**Qatar is seen to offer top opportunities’ for Italian firms in luxury segment**

By Peter Abanges

Business Reporter

Italian companies in the luxury brand segment stand to gain from the “tremendous opportunities” available in the Qatar market, according to an Italian Chamber of Commerce official.

Organised by the Italian Chamber of Commerce in Qatar, the ‘Italian-Qatari Fashion Talks’ discussed in a recently-held webinar.

The webinar, hosted by Nicola Spinella, head of Commercial Development at Polimoda, highlighted the extensive presence of Italian designers in the Qatar fashion and design industry.

Several Italian designers are “emerging” and “seeking the best opportunities in Qatar,” according to Prunas, the head of the Campaign Activities team of the Italian Chamber of Commerce in Qatar, who moderated the discussion.

Citing opportunities for Italian companies in the Qatar luxury market, Spinella said, “In the last few years, many Italian fashion designers have started looking for new markets to expand their industry. Italy has a lot to offer in terms of fashion and design.”

“Several Italian designers, including Prunas and Allievi Liberti, chairperson of the Italian Chamber of Commerce in Qatar, who moderated the discussion,” added Prunas.

Prunas said two of the designers participated in a ‘mini-workshop’ that was held in Qatar in February with the support of the Italian Chamber of Commerce in Qatar and the Italian Ministry of Economic Development.

“Prunas and Allievi Liberti are two of the most well-known Italian fashion designers,” Prunas added.

“Prunas and Allievi Liberti are two of the most well-known Italian fashion designers,” Prunas added.

The Group’s financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and have been translated into Qatari Riyals, which is the functional currency of the Group.

Business
We implemented several measures to ease the challenges of the Covid-19 pandemic by offering innovative initiatives and digital products that the bank offers. Through its digital channels, the bank continued demonstrating the resilience and agility of its business as we successfully navigated the challenges of the Covid-19 pandemic by leveraging technology and maintaining its commitment to attracting strong investor confidence, having demonstrated the attractive pricing and competitive terms of our inaugural international issuance for an AT1 out of Qatar.

Commercial Bank chairman Sheikh Abdulla bin Jabor Al-Nuaimi said while releasing its first-quarter results last night. “We are committed to contributing to the success of Qatar by offering innovative initiatives and digital products that the bank offers. Through its digital channels, the bank continued demonstrating the resilience and agility of its business as we successfully navigated the challenges of the Covid-19 pandemic by leveraging technology and maintaining its commitment to attracting strong investor confidence, having demonstrated the attractive pricing and competitive terms of our inaugural international issuance for an AT1 out of Qatar.”

Alternatif Bank reported a net profit of QR24.6mn for the same period last year. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s performance in the first quarter of 2021 increased by 5.8% to QR81.8bn compared to the same period last year mainly on account of higher provisions on NPL customers. This was partially offset by strong recoveries during the period, hence net loan provisioning in Q1, 2021 increased by 5.9% to QR856mn compared to the same period last year. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

Our associate banks NBO and UAB contributed positively to our earnings in the first quarter of 2021 with UAB recording a profit for the first quarter compared to a loss of QR20.7mn during the quarter compared to a loss of QR20.7mn during the same period last year. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s net loan provisioning increased by 12% to QR99.4bn by March 31 compared to QR88.8bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s investments decreased by 2.9% to QR26.2bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s government and public sectors increased by 5.8% to QR81.8bn by March 31, compared to QR77.4bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s commercial and corporate sectors increased by 12% to QR99.4bn by March 31 compared to QR88.8bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s private sector increased by 12% to QR99.4bn by March 31 compared to QR88.8bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s natural gas sector increased by 12% to QR99.4bn by March 31 compared to QR88.8bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s financial sector increased by 28.7% compared to the same period last year mainly on account of higher provisions on NPL customers. This was partially offset by strong recoveries during the period, hence net loan provisioning in Q1, 2021 increased by 5.9% to QR856mn compared to the same period last year.

The Group’s government and public sectors increased by 5.8% to QR81.8bn by March 31, compared to QR77.4bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

The Group’s government and public sectors increased by 5.8% to QR81.8bn by March 31, compared to QR77.4bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

In the National Response Guarantee Programme, we committed to contributing to the success of Qatar by offering innovative initiatives and digital products that the bank offers. Through its digital channels, the bank continued demonstrating the resilience and agility of its business as we successfully navigated the challenges of the Covid-19 pandemic by leveraging technology and maintaining its commitment to attracting strong investor confidence, having demonstrated the attractive pricing and competitive terms of our inaugural international issuance for an AT1 out of Qatar.

Group net interest income for the first quarter of 2021 increased by 5.9% to QR856mn compared to the same period last year. Adjusting for the impact of QR2.2mn net interest income increased by 7.4%. The improvement was driven by the effective management of our cost of funding to improve our net interest margin.

The Group’s government and public sectors increased by 5.8% to QR81.8bn by March 31, compared to QR77.4bn in the same period in 2020. The Group’s achievements, despite a challenging market environment, reflect the strong execution of our five-year strategic plan, which is now in its final year of implementation.

Saudi Arabia sees over $200bn in savings from energy reforms plan

Saudi Arabian oil minister Thani Al Alshaya said the kingdom is working on a new set of investment opportunities at record levels and keeping a cash cushion rather than repaying borrowings with authorities – and the outlook for Kuwait was seen next year is comfortably above the 2.2% previously as it faces a possible new business opportunities at record levels.

Kuwait's economy was expected to grow at 4.1%, which was raised to 4.5% from 4.0% in 2023.

Saudi Arabia’s 2022 growth rate was raised to 2.9% from 2.8% from last month's forecast at 3.0%, while the outlook for Qatar was seen at 1.6% growth from 1.7%.

For next year from 3.5%.

Kuwait's 2023 growth forecast at 2.7% from 2.5%.

Bloomberg QuickTake Q&A

Why EU climate weapon is in the financial fine print

The European Union’s attempts to integrate the financial world, and the protection for their personal and corporate investment opportunities, are significant.

The EU is aiming for a 55% reduction in greenhouse gas emissions by 2030 from 1990 levels, to meet its commitments under the Paris Agreement and limit global warming to well below 2°C above pre-industrial levels.

The green bond market has grown rapidly in recent years, with over $1 trillion in outstanding green bonds and $2 trillion in assets under management.

The EU’s taxonomies for green bonds aim to ensure that investments are considered “green” and eligible for tax incentives and other benefits, provided they meet certain eligibility criteria.

One of the key criteria is the so-called “green” bond standard, which defines what constitutes a “green” bond and sets out the requirements for issuers.

Issuers must demonstrate that their investments are sustainable, by providing information on how they align with the EU’s taxonomy rules.

In the financial market, the term “green” is often used to refer to investments that have a positive impact on the environment, such as renewable energy projects, energy efficiency measures, or other sustainability-focused initiatives.

The EU’s taxonomies are intended to encourage investors to align their portfolios with the goals of the Paris Agreement and support the transition to a low-carbon economy.

The EU’s taxonomies are also intended to help investors make informed decisions about where to direct their investments, by providing clear and consistent definitions of what constitutes a “green” investment.
Treasures reprieve buoy emerging markets, but buyers are picky

Economists will view Thursday’s data as a pause on the progress of the global recovery. In Europe, the German ZEW economic sentiment index for April is due Thursday. The gauge will increase to 38.5, according to the median forecast of 34 economists surveyed by Bloomberg. In the U.K., the Confederation of British Industry (CBI) said Wednesday that sentiment among manufacturers improved sharply in the three weeks up to April 26.

The Federal Reserve is scheduled to release minutes from the March policy meeting on Friday. It will release minutes from its March policy meeting on Friday. It will also release minutes from the March policy meeting on Friday.

The Mexican peso is the top performer in emerging markets for the past month. Traders will monitor attention in Brazil amid a debate probe up assets owned by some of the country’s biggest banks.

While the U.S. dollar has strengthened against most of its Asian peers this year, the yen has been a notable exception. In Tokyo, investors are likely to show the economy’s resiliency and the yen’s resilience against a second round of economic stimulus, with the industrial and services sectors acting to support the yen.

Bloomberg Economics analysts including Cheng Hsu in Hong Kong and Jonathan Clark in New York wrote in a report last week that the yen’s resilience against a second round of economic stimulus, with the industrial and services sectors acting to support the yen.

Apple moving forward on app privacy, despite pushback

**Fed set to hold the line as US economy shows signs of recovery**

**SPOTLIGHT ON COMMODITIES**

**Weaker dollar, lower bond yields support global recovery efforts**

**Computer chip shortage may leave auto sector idling**

**What’s actually being played as a brief hiccup in the supply chain?**

**Apple moving forward on app privacy, despite pushback**

---

**Apple moving forward on app privacy, despite pushback**

Apple will begin requiring app reviewers to rate them in advance of their release, and developers who fail to submit an app in time will have to go through a more detailed review process. This move is significant because it’s the first major step towards implementing a policy that was announced in September 2020, when Apple first announced its plan to require developers to submit apps in advance of their release. The new app submission framework that stops apps from tracking users has been a long-time topic of discussion among developers and privacy advocates. The new framework provides a way for developers to submit apps for review without having to wait until they want to gather and get permission to track users, which is a much-needed step towards making the internet more private.

**Fed set to hold the line as US economy shows signs of recovery**

The US economy has shown signs of strength, with GDP growth accelerating in the first quarter of 2021. The US Federal Reserve has raised interest rates and trimmed its balance sheet, indicating that it is confident in the US economy’s ability to withstand a potential increase in inflation. The Federal Reserve is expected to continue its tightening policy, with further rate hikes and a reduction in its balance sheet anticipated.

**SPOTLIGHT ON COMMODITIES**

**Weaker dollar, lower bond yields support global recovery efforts**

The weaker US dollar and lower bond yields have provided a boost to commodity prices, particularly in the energy and precious metals sectors. The weaker dollar has made commodities cheaper for overseas buyers, while lower bond yields have decreased the cost of borrowing for companies looking to invest in new projects.

**Computer chip shortage may leave auto sector idling**

The ongoing semiconductor shortage has had a significant impact on the global auto industry, with production volumes in Europe and North America falling short of expectations. The shortage has been driven by a combination of factors, including the pandemic, increased demand for electronics, and supply chain disruptions. As a result, automakers have been forced to either reduce production or delay new models.

**What’s actually being played as a brief hiccup in the supply chain?**

The current semiconductor shortage is not just a temporary hiccup, but a more substantial issue that is likely to have long-term implications. As automakers struggle to meet demand, they are being forced to make difficult decisions about how to allocate their limited supply of chips.

---

**Fed set to hold the line as US economy shows signs of recovery**

The Federal Reserve is expected to continue its tightening policy, with further rate hikes and a reduction in its balance sheet anticipated. The Fed will be looking to data on inflation and employment to determine the appropriate course of action for interest rates.

---

Bedaya, General Tax Authority to host tax-related webinar for entrepreneurs

The General Tax Authority (GTA) will be briefing entrepreneurs on tax-related topics that are in their interest so that they can understand the general concept of taxes and when they need to file tax returns.

“During the webinar, the General Tax Authority will be addressing the knowledge of entrepreneurs and start-ups on tax-related topics such as tax returns, registering businesses, and obtaining the required information concerning the tax system in the State of Qatar,” said Ahmad Al-Khoobi, the Authority’s Spokesperson.

The Authority added that the webinar will be scheduled to be held on Wednesday, April 28, via Zoom from 1pm to 2pm.

“During the webinar, a number of important topics will be addressed to understand the knowledge of entrepreneurs and start-ups on tax-related topics such as tax returns, registering businesses, and obtaining the required information concerning the tax system in the State of Qatar,” said Ahmad Al-Khoobi, the Authority’s Spokesperson.

The Authority added that the webinar will be scheduled to be held on Wednesday, April 28, via Zoom from 1pm to 2pm.

“During the webinar, a number of important topics will be addressed to understand the knowledge of entrepreneurs and start-ups on tax-related topics such as tax returns, registering businesses, and obtaining the required information concerning the tax system in the State of Qatar,” said Ahmad Al-Khoobi, the Authority’s Spokesperson.
