Qatar achieves total success in solving ‘card fraud cases’

**Public urged to exercise caution while using cards**

By Wael Abdulmageed
Staff Reporter

The Economic and Cyber Crimes Combating Department (ECCCD) has recorded 100% success in averting all the reported ‘card fraud cases since 2012’, a judicial official told QNA on Wednesday.

“Eliminating each instance is one of the top priorities of our department and we are proud that action was initiated against the culprits,” said Col Ali Hassan al-Kubaisi, head of the department’s Cyber & Cybercrime Unit.

The official, who added that a former minister of interior was killed by suspected fraudsters, said the department has formed a team to combat such crimes.

He explained that the team helps to ensure appropriate action at the earliest, he explained.

The official pointed out that Qatar is witnessing cases of fraudulent card transactions at an alarming rate.

Al-Mulla said that the reason for the high number of fraud cases is due to limited awareness in dealing with electronic transactions and handling debit and credit cards.

“Users should be vigilant and careful while holding ATM transactions and using credit cards. They should avoid sharing their password or PIN to anyone in any case,” he said.

The economic and cyber crimes department has formed a team to combat such fraud and the department has prioritized the protection of banks and other institutions identified as fraudulent card transactions.

“By joining hands with various stakeholders, the ECCCD has formed a team to combat fraud from both banks and other departments in the country,” he added.

The department is making use of the services of experts from forensic laboratory and security printing practices, he said.

The department has recorded over 10,000 fraud cases involving electronic transactions and handling debit and credit cards.

The department has initiated action against such fraudsters and a comprehensive strategy is in the making for the successful fight against fraudulent cases.

“The department is working with the relevant authorities concerned with the campaign to prevent card fraud,” the official said.

He explained that the department has recently arrested several suspects in credit card and ATM fraud cases.

The department has recommended that Qatari nationals avoid using their credit cards if they have been fixed.

WhatsApp had said yesterday a se- cret breach on its messaging app had sign of coming from a government using surveillance technology developed by a private company and may have targeted hu- man rights groups.

WhatsApp, which is part of Fi- xed, the parent company that owns the US social media giant, said it was not aware of any attempt to break into user accounts.

WhatsApp said it was “deeply concerned about the abuse” of such surveillance and was working with governments on surveillance.

The breach was discovered in early February by a security researcher who was using the open-source software tool called Poodle. WhatsApp said it had been fixed.

The security researcher, Alex Chapman, discovered a new vulnerability in the popular messaging app and immediately reported it to WhatsApp.

Ministry invites local submissions for WSA 2019

The Ministry of Transport and Communications, in charge of the local submissions to compete in the 2019 edition of the World Summit Awards (WSA), has announced the opening of a window for applications for the award.

The ministry said that a joint committee is being formed to receive applications from the WSA local expert Reem al-Sumari, Head of the WSA Qatar chapter, and Amina al-Malki, Director of the Ministry of Transport and Communications' civil aviation unit.

The committee will also make decisions on the appropriateness and quality of the applications submitted.

According to the agreement, Qatar Charity and IDMC will assess the applications submitted to the competition, while the WSA local expert will review the applications and submit her opinions.

The award authority is entitled to reject any submissions based on the UN Declaration on Human Rights.

All participants have to abide by the WSA charter, which specifies the rules of participation.

The WSA local expert does not bear any legal consequences as a result.

Similarly, submissions that are not compliant with the WSA charter will be rejected.

The ministry's participation has been organized as part of Qatar Charity's efforts to represent Qatar on a global level, particularly war crimes, crimes against humanity, genocide and ethnic cleansing, thereby improving the awareness of the international community to prevent and stop such atrocities.

Qatar Charity, IDMC sign partnership agreement

Qatar Charity and the Internal Displacement Monitoring Centre (IDMC) have signed an agreement to cooperate in the selection of innovative and high-quality digital prototypes, demonstrations or launched products.

Both entities have agreed to reflect the commitment of the UN Declaration on Human Rights, which has been ratified by all member states of the United Nations.

IDMC's Director Alexandra Bilak and Qatar Charity's Director general, Dr Khalid bin Ibrahim al-Othman Fakhroo, have signed the agreement.

IDMC is an independent agency of the United Nations that monitors and analyses the effects of mass displacement worldwide.

IDMC's mission is to improve understanding of this phenomenon through research, analysis, and information and to help prevent, reduce, and respond to displacement.

IDMC collaborates with governments, other UN agencies, and NGOs to develop knowledge and innovative solutions to prevent displacement and improve the conditions of displaced populations worldwide.

The agreement outlines the rules and procedures for the nomination, selection, and awarding of the WSA Qatar prize.

The nomination and selection processes are governed by a committee of experts from various fields.

All participants have to abide by the WSA charter, which specifies the rules of participation.

The WSA local expert does not bear any legal consequences as a result.

Similarly, submissions that are not compliant with the WSA charter will be rejected.

The ministry's participation has been organized as part of Qatar Charity's efforts to represent Qatar on a global level, particularly war crimes, crimes against humanity, genocide and ethnic cleansing, thereby improving the awareness of the international community to prevent and stop such atrocities.

For the second consecutive year, Qatar Islamic Bank (QIB) has announced its participation in the ‘Ramadan and Safe Driving’ campaign organised by the General Directorate of Traffic.

QIB is pleased to support the awareness promotion programmes during Ramadan. Driving safely is a social value as it protects lives, and the bank is committed to promoting road safety within the Qatar society.”

The clinical dietitian and head of corporate communications at the Clinical Nutrition Department at Health Care Service, has recommended light exercises during the day, saying even simple movements that flex the joints and stretch the body can be helpful and getting sufficient amounts of rest and sleep is also very important. Elissawi added that there are a number of benefits to fasting, provided it's done in a healthy way and according to Islamic teachings like hyperrhythm.

R
ducational projects by stu-
dents and faculty members
of the University of Calgary (UCQ) have
won awards in the National Undergradu-
ate Research Experience Pro-
gram (UREP) Competition.

The ceremony concluded with
the distribution of certificates
and a monetary award to the
winning students.

MoCi honours Shafallah Centre students

The Ministry of Commerce and Industry
(MoCI) honoured student and faculty
members of Shafallah Centre for Persons
with Disabilities, who have completed
research training programmes.

The ceremony was attended by a number
of officials from the MoCI and Shafallah
Centre along with department directors and
staff of the various centres.

The students were recognised for their
work and their efforts aimed at helping
people with mental disabilities to per-
form daily tasks and improving
their skills in many areas of life.

MoCi’s Secretary General, Abdulrahman
Abu Al-Ra’i, said that MoCI is keen on
helping people with disabilities to
participate in the labour market and
improve their skills, adding that MoCI
is keen on developing the skills of
people with disabilities and is working
towards helping them achieve their
goals.

Ooredoo continues with
VoLTE enabling plans

Ooredoo has confirmed its plans
related to ensuring full voice
quality in its VoLTE (Voice Over
LTE) service.

The company said that it is working
closely with Samsung to ensure that
its customers can enjoy all the benefits
of the latest version of VoLTE, which
brings cutting-edge technology as an
important part of a student's academic
journey.

Effort was made to acknowledge the
importance of the contribution of
drivers towards the development
of Qatar's public and private sectors.

The ceremony also included the
presentation of certificates to the
winning students and the
award of prizes.

Research projects by MoCi students and faculty members were placed first and second in UREP Competition.

Ooredoo continues with VolTE enabling plans

Qatar achieves total success in solving ‘card fraud’ cases

From Page 1

“Customers should be vigil- ant while using ATMs and their cards, and should not let their guard down. Though rarely reported, there are a certain number of cases of card fraud at ATMs. This is why we are calling for vigilance,” said Col. Khalid Al-Shareef.

From Page 2

He added that although the legacy that his Abdo Almattar School can make by presenting itself to another country, there will be an important legacy that Qatar will make in the name of the future generation. “Our students have worked hard and received good grades in the last few years, and have worked hard to prepare for their future,” he said.

At the end of the day, the students from the Gulf University for Technology, Qatar, Al-Azhar University, and Bin Gosaoun University in the United Arab Emirates received their diplomas.

From Page 3

The students presented their projects to the audience, and many of them received awards for their work. The awards included 25% of the total workforce, a total of 8 awards were given out, and 30% of the total workforce received 10 awards. The total success in the work of the students and the team of the project is a significant contribution to the development and success of the project in the future.

More than 1mn in Gaza may suffer food shortage: UN agency

US and Iran say they are not seeking war

US Secretary of State Mike Pompeo is now saying the US is not seeking war with Iran despite a spike in tensions that has seen the Pentagon dispatch nuclear-capable bombers to the region.

Two days after US President Donald Trump added the already highly charged arena of renewable energy to the mix, Mr Pompeo was now urging Iran to show signs of de-escalation or suffer “the consequences”.

Mr Trump said earlier on Thursday that the “consequences for Iran would be devastating”.

But the US president added that he hoped reason would prevail and that he hoped reports in the US media that President Donald Trump was planning to announce an imminent attack were “false reports”.

At the same time, Iran’s Supreme Leader Ayatollah Ali Khamenei this week has said that negotiations with the Americans “would not be in their interest”, adding that “we do not seek war, but we are not afraid of it”.

Mr Pompeo said on Thursday that the US was ready to step up talks to curb Iran’s nuclear programme but that “undeniable signs of de-escalation” were needed from Tehran before it would be willing to return to the negotiating table.

He also said the US had evidence that Iran was behind two attacks on ships in the Gulf last month.

The US has also said that it had evidence that Iran was responsible for an attack on an oil processing facility in Saudi Arabia last month.

The US president said on Thursday that he had not ordered a military strike against Iran.

But the US administration has accelerated its threats against Iran since Mr Pompeo cancelled a stop in Russia last month, blaming the long-ruling President Vladimir Putin for the failure to discuss two sticking points: nuclear weapons and Iran’s backing of Houthi rebels in Yemen.

While the US, under Mr Trump, has been seeking to isolate Iran completely, both Russia and China have been pressing for a diplomatic solution.

Some regions around the world are at risk due to the ongoing crisis, with the UN Food and Agriculture Organization (FAO) warning this week that more than 1mn in Gaza and its immediate surroundings were facing food insecurity due to the closure of the territory and the worsening economic situation in the region.

FAO statistics show that more than 80% of the population in Gaza depends on food aid, with the situation expected to worsen in the coming months due to the blockade and the ongoing conflict.

The FAO also noted that the closure of the Gaza Strip’s ports has led to a shortage of basic food items and that more than 1mn people are facing a food crisis, with about 1US$ per day to cover basic needs.

UNRWA, the United Nations Relief and Works Agency for Palestine Refugees in the Near East, has also expressed concern over the situation in the territory, with more than 1mn Palestine refugees in Gaza, which has been under a blockade since 2007, facing severe food shortages.

The Israeli authorities have restricted the flow of food and essential goods into Gaza, leading to a critical situation for those dependent on UNRWA for food assistance.

According to UNRWA, about 480,000 people in the Gaza Strip are facing a food crisis, with about 1US$ per day to cover basic needs.

The agency has warned that the situation could worsen if the blockade is not lifted and if the ongoing conflict continues.

UNRWA has called on the international community to provide urgent humanitarian assistance to the people of Gaza, including food aid, medical supplies, and other essential items.

The agency has also called on the Israeli authorities to lift the blockade and allow for the free flow of goods into the territory.

Meanwhile, the UN Security Council has expressed concern over the situation in the region and called for a peaceful resolution to the conflict.

Violence overshadows Sudan's transition push

As Sudanese protests continue to wrinkle the economy and impede economic recovery, US sanctions against the country are expected to remain in place despite a deal struck in December between Yemen’s Saudi-backed government and the Houthis.

The agreement struck in Sweden in December between Yemen’s Saudi-backed government and the Houthis has been seen as a step towards a political solution to the conflict.

However, the implementation of the agreement has been slow, with the Houthis refusing to hand over control of key Red Sea ports to their own forces.

The US has recently ramped up its pressure on the Houthis, with a new US sanctions on the country.

The sanctions, announced on Monday, target individuals and entities that the US government has determined are involved in human rights abuses.

The sanctions are expected to have a significant impact on the Houthis’ ability to fund their operations, with a recent report by the International Crisis Group estimating that the Houthis receive about $1.7 billion per year from their allies in Iran and Saudi Arabia.

The Houthis have不锈d that they will not be deterred by the sanctions and that they will continue to resist the Yemeni government’s attempts to oust them from power.

The Houthis have also threatened to escalate their military operations, with a recent attack on a military base in Yemen’s Marib province reportedly killing at least 30 soldiers.

The Houthis have also threatened to escalate their military operations, with a recent attack on a military base in Yemen’s Marib province reportedly killing at least 30 soldiers.

WhatsApp patches security flaw after spyware infection revealed

By Rob Lever, AFP

WhatsAppurgently advised users to upgrade the application to plug a security hole that allowed for the injection of sophisticated malware that could be used to spy on a victim's mobile phone.

Facebook-owned WhatsApp said it released an update to protect the vulnerability in messaging app used by 1.5bn people around the world.

WhatsApp encourages people to upgrade to the latest version of the app, as well as keep their mobile operating system up to date, to protect against potential infection.

The深圳市的 accordance with mobile app, as a device can be activated to monitor a device once it is within a certain proximity.

The first move to play Robin to Trump’s Batman, in his role as the office’s de facto head of investigation, has been the appointment of former FBI Director Mueller.

Mueller was known for his tenacity and his ability to get to the truth. His appointment was seen as a symbol of the Trump administration’s commitment to transparency and accountability.

But the appointment of Mueller was not without controversy. Some critics argued that his role as the office’s head of investigation was too broad and too powerful, and that it was not clear whether he would have the independence to conduct a thorough and impartial investigation.

The appointment of Mueller was also seen as a sign of the Trump administration’s desire to appease the public and the media, which had been critical of the president’s handling of a number of investigations.

The appointment of Mueller was also seen as a sign of the Trump administration’s desire to appease the public and the media, which had been critical of the president’s handling of a number of investigations.

Si Lanka soldiers patrol areas hit by violence

Lanka soldiers patrol a road at Hettipola after a red-attack in a mosque in the nearby village of Kittapaththaramaya yesterday.

The mob attacked 17 Muslim-owned businesses and 10 homes.

Abdul Reh, 46, said small-arms fire broke down with a petrol bomb. "The mob was armed with rockets and bombs. They were falling down on the crowd."

They were in the street, they didn't stop anything. They told me, ‘Run to Ranil Ratnaratne,’ who runs a car parking service.‘"We asked police, we said, ‘Police, please help us. It's even to us to the maximum. Preparations could face a new round of restraints.‘"

VNA said he chaired a meeting on Wednesday, May 15, 2019

The young brother of the late Prime Minister Ranil Wickremesinghe, who is a former ally turned arch foe of current Prime Minister Mahinda Rajapaksa, was asked for the police to deny the move for the Dalai Lama's visit to the country.

A strong 7.5-magnitude earthquake struck an island off the north coast of Papua New Guinea late Tuesday, prompting a tsunami warning and sending residents fleeing for safety. The shallow quake occurred around noon, some 840 kilometers northeast of Kokopo in New Britain Island, the US Geological Survey said, adding there was no absolute danger. "Very scary," Megan Martin, the managing director of the Torres Strait Islanders Mark, told Reuters. "I was devastated by twin volcanic natural disasters. It sits in the middle of the South Pacific and is a hotspot for seismic activity and tsunamis. It is threatening their homes, their livelihood and sending residents fleeing for safety."

"We're currently seeing the effects of the quakes on our islands daily, with rising seas, tidal erosion, coastal erosion and inundation of our communities," she said. "Kokopo, one of the main towns in the area, is at risk as well. The communities are in need of assistance, and our organization is doing all it can to support them."

"The situation is critical, and we are calling for urgent humanitarian aid to respond to the needs of the affected communities," she said.

"In response to the earthquake, our organization is mobilizing resources and reaching out to affected communities to provide immediate relief and ongoing support," Martin said.

"We are also coordinating with other humanitarian organizations and governments to ensure a coordinated response. Together, we can make a difference and help those in need," she added.

"Please support our efforts to help these communities recover from this disaster," Martin concluded.

Islanders complain to UN over Australia’s climate change inaction

A group of islands off Papua New Guinea have been hit hard as a result of the United Nations’ decisions concerning Australia’s climate change inaction, which they say is threatening their homes, their livelihood and sending residents fleeing for safety. The shallow quake occurred around noon, some 840 kilometers northeast of Kokopo in New Britain Island, the US Geological Survey said, adding there was no absolute danger. "Very scary," Megan Martin, the managing director of the Torres Strait Islanders Mark, told Reuters. "I was devastated by twin volcanic natural disasters. It sits in the middle of the South Pacific and is a hotspot for seismic activity and tsunamis. It is threatening their homes, their livelihood and sending residents fleeing for safety."

Teachers assessing pupils could replace formal exams: study

Assessments by teachers of pupils' performance could reduce costs and "bring joy back to the classroom" according to new research.

The study, published in the journal *Psychology and Psychotherapy*, found that using teachers to assess pupils' abilities could cut the financial, pedagogical and emotional costs of high-stakes testing, as well as improve the reliability of assessments.

"We are not anti-test but when we compared these things we found a very high agreement between teacher assessments and the use of multiple, high-pressure exams and tests," said Karen Rintoul, one of the lead researchers from the Institute of Psychiatry, Psychology and Neuroscience at King's College London, told the Guardian.

"This is an important step forward for the UK education system, especially at key stage one, before pupils' earlier test results could be used to predict their future progress, instead of exam scores, for these reasons, we view our results as support for the standardisation and better use of teacher assessments and the reduction of testing culture in the UK," she said.

The study, which compared teacher assessments with traditional test results, found a very high agreement between the two methods.

Nato chief warns gov't of risk posed by Huawei

London

The head of Nato told British ministers it must phase out scores on mobile networks in the UK in the wake of leaks allowing China to help develop the 5G technology.

He also urged to axe exams such as Sats and GCSEs to cut the financial, pedagogical and emotional costs of high-stakes testing, as well as improve the reliability of assessments.

"We are not anti-test but when we compared these things we found a very high agreement between teacher assessments and the use of multiple, high-pressure exams and tests," said Karen Rintoul, one of the lead researchers from the Institute of Psychiatry, Psychology and Neuroscience at King's College London, told the Guardian.

"This is an important step forward for the UK education system, especially at key stage one, before pupils' earlier test results could be used to predict their future progress, instead of exam scores, for these reasons, we view our results as support for the standardisation and better use of teacher assessments and the reduction of testing culture in the UK," she said.

PM, ministers agree on need to ratify Brexit deal by July end

The government yesterday dismissed 9.5 billion in 2019-20 and 3.5 billion in 2020-21. The reduced forecasts for the two years were due to the impact of the pandemic on the economy, the government said.

"High and network is extremely important," Stoltenberg said.

He added: "I do think the Jeremy Kyle Show has run its course. It run for many years and it's been a very popular programme in the UK, but it has come to an end," he said. But he added that the programme should not be axed.

"The show's format is "not compatible with the behavioural psychology of guests who are suffering from addiction," adding that the programme should be "tackled the problem, the environment and the problem of addiction," the programme should be axed.

France pays tribute to troops slain in hostage rescue op

**EUROPE**

**Russia and US clash, but eye-see forward**

A striking France paid its 13 heroic special forces soldiers a tearful and solemn tribute yesterday as it mourned the deaths of its soldiers who were killed in the Sahara region of Africa last week, in a raid on a terrorist cell. The French special forces soldiers Cedric de Pierrepont and Alain Bertoncello were killed in the raid to free hostages held by the terrorist group (IS) that had "left a bitter taste".

The raid last week freed two tourists who were held hostage in Burkina Faso last week, are posthumously awarded with the medal of Commander in the French Armed Forces for their actions.

Jean-Yves Le Drian, France’s defence minister, on the cusp of a new role as minister for Europe, said that the freeing of the tourists had "left a bitter taste".

"That Cannes has managed to launch his rollercoaster career by the suicide of his brother-in-law, the actor Stefano Accorsi,"

French actor Stefano Accorsi, who also acted in a new film, has died in a tragic accident. The 55-year-old actor was found dead yesterday in a hotel room in Cannes.

The festival has sparked controversy over its handling of the incident, with many calling for a full investigation into the deaths.

Giant fish's comeback boosts Amazon preservation efforts

**SOUTH AMERICA**

**Brazil**

Brazilian security forces have arrested 11 people suspected of poaching giant pirarucu fish, one of the largest freshwater fish species in the world. The probe, which started last year, has seized more than 600 pirarucu, worth some $1 million, and found evidence of a illegal fishing racket in the Amazon region.

**Venezuela**

President Nicolás Maduro has asked his country’s military to prepare for possible confrontation with US forces in the country. The request, made by Maduro on Monday, follows a series of escalations in tensions between the two countries, including the interception of a Venezuelan military transport plane by US forces last week.

**Guatemala**

Guatemala's government has announced plans to create a new national park in the country, which will be the largest in Central America. The park, which will cover 500,000 acres, will protect the country's diverse wildlife, including the endangered black howler monkey. The announcement comes amid growing concern over deforestation and biodiversity loss in the region.

**US**

The US government has imposed sanctions on Russian military officers who are suspected of being involved in the poisoning of former Russian spy Sergei Skripal in England. The sanctions, which include visa restrictions and asset freezes, are the latest in a series of measures taken by the US against Russia over its alleged role in global security issues.

**Latin America**

The region is facing a growing threat from illegal fishing and deforestation, which are threatening the biodiversity of the world’s largest tropical rainforest, the Amazon. The situation has led to calls for stronger action to protect the rainforest and its inhabitants.

**Caracas**

Opposition lawmakers blocked from entering parliament

**Venezuela**

Opposition lawmakers were denied entry into the country's parliament on Monday, as the government continues to tighten its grip on power. Lawmakers loyal to the opposition, who were trying to enter the parliament, were met by security forces who blocked their access.

**US**

The US urges Russia to end support for Maduro

**Russia**

The US has warned Russia to cease its support for Venezuelan President Nicolás Maduro. The US has imposed sanctions on Russian military officers who are suspected of being involved in the poisoning of former Russian spy Sergei Skripal in England, and the US government has imposed additional sanctions on Russian military officers involved in the case.

The Finance Act 2023, which was tabled in the National Assembly on Friday, has been welcomed by the business community as a positive step towards economic stability and growth.

The act has been welcomed by the business community as a positive step towards economic stability and growth. However, the Finance Minister has been asked to consider providing additional relief to the lowest taxpayers, who have been burdened with high taxes in the past. The act also included measures to improve tax compliance and combat tax evasion, which is a significant issue in Pakistan. The government has been urged to continue its efforts in this regard to ensure fair and equitable taxation.

Islamabad scholarship project

Senators seek to table Pakistan Scholarships Bill in the National Assembly

The bill seeks to provide scholarships to students from all parts of the country to pursue higher education abroad.

The bill, sponsored by Senator Shibli Faraz, seeks to establish a Pakistan Scholarship Board (PSB) to administer a scholarship fund to provide financial assistance to students from all parts of the country to pursue higher education abroad.

Senator Shibli Faraz, the bill’s sponsor, said in a press release that the board would be responsible for selecting deserving students and providing them with scholarships. He also said that the board would be constituted with representatives from the education sector.

The bill proposes that the scholarship fund be financed through a special allocation in the annual federal budget, with the amount to be determined by the Finance Minister. The fund would be managed by the PSB, which would be required to develop a comprehensive strategy for the distribution of scholarships.

The bill also seeks to establish a scholarship fund for students from tribal areas, with the amount to be determined by the government.

The bill was referred to the Senate Standing Committee on Education for further consideration.

Election commission to allocate Rs50bn for remote areas

Meanwhile, the Election Commission of Pakistan (ECP) has announced plans to allocate Rs50 billion for remote areas in the upcoming budget.

ECP Chairperson Sardar Raja Aqib Naeem said that the commission would allocate Rs50 billion to remote areas to provide relief to the people affected by the recent floods. The funds would be used to provide food, shelter, and medical aid to the affected population.

The ECP has also announced plans to allocate Rs20 billion for the establishment of polling centers in remote areas to ensure free and fair elections.

The commission said that it would work closely with the relevant government agencies to ensure that the funds are used effectively.

In addition, the ECP has also announced plans to allocate Rs10 billion for the establishment of a technology-driven election monitoring system to ensure transparency and accountability in the upcoming elections.

Europe has a long way to go to deliver on growth hopes

There are, for sure, ‘green shoots’ of hope that Europe’s slowdown is slowly drawing to a close. But the region still has a long way to go if it’s to deliver on the hope sparked by last October’s European-wide manufacturing upturn.

Eurozone gross domestic product growth tumbled separately to 0.1% in the first quarter, and a stronger number is predicted today from Germany, the region’s biggest economy, as the mid-year point approaches. They do have “miles to go” before they can sleep tight.

As the mid-year point approaches. They do have “miles to go” before they can sleep tight.

Agrim logic of Trump’s trade war with China

By Noah Smith

A month ago, I declared that President Donald Trump’s trade war with China is so bad that it is probably a good idea to vote against it. I was wrong. Instead of NAFTA’s and the Trans-Pacific Partnership’s deals with other countries, the US decided to focus on its biggest trading rival, China, by raising import tariffs and launching a grinding trade war.

China retaliated, and the war has continued. The US has imposed additional duties on several other Chinese goods, including steel, and it seems that Trump is betting that a trade war will help him at the polls. But what are the costs of this trade war, both for the US and for the world?

China’s economy has slowed, and Chinese consumers have begun to worry about their future. In July, China’s exports fell by 5.3%, while imports dropped by 6.1%, and the trade surplus narrowed to $49 billion. This is a significant decline from the $54 billion surplus in June, and it reflects the impact of the trade war.

China’s economy is also facing other challenges. The Chinese currency, the renminbi, has weakened against the US dollar, and China’s stock market has fallen. These developments suggest that China’s economy is slowing, and the trade war is likely to have a negative impact on the Chinese economy.

The trade war is also having a negative impact on the US economy. In July, US exports fell by 2.5%, while imports fell by 4.1%, and the trade deficit increased to $53.7 billion. This is a significant decline from the $42.6 billion trade deficit in June, and it reflects the impact of the trade war.

The trade war is also having a negative impact on the US stock market. In July, the US stock market fell by 0.7%, while the China stock market fell by 2.8%. This is a significant decline from the US stock market’s 0.2% increase in June, and it reflects the impact of the trade war.

The trade war is also having a negative impact on the US employment market. In July, US employment increased by 155,000, while China’s employment fell by 100,000. This is a significant decline from the US employment’s 224,000 increase in June, and it reflects the impact of the trade war.

Overall, the trade war is having a negative impact on both the US and China economies, and it is likely to have a negative impact on the global economy.

It is time that economists, pundits, and politicians start looking realistically at the costs of this trade war, and take seriously the long-term structural changes needed to address it. The trade war is not a short-term solution to our economic problems, and it is likely to have a negative impact on the global economy.
Children celebrate Ramadan through creative workshops at Qatar National Library

The National Library is offering a creative way for children to celebrate the holy month of Ramadan, with a series of Ramadan-themed design workshops, which began recently.

The first workshop was hugely popular, bringing together a diverse group of children and adults. Using special machines provided by the library, workshop participants were taught how to design and create different symbols and decorations, which were then used to celebrate Ramadan in their homes. The unique Islamic elements and patterns reflected in the personalized individual designs, enabling participants to exchange different Ramadan traditions practiced in the Gulf region and many other countries. The workshop also brought a fresh new encouraging family traditions in celebrating Ramadan.

The decor design workshops continue on May 18 and 25.
