Manufacturing sector growth helps Qatar’s industrial production expand in June

By Heather F. Pennell
Washington

A robust growth in the manufacturing sector, particularly in the production of crude petroleum and refined products, natural gas liquids, and chemicals, helped Qatar’s industrial production expand marginally month-over-month in June 2020, according to the official statistics.

The country’s Industrial Production Index stood at 102.9 in June 2020, up 0.4% year-on-year in June 2019, said the Qatar General Authority for Statistics and Quality.

The RBI introduced CPI, a short-term quantitative index that measures the changes in the volume of production of goods and services produced by all industries over a given period within a specific region.

The RBI forwarded CPI, a short-term quantitative index that measures the changes in the volume of production of goods and services produced by all industries over a given period within a specific region.

Qatar’s Economic Production Index was 102.9 in June 2020, up 0.4% year-on-year in June 2019, said the Qatar General Authority for Statistics and Quality.

In other mining and quarrying sectors, the index stood at 103.7 in June 2020, up 0.4% year-on-year from June 2019, mainly due to a 2.1% growth in the extraction of crude petroleum and natural gas liquids and 3.5% growth in other mining and quarrying industries.

Qatar Chamber meeting spotlights waste recycling, treatment

By Simon D. Anderson
Doha

The meeting was chaired by head, Food Security and Environment Committee member, Mohammed Ahmad Al-Arith, in the presence of Qatar Environmental and Wildlife Association executive director, Al-Attiyah and the committee’s chairman, engineer, Ali Al-Abed Al-Mahmoudi.

The meeting was attended by officials of waste management at the Ministry of Municipality and Environment.

Al-Abed said, “We coordinate with the Ministry and head of meetings with the consulting company responsible for doing studies and reports on waste recycling to exchange information and ways of improvement. This would advance the local recycling projects and launch new ones to establish national circuits to participate in the consulting company.”

Al-Abed received decisions and drafts obtained by the Ministry, assessing that these proposed decisions would contribute to reducing recycling projects’ side effects.

Qatar Chamber of Commerce and Industry (QCCI) will henceforth work to ensure the implementation of these projects.

The committee recommended the importance of cooperation between private sector companies in environment and recycling of combustible materials.

QCCI has held a meeting with the private sector to discuss the most recent projects that need to be carried out in the process of recycling through collecting raw materials and environmentally friendly recycling of combustible materials suitable for recycling.

The committee members also discussed three projects related to waste and0 disposal and drafting guidelines for small hazardous waste recycling centers.

The central unit has been involved in Turkey’s recycling to the present and is our first mover, Ahmed Al-Jeddah, head of management of the association.

Turkish lira up ahead of high-stakes tightening decision

By Rashed Al-Majed
Doha

The key road ahead for all those with a position in today’s meeting of the US Federal Reserve is to expect new news to be released, while some expectations may be raised for the upcoming scenario.

A recent global grim has moved away from the global economy, and the country’s long-term policies are now faced with new uncertainties.

A notable stock market is now more likely to see the US Federal Reserve rise in interest on Wednesday, without a comment on the US Federal Reserve’s decision. And with the US Federal Reserve not likely to raise interest, the market may expect a rise in the US Federal Reserve on Wednesday, without a comment on the US Federal Reserve’s decision.

Main owner CBL Properties expects to file for bankruptcy

Lakhani announces the appointment of a new CEO for the company, a seasoned financial professional, to lead the company’s transformation and growth. 

The QFC Regulatory Authority announced new regulations that will have taken effect on all companies and institutions operating within the QFC and in the financial sector. These measures are designed to enhance transparency and integrity in the market, to protect investors and consumers, and to ensure the stability and soundness of the financial system.

The QFC Regulation Authority recently imposed a fine and license suspension on a company for failing to comply with its obligations under the QFC Law. The authority took this action after it found the company in breach of several provisions of the legislation, including failing to maintain adequate governance structures and to provide timely and accurate information to the regulators.

An audit conducted by Bayoum and Merzouki concluded that the company had not appropriately dealt with the financial risks and the impact of the pandemic on its operations. The audit also noted that the company had not taken adequate measures to ensure the stability of its financial position and to reduce its exposure to potential losses.

Asia markets mixed as stimulus hope offset by virus worries

S&P

Asia equity markets were mixed on Monday, as another wave of fresh US stimulus took its toll weighed down by lingering COVID-19 concerns and news from the vaccine front. Although US stocks have been supported by the prospect of further US stimulus, the market remains sensitive to news on the virus, as well as news from vaccine makers.

However, some analysts believe that the US government stimulus package will provide a boost to the global economy, indicating that the market will continue to remain volatile. The US government has taken various steps to support the economy during the pandemic, including the implementation of the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

The CARES Act was signed into law on March 27, 2020, and provides a range of economic relief measures for individuals and businesses impacted by the COVID-19 pandemic. The act includes provisions for direct cash payments to individuals, enhanced unemployment benefits, and support for small businesses.

The CARES Act also included provisions for businesses to receive loans and grants to help them stay afloat during the pandemic. The act also included provisions for additional funding to help states and local governments provide essential services.

The CARES Act has received widespread support, with many analysts and economists praising the act as a crucial step in helping to support the economy during the pandemic. However, some economists have also expressed concerns about the long-term impact of the act on the economy.

The CARES Act has provided a significant boost to the economy, but it has also raised concerns about the potential for increased government debt and the need for future stimulus measures.

Africa aviation needs lifeline of funding to soar high again

By Freda John

Until a few months ago, Africa was considered to be one of the last frontier regions in the world in terms of air transport infrastructure, with countries implementing rapid growth in air traffic and air transport infrastructure. Over the years, air transport throughout the continent has been its backbone, and it has also been developing with accelerated pace, with major projects planned and implemented. However, in recent months, the continent has been facing a severe challenge due to the economic downturn caused by the pandemic, which has led to a decrease in air travel and a slowdown in the industry. As a result, African countries have been facing financial difficulties, with many airlines struggling to stay afloat.

Beyond the Tarmac

A recent report by IATA states that Africa’s aviation industry faces significant challenges, with many airlines facing financial difficulties due to the pandemic. The report highlights that many African countries have been forced to reduce their flights, and some have even had to shut down their operations. The report also states that the continent’s aviation industry is at a critical juncture, with many airlines struggling to stay afloat, and the industry needs significant funding to recover.

Covid-19 impact on Middle East worsening

By Anna Mokhtar

Covid-19 pandemic has impacted the Middle East’s air transport industry, and airlines in the region have been struggling to stay afloat. Despite some recovery in air travel, the region has been facing significant challenges, with many airlines struggling to recover from the economic downturn caused by the pandemic.

Airbus delivers first of 16 new H125 helicopters to US Customs and Border Protection

By Freda John

Airbus Helicopters Inc (AH) has delivered the first of 16 H125 helicopters to the US Customs and Border Protection (CBP) as part of a $14 million contract awarded in 2019. The helicopters are part of a 40-aircraft order, with the remaining 34 helicopters scheduled for delivery over the next three years. The H125 is a multi-mission helicopter that can be used for a variety of tasks, including border patrol, search and rescue, and law enforcement.

Travel chaos gives passengers headaches

By Freda John

Airlines around the world have been facing significant challenges due to the pandemic, with many facing a drop in demand for air travel and a slowdown in the industry. As a result, airlines have been struggling to stay afloat, with many facing financial difficulties. The pandemic has also led to a significant increase in travel chaos, with many airlines facing delays, cancellations, and other issues. The pandemic has also led to a significant increase in travel chaos, with many airlines facing delays, cancellations, and other issues.
