Cuban doctors provide medical excellence around the world

#CubanHospitalDukhan has become a referral centre in the Gulf region: Cuban ambassador

By Joseph Vergneaux

The Cuban Hospital in Dukhan is at the centre of excellence in health care with about 150 Cuban medical professionals providing medical services to citizens and residents of the country. The hospital has 180 beds with different departments.

The hospital was opened in 2017 with the objective of providing quality medical services to the Dukhan residents. Cuban medical professionals have been working around the world providing the best medical services. Around 250 Cuban health-care professionals are currently working in 60 countries around the world.

The medical professional staff of the hospital has been working in the health sector for about 15 years providing quality medical services to patients. The Cuban doctors have also been providing medical services to patients in different countries around the world.

Cuban doctors are also providing medical services to patients in different countries around the world providing the best medical services. Around 250 Cuban medical professionals are currently working in 60 countries around the world. The hospital has been providing medical services to patients in different countries around the world providing the best medical services.

Dialogue the only way to solve Gulf crisis

US probing missile find at Libya rebel base

The US is probing in Libya the discovery of American Javelin anti-tank missiles, which were confiscated from Haftar forces and are seeking additional information.

According to a report by the Washington Post, the missiles were apparently discovered at a base used by men under the command of Khalifa Haftar, a strongman whom he describes as an "aggressive and uncontrollable" leader against Libya's internationally recognized government. The missiles indicate that Haftar’s forces are seeking to "discredit" the United States with their end-use obligations. The report said that the missiles were likely in Libya in June 2021.

HMC introduces new technique to improve care of surgery patients

**HMC first healthcare organisation in Middle East and 7th in world to implement Evone ventilation technique**

T he Ministry of Municipality and Environment has introduced a “Revolutionary Program” to improve its urban development and environment strategies, urban design and efforts for living, supporting growth and improving the quality of life for all citizens. The program is aimed at introducing six ministries and sectors to serve these objectives.

The program includes various initiatives, including a list of ongoing projects and awareness plans, the national strategy for traffic safety, the National Development Strategy 2015-2030, and the comprehensive urban development plan. The program also includes a list of responsibilities and measures for living, supporting growth, and improving the quality of life for all citizens.

The program is designed to improve urban development and environment strategies, urban design, and efforts for living, supporting growth, and improving the quality of life for all citizens. The program also includes a list of responsibilities and measures for living, supporting growth, and improving the quality of life for all citizens.
UNDP Accelerator Labs Network launch in Berlin

The United Nations Development Programme (UNDP), in partnership with Germany (the Federal Republic of Germany (Germany), the United Nations Development Programme (Germany), and the Italian government, has launched a global network of laboratories to accelerate development impact, which contributed 5mn euros to this project.

The ceremony was also attended by Martin Jagor, state secretary for Economic Co-operation and Development (Germany), and Achim Steiner, United Nations Administrator.

In addition to the €5mn contribution made by the German government, a similar cost-sharing agreement was also signed with the Italian government, a similar cost-sharing agreement was also signed with the Italian government, a similar cost-sharing agreement was also signed with the Federal Ministry of Economics and Energy (Germany). The ceremony was also attended by Sheikh Saud bin Abdulrahman Al Thani, UNDP Accelerator Labs Network launch.

The ceremony was also attended by Martin Jagor, state secretary for Economic Co-operation and Development (Germany), and Achim Steiner, United Nations Administrator. The ceremony was also attended by Sheikh Saud bin Abdulrahman Al Thani, Qatar's ambassador to Germany, and gave a speech at the opening ceremony in Berlin marking the UNDP Accelerator Labs Network launch.

QFFD attends UNDP Accelerator Labs Network launch in Berlin

QFFD has made a $20mn contribution to the UNDP Accelerator Labs Network in 60 developing countries for a period of four years.

The network also aims to turn intelligence available to countries into actionable innovations, turn them into actionable innovations, guided by relevant policies and laws, and make that intelligence available to countries and investors.

The network is done through a grant agreement signed with the Italian government, a similar cost-sharing agreement was also signed with the Federal Ministry of Economics and Energy (Germany), and the Italian government, and the Italian government, which can accommodate around 20,000-30,000 abandoned vehicles, has already been prepared and is to be become operational soon.

The Advisory Council will be taking part in the conference with a delegation headed by Advisory Council member Nasser bin Mohammed al-Attiya.

The Advisory Council attended a conference held by the National Human Rights Committee (NHRC) yesterday in Washington, DC.

The chairman of Qatar’s National Human Rights Committee (NHRC) stressed that the Gulf crisis has reached the peak of escalation, increasing the worries and concerns.

He also attended meetings with a number of Members of the US Congress, including the House of Representatives, who called on Washington to act immediately to prevent the blockading countries from deliberately prolonging the crisis and harming human rights in the Gulf.

He expressed concern about the violations of human rights and freedoms in the blockading countries and expressed the advice of the Advisory Council to stop these violations.

The NHRC secretary general, Dr Ali bin Smaikh al-Marri, said that the NHRC’s readiness to bring a number of the blockading countries to the international level is a major achievement in this regard.

During a meeting yesterday with Deputy Assistant Secretary of State for Arab Gulf Affairs Tim Lenderking, Dr al-Marri gave a background on the horrors suffered by the blockading countries, which have a negative impact on the economies of these countries.

The meeting was attended by Members of Congress, including the House of Representatives, who called on Washington to act immediately to prevent the blockading countries from deliberately prolonging the crisis and to protect human rights in the Gulf, as it does in the rest of the world.

During his visit to Washington, Dr al-Marri and the members of the Advisory Council met with several Members of Congress from the House of Representatives, including the Subcommittee on the Middle East Representative Hank Johnson, member of Congress from Georgia, and Representatives Chris Stewart and Steve Chabot, who called on the US administration to impose sanctions on the blockading countries.

He also met with representatives of the US administration, including the Assistant Secretary of State for Arab Gulf Affairs Tim Lenderking, and representatives from the House of Representatives, who called on Washington to act immediately to prevent the blockading countries from deliberately prolonging the crisis and to protect human rights in the Gulf, as it does in the rest of the world.

The chairman added that the success of any international alliance depends on the willingness of the blockading countries and the rest of the world to cooperate and work towards a solution to the Gulf crisis.

He also met with the US administration, including the Assistant Secretary of State for Arab Gulf Affairs Tim Lenderking, and representatives from the House of Representatives, who called on Washington to act immediately to prevent the blockading countries from deliberately prolonging the crisis and to protect human rights in the Gulf, as it does in the rest of the world.

NHRC chief urges the Gulf countries to act immediately to prevent the blockading countries from deliberately prolonging the crisis and to protect human rights in the Gulf, as it does in the rest of the world.

Everything you need to know about the Maserati GTS & Trofeo

The year 2018 has been a good one for Maserati. You have seen a fresh new MC20 debut the klaxon from the Lambo, the new 2000hp from 2018, Acudi and even Maserati. It seems every automobile brand is in a competitive race to outdo each other, and it is only Maserati that comes up with not one but two versions of their Levante SUV. The 2020 Maserati Levante GTS and the 2020 Maserati Levante Trofeo. What is the defining factor between the two variants? Well, come to the la verbe fine, let's take a look at the SUV's exterior.

Maserati's design team has not made many changes to the Levante's exterior design.

The only thing that has been made are only visible to the laser eye. You have only the front fascia but, that is almost everything in some respect for the front bumper and the grille. The front end of both the Trofeo and GTS has a wider opening at the lower part to pass through. While the GTS bumper is of the same color as the rest of the body, the Trofeo has a thicker black bumper.

This is in the words of FCA's design chief Klaas Koene, "We are doing the most just not any of the lines, but a world of the line is just fine, line, and we don't change it at all."

However, the GTS and the Trofeo have different power outputs. The GTS pulls out 522 horsepower and 279 Nm of torque, while the Trofeo has a more powerful engine, with 590 horsepower and 780 Nm of torque. Both the SUVs are tuned up with a 6-speed automatic gearbox, which takes power to the rear wheels, whereas power can be transformed to all the four wheels on request.

The Trofeo gets an added advantage over the GTS thanks to the dashboard, which is tighter and more in a higher-rev range. The change in the V8 engine is a big one for the Maserati.

The GTS has a 4.7-litre V8 engine capacity, while the Trofeo has a 4.9-litre V8 engine capacity, and it is built in Italy, but it is slightly different in design than the stock engine. This is the fastest V8 in the world, and it is the Quattroporte GTS. The Trofeo has 35% changes in the form of lidless stock wide, wheels, carbon, accessories, connecting rods. The engine inside the Levante is powered with two injectors.

The Trofeo has an all-black finish, which is not really exciting to the eye.

Price and Conclusion

The starting price for the Levante GTS is 8.48 lakh and for the Levante Trofeo is 8.58 lakh. The Trofeo comes with a handful of extra features, and it is a limited edition vehicle, which means not everyone will be able to get their hands on it.

It seems Maserati has tried to win two battles with one vehicle. The GTS variant comes more into play with the likes of Porsche Cayenne Turbo, Mercedes-AMG G Class, and Range Rover. The Maserati Levante Trofeo is an attempt to challenge top-tier SUVs like the Bentley Bentayga S V8 and the Lamborghini Urus, both of which are considerably expensive than the Levante Trofeo. Therefore, for those looking in terms of these SUVs, the Trofeo is a good choice since it is cheaper, it offers an exception.
Students explore Islamic architecture in Jordan

Students from the College of Islamic Studies (CIS) at Hamad Bin Khalifa University (HBKU) have visited Jordan to complement their studies within the college’s Master of Science in Islamic Art, Architecture and Urbanism programme. CIS Dean Swelim, associate professor of Islamic Art and Architecture and the programme’s coordinator, led the trip, organised and sponsored annually by the programme to a relevant destination in the Islamic world.

Jordan and its pre-Islamic, Islamic and modern cultures are studied as part of the curriculum of the Islamic Art and Architecture programme. The educational trip included visits to the pre-Islamic Roman sites of Jerash and Nabataean Petra, the Biblical sites of Mount Nebo and the town of Madaba, Amman’s Roman theatre, and the Temple of Hercules.

“The educational trip included visits to the pre-Islamic Roman sites of Jerash and Nabataean Petra, the Biblical sites of Mount Nebo and the town of Madaba, Amman’s Roman theatre, and the Temple of Hercules. Students benefitted a great deal from such an immersive experience in which they managed to meld their cultural and academic knowledge and avail the many benefits of travelling to a new destination. They embarked on historic site visits that had fascinating characteristics for their time in history. These sites provide a missing link to understanding the connection between different civilisations in this part of the world at large,” Dr Swelim said.

Comprising the basic division of Arabia by ancient geographers into Arabia Felix, Arabia Petra and Arabia Deserta, cities and archaeological sites such as Jerash, Ajloun, Umm Qais, Madaba, Mount Nebo, Mshatta, Qur Khana, Qusayr Amra, Al-Dei Petra, Petra, and Kharanaq provided the needed practical experience to some of the courses in the CIS programme.

“Students from CIS have previously visited Cairo and Istanbul as part of the recently introduced Islamic Art, Architecture and Urbanism programme, which relaunched in 2018, is multidisciplinary in nature and conducted in collaboration with the University of Oxford in the United Kingdom and the Museum of Islamic Art in Doha. Students benefitted a great deal from such an immersive experience in which they managed to meld their cultural and academic knowledge and avail the many benefits of travelling to a new destination. Saleh Al Hamad Al Mana’s dedicated outlet for pre-owned and accredited vehicles opens

**Total reassurance**

San that enables customers to buy an innovative programme from Nissan

Saleh Al Hamad Al Mana Co., in the presence of Nissan Middle East officials.

Nissan Intelligent Choice is an innovative programme from Nissan that enables customers to buy a certified pre-owned Nissan car that has already passed all technical and mechanical tests. These tests include a sequence of 100-105 inspection to ensure compliance with Nissan’s high standards of durability, capability, and endurance. The statement noted.

The benefits of this programme include a warranty for one car owner (5,000km), vehicle check inspection to ensure compliance with Nissan’s high standards of durability, capability, and endurance. The statement noted.

The programme reflects our commitment to enhance the Nissan brand and offer our customers the highest-quality and unmatched driving experience. It also opens the way to set new standards in the pre-owned car market in Qatar.

For pre-owned vehicles, this programme ensures our customers the very best of Nissan warranty and roadside assistance for one year, as well as vehicle eligibility for six years or 100,000km.

The attractive architecture, with wide open spaces and unique architectural design, makes it an appealing, walkable destination. The statement noted.

Sales, Service and Parts will be open from Saturday to Thursday, 9am-8pm, and on Fridays 4pm-8pm. The new showroom for pre-owned and accredited cars is open from Monday to Thursday, 9am-1pm, and on Friday afternoons.

21 High st at Katara offers ‘cool comfort’ as temperatures soar

The activities, theme games, entertainment, and food are organized by the Department of Tourism and Antiquities, Katara Performing Arts Centre by Doha Exhibitions and Events, in partnership with the Qatar Olympic Committee. The statement noted.

Libyan fighters seize town from Haftar’s forces

Libyan forces allied to Libya’s internationally recognised government seized a town from forces loyal to Khalifa Haftar on Tuesday, fulfilling a threat to attack Tripoli, home to the recognised administration.

The assault, the second in a week, capped an offensive by the government-aligned forces that captured Gharyan, south of the capital Tripoli, which eastern forces loyal to Haftar had used as their main supply base to attack Tripoli, home to the recognised administration.

UN reports have previously said that the UAE and Egypt have been arming Haftar’s Libya National Army (LNA) since 2014, but details have been unclear.

Libya’s Government of National Accord (GNA) military spokesman Colonel Mohamed Gnounou said Wednesday that forces loyal to the GNA had taken Gharyan, which Haftar had taken as his main supply base to attack Tripoli, home to the recognised administration.

Anti-Haftar forces that nominally back Libya’s internationally recognised government announced Wednesday that they had taken the strategic town of Gharyan in a surprise attack.

Haftar yesterday promised a “tough response” and accused militant backing the Tripoli-based Government of National Accord of “treason” and vowed to attack Turkish assets.

Libya’s Government of National Accord military spokesman Colonel Mohamed Gnounou (left) and Gharyan Mayor Youssef al-Bdiri give a press conference in Gharyan, 100 kilometres southwest of the capital Tripoli, yesterday, after it was re-occupied by forces loyal to the GNA.

Alfardan Jewellery, Chopard unveil exclusive pieces for Qatar Watch Club

By Peter Alagos

Alfardan Jewellery, in partnership with Chopard, recently unveiled the limited edition of its L.U.C GMT One Qatar Watch Club Edition to celebrate the first anniversary of the club.

The unveiling took place during an event held at Marea Maris in Doha as part of the celebration, including the unveiling of the newly elected members of the Qatar Watch Club.

The L.U.C GMT One Qatar Watch Club Edition features a dual-time function built into the movement to display a second time zone. The limited edition by Chopard is available only to 30 fortunate watch forums that allow people to share their passion with members and enthusiasts alike. The L.U.C GMT One Qatar Watch Club Edition “is a true illustration of design, quality, and craft that is distinctive only to Chopard’s master of watchmaking skills,” Alfardan Jewellery has said in a statement.

Crafted in stainless steel, the 42mm-diameter model is an ideal size for any wrist and makes the rounds of the Gulf on a brown crocodile strap with grey stitching, and offset by a polished, satin-brushed ring on which the distinctive hour lines stand out against a gray background and the lightning fast time against a slate grey canvas. The same matching colors apply to the bezel and crown.

The inherently distinguished timepiece adjusts to every circumstance. When traveling, the timepiece adjusts to the local time while keeping track of the home time as experienced by friends and family. This gentleman-traveler’s companion for the 30 privileged individuals who will have the honor of acquiring this limited edition is an exceptional timepiece that is easy to use and appreciate on a day-to-day basis, according to Chopard.

This approach shines through the determination of Chopard co-president Karl-Friedrich Scheufele, a passionate devotee of fine watchmaking who devotes his life to the making of each watch in the L.U.C collection that paid homage to the company founder: Louis-Ulysse Chopard already knew how to share greatness with his pocket watches.

The gentleman-traveler’s timepiece provides a dual-time read-out powered by an original L.U.C 01.03-L movement equipped with integrated GMT function. This gentleman-traveler’s watch stands out by the sheer elegance of its details and the innovative practical nature of its design. With Chopard’s modern design and fully crafted finishes it makes it a perfect travel companion for the 30 privileged individuals who will have the honor of acquiring this limited edition. The Breguet numerals on the dial are exactly the same as its prototype A.L.U.C, the first circular-registered pocket watch.

The L.U.C GMT One Qatar Watch Club Edition adds an in-house finishing touch to a gentleman’s wrist, rejuvenating the globe. Supplier picture

May asks MbS for transparency in Khashoggi case

Businessman arrested against attending workshop

A top Sudanese general warned yesterday that he would not permit talks any time soon with the country’s ruling military council which is killing protesters in the streets.

Security forces fired out of hand yesterday to disperse a sit-in in Khartoum, killing a worker and injuring dozens of protesters. The generals said Friday that the proposal could be a base for a new government of Sudan's ruling military council and the opposition, including the Sudanese Communist Party.

The generals said Friday that the country is going through a “vandalism” ahead of a mass protest on June 3 left dozens of people dead in Khartoum since Saturday.

Zimbabwe moves to keep a lid on maize prices after drought

Business

Zimbabwe has banned farmers from exporting maize for the time being, rather than the state Grain Marketing Board as the government moves to keep prices of the staple crop from soaring to unaffordable levels.

Under regulations published late on Friday, any individual or company that wants to export maize must first raise the matter with the Ministry of Agriculture.

The Grain Marketing Board will be the sole buyer of the crop and will fix a price that will try to keep it low enough to stop farmers from exploiting its export market to drop prices on the black market. It follows the drought, which a UN food agency said affected thousands of people in Zimbabwe needing food aid.

The new regulations impose a limit on the amount of land and agriculture also banned from the country's crops in order to prevent transporters from making more than 50% of their trips from one area to another.

Failure to comply would result in a police raid of the farm and the seizure of the maize. The government also wants to export a limited amount of its stockpiles of maize or any other grain to secure the supply for its domestic population.

Under the regulations, the government will fix prices on the export market and then fix the price for local farmers.

Zimbabweans have been struggling to feed families who were hit hard by the food shortages, and the country has been hit by several years of drought, with only a small harvest expected this year.

The new regulations are expected to be enforced starting next month, officials said.

South Africa takes Cape Town octopus fishing after two whales die

Business

South Africa has banned octopus fishing after two whales died in the country's first known entanglement with the animals.

The government announced the ban on Thursday after two whales were found entangled in lines attached to the octopus fishing vessels. The entanglement led to the death of one whale, which was found entangled in lines attached to the octopus fishing vessels.

The government has also banned the export of octopus to countries where it is illegal to import the animals. The ban comes after two whales died in the country's first known entanglement with the animals.

**Trump appeals courts border wall ruling**

**AMERICAS**

**A**

The US Court of Appeals for the District of Columbia Circuit on Monday upheld a lower court’s ruling that President Donald Trump improperly used emergency funding to construct a border wall in southwestern Texas.

The federal appeals court ruled against the administration in a lawsuit brought by the Sierra Club and the Southern Border Communities Campaign.

“We are extremely disappointed and will appeal this to the US Supreme Court,” Trump said in a statement.

Trump’s administration had tried to speed up border wall construction through emergency funding, saying the wall was needed to combat drug smuggling and prevent smuggling of human traffickers and of asylum seekers.

The Trump administration has been seeking to build a wall along the US-Mexico border. The president declared a national emergency last February to divert funds from a military construction account to build the wall.

Critics of the move said Trump was violating the constitutional separation of powers by using funds already approved by Congress for other purposes. The lawsuit was brought by a coalition of environmental groups, Native American groups and states affected by construction of the wall.

On Friday, US District Court Judge David H. Christen issued a temporary restraining order blocking the administration from using the money.

The ruling said the government could not use the emergency funding because it would violate the appropriations law.

On Monday, the appeals court upheld the lower court’s decision.

The appeals court order said Trump had exceeded his authority by using emergency funding to pay for the border wall.

The court said Trump had not shown that a national emergency existed.

The government had argued that the border wall was needed to combat narcotics smuggling and to prevent undocumented immigrants from entering the US.

"It is inevitable. These were made for the moon, not for the moon and back," added Young, who owns a child who is now 10 and still wears the boots that Collins wore.

"We know the rubber bladders are tough and strong and Aldrin touched down on lunar soil. The boots were made to withstand the loads of the astronauts who stepped on the moon. We know the composition of the lunar dirt is much more complex and the boots were built to withstand the loads of the astronauts who stepped on the moon."

US President Donald Trump yesterday said he would not plan to negotiate a new security treaty with Japan "until relations are good." He has threatened to negotiate a "great" security treaty on the island where Tokyo has "a lot of territory" and the two leaders have "a very good relationship." Trump said he would only negotiate a new treaty if "it makes sense for the Japanese people" and "for the security of Japan." He added he would "very strongly" ask for "very strong" compensation, "very strong," and "very high" compensation. The US President told reporters that he would not change the current arrangement unless "it makes sense." Trump's comments came as the two leaders met at the resort for the G20 Summit in Osaka, Japan. Trump and Abe met several times before the summit to discuss their relationship and their views on the trade war. The US President has threatened to impose new tariffs on Japanese goods, including steel and aluminum, if Japan does not open its market to US exports. Trump also accused Japan of being "very unfair" to the US, saying it has "protected" the yen and "very unfair" trade practices. Trump has called for "fair and reciprocal trade" and has threatened to impose tariffs on Japanese goods if they do not open their market to US goods. "We're not going to have a deal until we get fair and reciprocal trade," Trump said. "We've got a lot of deals that we want to make." Trump's comments come as the US and Japan are set to begin trade talks later this month. The US President has said he wants to renegotiate the Trans-Pacific Partnership (TPP) trade agreement, which was signed by 12 countries including Japan but not the US. Trump has said he wants to renegotiate the deal, which he called "horrible," and make it "much better." He said he wants to ensure that the deal is "better" for American companies and workers. The Trump administration has also expressed interest in negotiating a new trade agreement with Japan, which is the US's third-largest trading partner. The US has threatened to impose tariffs on Japanese goods if they do not open their market to US goods, and Trump has called for "fair and reciprocal trade" to be renegotiated. Corbyn says ‘neutrality of civil service a concern’

London’s Tower Bridge an icon at 125

The critics were sniffy, feeling it was a bit of a PR stunt. But the bridge is popular with both local residents and tourists. It is the most photographed bridge in the UK and in the world.

By Nadeem Badshah

London’s iconic Tower Bridge celebrates its 125th anniversary today by showing off the swish and shiny new cans of water that were sold on site in 2017.

No doubt you will be thinking of Tower Bridge on Sunday, June 30, 2019 as Britain’s Glastonbury Festival begins.

The fairytale castle-style south tower of the bridge, which was completed in 1894 by the future king Edward VII and opened by Queen Victoria, is now a major water station around the site. It has been refilled at least once a day since 2017 and has provided ice-cold water and carpets, the festival said. “If you’re not only a water station, but also a place to sit and enjoy the view, you’re doing it right.”

Tower Bridge took eight years to build and was opened in June 1894 by the future king Edward VII. The bridge was 303 feet (92m) tall and 801 feet (244m) long. It is the last bridge to be made of cast iron by the Royal Engineers. The bridge today is lit up every night.

The bridge has been the subject of much debate, with some saying it is too frail to become prime minister. It has also been the subject of much controversy, with many saying it is not as physically accessible as it could be.

Over the years, the bridge has been used for many different events, including the 2012 Olympic Games and the 2013 Brit Awards.

A dual British-Iranian citizen, she was sentenced to prison in late 2016 and has been on hunger strike for more than a year.

The Met Office forecaster said: “It’s going to be a very hot and very active weekend.”

The Met Office forecast for the weekend showed that temperatures would be in the mid-30s with a high of 35.6 degrees Celsius in Southampton. The capital was expected to be cooler and drier than the south east, with temperatures likely to be around 22 and over.

Outbreaks of rain and thunderstorms could hit eastern parts of the UK, with temperatures expected to be cooler and cloudier than in the west. Britain has recorded its

Glasstonbury’s plastic bottle ban tested by hot weather

B ristols’ Glastonbury Festival has been tested by running the sale of edible water bottles at the site, the hope being of inspiring long-term change – even amongst the very hands-on festival-goers that formed some of the biggest litterers in the history of the event.

Plastic bottles were banned at the site in 2015, although a number were shuttled in from outside the festival site.

Now, bottle-free Glastonbury has been tested by running the sale of edible water bottles at the site, the hope being of inspiring long-term change – even amongst the very hands-on festival-goers that formed some of the biggest litterers in the history of the event.

“Bottle free” means no bottled water at Glastonbury. Bottle-free means that only bottles of water made from water and salt are sold on site, to be used as a refiller. Bottle-free means that any water bottled on site is recycled and composted.

The critics were sniffy, feeling it was a bit of a PR stunt. But the bridge is popular with both local residents and tourists. It is the most photographed bridge in the UK and in the world. Rescue vessel docks in Italy, captain arrested

Italian police arrested yesterday the captain of a migrant-rescue ship at the centre of a stand-off with the Italian government, after the ship sailed to the Italian port of Lampedusa. The Sea-Watch 3, carrying dozens of migrants rescued off Libya, was taken off by tax authorities on Saturday evening, after a lengthy stand-off with Italian authorities.

The ship eventually entered the port in the early hours of Sunday, June 30, 2019. It had been in a stand-off with Italian authorities since it sailed to Italy or an EU state to accept migrants off the island of Lampedusa. After it was taken off by tax authorities, it was taken to a reception centre in the southern city of Taranto.

People of all ages rallied in support of the migrants on the new city hall run by the new mayor, Giangiuseppe di Maio, who was elected on the ticket of the Five Star Movement. The mayor's government has been criticized for its tough line against migrants, including the closure of the former migrant centre in Ventimiglia.

Merkel says she's fine

German Chancellor Angela Merkel told reporters on Saturday that she was feeling fine, two days after she experienced a second bout of severe shaking during a press conference on the sidelines of the G20 summit in Osaka, Japan. Merkel experienced a public health scare earlier this week when she said that she had “nothing particular to report” after falling over a week earlier, and had been taken to a hospital in Munich.

The German government has been under fire for its handling of the migration crisis, with protests in several cities and a stand-off with Italy over the fate of the Sea-Watch 3. The ship, carrying dozens of migrants rescued off Libya, was taken off by tax authorities on Saturday evening, after a lengthy stand-off with Italian authorities.

Migrants and homeless seek shelter inizzling France

France has been hit by a heatwave, with temperatures soaring to record highs. The government has declared a state of emergency in several regions, and has called on people to stay indoors and avoid strenuous activity.

Migrants and homeless seek shelter inizzling France

France has been hit by a heatwave, with temperatures soaring to record highs. The government has declared a state of emergency in several regions, and has called on people to stay indoors and avoid strenuous activity.
A minor road accident took place in the city on Friday. "Nvisibleness of the building is common," said one of the locals who witnessed the incident.

Chief Minister Devendra Fadnavis announced Kondhwa as dramatic videos on social media, as well as a compensation of ₹500,000 to the family of each deceased for such mishaps. The incident was the biggest in the current monsoon season.

Governor C V Rao also expressed grief over the incident and said, "I feel very sad to hear this news. I hope the families will be given justice and the injured will recover quickly due to the injury." The families said that their house had fallen while they were sleeping in their huts, police and NDRF were immediately called to the scene.

**Incident**

"In the incident, a three-storey building collapsed on the road," said Jogdande. "There were no deaths, but some people were injured." The building was under construction and was being done by a contractor.

The operation has been repeatedly delayed due to inclement weather and rains. "The weather condition improved on Saturday morning, allowing us to fly to the region," said Jogdande.

**Search and Rescue**

"All the 15 members of the team, including four Britons, two Americans, one Indian and one Australian woman who were on the slopes, were brought down safely. They were brought down from the peak by the Indian mountaineering team and the recovered bodies will be airlifted off the mountain," said Jogdande.

"The body of the eighth person could not be retrieved as it is still looking into the charges," said Jogdande. "The Indian Government has also stated that this is nothing but a quid pro quo deal for the services that have been provided to the families of the victims and survivors." The families said that they will not accept any compensation unless the government provides them with a clean chit.

"We are going to take this up with the government," said Jogdande. "We will bring in not only the government but also the Supreme Court to look into the matter."

"In the last few days, we have been trying to bring the family members of the victims and survivors to the city," said Jogdande. "We have been trying to provide them with a clean chit."

**Vijayan Secretary**

The two activists said they have already submitted a letter to the Chief Minister of Kerala.

"We have written a letter to the Chief Minister of Kerala," said one of the activists. "We have written to the Chief Secretary of Kerala and the Commissioner of Police."

**Allegations**

Three of the main allegations made by the activists are:

1. The selection of R Mohan as Kerala Chief Minister's private secretary was arbitrary.

2. The selection of the ex-IT official as Vijayan's private secretary was arbitrary.

3. The selection of the ex-IT official as Vijayan's private secretary was arbitrary.

**Conclusion**

"We are going to take this up with the government," said Jogdande. "We will bring in not only the government but also the Supreme Court to look into the matter."

"In the last few days, we have been trying to bring the family members of the victims and survivors to the city," said Jogdande. "We have been trying to provide them with a clean chit."

**Pakistan**

**Initial Islamabad master plan report out by July 13**

The Federal Capital Territory (FCT) Administration has decided to review the master plan of the city and has finalised the proposed by-laws for its implementation.

The FCTA has formed a committee to finalise the new by-laws for the master plan, which will be submitted to the board for approval.

The committee will also recommend the proposed by-laws to the board for its approval.

**Tax officials told to declare personal assets by July 20**

The Federal Board of Revenue (FBR) has directed the officials of the Federal Board of Revenue to declare their personal assets in accordance with the Government Servants (Conduct) Rules 1964.

**Sikh culture**

Indian and Pakistani Sikh pilgrims are seen at the masquerade of Maharaja Ranjit Singh, the first Sikh emperor, during commemorations for the 1849 death anniversary in Lahore yesterday.

**HIV cases show fault in health system: Lancer**

The recent HIV outbreak in Larkana, the second worst in the country, is a worrying but potentially preventable outbreak in Pakistan's territory, according to a leading international epidemiologist.

Dr. John Lancer, a renowned epidemiologist from the US, said that the recent HIV outbreak in Larkana is a worrying but potentially preventable outbreak in Pakistan's territory.

Lancer said that the recent HIV outbreak in Larkana, the second worst in the country, is a worrying but potentially preventable outbreak in Pakistan's territory.

Protecting marine resources ‘bigger issue than impeaching president’

By Glee Jalea

The Philippines is seeking to assert that Chinese fishermen have been fishing illegally off its coast, a sea frontier dispute that could lead to tensions with China.

Sen. Richard Gordon called on China to end illegal fishing in the South China Sea, saying it is a bigger issue than impeaching President Rodrigo Duterte.

“I think we have to go to war with China to enforce our maritime boundaries if we cannot abide no more,” Gordon said during a closing hearing for the impeachment trial of Vice President Jejomar Binay, who is charged with plunder.

“If you ask me, it’s a bigger issue,” Gordon said.

Gordon earlier called on the Senate to reject the impeachment case against Binay, saying that Binay had no prima facie case for impeachment.

The Philippine government has filed a case against China in the United Nations’ International Court of Justice in the Hague, but Gordon said that this is not enough to resolve the dispute.

“arrest him to assert our maritime boundaries,” Gordon said.

The newly-impeached vice president has vowed to fight the charges against him and to continue to lead the opposition in the Senate.

Gordon said that if Binay is acquitted, the Senate should consider the impeachment itself as moot and academic.

On Friday, the Senate voted to startBinay’s impeachment trial.

A Senate source said that if Binay is acquitted, it would be difficult for the Senate to consider the impeachment itself as moot and academic.

Ethane cracker to give greater thrust to Qatar's petrochemical industry

Qatar's position among the world's leading petrochemical producers will be reinforced with the completion of a new ethane cracker that will be the largest in the world for processing ethane – or "cracking" in industry parlance – into ethylene. The state-owned Qatar Petroleum and the US chemical company Chevron Phillips Chemical Co LLC will be the biggest facility in the entire Middle East and one of the world’s largest petrochemical crackers at Ras Laffan, which is slated for start-up in 2025. The venture is seen as a major boost for the national petrochemical sector as it will enhance its capabilities and put a stronger emphasis on nation building and achieving self-sufficiency in key areas of the country’s energy sector, and will provide tremendous opportunities to contribute to Qatar’s economic diversification in countries that are not as fast growing as the US and Europe.

The new cracker, with a nameplate capacity of 1.6mn tonnes a year, will be a key component of Qatar Petroleum's $25bn ethane cracker complex with a production target of 1.6mn tonnes a year. It will be the world's leading petrochemicals producers, and complement Qatar’s existing ethylene cracker at Ras Laffan, which has a capacity of 0.85mn tonnes a year. The new cracker will bring Qatar's ethylene production up to 2.45mn tonnes a year, making it the world's third-largest producer of the commodity, behind the US and China.

Announcing the key project in Doha recently, HE the Minister of State for Energy Affairs Saad bin Sherida al-Kaabi said the project would be built to the highest standards, adding that the project would be “state-of-the-art technology and placed utmost emphasis on deploying state-of-the-art technologies and placing utmost importance on safety, environment and quality control.”

The project is part of a joint venture agreement between Qatar Petroleum and Chevron Phillips Chemical Co LLC, which will be operational by 2025. Under the terms of the agreement, Qatar Petroleum will own and operate the facility, while Chevron Phillips Chemical will provide technical and operational support and will have an option to purchase up to 25% of the ethylene produced. The project is expected to create around 5,000 jobs during construction and 500 permanent jobs during operation.

The cracker will be integrated with Qatar Petroleum’s existing ethylene and propylene facilities at Ras Laffan, allowing for efficient use of ethane and integration with other downstream processes. The facility will also facilitate the further development of the country’s petrochemical sector, as ethylene is a key feedstock for producing a wide range of petrochemical products, including ethylene oxide, ethylene glycol, polyethylene, and propylene.

By Andrew Sheng and Xiao Geng

A

echnologies such as state-of-the-art ethane cracker technology and the construction of advanced ethane crackers will play a key role in Qatar’s efforts to maintain its position as a leading petrochemicals producer in the region. The new cracker will be the largest in the world for processing ethane and will provide Qatar with a competitive advantage in the global petrochemicals market. It will also consolidate Qatar’s position among the world’s leading petrochemical producers, and complement its efforts to further expand its footprint in the global petrochemicals market.

Initial plans for the new cracker were announced in 2015, and the project was originally scheduled to come online in 2022. However, delays in the construction schedule and the ongoing political situation in the region have led to further delays. The project is now expected to be completed in 2025, which will make it one of the world’s largest petrochemical crackers.

The new cracker is expected to have a significant impact on Qatar’s petrochemical sector, as it will help the country to maintain its position as a leading petrochemicals producer in the region. The facility will also help to further diversify the country’s economy, reduce its reliance on oil and gas revenues, and contribute to the country’s vision of achieving self-sufficiency in strategic sectors such as energy and petrochemicals.

The new cracker is expected to have a significant impact on the global petrochemicals market, as it will provide Qatar with an additional 1.6mn tonnes of ethylene per year. The facility will also help to further diversify the country’s economy, reduce its reliance on oil and gas revenues, and contribute to the country’s vision of achieving self-sufficiency in strategic sectors such as energy and petrochemicals.

In conclusion, the new ethane cracker is expected to be a major boost for Qatar’s petrochemical sector, as it will help the country to maintain its position as a leading petrochemicals producer in the region. The facility will also help to further diversify the country’s economy, reduce its reliance on oil and gas revenues, and contribute to the country’s vision of achieving self-sufficiency in strategic sectors such as energy and petrochemicals.
**Should the Russians hug the Chinese?**

**By Nina L Khrushcheva**

ChildrenPresident Xi Jinping was lauded the host of Russia’s state visit to Moscow on 21 April. Vladimir Putin admired the panda Xi had brought a standard of Chinese gift-giving to the international diplomatic scene. In his speech to the students, the president thanked the Chinese and President Xi for their hospitality.

But the relationship has its ups and downs. Putin and Xi have not always been on the same page. Putin has sometimes criticized China’s assertiveness, while Xi has been critical of Russia’s behavior.

So what is the current state of relations between Russia and China? Let’s look at some key points:

1. **Economic ties:** Russia and China have been strengthening their economic ties. Trade between the two countries has been growing steadily, and they are working together on major infrastructure projects.
2. **Security cooperation:** Russia and China have a strong security partnership. They are members of the Shanghai Cooperation Organization (SCO) and have worked together on numerous security issues.
3. **Energy cooperation:** Russia and China are major players in the global energy market. They are working together on energy projects, including the construction of the Power of Siberia pipeline.
4. **Cultural exchanges:** Russia and China have a rich cultural and educational exchange. They have many cultural and educational exchange programs.

However, there are some challenges to the Russia-China relationship. For example, Russia has been critical of China’s human rights record, while China has criticized Russia’s military aggression.

Overall, the Russia-China relationship is complex and multifaceted. It is important to continue to monitor and analyze this relationship to understand its evolving nature.
Northwestern University in Qatar (NU-Q) has announced a new master’s programme for professionals looking to start or advance their career in the business of sports.

The Master of Arts in Sports Administration (MSA) programme, which is offered by NU-Q in partnership with Northwestern University’s School of Professional Studies, will equip students with the skills and knowledge they need to excel in the economic enterprise of sports, NU-Q has said in a statement.

The MSA courses – both online and on campus at NU-Q – will be taught by faculty members with extensive professional and scholarly expertise in the field of sports and sports management.

In addition to core courses on operations, marketing and sponsorship in sports, students will also enrol in a four-course programme on Global Sport Communication designed to prepare students for communication, marketing, and promotional roles in the global sports industry, the statement notes.

"With the growing focus on strengthening the local and regional sports industry, along with the upcoming 2022 World Cup, this degree offers young professionals an opportunity to build a solid foundation in strategic, creative and analytic skills that are essential for success in this highly competitive and complex domain," said Everett E Dennis, dean and CEO.

To complete the MSA degree, students must earn credit from a total of 11 courses that include sports research methods; legal and ethical issues; the technology of sports; and global sports communication. They must also complete a capstone or thesis project to demonstrate a firm understanding of the fundamentals of sports administration and communication.

"The MSA degree provides students from Qatar and the region with access to a graduate programme from one of the world’s top universities on the business of sports that will enable them to advance in their professional careers," said Jairo Lugo-Ocando, director of executive and graduate education at NU-Q.

The deadline to apply for the programme is July 15. For more information, one can visit https://www.sps.northwestern.edu/master/international-sports-administration/index.php.

Qatar National Library hosted a talk by Qatari artist Hamad al-Mataw’ah on June 27 as part of an ongoing series, 'Inspiring Individuals'. Young adults learned about the inspirational life experience of the talented artist who was born colour-blind, but has gone on to become one of Qatar’s most popular cartoonists. Hamad's art is also a medium to represent aspects of Qatar’s culture and identity, as well as social and political issues, most recently the blockade on Qatar. He is a recognized talent in Qatar’s visual art community, participating in exhibitions such as ‘Colour Barrier’ in Doha and the ‘Al Ezz and Al Khair’ exhibition at Katara – the Cultural Village, where his work reflects his artistic talent for classic cartoon characters. Attending the event, Abulrahman Hilal said: “The library is giving us the perfect opportunity to learn and be inspired. I often come here to attend events, read books, and meet my friends and relations. Today’s event, for example, shows the value of this place in helping people meet passionate youth from Qatar.”

On the occasion of the Indian Independence Day, Gulf Times, as always, will be publishing a Special supplement in tabloid format, which will give you the opportunity to convey wishes and greetings to the government and people of India with the aim of popularising yourproduct/service.

The supplement will be distributed free along with the Gulf Times Newspaper on 15th of August 2019.
