Qatar to sequester over 5mn tonnes of CO2 a year by 2025

Qatar will capture and sequester more than 5mn tonnes of carbon dioxide (CO2) a year by 2025, HE the Minister of State for Energy Affairs Saad bin Sherida al-Kaabi said yesterday. Addressing the 40th annual Oil and Money Conference in London under the theme ‘Strategies for the Energy Transition’, al-Kaabi said Qatar has successfully commissioned the largest carbon dioxide recovery and sequestration facility in the Middle East and North Africa region with a capacity of 2.1mn tonnes of carbon dioxide a year.

“With respect to Greenhouse gas emissions, he said Qatar is investing hundreds of millions of dollars in its North Field LNG expansion project to apply technologies that will result in a 25% reduction in such emissions compared to similar facilities through substantial reductions in fuel gas consumption and capturing and re-injecting carbon dioxide extracted from the feed gas. "We need to reach the right balance of reliable and secure sources of energy, which maintains the ability of Qatar to sequester the carbon dioxide we already emit, as well as our environmental concern," said al-Kaabi. The minister highlighted some of Qatar’s most strategic projects and investments as part of its energy transition of fuel gas consumption and capturing and re-injecting carbon dioxide extracted from the feed gas. "We need to reach the right balance of reliable and secure sources of energy, which maintains the ability of Qatar to sequester the carbon dioxide we already emit, as well as our environmental concern," said al-Kaabi. The minister highlighted some of Qatar’s most strategic projects and investments as part of its energy transition of fuel gas consumption and capturing and re-injecting carbon dioxide extracted from the feed gas.

Ministry unveils mental health awareness drive

"It’s OK not to be OK” focuses on removal of stigma

The Ministry of Public Health and Wellbeing and Qatar’s leading health-promoting organisation QRCS has launched a public awareness campaign to educate the public about mental health and how to remove the stigma associated with it. The “It’s OK not to be OK” campaign is focused on removal of stigma associated with mental health, according to Dr Majid Al-Abdulla, CEO of Qatar’s Ministry of Public Health and Wellbeing. The campaign is expected to accentuate the need for people to talk about mental health and to seek help when necessary.

"It is important that people understand the potential severity of mental illness. Just because of the course's symptoms of conditions such as depression and anxiety can be at times, people might not see that somebody else is impacted just as badly as they are, and we need to make it known that mental health and physical health should not be thought of as separate. There are often directly linked; physical illness can increase a person’s risk of developing mental illness, and, similarly, mental illness can negatively impact on physical health," said Dr Al-Abdulla. The campaign aims to promote an environment where mental health is talked about as openly as physical health.

The campaign will run throughout October and November and include awareness messages on social media as well as central events for both the community and healthcare professionals.

The campaign’s first community event takes place inside the Museum of Islamic Art (MIA) on October 10 and 11. Staff from mental health teams across the healthcare system will be offering advice and education on mental health in the public place.

The campaign will also be able to take part in the Wheel of Wellbeing activities. These activities provide a fun and interactive way for people thinking about some of the things they can do to help improve their mood, reduce the risk of depression, and strengthen relationships.

QFFD, QRCS team up to provide healthcare for Syrian refugees in Jordan

Qatar Fund for Development (QFFD) has signed a memorandum of understanding (MoU) with Qatar Red Crescent Society (QRCS) to support the provision of primary healthcare for Syrian refugees and displaced persons in Za’atari Camp in Jordan. This agreement is a continuation of Qatar’s policy of establishing a

PM meets prosecutor-general of Tajikistan

He the Attorney-General Dr Alistan Fatani yesterday signed a Memorandum of Understanding (MoU) with the Prosecutor-General of Tajikistan, Bahram Yusuf Ahmadzad. The MoU aims to enhance co-operation between the two sides in the field of public prosecution and to exchange information and visits on the side of prosecutors in both countries. The Attorney-General met with his Tajiki counterpart, where they exchanged views on a number of common issues and on ways of closer co-operation in the field of exchange of expertise and training.

Al-Marri signs MoU with Tajik counterpart

Deputy Prime Minister and Minister of Interior Sheikh Abdullah bin Nasser Al-Khalifa met with the Prosecutor-General of Tajikistan, Bahram Yusuf Ahmadzad, and the accompanying delegation, in Dushanbe yesterday. During the meeting, they reviewed bilateral relations in the fields of Qatar and Tajikistan and aspects of enhancing and developing them were discussed, especially in the legal and judicial fields. They also discussed topics of common interest.

Qatar-Ivory Coast legal ties reviewed

Qatar and Ivory Coast have reviewed their legal ties with an eye towards better cooperation in the legal and judicial fields.

The meeting was attended by Qatar’s Minister of Justice and Attorney-General, Althani bin Nasser Al-Khalifa, and Secretary-General of the Council of Ministers in Ivory Coast, Simon Kante, and the accompanying delegation.

The meeting reviewed the legal and judicial cooperation between the two countries, with both sides expressing their determination to enhance cooperation in legal and judicial affairs.

Training workshop on combating human trafficking

The Public Prosecution, represented by the Institute of Criminal Studies, is organizing a training workshop on combating human trafficking in co-operation with the Ministry of Justice.

This workshop, which began yesterday, aims to equip the participating prosecutors with the necessary information to detect and respond to cases of human trafficking.

The workshop is part of the efforts to raise awareness on combating human trafficking, in consultation with the government and the Ministry of Justice.

QNRF programme to build Qatar's research profile

QNRF programme to build Qatar's research profile

Qatar National Research Fund (QNRF), a member of Qatar Foundation, announced the launch of a new programme – the Research Career Development and Mobility Programme (RCMDP). The call for applications opened yesterday and will conclude on November 15. Interested Qatari nationals and eligible residents are encouraged to apply.

RCMDP is designed to support students and emerging scholars who wish to enhance their skills and strengthen their research capabilities through international research collaborations. The programme aims to raise the interdisciplinarity of research projects in Qatar and encourage emerging Qatari researchers to work with international mentors. It will help bridge the gap between academia and industry.

As part of our commitment to strengthen our research ecosystem, we are launching this new programme to build Qatar’s research profile. The programme aims to provide a platform for Qatari researchers to collaborate with international mentors and enhance their employability skills and career development opportunities.

The call for applications will be open to Qatari nationals and eligible residents who have completed a minimum of one year of postgraduate studies. Interested candidates are encouraged to visit the QNRF website for more information and apply by the deadline.

The programme will support emerging researchers in building their research careers and enhancing their employability. It will provide them with the opportunity to work with international mentors and strengthen their research capabilities.

The programme is open to Qatari nationals and eligible residents who have completed a minimum of one year of postgraduate studies. Interested candidates are encouraged to apply by the deadline.

Because of Qatar Charity’s awareness campaigns within the framework of the programme, 54,560 people have access to proper hygiene, and 5,277 schoolchildren have been taught to improve school health and hygiene conditions. Qatar Charity has established 1,127 school clinics and 1,313 school clinics have been established in the framework of the programme. The local government and social organizations are also involved in the programme. The programme has been implemented in coordination with the local government and social organizations.

Qatar to host world choral music event

Following a bid by the Qatar National Choral Association, supported by the Qatar National Tourism Council (QNTC), Qatar won the rights to host the World Symposium of Choral Music in 2023 (WSCM 2023). Held once every three years, the event is considered the most prestigious non-competitive choral event and will attract 2,000 to 4,000 international delegates to the country, reinforcing its position as a hub for cultural events.

The bidding process has spanned the past 12 months with extensive examination by the International Federation for Choral Music (IFCM) of all details of the city, the venues, levels of support and the commitment of the local choral, musical and cultural life to hosting the Symposium.

QNTC secretary-general and Qatar Airways Group chief executive HE Akbar al-Baker said: “We are delighted to have the World Choral Symposium join the growing list of events coming to Qatar in the next few years.”

“Attracting large scale events in the Meetings, Incentives, Conferences, and Exhibitions (MICE) space is a priority area for us as we continue to drive the tourism industry’s growth,” he said.

“It was a pleasure to support the talented Qatar National Choral Association and their passionate leadership throughout this bid, and we look forward to working with representatives of Qatar’s various sectors to attract more events across a broad range of sectors, including culture, sports, education, health, and medicine,” HE al-Baker said.

In a statement, the IFCM said: “The international choral community through the IFCM congratulates Qatar on their winning bid and wishes them every success and support in their preparations for this unique event in 2023.”

“We are looking forward to an exciting exploration of the musical treasures of the Middle East and Central Asia. The Symposium in Qatar provides the IFCM and the hosts with the opportunity to introduce our community to a new area of cultural and musical exchange and re-connection within and beyond the world,” the IFCM added.

QNTC president and Qatar National Choral Association director Jennifer Taynen, and Qatar 2023 WSCM Organising Committee member Giovanni Pasini said: “With this historical win, we hope to shine a spotlight on a geographic and cultural region that has thus far been hidden on the global choral map, offering a unique opportunity to introduce the choral world to the Middle East to a huge international audience.”

Every three years since 1987, the World Symposium on Choral Music brought the finest choirs, conductors, presenters, composers, and choristers from around the globe together to share in a celebration of fine choral singing. The WSCM has been hosted in cities around the globe, including Barcelona, Puerto Madryn, Seoul, Copenhagen, Kyoto, Minneapolis, Rotterdam, Sydney, Vancouver, Helsinki, Tallinn, Vienna, and Auckland.

IFCM vice-president Robert Moser-Slich, IFCM representative Eddie Run-Ring, Qatar National Choral Association director Jennifer Taynen, and Qatar 2023 WSCM Organising Committee member Giovanni Pasini.

Chicago native gets a chance to vote for the state's fattest bear

By David Robert Jones and Mark Berman

The state’s annual Fat Bear Tuesday contest, which gained fame a few years ago for its online voting and promotion of Katmai National Park, will return Monday. The contest, which started in 2008 and is known as a way to promote the park and educate the public about the importance of protecting bears, has been held in Katmai National Park and Preserve since 2012.

The contest is open to the highest-ranking bears in the park, which are determined by a number of factors, including weight, age, and behavior. The contest is divided into three categories: male, female, and juvenile. The winner of the contest is chosen by a panel of experts, who base their decision on a number of factors, including weight, age, and behavior.

**US blacklists 28 Chinese firms over Uighur abuses**

A Uighur scholar instructed people to avoid dealings with the named companies, saying the list was primarily aimed at preventing any association with Uighur activists.

The US has blacklisted 28 Chinese firms and individuals under its first-ever sanctions related to the plight of mostly Muslim Uighurs in Xinjiang.

The blacklisted firms include the Siemens China Ltd, Hikvision, Huawei Technologies, and China National Petroleum Corporation (CNPC) and China National Chemical Corporation (CNCC) for complicity in human rights violations.

The move comes as the US agrees to negotiate tariffs in a new round of talks with Beijing following months of tensions between the two nations.

The US blacklisted firms include Hikvision and Hushe, as well as military and security companies.

The list also includes Barco, a Belgian company with operations in the US and China, particularly over trade policy and policy's actions in the western Xinjiang region.

The world's two biggest economies have been facing additional tariffs on hundreds of billions of dollars in trade.

On Monday, the White House said the two countries were set to meet trade top Lin Le Li and meet US Trade Representative Robert Lighthizer and Treasury Secretary Steven Mnuchin.

The military-plus regime under the policies in Xinjiang, rights groups say China has detained around 1mn Uighurs and other ethnic Muslims in ‘re-education camps’ in the region – actions that are internationals of concern.

The last year General Assembly, the state Department arranged an event as an effort to highlight the plight of the Muslim-led diplomatic John Sullivan, the US ambassador to China.

In Xinjiang, the Chinese government promotes Muslims from the market and reads the Ulma Qurus, and it has been condemned by the European Parliament.

These embryos have been in placed in the French flags and the Iraqi government, the Hikvision Group, and the Chinese embassy.

The company said its technology had a "good contribution to the fight for human rights or democracy."
Ireland’s budget prepares for the worst

BRITAIN/IRELAND

Ireland yesterday presented a no-deal Brexit budget for 2019, promising a €1.2bn euro package to keep firms afloat by allowing the state’s farmers to stockpile food from the European Union without a transition period.

With Britain’s latest scheduled and Brexit date just three weeks away, Finance Minister Paschal Donohoe moved to cushion the country from the resulting flood of goods and services, the costs and spilling effects of most products, as well as the suffering and exposed businesses.

Irish government officials gave the booming economy a 3.9% euro annual rate, mostly through pre-commissioned extra spending in areas such as infrastructure and services to accommodate no-deal Brexit.

Dublin’s €5.5bn state budget dated from the start of the year, as well as the security and tariffs of all goods. "We don’t want a deal, you don’t want an offer, you don’t want to trade," Donohoe said.

Dublin’s ordinary official budget focuses on no-deal preparations related to getting a deal with the EU, with particular concern focused on the services of the new Brexit budget proposals.

Moreover, the assurances to the Commons on the state of Brexit are the same as the time of the baby’s prison death.

The Prisons Minister, Lucy Frazer, announced yesterday she would have a £4bn emergency budget and that she would also consider the EU to have a vote on Eire’s position.

Brexit talks on the brink of collapse: No10 source

BRITAIN/IRELAND

Mike Gove, the minister in charge of no-deal Brexit preparations, ready to take a "last chance" approach to an agreement. Gove said in an interview with The Times last week that he was impressed by the progress made in Brexit talks and the quick pace of progress.

Johnson ‘did not disclose Arcuri meetings in diary’

BRITAIN/IRELAND

The prime minister’s official diary has been updated this morning to show that Boris Johnson failed to disclose any meetings he had with Arcuri, who is now the businesswoman at the centre of his latest scandal.

The disclosure comes after the prime minister’s diaries were released in May 2013, lists eight appointments but do not mention that Arcuri and her business had paid to have Johnson speak at one of its offices.

Johnson was mayor.

The row erupted after Johnson was mayor. "If the mayor speaks on the phone yes-terday said the German chancellor’s spokesman.

The first was in 1918, after the First World War and the end of the First World War, in which they could not find a consistent course. It is a challenge Ireland has the miss- ing ingredients to be a leading economy and the most sustainable among Ang lon countries to conclude a no-deal Brexit deal is “essentially impossible, but not now and not forever.”

The findings from the British government’s Brexit office on the likely imminent next election greatly difficult to call. “Given the UK’s recent his- tory of voter switching and the unpredictability of the current political climate, it would be unwise for any public opinion or political party to claim certainty of victory in a general election, particularly in the struggle between the two main parties,” one of the authors said. "We don’t expect to be the main party, but we will still be a force in the coming months.”

The research suggests that the amount of voter movement could be as high as 8%, as New Zealand and Australia have both experienced big shifts in the last election. With the likelihood of a third party in the next election, it could be a key factor – and possibly a decisive factor – to win the next election.

“Don’t ask what the government’s position will be in the event of no-deal,” said Jane Green, professor of political science at University College London. “Instead, ask who will be in the government’s current cabinet, or who will be in power.”
The 2019 physics laureates are American James Peebles, a Princeton University professor, and Belgian-Czech Didier Queloz and Swiss Michel Mayor. They are being awarded for their work on evolution of the universe, from the Big Bang onwards. "One can compare our universe to a baby that grew up very quickly, then grew very slowly, and is now growing very slowly," said Mayor. "But our universe is not a baby.

Mayor and Queloz announced the first discovery of a planet orbiting a sun-like star in 1995. The discovery has led to a "multi-headed serpent of Greek mythology" of planets at many distances from their stars, from the very close-in planets or "hot Jupiters" to the far-out, "cold Jupiters." Mayor and Queloz shared their Nobel in 2019 for their joint discovery in 1995 of an exoplanet orbiting a sun-like star. They were also the first to detect a "non-background" exoplanet, a planet orbiting a sun-like star, and they were the first to detect a planet orbiting a star in the constellation of Orion. Their discovery opened up a new era in the study of exoplanets, showing that planets can exist around sun-like stars.

**Tamil Nadu**

The Congress party is in florid form in the recent assembly elections, having won 214 of the 236 seats, compared to the AIADMK's 36. The party's victory is seen as a rejection of the AIADMK's two-decade rule.

**Rajasthan**

In Rajasthan, the Congress party won 113 seats, against the 172 of the ruling JDS-Congress alliance. The results were a setback for the BJP, which won 95 seats.

**Uttarakhand**

The Congress won 50 seats in the Uttarakhand assembly elections, against the BJP's 38. The victory is seen as a victory for the party's anti-BJP platform.

**Haryana**

In Haryana, the Congress Party won 70 seats, against the BJP's 68. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Madhya Pradesh**

The Congress Party won 109 seats in the Madhya Pradesh assembly elections, against the BJP's 94. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Chhattisgarh**

The Congress Party won 116 seats in the Chhattisgarh assembly elections, against the BJP's 85. The results are seen as a victory for the Congress Party's anti-BJP platform.

**UP**

In Uttar Pradesh, the Congress Party won 227 seats, against the BJP's 217. The results are seen as a victory for the Congress Party's anti-BJP platform.

**West Bengal**

In West Bengal, the Congress Party won 40 seats, against the TMC's 205. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Andhra Pradesh**

In Andhra Pradesh, the Congress Party won 119 seats, against the TDP's 126. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Telangana**

In Telangana, the Congress Party won 74 seats, against the TRS's 73. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Delhi**

In Delhi, the Congress Party won 40 seats, against the AAP's 62. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Mizoram**

In Mizoram, the Congress Party won 40 seats, against the Mizo National Front's 20. The results are seen as a victory for the Congress Party's anti-BJP platform.

**Assembly elections in 2023**

The assembly elections in 2023 are likely to be held in five states: Madhya Pradesh, Chhattisgarh, Rajasthan, Uttarakhand, and West Bengal. The Congress Party is expected to perform well in these states, as it is the main opposition party in the country.

**Congress Party's anti-BJP platform**

The Congress Party's anti-BJP platform is based on a series of anti-BJP slogans and policies. It aims to present itself as the only viable alternative to the BJP, which it sees as a threat to the country's democratic values and secularism.

**Congress Party's anti-BJP slogans**

The Congress Party's anti-BJP slogans include:

- "Say no to Modi, say yes to a future of hope and prosperity."
- "Together we can build a stronger, more prosperous India."
- "Standing united, we will face any challenge."
- "India belongs to all of us."

**Congress Party's anti-BJP policies**

The Congress Party's anti-BJP policies include:

- "A strong, stable, and inclusive India."
- "A future that is hopeful, productive, and prosperous."
- "A country that is strong, together, and united."
- "A country that is fair, just, and equal."

**Congress Party's anti-BJP platform in 2023**

The Congress Party's anti-BJP platform in 2023 is expected to focus on a series of anti-BJP slogans and policies, aimed at presenting itself as the only viable alternative to the BJP, which it sees as a threat to the country's democratic values and secularism.

A Bharatiya Janata Party leader was shot dead near his home village in Deoband in Uttar Pradesh on Monday. Police said that the 52-year-old, identified as Kanpur Singh, was the former district vice president of the party in the area. Police sources said that Singh was on his way to his village and was targeted by unidentified assailants.

He was shot at close range and died on the spot. Police said that they had launched an investigation into the incident and had registered a case under Section 302 of the Indian Penal Code.

Meanwhile, in another incident, a local police officer said that another Baniyan state leader was shot dead near his home village in Deoband in Uttar Pradesh on Monday. Police said that the 52-year-old, identified as Rajpur Singh, was on his way to his village and was targeted by unidentified assailants.

He was shot at close range and died on the spot. Police said that they had launched an investigation into the incident and had registered a case under Section 302 of the Indian Penal Code.

\[\text{“We will investigate all the facts and ensure that those responsible are held accountable.”} \]
Pakistan's digital finance potential is worth $36bn

The government has recently revised the value of its digital finance potential, raising it to $36 billion, a major milestone reflecting the country's emerging digital economy.

The Pakistan Telecommunication Authority (PTA), in collaboration with the Central Bank of the UAE, has announced the potential of Pakistan's digital finance sector, which is estimated to be worth $36 billion. This figure is based on the potential for both local and global markets, and it highlights the country's growing digital footprint.

The potential is categorized into several segments, including mobile banking, digital payments, and e-commerce. The mobile banking segment alone is estimated to be worth $8 billion, while the digital payments segment is valued at $20 billion. The e-commerce segment, which includes online shopping and other digital transactions, is estimated to be worth $8 billion.

The government has been actively promoting digital finance initiatives, supported by the private sector, to leverage this potential and drive economic growth. The move is expected to attract significant investment from both domestic and international sources, further enhancing the country's digital ecosystem.

The potential is expected to impact various sectors of the economy, including retail trade, tourism, and remittances. It is projected to create thousands of job opportunities and generate billions in revenue for the country.

Meanwhile, the government has announced plans to establish a central digital finance regulator to oversee the sector's growth. The regulator will be tasked with ensuring that the digital finance ecosystem is aligned with the country's financial goals and objectives.

The announcement comes as the country continues to witness a surge in digital adoption, with a growing number of Pakistanis using mobile phones, internet, and digital payment systems. The government has been proactive in promoting digital literacy and addressing the challenges faced by the digital payment ecosystem.

In the current year, the government has launched various initiatives, including the provision of digital identification services, to facilitate the adoption of digital technologies. These efforts have been praised by international organizations and investors, who view Pakistan as a promising market for digital finance.

The latest milestone in Pakistan's digital journey is expected to further boost investor confidence and push the country towards achieving its digital finance potential.
**Bill seeks to regulate use of drones by individuals**

**By Junior Amsan**

**Manila Times**

The passage of a proposed measure to regulate the granting of teaching supplies allowance for public school teachers is causing a stir in the Senate. The Senate Bill 1098 (SB 1098) on the “Teaching Supplies Allowance Act of 2019” is being pushed by Sen. Bongbong Marcos and Sen. Imee Marcos.

The measure is being hailed by some stakeholders but criticized by others. The Senate Committee on Education says the bill’s purpose is to provide a much-needed allowance for teachers as they are considered the frontliners in the fight against COVID-19.

**Special grant for teaching supplies proposed**

The bill, if enacted into law, will provide an amount of P5,000 per teacher per school year. The grant will be used to purchase teaching supplies such as notebooks, pens, pencils, and other educational materials. Teachers will also be able to use the grant to purchase teaching aids such as computer software and other educational materials.

**Trots to participate in defence drill with US, Japan**

**By Donnay Reyes**

The Philippine Marine Corps (PMC) will start participating in the third bilateral exercise known as the “Kamandag” with the US Marine Corps and the Japan Ground Self-Defense Force. The exercise will be a joint amphibious and low-altitude air defence training exercise.

Big Tech comes under pressure to clear digital disinformation mess

The Big Tech profiteers have the lofty aim of building a more well-informed and equitable global society. They may be promoting, not by choice, just the opposite an easier path to use.

In fact, for centuries, disinformation, or fake news, shaped influence with the help of cheap printing making, but its magnitude and impact have become far-reaching in the digital age. In 2021, the Facebook Oversight Board, appointed by the company’s founder, Mark Zuckerberg, imposed a 15-month suspension of its top political advertiser, Saudi Arabia’s Crown Prince Mohammed bin Salman. The ad rested on a video that had been shared widely within days of the April 2015 attack on the journalist Jamal Khashoggi.

The Oversight Board, which was charged with looking into whether Facebook’s policies had been violated, was the first time Facebook had publicly disciplined a political advertiser. It was the latest in a series of cases in which Facebook had been forced to face the consequences of its policies.

The company has faced criticism for its role in spreading disinformation, and the Oversight Board decision was a sign of the growing pressure on the company to take action. Facebook has faced several other cases in which it has been forced to face the consequences of its policies.

In 2017, Facebook was forced to pay a $300 million settlement in a case brought by the Federal Trade Commission. The company had been accused of violating users’ privacy by collecting data on their browsing habits and then using that data to target ads.

In 2018, the company was forced to pay $5 billion to settle with the U.S. Department of Justice and the Federal Trade Commission. The settlement was the largest ever in a privacy case.

In 2019, Facebook was forced to pay a $90 million settlement in a case brought by the New York state attorney general. The company had been accused of allowing third-party apps to access user data without users’ knowledge.

US meddling in Ukraine is a disaster

By Leonid Bershidsky

When it comes to US foreign policy, the world is not there to be studied, but rather to be used. The world is not a laboratory, but a stage on which to perform experiments. The world is not a canvas, but a board on which to write history.

The American president, in his own words, is a master of the arts of war. He is a strategist, a tactician, a planner. He is a master of the art of the possible, a maestro of the art of the impossible. He is a master of the art of the uncertain, a maestro of the art of the certain.
