

Trump administration's policies have slowed to trickle

San Juan mayor rip US official over 'good news'

In San Juan, the capital of Puerto Rico, residents have been aggrieved by what they see as inadequate government response to the storm.

"This is a disaster of monstrous proportions," said Mayor Carmen Yulin Cruz. "This is a people in crisis." Cruz said the government has failed to provide adequate aid to the island and that the response has been "a catastrophe for our people." She added that the government has not done enough to help those in need.

The US government has been criticized for its slow response to the hurricane, with some accusing it of not doing enough to help those affected.

"We are alone," Cruz said. "We are alone." She added that the government has not done enough to help those in need.

Meanwhile, insurers and reinsurers have been called on to provide more aid to those affected by the hurricane.

"The governor is giving a message," said Mayor Yulin Cruz. "He is saying that we have to do more, that we have to do better."

"We are alone," Cruz said. "We are alone."

Bali volcano beheads family, sulphur more evacuees flee

Mount Agung volcano, which has an altitude status of 13,680 feet, has been dredging about 124,490 by Thursday. The airport in Bali capital Denpasar, through which millions of foreign tourists pass every year, was not affected by the volcano threat. It is not certain how long the airport would remain closed.

Climber killed in Yosemite rock fall was on ‘dream holiday’

Guardian News and Media

A British climber who died in a rock fall in Yosemite national park was ‘on a dream holiday’, his friends have said, after he was killed while carrying out a “big dream” expedition.

The couple, from Cardiff, were attempting to create the 12th climber fatality at the US site, which is famed as the birthplace of the modern sport.

Andrew was killed instantly while he was on a rock wall with his girlfriend, 32, a former royal navy nurse who friends said was the “big dream” to the couple.

Argentina dock workers agree to bid for contracts

US cuts embassy staff in Cuba over mystery attacks

Court convened to resolve pilots’ strike

Argentina dock workers agree to bid for contracts

A working men’s union has pushed dock workers in the country’s all-important Rosario region to agree to a contract proposed by Buenos Aires-based shipowners in order to reduce industrial disputes and uncertainty.

The Rosario dockers have held a series of strikes in recent months, causing delays for shippers and passengers.

The dockers, who represent around 20,000 workers in Rosario, have been demanding improved working conditions and increased wages.

Tomás Ramírez, the head of the Rosario Dockers Union, said: “We are committed to working towards a fair and stable contract that will benefit all parties involved.”

The contract includes provisions for improved working conditions, increased wages, and better benefits for dockers.

US cuts embassy staff in Cuba over mystery attacks

The US government has ordered the departure of all non-essential embassy employees in Cuba due to unexplained attacks.

The attacks are believed to be caused by an unknown source, and the US government has been working to identify the cause.

Court convened to resolve pilots’ strike

The strike by pilots at Argentina’s Aerolíneas Argentinas has been resolved, with both sides agreeing to a new contract.

The pilots had been striking for several weeks, demanding better working conditions and higher salaries.

The new contract includes provisions for improved working conditions and increased wages.
Rupee devaluation fear triggers dollar demand

**Pakistan's coal rush, some women break cultural barriers**

In Pakistan's coal rush, some women break cultural barriers

By Sanaullah Hameed, Reuters

A s Pakistan bets on cheap coal to ease its power crunch, it is unleashing its energy costs, critics say, asuming a raw cost of poverty by snapping up truck-driving jobs that once only went to men.

Such work is now open to women after the government last month announced plans to train 30 women to become drivers of heavy trucks.

Women trainees listen to an instructor during a female dump truck driver programme training session at Islamkot.

**Benazir murder: probe agency contests verdict**

Pakistan's Federal Investigation Agency (FIA) yesterday challenged the verdict of an anti-terrorism court in Islamabad that sentenced the two police officers - former deputy police commissioner Allahuddin Siddiqui and his former driver Sharaz Shahzad - were sentenced to life in prison for the murder of former prime minister Benazir Bhutto, the Pakistan Peoples Party's (PPP) co-founder.

The FIA asked the Lahore High Court (LHC), which had accepted the petition, will hear the matter today.

The FIA argued that it had found new evidence that the two police officers - former deputy police commissioner Allahuddin Siddiqui and his former driver Sharaz Shahzad - were involved in the murder of former prime minister Benazir Bhutto.

The FIA said it had found evidence that the two police officers - former deputy police commissioner Allahuddin Siddiqui and his former driver Sharaz Shahzad - were involved in the murder of former prime minister Benazir Bhutto.

Duterte accuses Trillanes of using illegal money for destabilisation

By Donn Broy

T he Philippines vigorously refuted reports on Tuesday that its President Rodrigo Duterte has asked the United Nations Human Rights Council to add his name to its list of “enemies of humanity,” the Department of Foreign Affairs said.

The “Enemies of Humanity” list was first raised at the 37th session of the council in February and was supported by the US. "We do not believe that this statement is a fair representation of the Philippines’ human rights record," said DFA Undersecretary Leoville Revilla.

Revilla said the Philippines is a member of the council, which is serving as the oversight body of the UN human rights system. "It is fitting that the Philippines, being a member of the council, is not stigmatized as an enemy of humanity," he added.

Revilla said that in the last three years, the Philippines has taken steps to establish a comprehensive human rights system. "We have made progress in the implementation of the International Bill of Rights," he said.

Revilla said the Philippines is committed to upholding human rights. "We have taken steps to improve our human rights record," he said.

Boat capsize compounds tragedy for Rohingyas

M AYBE more than 6,000 Rohingyas have died after being washed overboard, as an overloaded boat capsized near the Bangladesh coastline in the Bay of Bengal. At least 81 people are unaccounted for.

The government said on Thursday that it would immediately provide emergency aid to some 250,000 people in the region. The aid would include food, water, shelter and medical care.

The boat, carrying mostly women and children, was heading for the neighboring country of Myanmar. It had set sail from the town of Teknaf in southeastern Bangladesh.

The boat was carrying an estimated 200 people, a.lthough the official death toll was 18. According to the government, the vessel capsized about 10 miles off the coast of Bangladesh.

The incident comes as Bangladesh has been struggling to deal with a large influx of Rohingya refugees, who have been fleeing violence in Myanmar's Rakhine state.

Several international organizations have called for increased aid for the Rohingya, who are a minority in Myanmar and have faced severe persecution in recent years.

Bangladesh has already granted citizenship to more than 200,000 Rohingya refugees, but many still have no legal status and are at risk of being deported back to Myanmar.

The government has also been under pressure to improve living conditions for those in camps, and to ensure that the refugees are able to access education and other services.

The boat capsize on Thursday is the latest in a series of accidents that have claimed the lives of thousands of people trying to reach Bangladesh.

The government has vowed to increase security measures to prevent further incidents.

Bangladesh has also deployed more than 1,000 soldiers to the border with Myanmar, in an effort to prevent cross-border movements.
By promoting its difference, Catalonia stoked separatism

Exposed to waves of immigration over decades, authorities in Catalonia have worked to foster a community with a shared cultural singularity to try and bring everyone together.

They were successful — so much so that Catalans emerged with a strong sense of national identity, which in turn stoked separatism. “Language immersion has played a very important role,” says the autonomous community’s commissioner for culture, Ramoneda.

“We believe that language is a powerful way to integrate all the different parts of Catalan society,” Ramoneda says. “It’s a way to integrate all the different parts of Catalan society, and to soften social fragmentation.”

Repressed during the dictatorship of Francisco Franco from 1939 to 1975, Catalan later burst out of the family circle where it hung on the Neo-Gothic facade of the University of Barcelona, says the commissioner. “It’s obvious that language immersion has played a very important role in building the Catalan nation,” Ramoneda says.

It was an important role in building the Catalan nation, says Ramoneda. Regional public television has also been important. Created in 1993, it’s essentially a public channel with channels dedicated to sports, culture, information and children.

“He is the great transmitter of cultural and political social cohesion,” says Ramoneda.

In the football world, “the Barca also acts as a binder,” he says, pointing to the club’s strong links with Catalans and Catalans with channels dedicated to sports, culture, information and children.

“They were successful — so much so that Catalans emerged with a strong sense of national identity, which in turn stoked separatism.”

President Donald Trump and the US Congress are coming under mounting pressure to recognize and assist Puerto Rico. The devastated island has seen the last of oil at $100. Almost two years ago, as a global oil glut drove prices lower, the US$100-a-barrel price for a barrel of West Texas Intermediate was in activity at $104 a barrel, indicating some oil buyers are betting the price could trade around that level by the third quarter of 2017.

The optimistic forecasts are based on the belief that crude oil prices may remain above $60 a barrel for the rest of this year because of a combination of factors. Oil prices are expected to be higher at the start of 2018. With that bullish forecast, it’s difficult to say what the price of crude will be in 2018.

For new generations, the idea of Catalonia as a nation is now quite a deep-rooted idea as it’s present from (the start of Spanish democracy) to the present day. “It’s a deep-rooted idea as it’s present from (the start of Spanish democracy) to the present day.”

When crude prices crashed in 2014 to 2015, it led most oil-producing nations to call for the price of oil to be above $50 a barrel, indicating some oil buyers are betting the price could trade around that level by the third quarter of 2017.

Europe’s battle on four fronts

What happens in Paris, London, Berlin and beyond will depend crucially on the government programme that Merkel navigates, as well as her eventual coalition partners in Berlin.

By Ambassador Katstania Ghosn

With Germany’s election campaign winding down and the end of a season of combined European crises in sight, it is timely to reflect on the lessons of the past and the opportunities of the future.

Many believe this year will be one of breakthroughs on all four fronts, it is now time for actions that take decisions that support economic and social progress. If done correctly, such an effort could create the conditions for a more integrated eurozone inside a more dynamic and competitive Europe. Without simultaneous actions on all four fronts, it is unlikely to make a difference.

Economic reforms in France, Germany and elsewhere are needed, as are geopolitical strategies to overcome the challenges of Brexit and an uncertain Russia. Equally important, the EU must take a leadership role in the geopolitical risks attributable to the US and China. The US is no longer the dominant player in the world, and China will continue to be a force, whether positive or negative, to a larger extent.

France is one of the most important countries in Europe, and the geopolitical risks attributable to the US and China. The US is no longer the dominant player in the world, and China will continue to be a force, whether positive or negative, to a larger extent.

In the context of Brexit, it is crucial for the EU to maintain its cohesion and its ability to act as a common market. Without it, the EU would become a collection of smaller countries, each facing its own challenges. The UK’s departure has shown that a country can act in its own interest, even at the expense of the EU, but it is essential to ensure that such a situation does not happen again.

The EU has a unique opportunity to take a leadership role in the geopolitical risks attributable to the US and China. The US is no longer the dominant player in the world, and China will continue to be a force, whether positive or negative, to a larger extent.

The EU has a unique opportunity to take a leadership role in the geopolitical risks attributable to the US and China. The US is no longer the dominant player in the world, and China will continue to be a force, whether positive or negative, to a larger extent.

For example, any easing of German-Italian relations can be used as a model for overcoming the barriers to economic and social progress. If done correctly, such an effort could create the conditions for a more integrated eurozone inside a more dynamic and competitive Europe.
Cyberattack, piracy against Qatar reviewed at NY meet

By Peter Alagos

The State of Qatar reviewed the importance of the sustainable development goals (SDGs) and the complementary tool to counter terrorism, highlighting that this would address the root causes of terrorism and extremism. Dr al-Marri stressed that the challenge is not to impose sanctions on Qatar or the siege being imposed on the State of Qatar, rather made every effort to combat terrorism and extremism.

He also called on the Security Council to adopt a resolution against piracy and cyberattacks as amounting to a violation of human rights and the Charter of the United Nations and threat to international peace and security.

The meeting was attended by a number of international law experts along with International Law Association, communication law specialist, speakers, and representatives of the United Nations and theFlotilla of States representing the threat in the Gulf and the attempt to impose sanctions on Qatar. Security.

The seminar stressed that the challenges of fighting violent extremism, terrorism and the attempts being made by international organisations, on the sidelines of the 72nd UN General Assembly under the theme of combating terrorism and extremism by tackling its root causes, was ignored by those who imposed the sanctions on June 5.

Al-Qahtani pointed out to the repeated call by the UN Office on Drugs and Crime, UN Office of Political Affairs, International Criminal Court as one of the constants in the Qatari society and government policy.
