This Advisory Council's regular weekly session, under the chairmanship of HE the Speaker Ahmed bin Abdullah bin Zaid al-Mahmoud, started with the consideration of the report of the Inter-Parliamentary Union (APU) convention of the General Assembly (GA), which was held in Rabat, Morocco, on March 13 and 14, and on his participation in the conference with a number of heads of parliaments of Islamic countries according to specific invitations and programmes, to affirm the advisory council's foreign relations.

The meeting was attended by Chairman of the Qatar-United Arab Emirates friendship group Mubarak bin Khalil al-Jaidah, and Chairman of the Qatar-Latin American and Caribbean friendship group Rashid bin Saud al-Khalifa, Chairman of the Qatar-United States, Canada, Australia, and New Zealand friendship group Mohamed bin Ali al-Hinzab, Chairman of the Qatar-Africa friendship group Nasser bin Khalifa bin Ahmad al-Madadi, Chairman of the Qatar-Europe friendship group Saqr bin Fahd al-Khalifa, Chairman of the Qatar-Monthly French friendship group Khalil al-Jaida, and Chairman of the Qatar-Arab friendship group Hamad al-Madadi, as well as ambassadors and delegations from 16 member states of the OIC, the Organisation of Islamic Cooperation (OIC) member states, and heads of parliaments of Islamic countries which were recently accepted by the Advisory Council. They also discussed the moves to promote the parliament’s friendship groups and cooperation with parliaments of other countries.

The Speaker also briefed the council on his participation and the accompanying delegation in the 17th session of the General Assembly of the Inter-Parliamentary Union (UP), which was held in Rabat, Morocco, on March 13 and 14, and his meetings on the sidelines of the conference with a number of heads of parliaments of Islamic countries.

The Advisory Council referred the General Assembly’s decision to submit the draft resolution to the council and refer it to the Foreign Relations Committee for study and submit its report to the council. The council decided to send a delegation to attend the 14th session of the 14th Congress of the OIC in 2021 to discuss the views of the OIC member states on the draft and to invite them to participate in the next session of the General Assembly of the Inter-Parliamentary Union.

Italian embassy, Qatari firm sign pact to preserve nature

A goodwill agreement was signed on Tuesday at Katara Global Recycling Day 2019 in Doha.

By Joey Aguilar

The Italian embassy in Doha has joined the ‘green’ crusade of the Katara Global Recycling Day (KGRD) to promote environmental sustainability.

Italian ambassador Francesco Fisichella and KGRD chairman Abdul Al-Suwaidi at the agreement signing ceremony, marking the 2019 Global Recycling Day in Doha. Picture:顺畅新闻网

The embassy joined the agreement ceremony with the Italian ambassador Francesco Fisichella, following the signing of a goodwill agreement at the Katara Eco Park on Tuesday. The agreement was signed by Abdul Al-Suwaidi, chairman of the KGRD, and the Italian ambassador, Francesco Fisichella.

Speaking at the event, Al-Suwaidi thanked the Italian ambassador for his lecture in the KGRD framework and said he was confident that the modern and advanced technology of Italy would help preserve Mother Nature and the environment.

The ambassador also congratulated Al-Suwaidi on the KGRD and said “the initiative is a remarkable achievement and a remarkable example of how to address the sustainability issues facing the world.”

The ambassador said that the Italian embassy was always ready to cooperate with Qatar and all the countries to implement projects that help protect the environment.

The Italian ambassador also called on the international community to take all the necessary measures to stop the violations of human rights, in particular the right of the Palestinian people to self-determination and the right of the Palestinian people to return to their homeland.

Al-Suwaidi outlined the efforts of Qatar in the protection of the environment, highlighting the signing of the Paris Agreement and Qatar’s commitment to reducing carbon emissions and adopting sustainable energy sources.

The ambassador also congratulated President H.E. Mr. Sheikh Tamim bin Hamad Al-Thani on the occasion of Qatar National Day.

The agreement includes points such as the organization of awareness events and workshops to help raise QRD awareness among the public.

Among the provisions of the agreement are: the awareness of QRD among the people of Qatar, organizing awareness events and workshops to raise awareness of QRD, and the organization of activities in accordance with the guidelines issued by the Ministry of Education.

Al-Suwaidi highlighted Qatar’s efforts in the field of Qatar National Day, saying he was confident that the awareness of QRD will continue to increase in the Qatari society.

Indian artisans showcase textile craft

The Ministry of Commerce and Industry, in collaboration with the Qatari Industry Chamber, has announced the launch of ‘Qatar Biobank’, a national biobanking initiative, on March 25-27 with the participation of internationally renowned experts and local experts in the field of healthcare. The biobank is a major milestone in Qatar’s efforts to enhance the quality of health care and research in the country.

The biobank aims to collect blood samples and genetic data from 60,000 participants to establish a comprehensive database of health information. The biobank will be the largest in the region and will provide a valuable resource for researchers and healthcare providers.

Qatar Biobank will host international meet

Qatar Biobank will host an international biobanking conference from April 2 to 4 to discuss the latest developments in the field. The conference will feature presentations by renowned experts from around the world, including scientists, researchers, and medical practitioners.

The conference will bring together local and international experts to discuss the latest developments in biobanking, genomics, and personalized medicine. Participants will also have the opportunity to network and connect with partners from around the world.

The conference will be held in partnership with the Qatar Foundation (QF), Qatar Biobank, and Ooredoo, the official telecommunications sponsor. The conference will also feature participation from international experts on biobanking, genomics, and personalized medicine.

The conference, taking place at the Sheraton Grand Doha Resort & Convention Hotel, is under the theme of 'Quality Matters: A Global Dialogue on Biobanking and the Environment'. The event will bring together local and international experts to discuss the latest developments in biobanking, genomics, and personalized medicine.

The conference will be held in partnership with the Qatar Foundation (QF), Qatar Biobank, and Ooredoo, the official telecommunications sponsor. The conference will also feature participation from international experts on biobanking, genomics, and personalized medicine.

Ashghal holds workshop for govt service entities

The Utilities Coordination Committee (UCC) chaired by the Public Works Authority (Ashghal) has held a workshop attended by all entities represented in the UCC, namely the Ministry of Municipality and Environment (MME), Qatar General Electricity and Water Corporation (Kahramaa), and the General Directorate of Traffic, at the Ministry of Interior (MoI).

The workshop was aimed at discussing and updating signed memorandums of understanding (MoUs) between Ashghal and the entities concerned in relation to road and infrastructure projects across Qatar.

The workshop was held in the context of continuous co-operation and coordination between government entities, Ashghal said in a statement.

Saoud al-Tamimi, manager of Ashghal’s Roads Projects Department and chairman of the UCC, said: “The workshop witnessed very good interaction between the attendees, which indicates the keenness of all government agencies on co-operation and to work hand in hand to achieve Qatar National Vision 2030 in addition to the delivery of all commitments for the 2022 World Cup. The workshop proved the efficiency of the UCC and the implication of the commitment of the UCC’s participating entities over the last few years have led to the resolution of most of the issues and matters caused before the committee. He also noted that the MoUs signed between Ashghal and other entities have played a significant role in saving time and reducing costs.

The MoUs provided the basis on which approved and streamlined processes and procedures were established to handle existing services and co-ordinate work among contractors. They also facilitated the regulation of land allocation processes and elimination of all challenges that hindered or delayed project construction, the statement proposed.

Ibrahim Abbas, manager of the MME’s Infrastructure Planning Department and the ministry’s representative for planning affairs, said the MME had entered into an agreement with Ashghal in 2012. The agreement helped expedite work in the new residential subdivisions.

Fahad Telfat, manager of Kahramaa Water Network Sector and UCC member, praised the close coordination and cooperation between the corporation and Ashghal and emphasised the importance of this co-operation in the success of projects as the provision of utilities in both existing and new areas largely depended on such co-operation. Brigadier Mohamed Maarifaya, manager of the Traffic Safety & Engineering Department and the MoI representative, emphasised the importance of coordination and workshops between government agencies. He also praised the UCC’s role in setting a strategy for integrated infrastructure development and in finalising traffic safety and traffic flow issues during project construction.

The two-day workshop discussed the design and construction workloads between Ashghal and Kahramaa, reviewed the current procedures for traffic diversions and the land allocation agreement with the MME. In addition, the workshop discussed backfilling and reinstatement procedures.
Locally produced veggies sell fast at shopping outlets

The programme to market locally produced vegetables, approved by the Ministry of Commerce and Industry, has proved successful in the first year, said the Market Manager of the Qatar Farmers Initiative (QFI) in a statement recently.

The total sales amounted to 2,034 tonnes last year, with the Farmers Qatari Veggies Initiative (MQV) program. Both programmes aim at improving the marketing of locally grown produce in Qatar and increasing the income of local farmers.

Together, the programmes would help increase the income of local farmers and encourage investors to explore options in the agriculture sector. Further, the programmes are available at shopping malls all year round, the MME added.

The programme was a joint venture with the Ministry of Agriculture and Fisheries, targeting the marketing of locally grown vegetables to help increase the income of local farmers and encourage investors to explore options in the agriculture sector.

The programme also promotes dog-friendly Fridays, where dog owners can bring their pets to market, provided they remain on a leash.

The market will again be operating its own farm-to-table concept during QIFF 2019, offering a selection of fresh fruit and vegetables, and handmade artisan food products and goods.

The market has also launched a new initiative for dog owners to enjoy a weekend escape with their pets at the market.

The Mark also promotes dog-friendly Fridays, where dog owners can bring their pets to market, provided they remain on a leash.

The report finds that February, March, and April 2019 were the most congested months in Qatar, with a congestion index of 28.8% and 26.5%, respectively. The report also highlights the importance of child passenger safety in the country.

Another finding of the report is that only 15% of vehicles have been fitted with child seats. This translates to a loss of 11.1% of the GDP in 2018. This is particularly concerning as Qatar is one of the leading shopping destinations in the region.

Now is the time to share our stories: filmmaker

Qumra has become a platform for young Arab filmmakers and directors to network with international film experts and take their stories to audiences globally, it is learnt.

“Qumra helps a lot in supporting and developing projects and that’s one big thing I really enjoy,” Nouf al-Sulaiti, producer of Khuzama, told reporters yesterday on the sidelines of Doha Film Institute’s (DFI) industry incubation event.

She was one of the seven filmmakers who are working with DFI for a number of projects, including Hamida Issa, AJ al-Thani, Hend Faifhroo, Hassan al-Malki al-Jahni, Khalifa al-Thani, and Ahmad al-Sharif.

Al-Sulaiti said she saw how other filmmakers progressed and win awards in a number of festivals after their Qumra stint in Doha last year.

The fifth edition of Qumra, which began on March 15 and concludes on March 20 at Souq Waqif and the Museum of Islamic Art, gathered over 150 acclaimed filmmakers, industry professionals and experts to nurture 36 Qumra projects – by first- and second-time filmmakers that are in various stages of development, DFI noted.

“Having an institute like DFI that supports Qatari filmmakers, even from the region, and pushes for creative outputs really helps in creating a different voice,” al-Sulaiti said.

Like al-Sulaiti who is working on two projects this year, Issa also lauded Qumra for its important role in developing and promoting the local creative industry.

“DFI is the foundation of what the film industry has been built upon, there have been branches that grown out of it,” she said. “DFI gave me the tools and empowered me with storytelling.”

Issa’s Places of the Soul, the first Qatari documentary screening in the work-in-progress segment of Qumra 2019, is about her journey as the first Qatari woman to travel to the Antarctic in hope of a sustainable future before returning to Qatar in search of inspiration to make positive change.

About the growing number and interest of Qatari women in the country’s film industry, Issa cited women’s creativity “who have so much stored inside of them.”

“Now is the time for us to share our stories and express our reality when in previous times it has not been expressed,” she said. “Now is the time that we share things about our culture in the feminine perspective, stories, mythology, our disasters, to prove that we are able to succeed and chase our dreams.”

Qumra Master Pawlikowski encourages filmmakers to innovate, break convention

Qumra Master Pawlikowski encourages filmmakers to innovate, break convention

Go against the grain of typical conventions and character tropes, critically-acclaimed Qumra Master Polish director Pawel Pawlikowski told up-and-coming filmmakers as he shared his unconventional approach to filmmaking at a masterclass at Qumra 2019.

During the third Qumra Masterclass, Pawlikowski joined a filmmaker with films like Pawlikowski’s first film The Last Resort (2000), The Woman in the Fifth (2011), and Ida (2015), which won an Academy Award for Best Foreign Language Film.

During the masterclass, Pawlikowski shared that early in the filmmaking career, as a director of documentaries at the BBC, he wanted to do things differently.

“Do our own thing. The job of a filmmaker is to bring your stories to life and that sometimes requires going against the grain. In my early films, I wanted to do something that was a more creative way of looking at the world than simple reportage – to break convention of documentaries or not,” he said.

After moving away from documentaries into narrative feature films, Pawlikowski developed a unique approach to filmmaking that was “Fun and leave.”

QDA, QBRI hold lecture to raise diabetes awareness

Qatar Diabetes Association (QDA), a member of Qatar Foundation, in partnership with Qatar Biomedical Research Institute (QBRI), a part of Hamad Bin Khalifa University (HBKU), organised a lecture for parents of children with type 1 diabetes.

The lecture was led by QBRI scientists, Dr. Mohamed Emara, who touched on the subject of diabetes. The lecture also provided the opportunity to raise questions and seek advice from established experts in the field, as well as showcase QBRI’s advanced knowledge and research efforts in diabetes.

Members of the audience, including parents of children with diabetes, were given an opportunity to gain a clearer understanding of the disease and the latest developments in the stem cell research and potential treatment for their family members.

Dr. Abdulla al-Hamaq, executive director of QBRI, said, “QBRI is committed to running diabetes research that resonates locally, and we are looking to conduct research that resonates locally, regionally and globally.”

QBRI is home to three research centres – Cancer Research Centre, Neurological Disorders Research Centre, and the Neurological Disorders Research Centre.

“The ultimate goal of our stem cell research at QBRI is to pave the way for developing novel therapeutic strategies for diabetes treatment,” said Dr. Emara. “Our current stem cell research is able to achieve two main goals, which are understanding genetic factors underlying the development of diabetes using induced pluripotent stem cell technology, and generation of functional pancreatic islet cells using induced pluripotent stem cell technology, and generation of functional pancreatic islet cells using induced pluripotent stem cell technology.”

“Using stem cells as a therapeutic tool to treat different diseases is very promising. Currently, there are several clinical trials taking place around the world to test the cure with such new technology.”

“QDA is a longstanding partner and we share the objective of securing a healthier future for Qatar by raising awareness and enabling the wider community to seek out advice from established experts in the field, as well as showcase QBRI’s advanced knowledge and research efforts in diabetes.”

“We are pleased to collaborate with QBRI in organising this important lecture, which offered the opportunity to raise questions to QBRI’s scientists pertaining to diabetes and the latest developments.”

Manar Khalifa al-Muraikhi, director, PR and corporate communications at Ooredoo, said: “We know we have plenty of options through which customers can pay their bills, but as an added incentive for them to pay their bills in a timely manner, we’re delighted to offer this generous promotion.”

Ooredoo offers data incentive for prompt bill payment

Ooredoo has announced a new promotion that allows customers who pay their mobile bills promptly to receive double data for free.

The promotion is valid for all Ooredoo and mobile broadband postpaid customers, and offers free data when the bill is paid within 15 days of being issued.

Customers paying their bills within the specified time limit of 15 days will receive 4GB data free, valid for 15 days, on their mobile or mobile broadband service.

Additionally, any customer paying their bills via the Ooredoo app using a credit or debit card will see their free data doubled to 4GB valid for 15 days, as well customers using Ooredoo Money service to pay their bills.

Ooredoo is well aware that for a customer, an SMS will be sent to the registered number to let them know the bill has been paid and within a timely manner, we’re delighted to offer this generous promotion.”

Once a bill is sent to a customer, an SMS will be sent to the registered number to let them know the bill has been paid and within a timely manner, we’re delighted to offer this generous promotion.”

Customers paying their bills promptly will be rewarded with double data on their mobile broadband and mobile postpaid services, with 4GB data valid for 15 days.

LuLu rings in British Food Festival 2019

LuLu Hypermarket Qatar is bringing British Food Festival 2019 across all its outlets, in collaboration with Doha Festival City, from March 15 to March 23. The festival is set to be inaugurated on March 19 by the British Ambassador to Qatar, His Excellency Major General The Baroness Lawrence of Clarendon, DBE, CBE, who will cut the ribbon for the opening ceremony.

On the occasion, the festival’s Managing Director, Dysart, expressed his excitement saying, “The festival will be a truly unique and talented opportunity for the Qatar public to taste the true British culture and experience a taste of home. We are delighted to partner with the British embassy and the British community in Qatar to bring this event to our local customers.”

The festival will see a wide variety of British products from across the region, including meats, cheeses, and dairy products, and will also feature live entertainment and music, with the best in British performing artists and bands.

The event is an opportunity for visitors to learn more about British culture and taste the best of what the UK has to offer. It will be a fun and educational experience for all ages, with a variety of activities, including cooking demonstrations, book signings, and live music performances.

The festival will run from March 15 to March 23 at all LuLu outlets in Qatar, and will include a range of activities, including food tastings, cooking demonstrations, and live entertainment.

Baladna staff donates blood

Nearly 800 employees of Baladna Food Industries Company, Qatar’s largest producer of supermarkets and hypermarkets in the region, donated blood on Saturday at the Al Khor Hospital. As part of its social responsibility, the company is conducting blood donation campaigns in each of its branches to encourage its employees to support the community.

Baladna. “I am also very proud of our staff members who stepped forward and donated their blood, which might help save a life. Having the blood donation campaign on our premises exemplifies Baladna’s constant commitment towards supporting the local community.”

Indian comedian Johnny Lever coming to Doha

Johnny Lever, one of the most recognised and loved comedians in India, is coming to Doha for a laughter session. The session will be held at Doha Festival City on March 20, from 6pm to 9pm.

The laughter session will be a part of the Indian Film Festival, which is being held in Doha from March 19 to March 23. The festival will feature a range of films from India, including comedy, drama, and romance.

Johnny Lever is known for his ability to make people laugh with his unique style of comedy. He has been a part of the Indian film industry for over 50 years and has acted in more than 300 Bollywood films.

He will be accompanied by his talented daughter, Jamie, as well as comedian Ganesh Sharma, and will perform a range of comedy sketches, one-liners, and humorous stories. The event is in partnership with Millennium Entertainment.

Tenders and Bids of Government Organizations subordinate to the Law of Organizing Tenders and Bids No.24 for the Year 2015

For the first time, Almana Automotive Group sponsors the Commercial Bank Qatar Masters Golf Tournament 2019 represented by all the Automotive brands in Almana Group: Ford, Lincoln, Jeep, Dodge, Chrysler, Ram, Ford Heavy Trucks and Hertz.

The event that took place from March 4 till March 10, 2019 is considered to be "The Pearl In Qatar's Sporting Crown." Since 1998 the prestigious Qatar Masters tournament has been hosted by Doha Golf Club and sponsored by Qatar Commercial Bank. It is held at the beginning of each year as part of the PGA European Tour. Many of the World's top golfers have competed in this year in a desert-type competition and crowned Justin Harding Champion.

The participation of Almana Automotive Group in this iconic event was remarkable. Hertz Almana, the Official Transportation Provider of the Qatar Masters, supported the logistics of the Golf Tournament with over 120 vehicles and drivers. The sponsorship was a great exposure for all Automotive brands as the tournament was broadcast by over 23 International TV networks worldwide.

Qatari Golf Association represented by Mike Shoueiry mentioned that "We have not witnessed any better service in the field of transportation in all our older versions of the tournament. Hertz Qatar has proven very high professionalism and best quality service that encourage us to build a long-term relationship with them."

Mr. Vincent Cardone, Deputy Director Almana Automotive Group commented on this sponsorship saying "We in Almana are proud to be part of the success of this iconic event and we look forward to support Qatar Masters in 2020." He is lucky enough to be pictured with Justin Harding the 2019 Champion. General Manager of Hertz Sanaa Ouahmane and of course the Championship Trophy. Hertz team did a great job handling the logistics, transporting 250 players a day, caddies, officials and press flawlessly over an entire week. "We congratulate and thank Qatar Commercial Bank, Qatar Golf Federation and Doha Golf Club for giving us this great opportunity, and look forward to working together on future events," he concluded.

In its continuous strive to offer its clients the best service and appreciation, the Almana Automotive Group invited its loyal customers enjoy an memorable opportunity to experience the Golf Tournament live in a dedicated VIP lounge.
Qatar Charity declares winners of “Future’s Writers-3” programme

Under the patronage of the Minister of Culture and Sports HE Salah bin Ghanim Al Ali, the third edition of the “Future’s Writers” programme concluded, declaring the names of winners in this edition.

The announcement of winners was made during a ceremony attended by Dr. Ibrahim Al Nuaimi, undersecretary of the Ministry of Education and Higher Education, Mr. Yousef bin Ahmed Al Kuwari, CEO of Qatar Charity, partners and supporters of the programme and many students.

Eighteen students out of 1,697 participants from 259 private and independent schools and other schools were declared winners in the edition of the programme. Khalid bin Abdullah al-Kaabi, Abdullah Masoud al-Marri and Bara Mohammed Khairuddin topped the list of winners in the category of primary, preparatory and secondary schools for boys, respectively, while Sarah Al Nuaimi, Asma Ashraf and Shahad Abdul Rahman won the first positions, respectively, in the category of these schools for girls.

Dr. Ibrahim Al Nuaimi, undersecretary of the Ministry of Education and Higher Education, Mr. Yousef bin Ahmed Al Kuwari, CEO of Qatar Charity participated in the distribution of the shields and certificates of thanks and appreciation to winners, partners and supporters of the programme.

HE Dr. Ibrahim Al Nuaimi, undersecretary of the Ministry of Education and Higher Education, expressed his happiness at the successful conclusion of the “Future’s Writers-3”, appreciating the great efforts exerted by the Ministry of Culture in supporting the programme. He also thanked Qatar Charity for organizing it on a larger scale that provided all students in Qatar to participate in this edition of the programme.

In a statement, Al Nuaimi said more than 1,600 students’ participation in this edition of the programme, indicates that schools attach significant attention to this programme, which provides the opportunity for students to take part in the creative writing, with the aim of promoting the Arabic language among them.

He also emphasized the importance of the role played by civil society organizations in supporting the efforts of ministries and government institutions to promote such important issues.

Yousef bin Ahmed Al Kuwari, CEO of Qatar Charity, said, “We are delighted that the “Future’s Writers” programme has achieved impressive successes, as it contributed to nurturing young talents in Qatar in the field of writing stories,” adding that the programme witnessed tremendous developments on the quantitative and qualitative levels, especially in its third edition.

Al Kuwari congratulated the winners and extended thanks to all those who supported the programme.

It is worth mentioning that Qatar Charity received the Social Responsibility Award (SRA) for its “Future’s Writers” programme in the category of the best national initiative during the 6th Social Responsibility Ceremony organized by Dar Al-Sharq.

The “Future’s Writers” programme is one of Qatar Charity’s projects, which is implemented within Qatar and is concerned with the development of students’ writing skills through the competition.
Aman’s mobile app offers free counseling for women

Protection and Social Rehabilitation Center (Amal) has launched a new application (Aman) to provide social, psychological and legal services for women. The aim of the application is to facilitate access to a number of specialized social, psychological and legal services provided by Aman, especially to women who do not have access to such services through traditional means.

The application is an important mechanism to strengthen the national professional identity of persons with disabilities. Al-Mansouri noted that the launch of the application is an important mechanism for civil society organizations in the framework of promoting the empowerment of people with disabilities. She emphasized that Aman is keen to provide services and raise the level of women’s awareness of their issues, thereby enhancing their ability to overcome the challenges they face and contributing to ensure women’s rights.

HMC’s Health Promotion Department—the head of the program noted that the application was developed in collaboration with Mada Center, which is the most competent experts and specialists for digital access, consultancy and electronic services. The application provides easy, safe and secure access to the application provides easy, safe and secure access to the advice provided by Aman, especially to women who do not have access to such services through traditional means.

Bouteflika assures comprehensive reforms

Saudi crown prince approved ‘intervention’ against dissidents

Civilian deaths surge in Yemen despite port truce

Crown prince grounds his authority on Saudi Arabia and Riyadh’s control over the oil-rich Persian Gulf state. The oil-rich state is a key player in the Middle East and a host to many major international events, including the Treaty of Rome and the Arabian Gulf League. The crown prince has repeatedly stated that his goal is to protect the interests of his country and its citizens, and he has been controversial in his actions. He has been accused of corruption and human rights abuses, and he has been criticized for his policies in the Middle East, including the war in Yemen. The crown prince has also been criticized for his approach to the 2016 presidential election, which was marred by allegations of irregularities and voter fraud. The crown prince has been accused of using his power to suppress political opposition and dissent, and he has been criticized for his role in the current political crisis in the Middle East. The crown prince has also been accused of using his influence to support the government of President Donald Trump. The crown prince has been a key figure in the political landscape of Saudi Arabia, and his policies have had a significant impact on the country and the region.

Trump may shut down government over immigration, as Senate faces pressure to act

President Donald Trump yesterday gave possible Joe Biden as ‘low IQ’

By Lawrence Hurley, Reuters

WASHINGTON (Reuters) - US President Donald Trump yesterday gave possible Joe Biden as ‘low IQ’ after the US Senate yesterday rejected legislation to provide $3.6 billion in emergency aid to help immigrants and refugees.

Trump, who has been a vocal critic of Biden’s immigration policies, said in a tweet that Biden was “LOST” and that the legislation was “FAKE”. The tweet came hours after Biden announced his intention to run for the 2020 Democratic nomination.

Trump has repeatedly threatened to shut down the government if he does not get his way on immigration. The measure in question, the Convention on Status of Refugees Act of 2018, was introduced by Senator Dick Durbin, a Democrat from Illinois, and would have provided $3.6 billion over three years for legal immigration services and refugee resettlement.

Durbin said in a statement that he was “disappointed” by the Senate’s failure to pass the legislation, which was supported by 67 Senators, including 31 Republicans. The bill was blocked by a procedural vote of 49-41.

Trump later tweeted that the Senate had “finally said no” to Biden’s immigration plan. "The Senate said no today to Joe Biden’s plan to spend $3.6 billion on illegal immigration," Trump wrote. "This is a good day for America and for our country. Thank you to all of the people who supported this important initiative. It will now go back to Congress for consideration."

New Zealand to go for tough new gun laws

Alligned gun bough bought 4 weapons legally online: gun shop; NZ cabinet agrees in principle on new gun laws; Families of victims frustrated over burial delays

Volunteers fly in to wash the dead in New Zealand

Kearuna New was a trainee nurse in Auckland when a gunman slaughtered 30 people during Friday prayers at two mosques in the New Zealand city of Christchurch. She became the first person to sign a national condolence book for the victims of the massacre.

New Zealand Prime Minister Jacinda Ardern yesterday called for a ban on semi-automatic weapons and called for a gun law review in New Zealand to help a community overwhelmed by the number of lives lost.

A New Zealand standard A-category firearms licence is issued for firearms that do not usually carry guns. But, in this case, the man had a gun licence.

Ardern was the first person to arrive on the scene of the mosque shooting in Christchurch on Friday.

Ardern was not under home affairs minister, who is due back in court on April 5 after she pleaded guilty to a charge.
Woman jailed for drowning three-year-old daughter in bath

A woman who drowned her three-year-old daughter during a fit of postnatal depression has been jailed for life.

Claire Colebourn, 36, was found guilty of murder at the Old Bailey after pleading guilty to manslaughter on the basis of diminished responsibility.

The court heard how Colebourn, who was tried at the Old Bailey, had been convicted of manslaughter on the basis of diminished responsibility.

The jury found she was guilty of murder but not of attempted murder.

The Advertising Standards Agency, Historic England, plans to undertake an investigation of Cadbury’s ‘treasure’s fair game’ – a view endorsed by some archaeologists who want Cadbury to be happy to advise Cadbury on what treasures can be found.

A petition to force a byelection in seats where “treasure’s fair game” had been banned must take place but what happened on Border lines was, awful, appalling. It was complicated, but it does not necessarily determine, but what would you do if you knew in your heart of hearts that you were innocent? Could you fight for your name?”

Three dead in Utrecht tram shooting, motive unknown

By Marc Preel and Joseph Schmid, AFP

By Marc Preel and Joseph Schmid, AFP

Dutch police yesterday arrested a 33-year-old Dutchman who was said to have terroristic intent on a train near the city of Utrecht. The man was said to have planned a shooting, motive unknown.

Three dead in Utrecht tram shooting

The shooting took place on a tram in the center of Utrecht on Saturday. Twelve people were injured, including four who are in critical condition. The man who was arrested was a local resident and had no known history of violence.

Eleven people have died and more than 30,000 others have been infected this year. The virus spreads through contact with infected droplets and can be transmitted through the air.

The city's mayor Jan van Zanen said it was a “black day for Utrecht”. He called for a review of the instructions and for more proactive measures to be taken to prevent similar events in the future.

The Dutch military police said they were less aggressive, less reactive than usual” over the weekend, that police “were less aggressive, less violent”.

The UN rights chief Michelle Bachelet said she was “deeply concerned” by the violence, especially when police “were not proportionate to the violence”.

Rioting in the Netherlands on Saturday was part of the Council of Europe rights body. The Council of Europe is an international organization that promotes democracy, the rule of law, and human rights in Europe.

Putin in Crimea on anniversary of annexation

Russian President Vladimir Putin, who has been in power since 2000, has been praised for his leadership and for the economic success he has delivered in Russia. He has also been criticized for his human rights record, his policies towards minority groups, and his foreign policy.

The Russian military has been stationed in Crimea since February 2014, when Russia took control of the peninsula after a pro-Russian uprising. The annexation of Crimea has been condemned by the West but not by Russia, which is a member of the United Nations Security Council.

Putin has promised to hold a referendum on Crimea’s status in March 2014, but this has been criticized by the international community as illegal. The United States and the European Union have imposed sanctions on Russia in response to the annexation.

The US and EU have imposed sanctions on Russia in response to the annexation of Crimea, and have also imposed economic sanctions on Russia. These sanctions have been condemned by Russia, which has described them as “illegal and unfair”.

The US and EU have imposed economic sanctions on Russia in response to the annexation of Crimea, and have also imposed political sanctions on Russia. These sanctions have been condemned by Russia, which has described them as “illegal and unfair”.

Paris police chief sacked after Champs-Élysées rioting

By Marc Preel and Joseph Schmid, AFP

The police chief in charge of the Paris police force, who was responsible for the Champs-Élysées rioting last month, has been sacked.

Paris police chief Raphaël Guerra, who was in charge of the Paris police force at the time of the rioting, was placed under an official investigation. The investigation was opened after a video was released showing police using excessive force.

The video showed police using tear gas and rubber bullets against demonstrators, and using excessive force against protesters. The police have been criticized for their response to the rioting, which has been described as violent and excessive.

The police chief has been replaced by a new police chief, who will be responsible for the Paris police force.

The new police chief is expected to be appointed within the next few days. The investigation into the Champs-Élysées rioting is ongoing, and the police force is expected to face further criticism.

The Champs-Élysées rioting last month was the worst rioting in Paris since the 2015 Charlie Hebdo attacks. The rioting saw hundreds of protesters clash with police, and resulted in widespread damage and injury.

The police chief has been placed under an official investigation, and is expected to face further criticism in the coming days.

A day after the Congress announced its alliance with the Bahujan Samaj Party (BSP) and the Rashtriya Lok Dal (RLD) in Uttar Pradesh, the BSP announced that it will contest 80 seats in the state assembly elections. The BSP-BSP alliance will contest 77 seats, the RLD 3 seats, and the Congress 3 seats. The alliance is expected to face a tough fight against the ruling Bharatiya Janata Party (BJP) in the state.

The BSP's decision to contest 80 seats is a strategic move, as the state has been a stronghold of the BJP for many years. The alliance is also expected to benefit from the popularity of Mayawati, the BSP's president, who is a strong leader in the state. The alliance is also expected to benefit from the support of the RLD, which has a strong base in the state.

The Congress's decision to contest 3 seats is a strategic move, as it is seen as a move to strengthen its position in the state. The Congress is also expected to benefit from the support of the RLD, which has a strong base in the state.

The alliance is expected to face a tough fight against the ruling BJP in the state, as the party has been in power for many years. The alliance is also expected to benefit from the support of the RLD, which has a strong base in the state.

### Argentina

A Brazilian court has ordered Vale SA, the world’s largest iron ore miner, to support two more dams that are part of a larger complex of dams that have been the subject of controversy. The court decision is the latest in a series of court cases that have escalated over the past months, as local communities have complained about the environmental impact of the dams. The court ruled that Vale must undertake measures to protect the surrounding environment and ensure the safety of the dams.

### Brazil

Bolsonaro’s market-friendly agenda, which has been a major test of foreign investor confidence, has been demonstrated by the concessions to 42 airports being auctioned, with a special focus on contracts with the government’s policy to inject pro-business vigor into an economy struggling to gain traction. While Bolsonaro’s past efforts to privatise state assets have met with mixed results, the latest auction is seen as a step towards further privatisations and concessions.

### Venezuela

The governments of both Colombia and Venezuela have been trying to stabilise their economies, with Venezuela suffering from economic collapse and hyperinflation, while Colombia has been dealing with the aftermath of a civil war. Despite these challenges, both governments have been working to implement pro-business policies and attract foreign investment.

### Colombia

Bolton’s economic activity fell sharply in January, as a central bank indicator declined, the latest evidence that the economic recovery momentum lost last year has carried into 2022 even as otherwise being stronger. The central bank’s BCVB economic activity index, seen as an indicator of broader economic conditions, showed a decrease of 0.1% compared to the previous month, with expectations for a 0.1% fall in the first quarter of the year. The decrease was driven by a weak performance in the non-housing sector.

### Chile

A journalist shot dead in southern Honduras. A Honduran newspaper reported that the government was about to shoot the journalist, who was a critic of the government, in front of the presidential palace. The journalist’s death has sparked outrage and calls for justice.

### Costa Rica

Human rights activists and diplomats have condemned the Costa Rican government for failing to protect the rights of suspected criminals during demonstrations this weekend. The Spanish embassy in Managua said the reports were “a clear violation of human rights and a violation of the right to protest.”

### Ecuador

The Inter-American Court of Human Rights has ordered Ecuador to pay $2.4 billion to indigenous communities affected by the Ecuadorian government’s approval of the $6.4 billion MiraVista water project. The court ruled that the project had violated the rights of indigenous peoples and that the government had failed to carry out adequate environmental impact assessments.

### Guatemala

Security analysts have reported that the government of Guatemala has been unable to control widespread violence and illicit activities, including drug trafficking and human rights abuses. The analysts noted that the government has not taken adequate steps to address the root causes of the violence.

### Panama

The Panama Canal Authority has announced that it will invest $3.5 billion during the term of a new government to expand the canal and improve its infrastructure. The investment is part of a larger plan to modernise the canal and increase its capacity.

### Peru

There have been more than 1000 cases of state crime committed since the peace deal with FARC in 2016, according to a new report. The report highlighted a lack of accountability for war crimes and the lack of justice for victims of the conflict.

### Mexico

The former president of Mexico, Vicente Fox, has said that he believes there is no chance of a new Mexican government that would be able to implement the peace process. He has called on the current government to take a more active role in promoting peace.

Pakistanis also perform motorcycle stunts during the Pakistan Day parade in Islamabad. Pakistan National Day commemorates the signing of the Lahore Resolution, when a separate nation for the Muslims of the British Indian Empire was demanded on March 23, 1940.

FM radio in KP to counter propaganda

The Khyber Pakhtunkhwa government in the northwest of Pakistan is taking measures to make accurate radio broadcasts from radio stations in the merged districts of the province to counter the narratives shaped by foreign radio broadcasts in the region.

The Khyber Pakhtunkhwa Radio Corporation, established in 2004, is one of the oldest radio stations in Pakistan. It covers a large area in the northwest of the country and broadcasts in both Pashto and Urdu.

The Pakistan Telecommunication Authority has amended a clause that detailed the requirements for radio stations in the merged areas. "This will make it easier for people to understand the government's policies and initiatives," said a government official.

The Khyber Pakhtunkhwa government has been working on broadcasting in the merged districts since the passage of the Pakistan Armed Forces (Extension of Limitation of Waging War) Ordinance 1947, which revised the laws regarding the use of radio stations in Pakistan.

FM radios were once considered a symbol of national统一, but the rise of radio stations in Pakistan has led to a surge in the number of political speeches and campaign rallies in the country.

Radio stations in Pakistan have been used as a tool to spread propaganda and influence public opinion, especially in areas where traditional media is not widely available.

According to the Pakistan Telecommunication Authority, there are currently around 4,000 radio stations in Pakistan, including both private and state-owned stations.

The Khyber Pakhtunkhwa government is taking measures to make accurate radio broadcasts from radio stations in the merged districts of the province to counter the narratives shaped by foreign radio broadcasts in the region.

"The radio stations will be broadcasting in both Pashto and Urdu, and will cover a large area in the northwest of the country," said a government official.

FM radio stations in KP will also be broadcasting in Pashto and Urdu, and will cover a large area in the northwest of the country. The Khyber Pakhtunkhwa government has been working on broadcasting in the merged areas since the passage of the Pakistan Armed Forces (Extension of Limitation of Waging War) Ordinance 1947, which revised the laws regarding the use of radio stations in Pakistan.

Dead whale had 40kg of plastic in stomach

**AJP Times**

*Startling photo of 40-kilogram plastic debris in the stomach of a dead Cuvier's beaked whale in Compostela Valley, Davao, on the southern island of Mindanao. A total of 41 provinces may be affected by the drought.*

A stunning photo showing the stomach of a dead Cuvier's beaked whale in Compostela Valley, Davao, on the southern island of Mindanao. This photo highlights the frightening reality of plastic pollution in the oceans, where marine life such as whales are ingesting plastic debris, leading to their death. The image is part of a compelling story on plastic pollution and its impact on marine life and the environment.

Finland’s Bottas breaks free from Hamilton’s shadow

Valteri Bottas has made his feelings clear after winning the Australian Grand Prix on Sunday, his first Formula One victory since December 2017. With world champion Lewis Hamilton second, it was a perfect start to the season for Mercedes, who Bottas were left puzzled by poor performance.

In doing so, Bottas emerged from the shadow of five-time world champion Hamilton to whom he had played second fiddle in the past.

After going the whole race without a win, Sunday’s win came as a relief to the 29-year-old Finnish.

That much emerged when his pent-up frustration came to the fore with a profanity over the weekend after its successful pre-season was unclear why the Italian team was below par — winner of the last two races in Melbourne — had plenty to ponder ahead of the next race after overtaking pole-sitter Hamilton at the start.

Maybe they should look in the mirror and think: “In sport there are always second fiddles,” Bottas said: “In sport there are always second fiddles.”

After his engineer had told him the victory made up for last season.

That much emerged when his pent-up frustration came to the fore with a profanity over the weekend after its successful pre-season. Ferrari were left puzzled by poor performance.

Ferrari team principal Mattia Binotto said it later explaining what had prompted his reaction.

Bottas took the chequered flag for his fourth F1 victory and the first since Abu Dhabi in 2017 following seven second places last season.

After what has been a tough start to the season, Bottas won as a result of Sebastian Vettel finishing fourth behind Red Bull’s Max Verstappen, with Ferrari teammate Charles Leclerc fifth.

It was the first win in his Ferrari career that Vettel — winner of the last two races in Melbourne — had failed to be on the podium at the Australian GP.

Ferrari team principal Mattia Binotto said it was unclear why the Italian team was below par — winner of the last two races in Melbourne — had plenty to ponder ahead of the next race after overtaking pole-sitter Hamilton at the start.

When the past empowers the future

QF’s initiatives to preserve Qatar’s heritage help foster young people’s sense of identity

Qatar Foundation (QF) believes that true progress happens in society when people – and especially its youth – feel connected to their roots, and when they recognize and appreciate where they came from as much as they look to where they are going.

“Growing up, I was mostly taught about the history of other cultures and civilizations,” says al-Thani, a PhD student at UCL Qatar. “I was conscious of the need to see Qatari history as one of the narratives covered in classrooms, and museums – affected anywhere – in history textbooks, never seeing Qatar mentioned in the history of other cultures and civilizations.”

QF’s initiatives have empowered young people like al-Thani to unearth Qatar’s past. “I was eager to join the project; I saw this as an opportunity to engage with the past and re-discover my roots,” she says.

According to al-Thani, the response of both teachers and students who have used the presentation and the teacher’s guide were released online in February 2019, and can be freely accessed by the public.

QF’s initiatives go beyond simply preserving the house. “The house is a tangible part of Qatar’s living memory; something that young people like myself can actually picture the exact spot where he would have been sitting and how the place looked like then,” says Nabil Abudabbous, Valdeolmillos, a Senior Architect at QF’s Capital Projects Directorate, and an expert in Qatar’s historical heritage buildings – has, for the past eight years, been helping QF preserve and document historic structures within Education City.

The architectural expert helped QF come up with a masterplan based on eight years of site investigations and data collection. It demonstrates how QF cares for our past and will go on efforts to conserve it,” she says. “The house is a tangible part of Qatar’s living memory; something that young people can actually picture the exact spot where he would have been sitting and how the place looked like then.”

Al-Thani specialist in Qatar’s history, QF’s initiatives to preserve Qatar’s heritage help foster young people’s sense of identity.

The National Museum of Qatar (NMoQ) is set to open to the public on March 23, 2019, after a five-year construction period. The museum’s 11 permanent galleries will take visitors from the formation of the Qatar peninsula millions of years ago to the nation’s exciting and diverse present, giving voice to the rich heritage and culture of the people and expressing their aspirations for the future.

The museum’s story began with a conversation between HE Sheikha Al Mayassa bint Hamad bin Khalifa Al Thani, Chair of the Qatar Museums Authority, and the renowned French architect Jean Nouvel, who also conceived the design of the new Louvre Abu Dhabi museum.

At an early phase of research, the NMoQ team also engaged in dialogue with facilities for management and operation teams. The museum is yet to reveal the names of the experts, archeologists, and historians who have helped shape the museum’s curatorial process.

To check whether the projects have been delivered as planned, Ashghal set to hand over the National Museum of Qatar to the National Museum of Qatar. The new building of Hamad General Hospital Trauma and Emergency Department is expected to offer advanced services, with the establishment of an International Emergency Assessment System (GSAS). So are a total of 14 operating rooms have been allocated for women are available in the building.

The museum is embraced by the monumental structure that seems visionary architect, Jean Nouvel: a combination of architectural space, landscape, and the testimonies and materials. It is now time to reveal the emotions as well as their intellectual change the travellers themselves, so they engage with our exhibitions through their senses and become discoverers of the palaeontology, and the Moes- sium of Qatar. Aspects of the major eras of Qatar, from the heyday of Al Zubarah. The film captures a body of trade and culture and maritime life that the people of Qatar have engaged with for four times more than usual, while the Maximalist building is all set to be handed over to the Ministry of Health.

Ashghal set to hand over new facility for Hamad trauma care

The Public Works Author- ity (Ashghal) has announced that the newly built Hamad General Hospital (HGH) Trauma and Emergency Department building is all set to be handed over to the Ministry of Health.

Ashghal has also set up a project to gather evidence on the image of the Qatari flag in a new feature of the exhibition galleries.
