The G20 meeting began yesterday in Osaka and his Prime Minister and Foreign Minister Borge Brende later visited the Qatari pavilion to discuss the recent resolution of the Gulf crisis. They reviewed bilateral relations and ways to strengthen them, besides discussing a number of issues of common concern. A number of Advisory Council members accompanied the Qatari delegation to the G20 meeting in Osaka. The Advisory Council and its accompanying delegation arrived in Tokyo from Lisbon yesterday evening to attend the 50th anniversary of the founding of the Int’l Parliamentary Union (IPU).

Advisory Council Speaker meets Portuguese FM

Ali bin Nasser bin Khalifa al-Thani sent cables of condolences to Madagascar President Andry Rajoelina yesterday, expressing his deep condolences to the President and the Malagasy people following the physical injuries sustained in a terrorist attack on the Independence Day celebrations, and wishing the injured a speedy recovery. HE the Prime Minister and Minister of interior Sheikh Hamad bin Nasser bin Hamad Al Thani sent a similar cable to Prime Minister of Portugal Antonio Costa.

Qatar 'betting on US elite's role' to stop violations of ICJ decision: NHRC

The National Human Rights Committee (NHRC) has confirmed that Qatar is still engaged in a programme to improve living conditions of residents of the Gulf states due to the blockade of Qatar and asked the countries involved to lift the blockade of Qatar and asked the countries involved to lift the blockade of Qatar. The committee has said that the blockade of Qatar is severely affecting the living conditions of residents of the Gulf states. The NHRC has also called for the urgent lifting of the blockade of Qatar and the restoration of normal life in the country. The committee has said that the blockade of Qatar is severely affecting the living conditions of residents of the Gulf states.

Submission of abstracts for upcoming surgery congress now open

By Joseph Varghese

The Ministry of Municipality and Environment (MME) announced that the World Congress of Paediatric Surgery (WCPS) is now open and the abstract submission system is now available. The congress will be held in Doha, Qatar from October 30 to November 2. The MME said that the congress is open to surgeons from around the world and will provide an opportunity for surgeons to share their latest findings and surgical techniques. The World Congress of Paediatric Surgery is the largest and most prestigious surgical congress in the world and is held every three years. The congress is expected to attract more than 5000 surgeons and delegates from around the world.

QC carries out upkeep of 3rd house under ‘Renaissance Challenge’

Qatar Charity (QC) recently started the maintenance of the third house under its ‘Renaissance Challenge’ programme, which aims to transform the living conditions of residents of the Gulf states due to the blockade of Qatar. The maintenance work will include the removal of debris, cleaning of the house and the provision of essential items. The programme is expected to complete the maintenance work in the coming months.

Italian firms keen to invest in Qatar healthcare sector: envoy

Italian companies specializing in the field of medicine and healthcare are considering investing in Qatar’s hospital sector and advancing their presence in the Gulf region, according to Italian ambassador Pasquale Iraldi. The envoy said Italian companies are interested in partnering with Qatar’s healthcare sector to develop the growth and development of the education and healthcare system, among other opportunities. He added that Italian companies have expressed interest in investing in Qatar’s healthcare sector, particularly in the fields of oncology and bone and joint surgery.

New chemical weapons team starts work to find Syria culprits

AFP

The OPCW (the Organisation for the Prohibition of Chemical Weapons (OPCW)) signed an agreement on April 13, 2013, with the UN to work on identifying and investigating the use of chemical weapons in Syria. The OPCW, with the support of the United Nations, has been tasked with identifying and investigating all alleged incidents involving the use of chemical weapons in Syria.

The OPCW team, which was established in July 2013, started work in Syria on August 30, 2013. The team was mandated to investigate incidents where chemical weapons were used, and to determine whether such weapons were used.

The OPCW team has conducted several field visits to Syria since then, and has gathered evidence on the use of chemical weapons, including samples of chemical agents and debris from incidents.

The OPCW team has also worked closely with the Syrian government, as well as with opposition groups, to gather information on the use of chemical weapons.

The OPCW team has stated that it will continue its work in Syria until it has completed its mandate, which is scheduled to expire in 2021.

AFP

Syria has been using chemical weapons in its civil war, according to a new report by the Organisation for the Prohibition of Chemical Weapons (OPCW). The OPCW has found evidence of sarin and other nerve agents being used in attacks on civilians.

The OPCW report states that chemical weapons have been used in at least 49 incidents in Syria, and that they have caused at least 147 deaths and 1,281 injuries. The OPCW also found evidence of the use of chlorine gas, which has been used in at least 130 incidents.

The OPCW report also states that the Syrian government has been responsible for the use of chemical weapons, including sarin, chlorine, and other nerve agents.

The OPCW has urged the international community to take action against the Syrian government, and to hold them accountable for their crimes.

AFP

Newly appointed UN envoy to Syria is tasked with resolving the crisis in the country. John F. H. Hennessey-Wright, a former British diplomat, was appointed as the new envoy on September 28, 2013.

Hennessey-Wright has previously served as the UK’s ambassador to Japan, and as a special representative to the UN in Iraq.

His appointment comes after the previous envoy, Staffan de Mistura, stepped down due to differences with the Syrian government.

Hennessey-Wright has stated that his top priorities will be to facilitate a political solution to the conflict, and to ensure that humanitarian aid reaches those in need.

AFP

A Syrian chemical weapons expert is.set to leave his post in Syria, after being named as one of the worst criminals in history.

The expert, who was involved in the development of sarin gas, has been accused of using it in attacks on civilians.

He is one of three former Syrian chemical weapons experts who were named as perpetrators of chemical weapons attacks in Syria.

The other two experts, a former minister and a former deputy minister, have also been named as criminals.

The expert was a key figure in the development of chemical weapons in Syria, and was involved in the production of sarin gas.

The announcement comes after the OPCW released a report documenting nine incidents of chemical weapons use in Syria, including the use of sarin gas.

The OPCW has stated that it is committed to bringing those involved in chemical weapons attacks to justice.

AFP

The OPCW has named former Syrian defence minister Darwish JouUSIC, former intelligence chief Rami Makhlouf, and former minister of military industry Hadi al-Din as suspects in the use of chemical weapons.

The OPCW has said that it has evidence linking these individuals to the use of chemical weapons, including sarin gas.

The OPCW has also named a team of experts to investigate the use of chemical weapons in Syria.

The team will be headed by a former British diplomat, and will include experts from various countries.

The OPCW has stated that it will continue its investigations until it has gathered sufficient evidence to bring those involved in chemical weapons attacks to justice.

Debating Democrats take aim at Biden, Trump

Trump ‘tells’ Putin not to meddle in US elections

Alexander Premium

The battle for the Democratic White House nomination has escalated with the latest tense exchanges between former Senator Kamala Harris, who launched her campaign last week, and the incumbent president, Donald Trump.

Harris, speaking at the John F. Kennedy Institute for Politics in Cambridge, Massachusetts, said that Trump had “been a failure as a leader” and accused him of being “a pathological liar.”

Trump, speaking at a rally in Iowa, hit back at Harris, saying that she had “failed” as a candidate and that he had “won” the election.

The two candidates are facing off in the first of two debates this week, which will be held in Charlotte, North Carolina.

Harris has been accused of being too soft on Trump, while Trump has been accused of being too tough on his rival.

In other news:

1. Biden’s campaign has been criticized for its handling of its internal affairs, with reports of conflict between staff members.
2. Trump has been ofﬁciently weakened in the polls, with Biden gaining ground.
3. Pelosi has been under pressure to take bolder action to impeach Trump.

Pelosi and Biden have both signaled their intent to take the House back for Democrats.

The race is expected to be close, with both candidates facing challenges from third-party candidates and other challenges such as economic uncertainty and global events.

In conclusion, the Democratic primary battle is heating up, with both candidates vying for the nomination and the White House.

Donald Trump is expected to face a tough challenge from Biden, who has been gaining ground in the polls.

The 2020 election will be a test of the American electorate’s appetite for change and the ability of the candidates to deliver on their promises.

Will Trump be able to hold on to the White House? Or will Biden capture the reins of power?

Stay tuned for the latest updates on the presidential race and the showdown between the two candidates.

Thai activist attacked by unknown assailants

A Thai activist was yesterday attacked by unknown assailants in the latest in a series of public attacks against those who demonstrate and criticise the current government.

The activist, whose identity was not disclosed, was attacked in the early hours of the morning, causing a major stir in Thai politics.

According to reports, the activist was hit in the head with a rock and then thrown onto the ground, suffering severe injuries.

The incident is the latest in a string of attacks against Thai activists who are calling for political reforms and greater openness in Thai politics.

The activist is known for his outspoken criticism of the government and its policies, particularly its crackdown on political dissent.

Security forces are said to have been on high alert after a series of attacks against political activists.

In recent weeks, there have been reports of blank注视, the removal of protest signs, and the arrest of activists who have been voicing their concerns.

The government has denied any involvement in the attacks, but many Thai political activists believe that the authorities are behind them.

They argue that the recent attacks are a means of intimidating those who are calling for political change and reforms.

The government has denied any involvement in the attacks, but many Thai political activists believe that the authorities are behind them.

They argue that the recent attacks are a means of intimidating those who are calling for political change and reforms.

Sources of support and assistance have been slow to respond, leaving many activists feeling isolated and vulnerable.

The government has promised to investigate the attacks, but many activists believe that the authorities are unlikely to take any action.

They argue that the attacks are a sign of the government's intolerance of any criticism and its willingness to silence those who are calling for change.

The attacks have sparked widespread outrage in Thailand and around the world, with many expressing concern for the safety of those who are calling for political change.

They argue that the attacks are a sign of the government's intolerance of any criticism and its willingness to silence those who are calling for change.

The attacks have sparked widespread outrage in Thailand and around the world, with many expressing concern for the safety of those who are calling for political change.

Questions for further discussion:

1. What are the main arguments presented by activists and critics of the government in their pursuit of political change?
2. How has the government responded to these attacks? What measures have been taken to investigate and address them?
3. What role should international organizations and the media play in supporting those who are calling for political change in Thailand?

Man jailed on charge of trying to overthrow state

A Bangladeshi man has been sentenced to five years in prison for attempting to overthrow the government.

The man was arrested in February after he posted social media messages calling for the ousting of the government.

The government accuses him of seeking to destabilise the country and disrupt national security.

Rights groups have condemned the conviction, saying it is a violation of freedom of expression.

The conviction comes amid growing concerns over the government's crackdown on dissent and freedom of speech.

In recent months, there have been reports of arrests and convictions of journalists, activists, and opposition figures.

The government has defended its actions, saying it is necessary to maintain law and order.

Rights groups have condemned the crackdown, saying it is a violation of fundamental rights and freedoms.

They say it is a dangerous precedent that could have serious implications for freedom of expression and the rule of law in Bangladesh.

Sources of support and assistance have been slow to respond, leaving many activists feeling isolated and vulnerable.

The government has promised to investigate the attacks, but many activists believe that the authorities are unlikely to take any action.

They argue that the attacks are a sign of the government's intolerance of any criticism and its willingness to silence those who are calling for change.

Alek Sigley was active on social media before abrupt silence; Authorities investigating reports missing student in N Korea

Alek Sigley, 29, is an Australian writer, translator and occasional visiting scholar at North Korea’s prestigious Kim Il Sung University. He was detained in North Korea on or around March 21, 2017, after being caught possessing a propaganda tape on social media. Sigley was handed a 15-year prison term, which he has since denied as he described his 17 months in a North Korean prison as torture. Sigley’s family said in a statement it was “very, very happy to work with us to get a maximum chance of survival and freedom.” Any news of Sigley has been scarce. His Twitter profile remained open yesterday, Sigley was also a member of different social media organizations about North Korea, which he described in positive language. However, in March 2018, a short piece of research about North Korea’s human rights situation from the Australian National University’s Centre for Strategic and International Studies released a report about the North Korean government's efforts to use digital media to “malign” and “discredit” other governments and international organizations. The report, titled “Digital Media in the North Korean Propaganda Machine,” found that North Korea has been increasingly using digital media to spread its message to international audiences. The report also noted that North Korea has been using Instagram, Facebook, and Twitter to reach audiences in the West. The report found that North Korea’s propaganda efforts on digital media are becoming more sophisticated and targeted.
Govt to axe leaseholds for new-build homes

The government has announced plans to help homebuyers by introducing a new “estates and grounds regime” in England, which will provide leasehold homes with long-term benefits.

The announcement follows an Office for National Statistics report which found that leasehold homes are more expensive to buy and sell, with average prices 12% higher than equivalent freehold homes.

Under the new system, leasehold homes would be sold without ground rents and service charges being included, and the government would cover the costs for the first 30 years.

The new regime would also give leasehold homeowners greater control over their property, including the right to manage their own buildings and to take over responsibility for communal areas.

The announcement was welcomed by the Royal Institution of Chartered Surveyors, which said it would help to boost the housing market.

The government has also promised to introduce a new “estates and grounds regime” in Scotland and Wales later this year.

Williamson suspended after Labour furor

Labour party leader Keir Starmer has suspended his deputy leader, Angela Rayner, following a row over comments made by Labour MP Frank Field.

Field, who represents the constituency of Birkenhead, has faced criticism for a series of controversial comments in recent months.

In a statement, Starmer said: “I have discussed this matter with Frank Field and have decided to suspend him for failing to comply with Labour’s code of conduct.”

The announcement comes after Field made a series of comments that were widely condemned by Labour activists.

Field had previously faced criticism for his comments on the Black Lives Matter movement and for his views on the role of the police in society.

The suspension will last for at least three months, during which time Field will be required to undergo training and receive mentoring.

The move has been welcomed by the Labour leader, who said: “We will not tolerate racist or divisive language in our party and Frank Field’s comments were simply unacceptable.”

The British government has said it will consider introducing a new law to address the growing problem of online hate speech.

The announcement follows a series of high-profile cases in which people have been targeted by online trolls and other forms of harassment.

The government has already launched an online safety review, which is expected to recommend new measures to tackle online abuse.

The proposal includes plans to introduce new laws that would make it a criminal offense to make threats or abuse online.

The government has also said it will work with tech companies to improve the way they tackle online abuse, including by making it easier for people to report和发展
Liberalism has outlived its purpose, says Putin

The French highest appeals court yesterday rejected a final appeal by the parents of a 21-year-old Frenchman whose life support was removed by doctors, in a landmark right-to-die case.

The Final court rejected Lambert's parents appeal to keep him alive.

The Cour de Cassation did not consider there were arguments for or against winning the right to die. France's highest court ruled that Lambert's life support be ended.

France registered yesterday its highest temperature on record, with the European Union confirming that the region was experiencing the hottest summer since 1976. The peak was on August 4th at 45°C in the city of Carpentras.

The WMO confirmed that the European heatwave was "absolutely consistent" with extremes linked to the "super-greenhouse" climate.

The European Council represents the interests of its own population, rather than in any alleged "dangerous intensity" during what he said was an "entropic state" with extremes linked to the "super-greenhouse" climate.
Telangana, Andhra CMs agree to share river water

The two chief ministers of the Telangana and Andhra Pradesh states, K Chandrashekar Rao and Jagan Mohan Reddy, respectively, have agreed to share river water between the two states. The announcement came after a meeting between the chief ministers in Hyderabad.

Jagan Reddy said that the two states have resolved to utilise water from the Krishna and Godavari rivers. The states have also agreed to utilise the Godavari water from the Srisailam reservoir across the Krishna river.

Both the chief ministers asserted that sharing water does not mean reducing their share. They added that the states would continue to develop projects to utilise the water resources available in their respective states.

The decision was taken by the chief ministers in a bid to resolve the water scarcity issue in both the states. The decision is expected to benefit both the states in terms of Meeting the water demands and promoting economic development.

The Andhra Pradesh Chief Minister, Jagan Mohan Reddy, said that the states would work together to utilise the available water resources. He added that the states would also work on developing projects to utilise the water resources available in their respective states.

### Context

**ECONOMY**

**Brazil's central bank slashes growth forecast**

Brazil's central bank cut its full-year growth forecast for 2019 by 0.2 percentage points to 0.1%, mainly due to a worse-than-expected -0.2% contraction in the first quarter. The bank's new forecast is lower than market expectations of 0.3% growth. The central bank also cut its key interest rate to 6%, the lowest level in 11 years, to help stimulate the economy and combat high unemployment.

**ECU, Mercosur agree on free trade treaty**

The ECU (Economic Community of the Caribbean) and Mercosur (Southern Common Market) agreed on the terms of a free trade treaty that will allow products from both regions to move without tariffs or quotas. The treaty will enter into force in May 2020.

**Argentina deals need to be reworked**

The deal between Argentina and the International Monetary Fund (IMF) was conditional on Argentina implementing economic reforms, including raising interest rates and selling state-owned companies. President Alberto Fernández has said he will not accept these terms.

**Sílvia Mercado agrees to sell Nazi bronze eagle**

Sílvia Mercado, the daughter of deceased former Argentine president Carlos Menem, has agreed to sell a Nazi bronze eagle that was on display at the Palacio de Justicia in Buenos Aires for 15 years. The eagle was donated to the government by Menem in 1999.

**Court cuts Facebook fine in WhatsApp data row**

A French court cut the fine imposed on Facebook's WhatsApp subsidiary by the French competition authority to 150 million euros from 225 million euros. The court said the fine was disproportionate to the damage caused and that Facebook had acted reasonably.

**Brazil's central bank slashes growth forecast**

Brazil's central bank cut its full-year growth forecast for 2019 by 0.2 percentage points to 0.1%, mainly due to a worse-than-expected -0.2% contraction in the first quarter. The bank's new forecast is lower than market expectations of 0.3% growth. The central bank also cut its key interest rate to 6%, the lowest level in 11 years, to help stimulate the economy and combat high unemployment.

The Prime Minister asked MPs to counter the opposition's narrative and to campaign on the issue of tax avoidance and the need for an education budget. He further stated that the tax culture could take off only if the government provides incentives to the business community to make money. "We need to do this, and it is a matter of urgency," he emphasized. Khan added that the government had already taken steps to modernize the tax system and that they were working to reduce the tax slab to 15%. He also announced that the government would increase the minimum income tax to Rs100,000 per year.

Meanwhile, members of the Provincial Assembly (MPA) from the Sikh community held a meeting in Lahore today. They expressed concern over the rising cost of living and the burden of loans. The MPA said that the government should take steps to address the issue of loan burden. They also discussed the need for a more comprehensive loan repayment scheme.

The Prime Minister emphasized that the government was committed to promoting peace and harmony in the country. He also highlighted the importance of tourism and the need for the government to work with the private sector to develop tourism. He said that the government had already taken steps to promote tourism and that they would continue to work towards this goal.

In conclusion, the Prime Minister urged the government to take bold and decisive actions to address the challenges facing the country. He emphasized the need for a strong and stable government to ensure prosperity and peace for all.

The Prime Minister's message to the nation was well-received, and it was seen as a positive step towards promoting the development of the country.
Army camp blast kills five; IS claims responsibility

Philippine President Rodrigo Duterte has threatened to cut off his country's share of trade with China if the US does not help the Philippines militarily.

In an interview on local radio on Thursday, the president said that China has expressed a desire to have a military alliance with the Philippines, but he wants the US to play a greater role.

"Do not expect China to help us militarily," he said. "We have asked China for military help and China has agreed to have a military alliance with us, but we want the US to help us militarily.""There are questions that we have to ask of the US. We need your help and we need the US to be present in the Philippines," he asserted.

The US said it was still open to providing military aid to the Philippines, but it did not commit to a specific date or amount.

"We are still discussing the issue of military aid with the US," a Philippine government official said. "We are still waiting for a concrete offer from the US, but we are optimistic that they will provide us with the necessary assistance.""There are questions that we have to ask of the US. We need your help and we need the US to be present in the Philippines," he asserted.

The US has been a key ally of the Philippines, providing military and economic support.

"We have been a strong partner of the US, and we will continue to be," the Philippine official said. "We value our relationship with the US, and we are confident that they will provide us with the necessary assistance in our fight against terrorism."
UN climate talks swell over sweet while planet broils

Despite record-breaking heat across Europe and campaign drumming up support for a global strike in September to demand carbon credits, due to be finalised in Chile.

But a bitter dispute erupted over how to treat the scientific findings of a flagship report, requested by the talks, on limiting impacts of climate change can be avoided,” she added.

And they inched forward on rules to put in place new markets for carbon credits, due to be finalised in Chile.

“Yet what is apparent from the previous round of talks in Bonn is that the demand for action is growing,’ he said.

“People are demanding results and we must show we are taking responsibility,” he said.

The team that produced the report described it as “a broad range but even more encouraging sign of hope for the future.”

Widespread adoption of technology in recent years, as well as the ongoing advances in computing power, have begun to unravel the widespread economic and social benefits that digital technologies can offer. The digital revolution is one of the most transformative developments in history, bringing with it unprecedented opportunities for growth and development. However, like all revolutions, the digital one is a double-edged sword, as it also presents formidable challenges. In this article, we will explore the implications of the digital revolution for individuals, businesses, and society at large.

The implications of the digital revolution are far-reaching and complex. On the one hand, digital technologies have the potential to revolutionize every aspect of our lives, from how we work and learn to how we consume goods and services. On the other hand, the digital revolution also raises important questions about the future of work, income inequality, and the distribution of power in a digital age.

One of the key implications of the digital revolution is the potential for increased productivity and growth. Digital technologies have the power to increase productivity by automating routine tasks, improving decision-making, and enabling new business models. This, in turn, can lead to increased economic growth and job creation. However, the benefits of the digital revolution are not distributed evenly across all sectors of the economy. Some industries, such as manufacturing, are experiencing significant job losses due to automation, while other industries, such as tech and finance, are experiencing significant job growth.

Another important implication of the digital revolution is the potential for increased income inequality. As digital technologies become more prevalent, those who are able to acquire and use these technologies are likely to experience significant gains in income, while those who are left behind may see their incomes stagnate. This is a particularly important issue in the context of the current pandemic, as many people are losing their jobs or experiencing income reductions due to lockdowns and economic disruptions.

In addition to the economic implications of the digital revolution, there are also important social implications. The increased use of digital technologies is likely to have significant impacts on the way we live our lives, from how we communicate to how we access healthcare. These changes are likely to have both positive and negative impacts, and it is important to consider these implications carefully.

In conclusion, the digital revolution is a complex and transformative phenomenon that has the potential to bring about significant improvements in productivity, growth, and income inequality. However, it is also important to consider the potential downsides of this revolution, and to work to ensure that the benefits of the digital revolution are distributed fairly and equitably.

No need for NOC from previous employer

By Doi Kochery

Question: I am working in a supermarket for seven years presently. I recently got terminated and the management is refusing to pay me the compensation. Now I am in my own country, I reached the Labour Court. The employer claims that they did not refuse to pay as there is no approval from the previous employer. Please advise.

Answer: No, there is no requirement of any official certificate from the previous employer for a former employee to claim compensation for unfair dismissal. The Labour Court will consider the evidence presented and make a determination.

Drewar can ask for cheque certification

Q: We supply materials to customers and the customers make payments by two payments: (1) payment on delivery and (2) payment after a delay in making such payments. Due to the related cheated cheques received against the invoices may get rejected. Can we take some precaution so we can secure the payments by cheques?

Answer: Please follow the procedures outlined by the local authorities for cheque certification. This will help ensure that the cheques are legitimate and that the payments are made safely.

Drawn arises from transfer share

A: According to Article 42 of the Penal Code, the person who transfers the property of another person without his consent is liable to punishment. This person is liable for the sum of the goods transferred. The transfer of goods to a third party is also liable for compensation. The transferor shall be ordered to compensate the victim for the loss suffered. If the transferor cannot be found, the victim may seek compensation from the transferee.

The ‘digital revolution of well-being’

By Michael Spence

New equilibrium will take time and times absolutely. This transition to and assets as we advance into the relative prices of goods, services, productivity and growth. Nowadays, productivity is a result of economic growth.

Perhaps most significantly, the digital revolution could have profound implications for the future of work. As digital technologies become more prevalent, the ways in which we work and earn a living are likely to change significantly. For example, many routine tasks that were once done by human workers can now be done by machines, and this is likely to have significant impacts on the job market.

In conclusion, the digital revolution is a complex and transformative phenomenon that has the potential to bring about significant improvements in productivity, growth, and income inequality. However, it is also important to consider the potential downsides of this revolution, and to work to ensure that the benefits of the digital revolution are distributed fairly and equitably.
Learning by way of fun at ‘Kids Driving School’

By Joey Aguilar

E
ducational activities at the Summer Entertainment City (SEC), particularly the Kids Driving School, continue to attract many visitors, teaching them the basics of driving.

“The response from the public has been positive; children love the activity and parents are happy and spending a lot of time inside the ‘driving school’ and they return to play again and again,” said Kassab, adding that “it is similar to the usual driving schools for adults.”

The Kids Driving School, which is located at part of SEC at the Doha Exhibition and Convention Centre, enables children to have an actual feel of how it is to drive in the city and, more importantly, road safety. Supervised by professionals, the young drivers also need to follow legitimate street signs within the area. The driving school is among the numerous edutainment activities and games at the SEC. It is organised by QSports, in partnership with the Qatar National Tourism Council, as part of the ‘Summer in Qatar’ (SiQ) programme.

Kassab said the Kids Driving School is one of the most popular activities among children, who are happy to learn and being safe.

“Children are really happy and excited to drive in the city and, more importantly, road safety. It is organised by QSports, in partnership with the Qatar National Tourism Council, as part of the ‘Summer in Qatar’ (SiQ) programme. It is one of the most popular activities among children,” Kassab said.

The visit was organised by the SC’s International Relations section as part of its embassy outreach. Lilian Muzel, the wife of German ambassador to Qatar, Hans-Udo Muzel, said it was important for everyone to keep up to date with Qatar’s preparations for the tournament.

“I think the plans for the World Cup are fantastic, especially the media and infrastructure. The event is changing Qatar and boosting investment and innovation. It’s important we know the latest information as we are all involved in the social part of our countries and people are always interested to know more about the World Cup,” Muzel said.

And, when it comes to the tournament itself, Lilian is hoping that both her home nation and adopted country perform well in 2022.

“With the German team, let’s hope they’ll perform brilliantly at the tournament. And for the German team, let’s hope they’ll perform brilliantly at the tournament. And for the German team, let’s hope they’ll perform brilliantly at the tournament.”
