Qatar participates in International Biology Olympiad in Hungary

A team from Qatar is participating in the 59th International Biology Olympiad, taking place in the city of Szeged, Hungary from 26 July to 3 August 2019.

The team comprises students from different schools in Qatar, including Al-Kuwari Secondary School, Princess Maryam Secondary School for Girls, Qatar Science and Technology College, and Al-Manhali from Maryam Secondary School for Boys.

According to the Ministry of Education and Higher Education, the students were selected after a rigorous process that included a placement test to select the best students and enriching their knowledge and skills in solving problems, experiments, and preparing them for the final international stage.

Nasser Naseeb al-Manhali from Maryam Secondary School for Boys, Mohamed Abdulaziz Al-Kuwari, a member of the Qatar team, and other students from different schools in Qatar have also been selected to represent the country in the International Biology Olympiad.

The students have been preparing for the event by attending courses, workshops, and seminars that have been conducted in light of the intransigence of the Israeli side. It is the central issue of the Arab nation, especially in light of the recent developments.

Qatar has voiced strong condemnation and denunciation of the violence and the violation of international law committed by the Israeli side.

Qatar has also expressed its support for the Palestinian people and the Palestinian Authority in their legitimate and just struggle for freedom and self-determination.

Qatar Free Zones and Media City are separate entities: QFZA

Qatar Free Zones Authority (QFZA) stated yesterday that Qatar Free Zone Authority (QFZA) and Qatar Free Zones and Media City are separate entities established by different laws.

Established by late Law No. 21 of 2013, Qatar Free Zones is responsible for the development and regulation of the economy and free zones in Qatar, helping to attract investments and contributing to the economic and business environment in the country.

QFZA, on the other hand, is responsible for the development and regulation of world-class business, industrial, and commercial, industrial and technology free zones in Qatar, helping to attract investments and contributing to the economic and business environment in the country.

QFZA has a strong commitment to attracting investments and contributing to the economic and business environment in the country. It is committed to implementing the strategy and direction of the government and the Amir in all its activities.

Qatar participates in Arab media conference in Cairo

Qatar participated in the 61st annual session of the Arab Committee for the Media Council of Arab States, which took place in Cairo, Egypt.

Qatar has made significant progress in the field of media and communications, especially with the establishment of Qatar Free Zones and Media City, which are separate entities established by different laws.

QFZA, on the other hand, is responsible for the development and regulation of world-class business, industrial, and commercial, industrial and technology free zones in Qatar, helping to attract investments and contributing to the economic and business environment in the country.

QFZA has a strong commitment to attracting investments and contributing to the economic and business environment in the country. It is committed to implementing the strategy and direction of the government and the Amir in all its activities.

QFZA has a strong commitment to attracting investments and contributing to the economic and business environment in the country. It is committed to implementing the strategy and direction of the government and the Amir in all its activities.
Now QIB cards with contactless technology

As we are keen to keep up with the latest banking technologies, we announce the launching of our contactless banking cards as the first Islamic bank in Qatar to adopt this technology.

**The most important features:**
- Ease of use without the need to insert your card into the POS
- High level of security
- Accepted locally and internationally in the majority of retailers worldwide

The QRCS refurbs Sudan health centre

The QRCS Red Crescent Society (QRCS) has continued the rehabilitation and furnishing of a health centre in the state of Darfur, in order to continue serving the region’s population.

At a total cost of QR704,000 (around USD 182,000), the health facility’s main premises, waiting area and outdoor shed were furnished, which will help the medical staff at the facility to serve the community better.

Established by the QRCS in 2015, the health centre seeks to help the local community and villagers after years of conflict. The health centre’s services are in line with the humanitarian assistance provided by the QRCS.

The QRCS health team has been working alongside the Sudanese Ministry of Health, the local governorate and the health centre’s director to improve the facility, maintain it and provide the necessary medical equipment.

According to the QRCS’s representative in Sudan, the health centre’s rehabilitation and furnishing will help to enhance the quality of health services provided to the people of Darfur, and to respond to the needs of the local community.

The health centre is equipped with a prayer garden, medications, and medical equipment.

PM meets Tunisian ambassador

HE the Prime Minister and Minister of Interior Sheikh Abdullah bin Nasser bin Khalifa Al-Thani met with Tunisian ambassador to Qatar, H.E. Mr. Mustapha Mezrieh, during his official visit. During their meeting, the Prime Minister welcomed the Tunisian ambassador and expressed Qatar’s desire to further strengthen bilateral cooperation and progress and prosperity for relations between the two countries.

The ambassador extended Qatar’s congratulations to the State of Qatar and the Emir and the people of Qatar on the occasion of the Qatar National Day.

QRScience publishes study on effects of mental health stigma

QRScience has published a research article, “Mental health stigma in Qatar: a qualitative study”, which explores the negative effects of mental health stigma on residents of Qatar.

The article was written by researchers at the University of New Brunswick, Fredericton, who conducted in-depth interviews with people from diverse backgrounds in Qatar to gain a comprehensive understanding of mental health stigma.

The study concludes that the mental health stigma in Qatar, as well as the strategies of non-disclosure about one’s mental health often led to self-stigma and anti-social behavior, which can subcategorize the individual and impede the treatment-seeking process.

HEC Paris hosts module for EMBA participants

HEC Paris’ Executive MBA programme has hosted an intensive five-day programme for EMBA participants to gain a comprehensive understanding of the energy sector, the challenges facing the energy sector and the trends shaping the sector.

The programme featured discussions on various sustainability-related challenges, including climate change, energy access, social impact and the impact of new technologies on the energy sector.

In addition, the participants had the opportunity to meet executives from the energy sector, to develop a deep understanding of the energy industry and to enhance their knowledge of the energy sector's future trends.

This module is part of the EMBA programme's decision-making module, which aims to provide a valuable toolkit to define strategies and gain a deep understanding of the energy sector.

Qatar Environment and Energy Research Institute (Qeeri), part of Hamad Bin Khalifa University (HBKU), has invited papers for its upcoming International Conference on Sustainable Energy-Water-Environment Nexus in Desert Climates 2019 (IC-SEWEN’19), to be held at Qatar National Convention Centre from December 3 to 5.

Qeeri welcomes papers on various topics relating to energy, water and environment. The deadline to receive all submissions is August 15. Admissions can be submitted at www.hbku.edu.qa/qeeri-call-paper.

More than 400 researchers, scientists, engineers and stakeholders will come together at the International Conference on Sustainable Energy-Water-Environment Nexus in Desert Climates 2019 to promote a better understanding of the links between energy, water and environment, particularly in desert climates.

Dr Marc Vermeersch, executive director, Qeeri, said “The IC-SEWEN’19 will bring together the best minds across all relevant sectors to discuss topics of increasing importance in the wake of climate change and the threats it poses to the region. Through the gathering, we hope to collectively formulate sustainable solutions that are able to mitigate the effects of rapidly changing environmental occurrences.”

Qeeri has partnered with Springer Nature for the conference with the selected proceedings to be peer-reviewed and published in a special volume of the Springer Nature Applied Science journal dedicated to arid climates.

Dr Veronica Bermudez, conference chair and senior research director of the Energy Centre at Qeeri, said “Qeeri is committed to supporting Qatar in addressing the grand challenges related to energy, water and environment, inline with Qatar National Vision 2030 and the UN Sustainable Development Goals.”

“Through this conference, we aim to exchange ideas, share knowledge, and provide updates on our technology development status, and learn from leading experts around the globe. The challenges that Qatar and other hot and dry regions are facing are unique and we hope that our conference will support the implementation of research in the area of energy, water and environment.”

Charlottesville

*Neo-Nazi gets second life for Virginia murder*

A Virginia judge yesterday sentenced a self-styled ‘white patriot’ to a second life prison term for killing a counter-protestor during a white supremacist rally in the US city of Charlottesville last August.

Heather Heyer, 32, one of the white nationalists, who was killed during the day of tension and physical clashes that unfolded on August 12, 2017.

The night before, “Unite the Right” protesters had staged a rally in the heart of the city, where the Virginia capital was built, to protest removal of statues commemorating two Confederate leaders.

The rally turned into a clash between the demonstrators and a line of police officers, along with a crowd of counter-protesters, who were there to peacefully protest against racism and Nazism.

Statements by several victims and their families were also read in court.

The deadly car-carrying press prompted a frenzied rush of white supremacists and neo-Nazis who had gathered in Charlottesville for a rally of white nationalism.

Through the state trial, dozens of the victims’ families and friends made statements, expressing their emotions.

During the state court trial, Fields’ lawyers never disputed that he had driven his car into the crowd of counter-protesters, killing a woman and injuring 19 others.

Prosecutors countered that Fields felt intimidated by the counter-protesters and about 30 other people.

ISRO races for launch fix after Moon mission aborted

The Indian space chiefs pressed on with plans to launch a landmark moon mission after aborting one liftoff attempt while awaiting a new window to send a probe to the lunar South Pole. The mission was to spend 14 days sending back data on rocks and soil near the face near the lunar South Pole.

A technical hitch in the final stage of powering up the rocket, which was to have been launched from Sriharikota, led to the abort. Some components failed during the last check and the launch was postponed.

"ISRO has been called off ," it added. A committee is still investigating the incident — after Russia, the US and China — and asked for launch not before September or beyond. "Right now, it is not possible the launch will have to wait until September or beyond," said the chief minister.

"If it is not possible the launch would have to wait until September or beyond. "Right now, it is not possible when the launch will be able to happen," the chief minister said.

"ISRO blamed "a technical failure in the final stage of powering up the rocket," the chief minister said.

A senior ISRO official said the problem occurred during the last check and the launch was postponed. "Some components failed during the last check and the launch was postponed," the chief minister said.

"ISRO has been called off ," it added. A committee is still investigating the incident — after Russia, the US and China — and asked for launch not before September or beyond. "Right now, it is not possible the launch would have to wait until September or beyond."
**Macri prospect brightens as Argentina election nears**

Argentina’s President Mauricio Macri will present evidence linked to Information Minister Jorge Faurie to the US Federal Bureau of Investigation, according to sources in Buenos Aires, as part of efforts to uncover a financial dirty war against him.

Macri’s hiring of three former US Treasury Department officials to his administration’s national security council is also aimed at improving the president’s defenses against any new legal challenges.

**Hopes dim for migrants in Mexico seeking US asylum**

The number of Central American migrants seeking asylum in the US has dropped sharply since a March peak, with the asylum caseload down 50% from the peak last year.

**Opposition talks with Caracas go to extreme**

Venezuela’s opposition said it will return to talks with the government of President Nicolas Maduro as part of efforts to resolve the country’s political crisis.

The two sides met on September 19 as part of talks being mediated by the UN Security Council.

**Maduro supporters rally**

Members of the National Bolivarian Militia took part in a rally in support of the government and against the recent report on Venezuela by the UN High Commissioner for Human Rights, Michelle Bachelet, in Caracas.

**Brazil meatpackers call off merger talks**

Brasília-based meatpackers BRF and Marfrig Global Foods SA said they had mutually agreed to call off negotiations for a possible merger that was going on for a month and could have changed the landscape of Brazilian meat exports.

Mergers between Brazil’s two largest meatpackers for a larger stake in the combined company have been a topic of conversation since the federal government decided to allow the two companies to merge.

Mergers have been criticized by development bank BNDES.

**Bolivia: Hard knocks for the poor**

Bolivian meatpackers BRF and Marfrig Global Foods SA said they had mutually agreed to call off negotiations for a possible merger that was going on for a month and could have changed the landscape of Brazilian meat exports.

Members of the National Bolivarian Militia took part in a rally in support of the government and against the recent report on Venezuela by the UN High Commissioner for Human Rights, Michelle Bachelet, in Caracas.

**Brazil meatpackers call off merger talks**

Brasília-based meatpackers BRF and Marfrig Global Foods SA said they had mutually agreed to call off negotiations for a possible merger that was going on for a month and could have changed the landscape of Brazilian meat exports.

The two companies said they had mutually agreed to call off negotiations for a possible merger that was going on for a month and could have changed the landscape of Brazilian meat exports.

Mergers between Brazil’s two largest meatpackers for a larger stake in the combined company have been a topic of conversation since the federal government decided to allow the two companies to merge.

Mergers have been criticized by development bank BNDES.

**Bolivia: Hard knocks for the poor**

Bolivian meatpackers BRF and Marfrig Global Foods SA said they had mutually agreed to call off negotiations for a possible merger that was going on for a month and could have changed the landscape of Brazilian meat exports.

**Argentina: Macri prospect brightens as election looms**

Argentina’s President Mauricio Macri will present evidence linked to Information Minister Jorge Faurie to the US Federal Bureau of Investigation, according to sources in Buenos Aires, as part of efforts to uncover a financial dirty war against him.

Macri’s hiring of three former US Treasury Department officials to his administration’s national security council is also aimed at improving the president’s defenses against any new legal challenges.

**Hopes dim for migrants in Mexico seeking US asylum**

The number of Central American migrants seeking asylum in the US has dropped sharply since a March peak, with the asylum caseload down 50% from the peak last year.

**Opposition talks with Caracas go to extreme**

Venezuela’s opposition said it will return to talks with the government of President Nicolas Maduro as part of efforts to resolve the country’s political crisis.

The two sides met on September 19 as part of talks being mediated by the UN Security Council.

**Maduro supporters rally**

Members of the National Bolivarian Militia took part in a rally in support of the government and against the recent report on Venezuela by the UN High Commissioner for Human Rights, Michelle Bachelet, in Caracas.

Hopes fade for 10 trapped miners

AFP Quetta

At least 10 miners are feared trapped underground after a mine accident in Quetta, a news agency in southwest Pakistan said yesterday.

Rescue efforts were hampered by the fact that the miners were trapped in a gas-filled coal mine where carbon monoxide gas had killed five people. The mine is a pit mine for the production of coal in the province of Balochistan.

The incident took place in a coalmine in the city of Quetta, and the miners were buried live in the mine.

"The government of Pakistan has decided to pay all required amounts to the families of the miners who were trapped in the underground coal mine," a spokesman for the Coal and Mines Ministry of Balochistan said.

The Coal and Mines Ministry of Balochistan confirmed that 10 miners from the same family were trapped in a coalmine in Quetta and died. The family of the miners has rejected the report and demanded compensation for the loss of life.

The Coal and Mines Ministry of Balochistan confirmed that it has started rescue operations for miners trapped in a coalmine in Quetta, and that the miners were buried live in the mine.

Senator Go's bill hopes to give more benefits for solo parents

Senator Christopher Go wants to give more benefits for solo parents. His bill hopes to provide more support to them by helping them care for their children.

His bill is called “Solo Parent Act of 206” and aims to amend the existing laws on solo parents. It proposes to provide more financial support to solo parents who are currently struggling to raise their children alone.

Go said that the bill will provide a financial allowance of P50,000 per month to solo parents who are currently raising their children alone. It also proposes to provide a 10% tuition discount for children of solo parents who enroll in private schools.

Go also proposed to provide a P100,000 lump sum grant to solo parents who are currently raising their children alone. The grant will be used to cover the expenses of the children such as tuition fees, food, and other necessities.

The bill has been approved by the Senate and is expected to be passed by the House of Representatives soon. Go hopes that the bill will be passed into law as soon as possible to provide much-needed assistance to solo parents.
A Cricket World Cup that appeared predictable and at the very least less exciting might have got a fresh lease of life in the second, with the inventors of the game, England, looking for the first time in thrilling albeit controversial fashion.

A first-ball wide and four consecutive no-balls from the fourth over saw four matches were either abandoned or called off with the governing International Cricket Council (ICC) drawing flak for not consulting with the batsmen involved.

"We put men on the moon, so why can’t we have a reserve day, when action can’t proceed," asked a深知 Stokes, who has since been sacked as Bangladesh coach.

The knock-out stage was also played under rain threat.

New Zealand’s semi-final match against India spilled over to reserve day and morning delays delayed the start of Sunday’s final by half an hour.

Sri Lanka Panasonic huge favourite to win the tournament.

The knockout stage was also played under rain threat.

All's well that ends well and the organisers could not have got it more right.

South Africa crash out early but stunned Australia on their way to upset semi-final.

The final nature of the pitches used in the tournament show that even though many felt it provided the much-needed balance between ball and bat.

New Zealand’s first semi-final win was a testament to defend small totals with their disciplined bowling complemented by sharp fielding.

In the end, England’s 97-7 against Afghanistan in Manchester put the final on a thrilling, gripping and highest total.

Eoin Morgan’s man upped India to revile flute that a rule with their maiden 50s World Cup title.

Defeat will be bitter pill to swallow for New Zealand.

England, winning it for the first time in thrilling albeit

50 overs World Cup title.

Hasan lit up the tournament with his all-round brilliance.

That proved a bitter pill to swallow for the brave Kiwis.

The match began with Chris Woakes starting with a wide and four consecutive no-balls from the fourth over.

Not won 22 years ago, it has lifted millions out of poverty, sent millions of children to school, and millions of lives through vaccination programmes.

African schoolchild, which is not even a change in global trade that they would find little solace in it after their teams’ failure to lift the cup.

All’s well that ends well and a final tournament that cannot have imagined a better culmination of six weeks of largely mediocre cricket.

The match began with Chris Woakes starting with a wide and ended with Martin Guptill bring run out at the end of a near-wracking Super Over as England clinched the World Cup on boundary countback.

That proved a bitter pill to swallow for the brave Kiwis who won the international favours to win the tournament.

Many experts are of the view that they were done in by a couple of bad umpiring decisions and the boundary rule.

But with Stokes, whose batting heroics earned him player-

of the-match award, particularly in the third of it. All.

Ranji has a final of the World Cup divided opinions as the latest line.

While the celebrations in England will continue for a few days more, the Kiwis will be left to curse their luck.

Qatar is the most reliable US ally in the Gulf region

By Maryam Alameddine

H is high time the Arab Sheikh Tamim bin Hamad Al Thani, who is the current Emir of Qatar, visited the United States. During the Trump administration, the two countries had a tense relationship, which has since improved. On February 6, 2023, President Joe Biden visited Qatar, and the relationship between the two countries remains strong. Qatar is an important ally of the United States, and its strategic location in the Middle East makes it a key player in regional and international affairs.

The visit of President Biden is a positive development in the relationship between the United States and Qatar. It is a sign of the importance that the United States places on the stability and security of the Middle East. Qatar is a significant player in the region, and its strong relationship with the United States is a positive factor in regional stability.

The visit of President Biden also highlights the importance of Qatar's role in the international system. Qatar is a major player in the region, and its influence is felt in a wide range of areas, from energy to security. Its relationship with the United States is a significant factor in this influence.

The visit of President Biden is also a sign of the importance of the US-Qatar relationship in the broader context of the Middle East. The region is a complex and challenging one, and the United States and Qatar are both important players in the region. The visit of President Biden is a positive development in this relationship, and it is a sign of the importance that the United States places on the stability and security of the Middle East.
