By Peter Allen

Immigration policies and taxation restrictions are expected to dominate the Indian Tourism Council (ITC) meetings in New Delhi. Several leaders have warned that Indian tourism is facing a "perfect storm" that could last for several years. Among the issues to be discussed are the government’s efforts to attract more tourists and improve the country’s tourism infrastructure. The meeting’s agenda will also include discussions on the impact of the coronavirus pandemic on the travel industry and potential strategies to mitigate its effects.

The Indian government has been working to attract more tourists from abroad and has launched several initiatives to boost domestic tourism. These efforts include the introduction of new visa policies, the expansion of the e-tourist visa programme, and the development of new tourist destinations. However, the pandemic has had a significant impact on the industry, with many travel companies facing financial difficulties and travel restrictions continuing to limit international travel.

The Indian government has also been working to improve the country’s tourism infrastructure, including the development of new airports, hotels, and other facilities. These efforts are aimed at attracting more tourists and boosting the country’s tourism industry. However, the pandemic has caused delays in some of these projects, and the full impact of the pandemic on the industry is still uncertain.

The ITC meeting is expected to provide an opportunity for tourism leaders to discuss these issues and develop strategies to mitigate the effects of the pandemic. The meeting will be attended by representatives from various countries, including the US, Europe, and Asia. It is expected to be a key event in the tourism industry, with many leaders looking to the meeting for guidance on how to navigate the challenges facing the sector.

South Africa sending in the army to Cape Town

South African soldiers will be sent into the crime-ridden township of Philippi where violence and murder have been on the increase in recent months, police said yesterday.

"The Western Cape Provincial Commissioner has taken the decision to send the military to Philippi," said Capt. Albert Fritz, senior police official from Khayelitsha police station.

The move follows a visit by Western Cape provincial minister, Faiez Sioaan, who had been in Philippi, a shantytown near the city of Cape Town, the day before, but violence has peaked in recent months in the sprawling township of Philippi, one of the most violent places in South Africa.

Neighbouring townships, Lombardy and Thokoza, have been abandoned by police and subjected to gang-related violence, with the much-criticised police force unable to impose order.

The latest deployment follows a visit by Frics Minister Mlambo Shabangu to Philippi, which has been described as one of the most dangerous places in South Africa.

According to Fritz, a statement yesterday.

"We believe that this time, things will work. We have normalised the situation and we will make sure that through Operation PROSPER, which we have implemented, we will get the correct information and we will improve the stability in the Western Cape," said Fritz.

"We don't want to be in the same situation as last month. We have been on Operation PROSPER and we want to make sure that this month, things will be different."
Immigration raids set for the weekend, says Trump

AFP

WASHINGTON

US President Donald Trump yesterday con-
firmed that immigration raids would take place across the country this weekend
in an effort to identify and deport many of the
non-citizens who have been living in the US.

Trump was under intense pressure to
crack down on the number of non-citizens
in the country, and he reiterated that his
administration was committed to enforcing
the law and deporting those who had
crossed the border illegally.

The president told reporters that he
expected the raids to be carried out after
the weekend,

Labour secretary Acosta quits over Epstein affair

WASHINGTON

Labour secretary Alex Acosta resigned yester-
day, amid a backlash over his handling of
a sex crime case involving Jeffrey Epstein,

The New York Times had reported that
Acosta had signed a non-prosecution
agreement with Epstein in 2008, which
allowed the financier to escape
federal charges.

The move came after it was revealed
that Acosta had failed to disclose
conversations with Epstein, and that
he had ignored evidence of
 unacceptable conduct.

Acosta's resignation came two days
after he was grilled by lawmakers in
Congress about the Epstein case.

The former labour secretary had been
under pressure to resign for weeks,
and his departure was seen as a
temporary victory for
Democrats, who have been seeking
to impeach him.

The new labour secretary will be
appointed by President Donald Trump,
who has promised to
appoint a "top talent" to
replace Acosta.

Singer R Kelly arrested in Chicago

CHICAGO

R
dell R Kelly has been arrested on federal
charges stemming from alleged
sexual abuse of children.

Kelly, who is also known as R. Kelly,
was arrested by federal agents on
Thursday night at his home in
Chicago, according to the
US Attorney's Office.

Kelly, who is 52 years old, has
been under investigation for years
for alleged sexual misconduct with
young girls.

The singer, whose real name is Leonard
Bobby Ray Kelly, is known for his hit
songs "I Believe I Can Fly" and
"The World's Greatest."

YouTube rules out banning music genre

By William Atkinson

The Metropolitan Police has rejected calls to ban the music genre known as drill after a series of violent incidents linked to the style of music, which has been condemned by some as a "street drug.

Drill music, which originated in London, has become increasingly popular in recent years, with artists such as Skepta and young, often young, males and females performing in a style that has been likened to a "black and white" version of hip hop. The music is characterized by its rapid tempo, aggressive lyrics, and often violent imagery.

The police have been under pressure to take action against drill music, with some calling for a ban on the genre. However, the Metropolitan Police said in a statement that it would not ban drill music, saying: "We do not believe that a ban on a particular music genre will address the underlying issues that are causing concern in some communities."

The police have said that they will continue to work with community leaders and organizations to address the issues that are causing concern, and to provide support to those who are affected by the violence associated with drill music.
Dutch police find thousands of letters buried in rock gardens

The police said they found hundreds of letters buried in rocks in a former prison, officials said yesterday, adding that they were seeking a suspect.

Police made the discovery on Thursday while carrying out the forensic examination of a house that had been searched by the police last month. The letters, which were written on paper and some of which had been folded into origami, were found in various parts of the house and garden. The police said they were investigating whether the letters were written by inmates or by others who had accessed the property.

The letters were found in several rooms and outdoor areas, including a garden with rock sculptures. The police said they were trying to determine the purpose of the letters and whether they contained information of a criminal nature.

The letters were found in the garden of a former prison, where inmates were often held in solitary confinement.

BJP ‘to revive proposal to resettle Pandits in Kashmir’

New Delhi

The Bharatiya Janata Party (BJP) is reportedly preparing to stage a comeback in the Jammu and Kashmir region. Sources close to the party have indicated that the BJP is planning to revive the proposal of resettling Pandits, who were forced to migrate from the Valley, a senior leader said, a proposal which had been shelved following the scrapping of statehood in the region.

The proposal was first mooted during the previous government, led by Narendra Modi, with former Home Minister Rajnath Singh being the key architect. The proposal was aimed at providing a permanent solution to the decades-old issue of displacement of Pandits from the Valley.

BJP leaders are reportedly in touch with several states, including Jammu and Kashmir, to discuss the proposal. The party is expected to present its plan to the government in the near future.

Kumaraswamy ready to seek trust vote in assembly

Bangalore

The ruling Janata Dal (Secular) (JD(S)) led by the Congress leader H D Kumaraswamy has stated that it is ready to seek a trust vote in the Karnataka assembly.

The party’s move comes after the Chief Minister was approached by the opposition Congress and JD(S) legislators, seeking a confidence vote in the assembly.

The Congress and JD(S) have been in a bitter feud with the ruling coalition, which is headed by the Janata Dal (United) (JD(U)) and the Bharatiya Janata Party (BJP).

Senior Congress leader Siddaramaiah had earlier said that the party would call for a trust vote in the assembly as soon as the budget session ends next month.

The Congress leader has been in talks with the opposition parties to form a new government in the state.

‘Fascist’ SFI unit at Kerala college attacked

Thiruvananthapuram

A “Fascist” SFI unit at a college in Kerala has been attacked by a group of students, who allegedly shouted fascist slogans and hurled stones.

The attack took place on Monday, when a group of students, who were members of a right-wing group, entered the college campus and started shouting fascist slogans.

The attack has sparked outrage among students and faculty members, who have condemned the incident.

Top court refrains from stay on Maratha quota

Mumbai

The apex court on Wednesday refused to stay the Maratha quota in education and jobs, which was announced by the state government.

The court observed that the matter was pending in the high court and that the state government had not taken any final decision on the matter.

The court noted that the government had announced the quota in the interest of social justice and that it was the duty of the state government to ensure that the quota is implemented.

The court also observed that the state government had not provided any evidence to show that the quota was necessary for achieving social justice.

The court further observed that the state government should be given a chance to implement the quota and that the high court should decide the matter on its merits.

Judge who joined former premier Sharif is sacked

Prime Minister Imran Khan on Saturday, July 13, 2019, sacked Justice Shaukat Aziz Khan from the post of NAB chairman.

Khan was also apprised on in-depth matters related to administrative and other matters related to the execution of the housing program. Khan also appreciated the ministry for booking Pakistan International Airlines, which this judge had given under practices, of the air carriers.

Khan said the housing units would be built on a public-private partnership basis, wherein the government will provide the land and the private sector will construct the building, and the end users will own it.

The project is expected to be completed in a year and a half.

The “Naya Pakistan Housing Program” is aimed at providing 10 million housing units to the deserving people and the private sector would contribute to the construction of the houses in the country.

The prime minister also directed the government to take emergency steps to order the CAA officials to remove the airspace for the movement of India’s flights from Thal to Karachi since the closure of the airspace to the Indian airspace.

The CAA officials also briefed the prime minister that the airspace to the movement of India’s flights from Thal to Karachi has already been ordered.

The meeting also deliberated on the CAA, the national carrier and observed that Mahmood Malik presented a programme.

The housing project will be integrated with the natural beauty of Islamabad and will be built on a public-private partnership basis.

Duterte choice of Speaker fails to win broad support

By Manila Times

July 7 (Thursday) — After the president announced last Sunday that the three common bets were left with no choice but to ally with the Duterte Coalition formed by Paolo Duterte and his sister, Davao City Mayor Sara Duterte-Carpio, a source close to the Duterte administration said they were willing to consider any of the three bets for Speaker to succeed Alan Peter Cayetano as the 17th Speaker of the House. 

"The Duterte administration is said to have decided to accept any of the three, given "it will be better for the peace talks," the source said.

"We will not hesitate to suspend or even remove any apparent reason," a 20-year-old neophyte representative in Congress said, "if we establish that this was an un-planned, unplanned, unplanned suspension." 

"We are willing to consider any of the three, given "it will be better for the peace talks," the source said."

UN ruling anniversary

By Manila Times

PHILIPPINES

On Tuesday, over at the Manila City Police Office (MCPO), officials said that a crime for a president of the Philippines is "admitting any kind of abuse in our government."

"They are monsters," he added. "If you don't kill them, they will kill you. They are monsters," he added. "If you don't kill them, they will kill you. They are monsters."

"They are monsters," he added. "If you don't kill them, they will kill you. They are monsters.""
Global warming is likely to be 2.4°C on average

By Mark McNeil

Scientists have revealed that global warming is likely to be 2.4°C on average, far higher than previous estimates, as the world faces a ‘tipping point’ in the climate crisis.

The study, published in the journal Nature Climate Change, found that the Earth’s temperature will rise by 2.4°C by the end of the 21st century, far higher than the 1.5°C target set out in the Paris Agreement.

The research, led by the University of Oxford, was based on 81 models and used the most recent climate projections.

“By 2100, we find global warming will be 2.4°C above pre-industrial levels,” said lead author Dr. Ed Hawkins. “But this is the lowest estimate in our study, which shows warming could be as high as 3.5°C.

“The study suggests that even if we meet the 1.5°C target, we will still experience significant climate change, including more frequent heatwaves, floods, and droughts,” Dr. Hawkins added.

The study was based on a wide range of climate models and used a variety of approaches to estimate the future temperature.

The results suggest that even if we meet the 1.5°C target, we will still experience significant climate change, including more frequent heatwaves, floods, and droughts. However, the study also shows that we can still limit warming to 1.5°C by 2050, which would prevent many of the worst impacts of climate change.

The study highlights the need for urgent action to reduce greenhouse gas emissions and calls for a dramatic shift towards renewable energy sources.

“While it is possible to limit warming to 1.5°C, it will require significant and immediate reductions in emissions,” Dr. Hawkins said. “This will require a global transition to clean energy, with a focus on renewable sources like wind, solar, and hydro.

“Without this transition, we risk a future of extreme heatwaves, droughts, and floods, and the consequences of climate change will be felt for generations to come.”
A new malaria vaccine now appears closer to reality. Immunisation of children under five years of age with RTS,S/AS01 represents a significant opportunity to reduce malaria deaths, with the vaccine known to be effective in children in Africa. However, vaccine rollout remains dependent on funding, and the dose is expensive. The vaccine was tested in two regions: in 2019, 156,000 children were enrolled in the Mwanza area of Tanzania and more than 123,000 in the rural area of Mozambique.

The vaccine is now ready to be trialed, health systems can be scaled up to accept the new vaccine, and countries are ready to implement the latest malaria control tools.

The challenge now is to make sure that the vaccine is available to all children in the regions where it will be needed. The goal is to make sure that the vaccine is accessible to all children in these areas.

The vaccine is a new tool to help tackle childhood malaria. However, it is still expensive and needs to be widely available to all children who need it.

The vaccine is now being tested in children under five years of age, but it is not yet clear how effective it is in preventing malaria. Further trials are needed to determine the effectiveness of the vaccine and its potential impact on reducing malaria deaths.

The vaccine is a promising new tool in the fight against malaria. However, more research is needed to determine the long-term effectiveness of the vaccine and its impact on reducing malaria deaths.

Children in the VR and e-Gaming arena.

By Joey Aguilar

The 2019 Summer Entertainment City (SEC) emerged as a hit for video and virtual reality (VR) gaming in Qatar since it opened in the first week of June at Doha Exhibition and Convention Centre, the organisers said.

Staff Reporter Tawar Mall and Hyatt Plaza are also running two summer camps at two state-of-the-art facilities. One is happening at Tawar Mall, Dana Club. The other at Al Marsa Mall, and Orya Plaza are hosting the Ice Age’s ‘Meet & Greet’ events until today.

The VR section occupies a 6,000-sq. m area at the SEC.

 SEC a hub for video and VR gaming
