Qatar to take part in 2020 Copa America

Qatar, who are taking part in the Pan-American Games this year, will feature in the event for the first time. The Asian champions Qatar and runners-up Paraguay have already booked their place at the tournament beginning July, where Qatar will face Paraguay on Friday.

"We have decided to enter...to participate in our competitions the current Asian champions and the previous ones," said Alejandro Dominguez, the president of South America Football Confederation. "Qatar are the last champions of the Copa America."

CONMEBOL, who has decided that the Copa America usually features 12 teams meaning there are a pair of venues to the tournament.

Amidst the emirate's $25 billion sports development, the Games is also to feature 12 teams with the governing body allowing 10 different teams to take part in the event. The Gulf countries will be able to host the event from January 2022 to January 2023.

US blames Iran as Tehran calls tanker attacks suspicions

Qatar condemns attacks, calls for international probe

The new diplomatic push came as US efforts to reach a political settlement in Sudan began to fade, with the US envoy to Sudan, Donald Booth, saying the world "cannot afford" a "civilian catastrophe" in the country.

He warned that the world cannot afford "a civilian catastrophe" in the Gulf region.

The Saudi-led military coalition, which is battling the Iran-aligned Houthi rebels in Yemen, has already blocked the Strait of Hormuz, a crucial chokepoint to the world's oil supplies, putting a strain on the global economy.

"We are finally taking a stand against Iran's attacks on the world's oil supplies," said US Secretary of State Mike Pompeo.

Qatar Airways recently partnered with QNTC to offer passengers up to 25% discount on airfares for all flights, as well as flights to the Gulf region, in a move to boost Qatar's tourism sector.

Qatar is currently hosting the Volleyball World Tour, which is being held in the capital, Doha. The event began on Thursday and will run until Saturday.

"We are finally taking a stand against Iran's attacks on the world's oil supplies," said US Secretary of State Mike Pompeo.

Qatar has been a vocal critic of Iran's behavior in the region, and has repeatedly called for an end to attacks on shipping in the Gulf.

Minister visits schools to assess exam process

As summer exams are about to commence, Minister of Education and Higher Education Dr Mohamed Abdulwahab Al-Attiya arrived at the secondary school, Bin Abdulwahab Secondary School, to assess the exam process.

The minister hoped that the coming exams will be smooth and without any obstacles for students to adhere to the rules and regulations and protect their educational achievements. He also hoped that students and educators will improve their capabilities and enhance their learning by using the opportunities available in them.

The minister visited the school yesterday for the second time this year as part of the ministry’s efforts to ensure the quality of exams and to enhance the educational experience of students.

The ministry issued directives in September 2018 concerning the procedures and regulations to ensure that all exams are conducted in a fair and equal manner and that students are able to achieve their best performance.

The minister emphasized the importance of fair exams and called on students to be active and confident, particularly during the exam period, to ensure the quality of their performance.

The minister also called on students to support their colleagues who are facing difficulties and to assist them in achieving their goals.

Qatar Chamber holds meeting with Peru trade delegation

Qatar Chamber held a meeting with a trade delegation from Peru who are on a visit to Qatar to strengthen trade and investment relations between the two countries.

The delegation was led by the Board of Directors of the National Chamber of Commerce (CNC) and the National Federation of Chambers of Commerce and Industry (FEDERCAMAS) of Peru.

During the meeting, the Qatari and Peruvian officials discussed the potential for trade and investment opportunities between the two countries, particularly in sectors such as energy, construction, and logistics.

The Qatari officials highlighted the growth of Qatar’s economy and the state’s commitment to developing partnerships with international companies.

The Peruvian delegation expressed interest in learning more about Qatar’s market and exploring potential investment opportunities in areas such as energy and infrastructure.

The meeting also provided an opportunity for the two sides to exchange views on current global trade issues and the role of multilateral organizations in promoting free trade and investment.

The meeting concluded with the expectation of future collaborations and the strengthening of economic ties between Qatar and Peru.

E-visa system to attract more visitors to Qatar

From Page 1

This year’s programme promotes Qatar’s traditional culture, indoor activities and outdoor experiences, fan for family and friends. Entertainment programmes will feature regional and international artists, exhibitions, dramas, cinema, a variety of food and leisure activities in local markets, leisure and shopping.

New visit-walk malas across India will be participating in the festival, offering retail savings of up to 50% and a chance to win exclusive prizes for those who participate in the event.

Qatar Museum will also offer cultural experiences, offering guided viewing to interesting themselves in Qatar’s rich heritage and cultural scenes. Song Wafq and Culture Village – The Cultural Village is another attraction for your visit.

Visitors to the festival can also enjoy the traditional Qatari coffee and camel racing, as well as enjoying the scenic views of the desert and the water features.

Qatar reafirms its keenness to empower persons with disabilities

Qatar reaffirms its keenness to empower persons with disabilities.

Minister of Social Development and Labor, Dr Abdulaziz bin Hamad Al-Attiya, said the ministry is committed to ensuring the rights of persons with disabilities and promoting their integration into society.

The minister said the ministry is working on implementing projects and programs to enable persons with disabilities to live in dignity and independence, including Qatar’s National Strategy for Persons with Disabilities.

The minister said the ministry will continue to work on projects and programs to ensure that persons with disabilities have equal rights and opportunities. He also highlighted the importance of raising awareness about the rights of persons with disabilities and the importance of involving them in all aspects of society.

The minister called on all stakeholders to join forces to ensure that no person is left behind and to promote the rights of persons with disabilities. He also called on the international community to support the efforts of the ministry and to work towards the elimination of all forms of discrimination against persons with disabilities.
Iran leader rejects Trump talks despite Japanese PM’s mission

Iran’s Supreme Leader Ayatollah Ali Khamenei has rejected a proposal from Japan’s prime minister to hold talks with President Trump, according to reports.

The Japanese prime minister, Shinzo Abe, had expressed a desire to meet with Khamenei during his recent visit to Iran, but the Iranian leader said he would not meet with Abe.

Khamenei cited the US’s support for Israel and its involvement in regional conflicts as reasons for his refusal.

“Japan’s interest in continuing contacts with Iran and easing tensions is a guarantee for the ongoing development of bilateral ties,” Khamenei said in a statement.

Sporadic Iran-Japan foreign relations, Takeda Osamu, earlier in the week.

Abe had reportedly asked Khamenei to let him meet with Trump, despite the US’s demand for a ceasefire in the region.

US President Donald Trump has been pressing for a deal with Iran, but Khamenei said he was not interested in talks.

The US has imposed sanctions on Iran, including on its oil exports, in an effort to force the country to abandon its nuclear programme.

Abe’s visit to Iran was seen as a possible sign of warming ties between the two countries, but Khamenei’s rejection means that any such hopes are likely to be dashed.

Iran-US relations have been strained for years, with both sides accusing the other of violating international agreements.

The nuclear deal between Iran, the US, and five other powers was signed in 2015, but US President Donald Trump withdrew from the agreement in 2018, leading to a series of sanctions against Iran.

Abe’s visit to Iran was seen as an opportunity for the two countries to improve relations, but Khamenei’s rejection means that any such hopes are likely to be dashed.

**Kenya to hike capital gains tax to shore up revenues**

Kenya’s National Assembly has increased the capital gains tax rate to 12.5% from 5% in line with international standards. Finance Minister Henry Rotich said yesterday that proposals to generate more tax revenues are needed.

In a statement read out in the House, Mr Rotich said that investors have been complaining that the current tax rate is too low and that it is driving them away from the country.

He said that he had proposed to increase the tax to 12.5% to ensure that investors are incentivised to invest in the country.

The Finance Ministry has also proposed to introduce a 5% excise tax on cigarettes and tobacco products, and a 10% tax on the sale of sugary drinks.

Mr Rotich said that the government had also proposed to introduce a 10% tax on the sale of sugary drinks, which he said was a major contributor to the country’s health problems.

He said that the government had also proposed to introduce a 10% tax on the sale of sugary drinks, which he said was a major contributor to the country’s health problems.

Mr Rotich said that the government had also proposed to introduce a 10% tax on the sale of sugary drinks, which he said was a major contributor to the country’s health problems.

Trump under fire for saying ‘OK to use foreign intel’ on opponents

By Sebastian Smith, AFP

WASHINGTON -- President Trump is facing calls to resign after he revealed that his administration used foreign intelligence on opponents.

White House lawyers told Trump that his comments yesterday about the principle of using foreign intelligence "is a violation of the law," according to people familiar with the matter.

Trump's comments came in a rambling conversation with ABC interviewers George Stephanopoulos and Martha Raddatz on "This Week." Trump praised foreign sources as valuable allies for the US government.

"There's nothing wrong with having relationships with foreign leaders," Trump said.

"You have to be able to use a great phone and have great phone calls, and I use a great phone," Trump added.

Trump's comment has raised concern among Democrats and former government officials.

"Our governments on political opponents have an inherent right to use dirt provided by foreign governments on political opponents," said Schumer, speaking in a procedural vote on Capitol Hill.

Trump defended himself yesterday, saying Trump's comments were "taken out of context" and that there was "nothing wrong with having relationships with foreign leaders." Trump called his conversation with ABC "the best TV appearance he's ever had." Trump said he and his team had been working for "three and a half years" on the Russia story.

Trump's comments come as the US special counsel's investigation continues to outline the Russia probe.

Trump's comments come as the US special counsel's investigation continues to outline the Russia probe.

"I'm not saying there was a conspiracy," Trump said. "But I can tell you there's nothing here." Trump added that his comments were not "a confession." Trump said he had "had a lot to do with" the Russia probe, which was investigated by the special counsel.

Taiwan President Tsai defeats challenge from party primary

Taiwan President Tsai Ing-wen has won a bitter campaign to lead the Democratic Progressive Party (DPP) in the November election, according to exit polls. Despite a strong challenge from friendly candidate Lai Ching-te, Tsai is expected to navigate the party through the nationwide debate on cross-strait relations.

Tsai’s re-election campaign faced a tough test. Lai, who opposes the One-China principle, was expected to gain support from the pro-China segment of the population.

Tsai said she would continue to promote cross-strait dialogue, while Lai advocated a hardline stance.

"Our government will continue to protect Taiwan’s sovereignty and national dignity," Tsai said. "We will never give up the goal of reunification with the mainland, but we will do so in a peaceful manner."
BBC's £2bn pension hypocrisy raises hacks

D avid McAllister

B BC's £2bn pension debt might well vanish in a single day on Thursday, August 8, when the corporation is expected to ask MPs to vote through a resolution that would turn a profit on what it had written off as a £2.4bn black hole. If the MPs agree to the resolution, the UK government will hand over £2bn in cash to the BBC to backdate pension contributions for past years, which will be used to meet the corporation's pension obligations. If the MPs do not agree to the resolution, the BBC could face a financial crisis with a black hole in its pension scheme. The government has previously said that it will not contribute to the pension scheme, but a court ruling has since ruled that the government must contribute. The BBC has been forced to cancel plans for a new theme park called "BBC World" in order to fund the acceleration of its pension liabilities. The corporation has also been forced to make further cuts to its budget and to cancel plans for new programmes and initiatives. The government has been criticized for its decision to prop up the pension scheme, which it has described as "ill-conceived" and "dangerous." The Dharmic community has been particularly critical of the government's decision, with the British Council and the BBC both expressing concern that the government was not doing enough to support the community. The government has辩称 that the policy is necessary to protect the pension scheme, which it says is underfunded, and to ensure that it can continue to operate. The Dharmic community has been critical of this argument, with some arguing that the pension scheme is well-funded and that the government should not be intervening in it. The Dharmic community has also criticized the government for its handling of the crisis, with some arguing that it has been slow to respond and that it has not done enough to support the community. The government has辩称 that it is doing its best to support the pension scheme, and that it is working closely with the BBC to ensure that it can continue to operate. However, the Dharmic community has been critical of this, arguing that the government is not doing enough to support the community and that it should be doing more to help. The situation is complex, with the government and the BBC both arguing their case. The Dharmic community is likely to continue to be critical of the government, and will be watching closely to see how the government deals with the pension crisis.
Putin sacks top cops over journalist’s drugs arrest

Top German court has ruled that the killing of male chicks is only allowed during a short window at the end of incubation at the Agriculture Fair in Paris. Germany’s highest court has ruled that the business practice should be suspended, but two hatcheries sued. The state of North Rhine-Westphalia has filed a complaint against the business. The business would be required to change its operating practices as a result. The business is currently being investigated by the police. The business is accused of sexual harassment or discrimination.

**Shah to stay as BJP chief till next round of elections**

TheBJP has not officially declared whether Shah will continue as party chief or if he will be considered for another term.

The main opposition Congress party, which has been divided over the choice of its leader, has not yet announced its stance on the matter.

The election of the next leader of the Congress party will be held in the coming months, and it is expected that the winner will be announced shortly.

The BJP has been facing internal strife and  many leadership changes in recent years, and it is likely that the election of the next leader will be a major focus for the party in the coming months.

The Congress party, on the other hand, has been struggling with a lack of leadership and has been divided over the choice of its leader.

It is expected that the winner of the Congress party election will be announced in the coming months, and it is likely that the party will face internal strife in the months to come.

The results of the election will have a major impact on the political landscape of India and will determine the future of the Congress party.

It is expected that the election will be a major focus for the Congress party in the coming months, and it is likely that the winner will be announced in the coming weeks.

The results of the election will have a major impact on the political landscape of India and will determine the future of the Congress party.

Pakistan’s Kalash battle tourism deluge

By JUBEEN SHER MIR, Reuters

Kalash women dancing in front of a banner that says “We want to be part of this culture” in a village in Pakistan’s Swat Valley. (Reuters)

Pakistan's Kalash Valley, a remote valley in Pakistan, is home to the Kalash community, a group of people who are known for their distinct culture and traditions. The Kalash are famous for their pale skin and unique attire, and they have a rich history that has been preserved over generations.

The Kalash are known for their unique traditions, which include a ban on the wearing of veils and the practice of polygamy. They are also known for their love of music and dance, and their close relationship with nature.

The Kalash have been known to face persecution and violence from both the Pakistani government and neighboring tribes. In recent years, the Kalash have been the target of a campaign to force them to adopt more “modern” lifestyles and abandon their traditional practices.

Despite this, the Kalash remain resolute in their commitment to their culture and traditions, and they continue to fight for the recognition and protection of their heritage.

Emergency health unit established at Swat Valley

The district administration in Swat Valley has established an emergency health unit in an effort to provide better healthcare to the residents of the area.

The emergency health unit was set up in response to the increasing number of cases of COVID-19 in the district. The unit will provide medical treatment to patients suffering from the disease, as well as to those who have been exposed to the virus.

Pakistan Railways to reconstruct and repair bridges

Pakistan Railways is planning to reconstruct and repair 112 bridges across the country in an effort to improve the safety and reliability of the railway network.

The reconstruction work will involve the replacement of existing bridges, as well as the construction of new ones in areas where the existing bridges have been damaged or destroyed.

The work will be carried out by a team of experts who will use modern construction techniques to ensure the safety and durability of the new bridges.

The reconstruction of the bridges is a part of the government’s Plan of Action for the Development of Railways, which aims to improve the efficiency and competitiveness of the railway system in Pakistan.
The excellence of Islamic knowledge

Al-Habib said: “Allah (swt) is the most worthy of worship, except for Allah there is no deity worthy of worship but Allah then seek knowledge of Allah (swt) without knowledge.” [Regarding knowledge of Allah (swt) as one of the most important obligations on every Muslim], the Messenger (saw) ordered his companions: “Whoever of you will not seek knowledge will not be of benefit to Allah (swt) until he seeks knowledge.” [Al-Qur'an 3:187]. “Allah (Himself) is the Lord of the most glorious throne (2:225).” Therefore Allah (swt) says: “V eryly, Allah forgives not (the sin of) almsgiving (charity) with the heart (willingly). But He forgives (sins) others than that (who wish to be forgiven).” [2:283].

Allah said: “Allah guides a man through your help, and those who believe and do righteous deeds will be the nearest to Allah (swt).” [3:154].

Allah said: “What is implied here is teaching and expounding. Allah (swt) is the Lord of the most glorious throne.”

Allah said: “And He is the Most Forgiving, Most Merciful.” [39:9]

Allah said: “... And that the action of the heart, which is the belief in Allah and the hereafter is a compulsion on every Muslim (3:152).”

Allah said: “Verily, Allah forgoes not the setting up of worship in Him, but He forgives (sins) of lesser degree than that (which He forgives) (3:18).”

Allah said: “There is no deity worthy of worship except Allah (swt).” [11:28].

The Ayrat Yasar Mosque at sunrise in the West Bank City of Nablus.

The Qur’anic verse demands that those who believe and do righteous deeds will be the nearest to Allah (swt). [3:154].

The Qura’nic verse demands the Muslims (and all of humanity) to seek knowledge of the unseen and the known, each one must concentrate on and as such we find them put a priority on a knowledge which is compulsory on every Muslim (3:154).

The Messenger of Allah (saw) said: “Seeking knowledge is a compulsion on every Muslim.”

The Messenger of Allah (saw) said: “There is no difference between two persons who have knowledge of Allah (swt) and one who has marital relations with a woman.”

The Messenger of Allah (saw) said: “Seeking knowledge is a compulsion on every Muslim.”

The Messenger of Allah (saw) said: “Verily, Allah forgives not the setting up of worship in Him, but He forgives (sins) of lesser degree than that (which He forgives) (3:18).”

The Messenger of Allah (saw) said: “There is no deity worthy of worship except Allah (swt).” [11:28].

Allah said: “Our answer to them is that ‘...But He will call you to account for what you have earned...’ (49:10).”

Allah said: “Verily, Allah forgives not the setting up of worship in Him, but He forgives (sins) of lesser degree than that (which He forgives) (3:18).”

Allah said: “... But He will call you to account for what you have earned...” (49:10).
Unaccompanied migrant minors deserve respect

There is no question that the refugee crisis on the US border area is a humanitarian crisis. But one should also agree that unaccompanied migrant minors in federal shelters should be treated with basic human respect and decency. That is the people’s way of saying that the Trump administration on the verge of making a horrible situation worse has decided to add to it. The administration has decided to make the already vulnerable situation even more intolerable. The Office of Refugee Resettlement has to seek help at the US border. Now the humanitarian crisis of unaccompanied migrant minors is straining federal custody. There’s a lot wrong with this, both morally and prudently. The cutback would violate a more than two-decades-old federal court settlement and state licensing requirements that require education and recreation for unaccompanied minors in federal custody.

Besides, what is there to be gained by taking away structured activities and state assistance available for young migrants who already fear the invisible scars of a journey to escape violence? It doesn’t matter that these are migrants from another nation, or how they got there. Ask child welfare experts, and they will tell you that the administration’s action would threaten the medical and psychological health of already vulnerable children.

It is more difficult for minorities to obtain legal aid even in a greater tragedy. What adult can afford a legal attorney? Why should children, some as young as 13 and already traumatized, face the prospect of going it alone in an immigration听 hearing?

Legal representation doesn’t mean that minors will get to see an attorney; there are no attorneys to advocate on their behalf, or assist in their return to their home country if they can’t qualify for asylum. It is not the federal government owns this problem, which has begun with the administration’s ill-advised family separation policy to discriminate from making the treacherous trek through Mexico and into the US. Children should be treated with basic human respect and decency.

Why should children face the prospect of going it alone in an immigration hearing?

Doha tapped as 2019 Capital of Islamic Youth

Doha has been selected by the Organisation of Islamic Cooperation (OIC), the 57-member international body representing 202穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆穆ム

The Charter also refers to participation in Islamic economic co-operation and trade. Presently, numerous opportunities exist across multiple categories, including awareness programmes, social, education, medical, tourism, sports, and arts, appealing to youth with differing backgrounds in the country. As the host of the OIC Youth Capital, Qatar’s efforts will continue for measurement and for the near future.

The Youth Capital of Islamic Youth is an ideal opportunity to bring together young Muslims to be stronger leaders in global society. In order to provide additional platforms for engagement under a singular mission—seven axis—Qatari organisations are determined to be an engine of global Islamic innovation, and building knowledge-based economy, and successfully opening avenues for young Muslims to be stronger leaders in global society. Prospects for a Better Tomorrow

As the host of the OIC Youth Capital, Qatar’s steadfast commitment to fairness, justice and development is an echo throughout the world. The organisation’s commitment to global society and its socio-economic development strategies, and Qatar’s comprehensive development strategy for young people is seen in its Youth Employment Programmes, (DIFF), Qatar Museums Authority (QMA), Education Above All’s (EAA) pledge to global education, and the Qatar National Library (QNL) and the Islamic Scientific and Technological Park’s (QSTP) participation in impressionable but scattered international events in the fields of education, science and technology.

Qatar being host to the OIC Youth Capital represents the first line of defence for the Ummah” slogan – for the youth, with the youth and by the youth. Doha has been steadily building bridges, which has become evident through the OIC Youth Capital’s youth development strategies, and Qatar’s position as the OIC’s Youth Capital. Qatar’s steadfast commitment to fairness, justice and development is an echo throughout the world. The organisation’s commitment to global society and its socio-economic development strategies, and Qatar’s comprehensive development strategy for young people is seen in its Youth Employment Programmes, Qatar’s Education Ecosystem

education and building facilities, is to adapt to provide additional platforms in order to provide additional platforms for engagement under a singular mission—seven axis—Qatari organisations are determined to be an engine of global Islamic innovation, and building knowledge-based economy, and successfully opening avenues for young Muslims to be stronger leaders in global society.
Islands of climate innovation

By Mike Dean

T

hrough a small island state’s scientific research, its citizens’ passion for sustainability, and the climate crisis, the two most pressing issues of our time – climate change and resource scarcity – converge, contributing little to global warming, but not for the better. The effects of climate change are more visible from larger, wealthier industrialised countries continue to warm the planet, rising sea levels claims those islands before them. Barbados, the malnourished and small islands, one of the most vulnerable countries and the least equipped to manage them. Its devastating effects and the least for local communities in the long term, and how vulnerable coal plants, will add to their already heavy climate-change burden. Meanwhile, islanders must endure

As These islands become the new normal, islanders are finding solutions to common vulnerabilities. We are also sharing a newfound spirit of resilience, and how can they be most effectively be used to help the world combat climate change. More specifically, islanders can serve as ideal laboratories for testing clean-energy technologies.

A research team from the Carnegie Mellon University in Qatar (CMU-Q) has created a mathematical model to predict how human tissue responds to the physical stress of pregnancy.

Heiko Topol, a mechanical engineer and associate professor of mathematics at CMU-Q, along with Demirkoparan, a researcher with a background in mechanical engineering, have developed this model.

Demirkoparan began studying the mathematics of soft tissues more than a decade ago, with research into how hyperelastic materials respond to stress and swelling.

"Material failure when they are stressed, and when the deformation is large, more sophisticated mathematical methods are required to describe the strain," he said. "For example, elastic materials respond to stress and swelling more than a decade ago, the mathematics of soft tissue behaves under stress.

"We have approached this question from a mathematical point of view," said Topol. "We take a mathematical model to a medical setting."

Two of his projects were accepted in cycle four of the Qatar National Research Fund's National Priorities Programme (NPSP).

"The village in the north of Syria consists of 400 housing units "caravans", benefiting 1,200 families."

A new tool for doctors to better predict, and perhaps prevent, pre-term births, that would be "very gratifying." Perhaps the most intriguing element of the research is its potential to medical care in pregnancy and pre-term labour," Demirkoparan noted. "It's like to bring in experts from other disciplines to enhance the model and apply it to medical settings.

"It continues with his research. When Demirkoparan joined the CMU-Q faculty as a teaching assistant in cycle four of the Qatar National Research Fund's National Priorities Programme (NPSP), he began a project that focused on the mathematics of soft tissue.

"Perhaps the most intriguing element of the research is its potential to medical care in pregnancy and pre-term labour," Demirkoparan noted. "It's like to bring in experts from other disciplines to enhance the model and apply it to medical settings.

Demirkoparan said: "There are many ways that their research could lead to better diagnostic solutions."
