Ministry of Interior kicks off drugs awareness exhibition

The Ministry of Interior kicked off yesterday a four-day awareness exhibition on the International Day Against Drug Abuse.

The exhibition, which was launched in the presence of HE the Director of Public Security Staff Major General Saad bin Jassim al-Khulaifi, HE the Minister of Culture and Sports Salah bin Ghanem bin Nasser al-Ali, who is also a member of the national committee for narcotics control, along with a number of representatives of the bodies concerned, was part of the framework of the activities of the International Day Against Drug Abuse.

On the occasion, HE the Minister of Public Security Staff Major General Saad bin Jassim al-Khulaifi, said that the world is celebrating International Day Against Drug Abuse every year to raise awareness about the dangers of drugs and high-profile crime.

He added that this initiative is part of Qatar’s keenness to avoid the dangers of drugs and high-profile crime.

Brigadier Mohamed Ibrahim al-Jufairi, assistant director of criminal search department in the Ministry of Interior, also said that the participation of Qatar in this event is a reflection of the country’s commitment towards United Nations General Assembly to devote June 26 every year to celebrate international efforts in the fight against drugs.

Brigadier al-Jufairi also stressed that Qatar has signed no effort in support of international efforts to address the consequences of this phenomenon and has adopted a comprehensive, integrated and balanced approach consistent with international norms.

In the same context, he pointed to Qatar’s keenness to establish permanent cooperation with all regional and international organizations and institutions for the exchange of information, experiences and developments and updating laws and regulations related to the narcotics law, as well as forming permanent and national committees in this regard.

Drugs awareness exhibition

On the occasion, HE the Director of Public Security Staff Major General Saad bin Jassim al-Khulaifi, HE the Minister of Culture and Sports Salah bin Ghanem bin Nasser al-Ali, and other dignitaries toured the exhibition.

At the exhibition, various entities highlighted their role in this field.

Qatar Amiri Air Force participates in Anatolian Eagle 2019 exercise

Konya (Turkey)

Qatar Amiri Air Force concluded its participation in the 15-day Anatolian Eagle 2019 exercise held in Konya in Turkey.

The closing ceremony was attended by the Chief of Staff of the Turkish Armed Forces, Yasar Guler, as well as a number of senior officers of forces participating in the exercise.

The countries participating in the Anatolian Eagle were Qatar, Turkey, Pakistan, Azerbaijan, Jordan, USA, Italy and India.

Commander of the Qatari brigade participating in the exercise, Major Ahmed Saad al-Mohannadi, said the exercise included the participation of C-17 and C-130 aircraft. The exercise also included several joint exercises between air controllers, fighter aircraft, reconnaissance aircraft and tactical air transport, as well as training in counter-attack, air defense, airdrops, maneuvering and air defense.

QATEIFAN PROJECTS
Tender Agencies Proposals

As part of the marketing efforts, Qetafan Projects will be participating in the CityScape 2019 exhibition in Qatar.

The scope of the project includes:
1. A 500m booth design for CityScape 2019 activation,
2. Booth Installation,
3. Digital furnishing for the booth,
4. Virtual and Augmented Reality applications for the booth.

Qetafan Projects is now inviting agencies that comply with the following minimum criteria:
- Must be a qualified registered local or international agency with local official representation in Qatar, working in accordance with the local rules and regulations of the State of Qatar.
- Previous participation in CityScape Qatar in the last 5 years.
- No litigation record during the past 5 years.

Interested agencies should send their Expression of Interest stamped letter to info@qetafanprojects.com no later than 8th of July 2019.

Tender fees: 5,000 QAR
Hyundai's new flagship 'Palisade' rides on an all-new SUV chassis with exceptional second- and third-row roominess, generous cargo area and flexible seating. Available with Hyundai's HTXRC® multi-mode allwheel drive system, Palisade brings new levels of all-road, all-weather capability; technology; safety; spaciousness and efficiency to the premium three-row SUV segment. All of this innovation is packaged in cutting-edge design. It is the ultimate family vehicle for practical, comfortable daily use and imagery-making road trips. Exterior and interior design clearly reflect Hyundai's new design philosophy with a premium and bold road presence.

Skyline Automotive W.L.L., is the official distribution partner of the Hyundai Motor Company in the State of Qatar.

Flagship SUV Design
Palisade's styling conveys dignity with style in an understated theme worthy of a flagship SUV. From the front, the cascading grille is befitting of a premium SUV. Separated corner headlamps and a vertically connected forward lighting signature create a strong and distinctive front demeanor, with available LED headlights, LED daytime running lights and LED turn-signal mirrors.

A powerful, extended hood profile creates an impressive road presence, while bold C-pillars and a panoramic glass roof give Palisade a rich and luxurious appearance. Full volume over-riders and body sides offer muscular detailing.

The rear view emphasizes a wide and stable stance via muscular detailing and a vertical LED rear taillamp design. Panoramic rear glass coupled with a unique rear door provides a generous sense of spaciousness to passengers. Available optional 20-inch alloy wheels further fill out the Palisade flagship presence.

This design has aerodynamic benefits as well, with a 0.33 coefficient of drag (Cd).

Interior Convenience
The interior design combines a sense of relaxation and comfort, with eight passenger seating as standard. Leather-equipped models offer a premium, quilted Nappa leather, white on the instrument panel, smooth wraparound wood grain creating a spacious, comfortable ambience.

The One-Touch second row seat allows for one-touch operation of the seat forward and out of the way for easy access into and out of the third-row seat. For more convenience, the third row offers reclining seats. Second-row captain's chairs are also available with ventilated seating surfaces.

The interior gives a sense of openness and exceptional visibility with a large, fixed-glass rear sunroof opening, wide rear seating rows and a generous, noconfusion rear cargo area. All rear seating areas have been ergonomically designed for ease of family access. To assure a comfortable temperature for everyone, Palisade features an industry-first, innovative new roof vent diffuser design, providing quieter and more flexible flow of air to the rear passengers. A generous 16 cupholders mean there's always a place to stow a beverage at any seating position.

Palisade offers abundant technology to enhance the experience of driver and passengers. The audio and navigation display utilizes a widescreen 10.2-in touchscreen. Two Bluetooth® devices can be connected simultaneously, with one for a mobile phone connection and the other for audio streaming. The single 19 gauge cluster integrated with navigation offers exceptional ease of use.

A shift-by-wire push-button control replaces a traditional gear lever to free up space on the center console. The interior features seven available USB outlets, with outlets in every row, and nine-outlets for digital devices. Palisade’s available Head-Up Display (HUD) projects a virtual image onto the windshield, putting essential driving information – such as speed and navigation - in the driver’s line of sight without looking away from the road.

Infotainment systems integrate with Android Auto™ and Apple CarPlay™, and there is a wireless charging pad for compatible devices. An available premium sound system provides a robust and enjoyable on-road listening experience, including technology to rebuild details usually lost in digitally compressed music.

Palisade offers a sophisticated Driver Talk in-car intercom system with rear seat conversation and Quiet mode. Conversation mode allows the driver to communicate separately with the second or third rows of seats via the audio system. Rear Seat Quiet Mode allows the driver’s row to listen to the audio system while turning off the second- and third-row speakers, to avoid waking sleeping passengers in the rear. A conversation mirror allows the driver to clearly see passengers in the rear.

Exterior Dimensions and Interior Roominess
Palisade is larger in every exterior dimension than Grand Santa Fe which it replaces in Hyundai's product offering. Space efficiency compares favorably with other models in an equivalent size bracket.

Palisade delivers power to the wheels via an eight-speed automatic transmission with a multi-plate torque converter, and offers both two-wheel drive and HTRAC® four-wheel drive configurations.

Front and rear suspension width was manifested on Palisade, for enhanced roll stiffness and stability, and tires are a generous 245/50R20 standard or an optional 245/55R20. Steering and suspension components are engineered for lightness, resulting in reduced unprung weight and improved responsiveness.

Palisade also achieves best-in-class body torsional rigidity, and rigidity is almost identical with or without a sunroof.

HTRAC® All-Wheel-Drive (AWD)
The Palisade offers Hyundai's HTRAC® All-Wheel-Drive (AWD) system. This is a multi-mode system, providing an electronic, variable-torque-split clutch with active torque control between the front and rear axles – with settings optimized for several on-road and off-road situations.

Safety Technologies
Palisade offers a number of advanced safety technologies as standard, including Advanced Driver Assistance Systems (ADAS) packaged as part of Hyundai’s SmartSense. Technologies alert the driver to hazardous situations, and in some cases will act automatically to avoid danger.
Difi attends talk on elimination of
discrimination against women

D the International Family Institute (Difi), a member of the UN Economic and Social Council (UN ESC), has attended the 3rd session of the Committee on the Elimination of Discrimination against Women, which is currently taking place in Geneva, Switzerland, and set to conclude on July 19.

During the conference, Difi, an executive director, said: “Women are considered to be at the centre of the evolved family that serves as the basis for society, and we consider women’s full-fledged participation as one of our priorities. Difi not only conducted many studies and important activities aimed at strengthening the family, and combating discrimination against women, this year we have published a steady toolkit ‘Work Family Balance’ based on quantitative and qualitative data that sought to investigate the challenges confronting working women and the family as a whole. One of the challenges we identified is the importance of achieving a work-family balance, and the negative effects this can have on family members, such as health. “We are keen to attend this conference, reaffirming our commitment to support women, women leadership, and women’s empowerment. We have submitted an event titled ‘Gender Balance: Responding to Social Protection Needs in the Evolved Family’. Difi is a global policy and advocacy institute working in support of Agenda 2030 and in particular the SDGs, and the importance of family and the SDGs, which are in line with Qatar’s 2030 Vision. “The conference is also a platform to strengthen the partnership and cooperation between Difi and the UN Economic and Social Council, and to promote evidence-based policies and measures to support the rights of women and girls.”

During the conference, Difi also attended the talk on elimination of discrimination against women, entitled ‘Women and the Family as a Challenge’. For example, this year we have concluded many studies and important activities aimed at strengthening the family, and combating discrimination against women. WISE alumni win first place in AI Innovation category

A World Innovation Summit for Education (WISE) Accelerator programme alumni – OBRIZUM – has won first place in the AI Innovation category of the 2019 WISE Alumni Awards.

OBRIZUM, a global education technology company, has been helping students inside and outside the classroom. “We at WISE believe that the in-demand skill, care and diligence in recognizing and harnessing the power of AI to provide adaptive learning inside and outside the classroom.”

Dr Chibna Apey, CEO, OBRIZUM, said: “WISE Alumni Awards also recognize the importance of education and learning and its role in transforming education and training programmes faster than ever before, in a way that is personalized and measured to cater to the learner in real time, and ensures a clear return on investment.”

WISE, an initiative of Qatar Foundation, opened applications for the 2019-20 edition of the Accelerator programme in April, with the initiative completed by the end of the year, with 13 projects taking place in Doha in November 2019.

The programme aims to support innovative education technology initiatives that show high potential for scalability and positive impact.

WISE, in collaboration with the UN Economic and Social Council (UN ESC), has established the AI Innovation Challenge, which is a platform to promote evidence-based policies and measures to support the rights of women and girls.

The Qatar Financial Crimes Enforcement Authority (QFCRA) has imposed a penalty of $200,000 each on David Howell and John Hasberry, who were the directors of Guardian Wealth Management, for their contraventions of the Anti-Money Laundering and Combating Terrorist Financing (AML/CFT) rules.

Their contraventions also consisted of failing to act with due skill, care and diligence in relation to his oversight of the QFCRA’s rules with the assistance of the Anti-Money Laundering and Combating Terrorist Financing (AML/CFT) rules, the QFCRA said.

On July 30, 2019, the QFCRA fined GWMQ £20,000. GWMQ’s AML/CFT programme and controls to combat ‘illicit’ financial transactions is now in liquidation.

QC initiative to provide eyeglasses to 1,000 students

The College of Islamic Studies (CIS) at Hamad Bin Khalifa University (HBKU) is participating in the 2019 summer initiative ‘Bringing Me Back to School’ launched by Qatar Charity, in cooperation with the Ministry of Education and Higher Education, and the Doha Chapter of the British Society for Middle Eastern Studies (BSMES). The initiative was launched on June 24, aiming to provide low-income families in Qatar with eyeglasses for their children.

The project aims to provide the largest possible number of new eyeglasses for children in low-income families in Qatar to ensure they continue their education.

On Thursday, July 4, 2019, the ‘Restore A Child’s Sight’ campaign was launched at the International Conference Centre (ICAC) by Dr R Seetharaman, the ICAI chairperson, and Dr Caeiro, the CIS associate professor. The event was attended by approximately 300 students, who hold key positions in the country.

QFFD to take part in forum on sustainable development 2019

High-level delegation from Qatar Foundation Development (QFFD) and the Qatar Development Fund (QDF) will participate in the High-level Political Forum on Sustainable Development, which will be held from July 7-19 at the UN headquarters in New York.

The Qatari delegation, led by the Undersecretary of the Ministry of Development, Co-operation and Humanitarian Works, Dr Bader al-Attiyah, will attend high-level events, meetings with UN agencies, non-governmental organizations, and multi-partner institutions, to discuss collaboration opportunities for achieving the Sustainable Development Goals.

HMC supports Summer Entertainment City 2019

HMC is providing the support of its Ambulance Service for Summer Entertainment City 2019.

**Jihad Equipment’s warranty offer on Bobcat products**

Jihad Equipment, the official distributor of Bobcat equipment and attachments in Qatar, has announced a recall of the Ford Explorer model of 2019 produced by Ford Motor Company. The recall is due to the failure of the Anti-Lock Brake System module not being configured with the correct identification. This failure could result in the loss of braking function, increasing the risk of a crash. The recall also includes a repair to the Bowden cable, which may be loose and create tension on the door lock mechanism, causing the cable retaining slot to break and prevent the door from being opened when using the external handle.

**Ooredoo empowers Myanmar women to become entrepreneurs**

Ooredoo Myanmar has announced the success of its Village Kiosk programme. As part of this initiative, Ooredoo selects women with basic education levels and offers them the opportunity to run their own village kiosk business. The company has hailed a statement from the company’s chief commercial officer of Ooredoo Myanmar, said: "Ooredoo is creating a sustainable partnership model with women across the country." The programme has been key in opening up a world of business and digital technologies and empowering women across the country in the community. Ooredoo has facilitated the opening of more than 750 village kiosks and plans to open up to 1,000 kiosks across Myanmar by the end of 2019.

**AJ+ wins Capital Emmy honour**

AJ+ has been honoured with a Capital Emmy in the category of History/Music Programmes - Features/Segment for its Untold America story, "How Chop Suey Saved San Francisco's Chinatown.

The series was produced for Al Jazeera Media Network has said that AJ+, the award-winning division of Al Jazeera English, is "an inclusive and compelling way to tell the untold stories of the US deaf community." I love avocados. The day I was a child, I realized how much easier my life would be if I could just eat avocados all day. What a wonderful, delicious fruit to cook with! Avocado is high in healthy fats and for sure needs to be one of our daily meals. It is packed with vitamins and minerals.

Avocado is a fruit that is full of nutrients and vitamins. It is a one-time super fruit.

Benefits of Avocado consumption

Avocado is a high-fat fruit that contains a healthy fat called monounsaturated. This fat is good for the heart and blood vessels, and is healthy for the body. It helps to keep the body healthy and balance the cholesterol levels in the body.

Apart from being a one-time super fruit, avocados contain many essential vitamins and minerals. They are rich in potassium, magnesium, and vitamin K, which are essential for good health.

Avocado is rich in vitamin E, which is important for the body’s health. It helps to protect the heart and blood vessels, and is a great source of dietary fibre.

Avocado seeds are one of the greatest sources of dietary fibre, as well as being a great source of dietary fibre. They are also rich in antioxidants, which help to protect the body from free radicals.

Avocado is a high-fat fruit that contains a healthy fat called monounsaturated. This fat is good for the heart and blood vessels, and is healthy for the body. It helps to keep the body healthy and balance the cholesterol levels in the body.

Apart from being a one-time super fruit, avocados contain many essential vitamins and minerals. They are rich in potassium, magnesium, and vitamin K, which are essential for good health.

Sudanese protesters, generals resume talks over civilian rule

Iran to boost uranium enrichment limit

Kushner wants ‘pragmatic’ solution on Palestinian refugee issue

Security official killed in Yemen

Wanted militant blows himself up in Tunisian capital

The militant, ID 1003, blew himself up in the Tunisian capital after being surrounded by security forces in the capital following the end of the maximum uranium enrichment limit. The incident took place in April amid widespread protests against his policies.

APRIL 2020

Iran has ignored US and EU demands to cease enriching uranium to levels beyond the agreed limit. On May 8, Iranian President Hassan Rouhani announced that Iran would resume enriching uranium at the Arak nuclear facility, a move that the International Atomic Energy Agency (IAEA) had warned could be reversed in hours. Rouhani stressed that Iran would continue to abide by its commitments under the Joint Comprehensive Plan of Action (JCPOA), the international agreement that regulates Iran's nuclear program.

APRIL 2020

Kushner, US President Donald Trump’s senior advisor, has been pushing for a “grand bargain” to address the Palestinian refugee crisis. Kushner recently met with Palestinian leaders in Ramallah and has proposed a “deal of the century” that includes a plan for a Palestinian state with East Jerusalem as its capital.

JANUARY 2020

Security forces in Yemen have arrested a wanted militant, ID 1003, who had been on the run since the collapse of the Saudi-led coalition in May last year. The wanted militant, identified as Aymen Smiri, was wanted by the Tunisian authorities for his alleged role in a series of attacks in the country.

JANUARY 2020

Residents heard a loud explosion near a luxury hotel in Khartoum, an official said. The explosion occurred in the early hours of the morning, and there were no immediate reports of casualties.

DECEMBER 2019

The UN human rights chief, Michelle Bachelet, has called on the Sudanese Transitional Military Council (TMC) to lift restrictions on the internet and to investigate allegations of violations of human rights. The TMC has imposed restrictions on the internet and media outlets since June, and has arrested several activists and journalists.

Nigeria to sign landmark Africa free trade pact
By Joost Streekstra, AFP

Nigeria is signing the African Continental Free Trade Area (AfCFTA) agreement after extensive domestic consultations, and is focused on taking advantage of ongoing negotiations to secure the necessary anguish against unlicensed, bilateral and other deals/threats.

A key goal of the agreement is to create a single market for goods and services across Africa’s 54 countries, with a view to creating a large and dynamic continent-wide market.

The agreement would progressively eliminate tariffs on goods and provide a framework for facilitating movement of capital, people, and services.

It is expected to boost intra-African trade, which has historically been low, and to promote industrialization and economic development in Africa.

One reason is that average tariff s on intra-African trade, at 16%, is far lower than on intraregional trade, which stands at 38%.

The Economic Commission for Africa (ECA) estimates that the potential economic gains from the AfCFTA could be as high as $350 billion per year.

But there are also concerns that the agreement could lead to a race to the bottom, with countries cutting standards to attract foreign investment.

The AfCFTA is expected to create a single market for goods and services, eliminate non-tariff barriers, and promote cross-border movement of people.

It is expected to help Africa to attract more foreign direct investment and to create jobs and boost economic growth.

The agreement was signed in March 2020 during the African Union summit in CAPE VERDE and has been ratified by 38 countries so far.

The AfCFTA is expected to create a single market for goods and services, eliminate non-tariff barriers, and promote cross-border movement of people.

Seven patients have been treated for infections likely because of deficiencies in Seattle Children’s hospital at the prestigious hospital was more than 10 operating rooms have been infested by Aspergillus mould and dangerous mould that has forced the hospital to have “compromised the public health”, wrote in an email. “Outside industry experts” are helping the hospital investigate the source of the problem, wrote on Twitter. “Without the question. ” the American Medical Association tweeted.

Almost 1,000 surgeries have been postponed. Other camps have been removed from the on-campus facility on the hospital’s main campus by the company’s facilities department.

The six patients who developed infections were in the operating rooms’ air handling systems, which included issues with the flow of infected air into the operating rooms. The latter states that CMS had ordered the state to seek a Medicare provider agreement on September 1. About 1,000 surgeries have been postponed.

President Donald Trump yesterday said his administration had not dropped its efforts to add a citizenship question to the 2020 census, contradicting state legislators, the department of justice, and the Supreme Court.

The record surge of mostly Central American migrant detentions has taken on 15, said Susan Gregg, president of Mary Bridge Children’s Hospital.

Aspergillus can range from a eukaryotic organism to a fungus, depending on the conditions under which it is grown. The fungus is commonly found on bread, cake, and other foods. Fungal infections are daily occurring in people with weakened immune systems, and especially organ or stem-cell transplant patients, are at higher risk of developing aspergillosis.

The Seattle Times in response to follow-up questions requested the closure of five operating rooms on its main Seattle campus on May 16 because of Aspergillus mould and because of the remaining 10 operating rooms on the main campus.

The six patients who developed infections were in the operating rooms’ air handling systems. The latter states that CMS had ordered the state to seek a Medicare provider agreement on September 1. About 1,000 surgeries have been postponed.

Other camps have been removed from the on-campus facility on the hospital’s main campus by the company’s facilities department.

**Vietnam regions brace for tropical storm**

A tropical storm with winds of up to 175 km per hour is expected to make landfall on Vietnam’s northern coast on Thursday night or early Friday morning, according to the National Center for Hydrology and Meteorology. The center said the storm, which is expected to bring strong winds and heavy rain to the region, could cause flooding and damage to infrastructure. The government has issued warnings and advised people to stay indoors and avoid unnecessary travel.

**Thailand’s orphaned baby dugong becomes conservation star**

A baby dugong has become an unlikely star on the conservation scene in Thailand, where recent efforts by wildlife authorities and local communities have helped to protect the species from extinction. The dugong, a marine mammal and an important member of the dugong family, has been listed as a critically endangered species by the International Union for Conservation of Nature (IUCN).

**Six killed in Bangladesh textile factory blaze**

A devastating fire tore through a Bangladesh纺织 factory on Thursday, killing six workers and injuring dozens more. The fire broke out at a factory in Savar, a suburb of Dhaka, and quickly spread due to the lack of fire safety measures. The incident has reignited calls for better working conditions and safety standards in the garment industry in the country, where the majority of workers are women and children.

**Student held after professor doused in kerosene**

A teacher at a state-run university was doused in kerosene and beaten by a group of students on Wednesday, according to local media. The incident, which is being investigated by police, is the latest in a series of attacks on teachers and educational institutions in the country. The attack comes after a student was killed in a similar incident earlier this week.

**Amnesty protest against attack on activist**

Activists in Myanmar have called for an end to violence against a prominent human rights defender who was attacked in Yangon last month. The attack, which left the activist with serious injuries, is the latest in a series of incidents targeting human rights defenders in the country.

**Nine get death for 1994 attack on Hasina**

A court in Bangladesh sentenced nine people to death for their roles in the 1994 attack on former Prime Minister Sheikh Hasina, who went on to become the country’s first female prime minister. The attack, in which 11 people were killed, was carried out by a group of militants who were said to be connected to the ruling Bangladesh Nationalist Party (BNP). The court sentenced the men to death for their role in planning and executing the attack.

**Myanmar man dies after alleged custody abuse**

A 29-year-old man died in custody after being subjected to severe abuse by police officers in Yangon. The man, who was detained for possession of aUISs (unidentified person of unknown status), was beaten and tortured before being taken to a hospital, where he later died.

Two Japanese may face court for bid to join IS

Two Japanese may be prosecuted for allegedly planning to join the Islamic State to work as fighters. The other four are awaiting further details. One of the five is a 31-year-old who planned to formally 'defect to IS' and shut off mobile phone and internet communications with Japan. The other four are suspected of having defected to IS to work as fighters.

Prominent Japanese journalist Kosuke Tsuneoka, who defected to IS in 2015, was found dead in Syria on April 11. Tsuneoka, a veteran correspondent for The Japan Times, defected to IS in 2015 after writing a series of articles about the group's activities in Syria. He was last heard from in late 2015, when he wrote that he had been captured by IS and was being held in a prison in Syria. The group later released a video showing Tsuneoka being held captive by IS fighters.

The case of Tsuneoka, who has been missing since 2015, has raised concerns about the security risks for journalists covering conflicts in Syria and other regions. Tsuneoka had been covering the conflict in Syria since 2013, and had reported extensively on the group's activities, including the group's use of social media and the role of foreign fighters in its ranks.

Japan's government has been under increasing pressure to do more to prevent journalists and other civilians from becoming targets of IS. The government has been criticized for not doing enough to protect its citizens in conflict zones, and for not doing enough to address the security risks faced by journalists covering conflicts.

The case of Tsuneoka is not the first time that Japan has faced criticism for its handling of journalists in conflict zones. In 2015, the government was criticized for its handling of the case of a Japanese journalist who was held captive by IS in Iraq. The journalist was released in 2016, but his case has been the subject of continued criticism.

The government has been under pressure to do more to protect its citizens in conflict zones, and to address the security risks faced by journalists covering conflicts. The baby of a woman who was killed while she was eight months pregnant was found on Friday morning. Kelly Mary Fauvrelle, 26, was found with stab injuries at a property in south London on Sunday, a neighbour said.

David Baker, who said this was "dreadful news", said: "I think the lady was walking towards the property when we were all inside it."

Of course, goods and trade at the channel would be ready in three years. The consequence of not being traders across the border is extremely difficult to achieve without having permission to sell their goods. According to official guidelines, any candidate seeking to send a vote or truce may need to have consent from the Irish authorities and make sure that they have consent from the individuals to see such a marketing channel.

Another man was found unwell in a property in south London on Sunday. The body of a 26-year-old woman was found at a property in south London on Sunday. 11 killed as dam bursts in Ratnagiri after heavy rains

Mumbai: At least 11 persons were killed and 24 others were injured in a flash flood that struck Ratnagiri on Tuesday as seasonal rains took a severe toll on parts of Maharashtra, where at least three people died and several others went missing, officials said.

The death toll, which stood at 11, has brought the number of fatalities in the state to 26, according to officials.

A total of 12 people have died in the state, with 11 in Ratnagiri and one in Sindhudurg.

The rains have also caused damage to infrastructure, with several roads and bridges washed away.

In addition, several villages have been left without power, with 2,452 villages affected across the state.

In Ratnagiri, the rains have caused widespread damage, with several homes and businesses destroyed.

The state government has declared a disaster in the affected areas, with officials mobilizing rescue and relief operations.

The Union Cabinet has also approved an ex-gratia payment of Rs 2,000 for each family in the affected areas.

Mexico deported 33% more migrants after US deal

Mexico deported 33% more migrants after US deal. The bilateral agreement was accompanied by a surge in deportations.

The Mexican government deported 33% more people in June than in the same month last year, according to the country’s national immigration agency.

The number of deportations in June was 23,832, up 33.7% from 17,670 in May, according to the National Immigration Agency (INA).

The total number of deportations from January to June was 110,065, up 30.8% from the same period last year, the INA said.

The agreement with the United States, signed in May, includes measures to crack down on violent crime and drug trafficking.

The INA said that the increase in deportations was due to the implementation of the measures agreed upon under the agreement.

The agreement also includes provisions for the return of unauthorized migrants to their home countries.

The INA said that it has deported 45,345 unauthorized migrants so far this year, up 33% from the same period last year.

The agreement was reached during the Trump administration, which is seeking to reduce the number of unauthorized migrants entering the United States.

The agreement includes provisions for the return of unauthorized migrants to their home countries, as well as measures to crack down on violent crime and drug trafficking.

Hundred falls sick at Imelda Marcos party

By Dempsey Reyes

Now that his son President Rodrigo Duterte has recused himself from the Malacanang Palace to avoid conflict of interest over the drug war case, the Integrated Bar of the Philippines (IBP) has asked the Supreme Court to order Senior Associate Justice Antonie Carpio to recuse himself over the case.

Carpio was a former law professor at the University of the Philippines and was appointed to the Supreme Court by President Benigno Aquino III in 2011.

Carpio was among the 15 candidates endorsed by Imelda Marcos for the 2019 midterm elections.

The IBP filed a “petition for the issuance of a writ of kalikasan,” Carpio recused himself, the IBP said.

In a statement Carpio said, “I think we have no interest in the IBP to investigate the reported government order authorizing the Philippines to conduct anti-ship ballistic missile and anti-ballistic missile tests at the edge of the South China Sea.

Lorenzana said yesterday.

Two United States officials confirmed the reports, the said the missile tests are “not to be described as provocative” but rather a “series of anti-ship ballistic missile tests” being done by Felipe del rosario at the South China Sea.

One of the officials said it was not yet to be determined if the missiles had been fired from the Philippine Naval ship Davao City or one of the coast guard ships.

People’s Liberation Army

When asked in a news conference about the urgent need in serving our country, “We are no longer in the baywalk era,” he said.

It is possible that the weapons systems on the three Philippine ships to move to international waters.

Carpio made the abrupt statement when asked to comment on the report that Philippines will conduct anti-ship and anti-ballistic missile tests at sea. Kim said, “I think we have no interest in the IBP to investigate the reported government order authorizing the Philippines to conduct anti-ship ballistic missile and anti-ballistic missile tests at the edge of the South China Sea.

Lorenzana said yesterday.

From a peak area of 12.8mn sq km, the sea ice cover on the country’s initial report. He noted that Qatar, has witnessed an increase in the number of cases and the severity of the disease. Qatar’s efforts in promoting and protecting human rights are commendable. Qatar has made legislative reforms and promoted the protection of human rights in its national context. Qatar’s efforts in promoting and protecting human rights are commendable. Qatar has made legislative reforms and promoted the protection of human rights in its national context.
Qatar has made legislative reforms to protect and promote human rights

The International Court of Justice regarding the obligation to implement the Elimination of All Forms of Racial Discrimination in 2015 and the elimination of the worst forms of child labor in 2020. Qatar has also issued its policy regarding international mechanisms to ensure that the abolishing of the sponsorship system (kafala), and human rights developments have been key areas of focus.

The minister noted that Qatar has taken significant steps to protect human rights and has been actively involved in international efforts to promote and protect human rights and to ensure that the rights of citizens and residents, including those of the expatriate citizen, are not infringed. He added that Qatar has launched a number of initiatives aimed at furthering human rights and promoting social justice, including the establishment of the Human Rights Council in accordance with the United Nations Human Rights Council. In addition, the minister highlighted Qatar's commitment to the elimination of all forms of discrimination, including gender-based discrimination, and the promotion of women's rights. He also emphasized the importance of protecting the rights of children and people with disabilities, as well as the right to health and the right to education. Qatar has made significant progress in promoting these rights through initiatives such as the establishment of the National Council for Women's Affairs, the establishment of the Qatar Foundation for Education, Science, and Culture, and the establishment of the Qatar National Day for Persons with Disabilities. The minister further noted that Qatar has also made significant progress in protecting the rights of women and girls, including through the establishment of the Qatar National Women's Affairs Council and the National Council for Women's Affairs. He added that Qatar has also taken steps to protect the rights of workers, including through the establishment of the Qatar National Workers' Council and the Qatar National Workers' Rights Council.

The minister concluded by emphasizing Qatar's commitment to protecting and promoting human rights and ensuring the equal rights and duties of citizens and residents, including those of the expatriate citizen, are not infringed. He added that Qatar has taken significant steps to protect and promote human rights and to ensure that the rights of citizens and residents, including those of the expatriate citizen, are not infringed.
Qatar Museums announces India-based artist residency

Qatar Museums has announced an open call to a new month-long India-based artist residency, titled “What about Art?” (WAA), as part of the Qatar-India 2019 Year of Culture.

The residency is open to one emerging Qatari artist for a month. The WAA residency provides individual studio space, 24-hour access to a private Pinault-styled studio space, communal facilities, studio visits from past critics, support in planning trips to museums, galleries and other cultural venues.

The residency was launched in 2013 with the aim to facilitate and support art practice. It was the first of its kind in the Arab region.

One of the few art residencies in Mumbai, the WAA residency provides individual studio space, strong networking opportunities and an intellectually stimulating environment for dialogues on visual art practices for artists and critics.

The residency organises regular visits of the Mumbai Art Dialogue on visual arts practices for stimulating environment for dialogues on visual art practices for artists and critics.

The WAA residency is open to one emerging Qatari artist for a month. Artists only. Applications are invited from one artist per residence.

The carefully-curated Qatar-India 2019 Year of Culture programme is specifically designed to promote mutual understanding, recognition and appreciation between both sovereign nations.

The Qatar-India 2019 Year of Culture invites audiences in Qatar and India to explore cultural similarities as well as celebrate their differences.

The residency organises regular visits of the Mumbai Art Dialogue on visual arts practices for stimulating environment for dialogues on visual art practices for artists and critics.

WAA is in the heart of Mumbai in Bandra, a vibrant neighbourhood. There are nine studios situated in a quiet lane above the WAA office.

A resident artist in residence supports the newly created individual studio space, communal facilities, 24-hour access to a private five-suite facility, studio visits from guest critics, and support in planning trips to museums, galleries and other cultural venues.

The WAA residency was launched in 2013 with the aim to facilitate and support art practice. It was the first of its kind in the Arab region.

The carefully-curated Qatar-India 2019 Year of Culture programme is specifically designed to promote mutual understanding, recognition and appreciation between both sovereign nations.

The Qatar-India 2019 Year of Culture invites audiences in Qatar and India to explore cultural similarities as well as celebrate their differences.

Students enrolled in an academic programme at the time of the residency are not eligible to apply.

All applications must be submitted by August 15 through the online application form that can be found at http://waaresidency.org.
