Kuwaiti Amiri recovers from health setback

The Kuwaiti Amiri Deputy, Attorney General and Minister of Defence, Al-Hail, who has been recovering from health setbacks following a 15-day quarantine, has recovered from his health setbacks, which were related to the non-ionizing and -acting ray, according to a Kuwaiti Ministry of Health announcement.

A part of its continuing efforts to ensure the safety and protection of the 2022 FIFA World Cup, from various MoI departments are part of the five-day programme, according to information from the knot website. The course is aimed at equipping the participants with the knowledge and skills necessary to handle a crisis, including a crisis response plan, assess the situation, and communicate with the command centre. The training programme includes many theoretical lectures and practical exercises. It also includes seminars on virtual emergencies.

Colin Ahmad Ali al-Adil, head of the Security Committee of the Supreme Committee for Defence and Legacy, emphasized the importance of the course and noted the significance due to the importance of the 2022 World Cup. He praised the ministry for its role in ensuring security and stability during the mega event. The course included various activities to promote national security and the rule of law.

Vodafone Qatar unveils smart home solution

Vodafone Qatar continues to drive digital innovation in the country with the launch of its latest smart home solution, GigaHome Smart, which features a number of smart products, including smart plugs, smart bulbs, smart sensors, and a home internet solution powered by Vodafone Qatar’s GigaHunt network, including 4G and fibre.

The smart products can be accessed and controlled remotely by customers through their smartphones. With a simple tap, GigaHome Smart will transform any home appliance into a smart plug. Customers will be able to control lights, open and close doors, monitor energy usage, and have the flexibility to redeem earned points from electronics to jewellery, home furniture, travel and entertainment and enjoy in easy and convenient monthly rewards.

Vodafone Qatar’s smart home solution, GigaHome Smart, will transform any home appliance into a smart plug. By using Vodafone’s latest technology, customers can easily control the brightness and colour of their home lighting, as well as the movements of doors and windows with smart sensors, or use smart plugs to switch any of their home appliances on or off from their smartphones. Diego Camberos, CEO, Vodafone Qatar, said, “We have been building up a full spectrum of digital solutions to meet Qatar’s growing demand for digital innovation and are delighted to launch GigaHome Smart. Vodafone Qatar is committed to offering our consumers an easier, more convenient and smarter way of living as we embrace the age of smart home products.”

Ahlibank credit cardholders get chance to win back school or college fees

Ahlibank has launched again the highly-successful back to school campaign. Ahlibank credit cardholders will get a chance to win back school or college fees paid, with their Ahlibank credit card from August 8 until October 1. Five lucky winners will win back the school/college fees paid, with a maximum amount of QR20,000. The more they spend on school fees, the more are their chances to win back the school/ college fees.

Ahlibank deputy chief executive officer Business Banking al-Namla said, “Ahlibank is always striving to reward our customers and to provide them with enhanced services that suit their current and future ambitions when using their Ahlibank credit cards. "To line with the bank’s strategy, we will continue to demonstrate our commitment while providing tailored and innovative products and first-class services to our customers. At Ahlibank, we are always seeking to provide our customers with the most personal banking experience and making sure our credit cards are the cards of choice.”

This campaign is one of the features of the credit card’s remu-neration building an Ahlibank credit card, which includes the Pearl Rewards programme, a unique programme providing the flexibility to redeem earned points through our selected coalition partners. Another feature is the Easy Payment Plan that allows customers to buy anything from electronics to jewellary, home furniture, travel and entertainment and enjoy in easy and convenient monthly instalments.

Three Palestinians dead after troop firing

Tanzania has climbed to 95, a hospital spokesman said. It identified those killed as Mohamed Samir al-Taramsi, 26, and Hamas Said Samir al-Taramsi, 22. Hamas in a statement called for the right of our people to resist and confront all forms of Zionist aggression," it said. A series of tank ambushes along the Gaza border has tested a fragile truce between Hamas and Israel in recent days. On Sunday, a rocket fired by Hamas hit an Israeli army vehicle, and Israel said its air defence systems, without specifying what happened to the rocket.

Coalition appoints five civilian members of sovereign council

The ceremony in a hall by the Nile river was attended by several high dignitaries and representatives of the main political parties. The speeches were made by the Sudanese prime minister, the foreign minister, and the speaker of the national assembly. The ceremony was followed by a feast and a traditional dance performance.

Zimbabwe police ban opposition protest planned for today

Zimbabwe police have banned an anti-government demonstration planned for today by the country’s main opposition party in the city of Bulawayo, only a few miles away from the capital, Harare.

Police banned another demonstration planned for Monday for the Movement for Democratic Change (MDC). To avoid violence, the route to Bulawayo is closed and a heavy police force has been deployed.

The MDC, which opposes President Robert Mugabe’s government, called for the demonstration to mark the first anniversary of the resignation of Prime Minister Morgan Tsvangirai, who was ousted amid a wave of protests.

The demonstration is scheduled for 3pm on Monday and is expected to attract hundreds of protesters. The police said they had received intelligence that the demonstrators planned to march to the Harare International Convention Centre where Mugabe is due to address the nation.

The MDC said it was considering its legal options and would challenge the police ban in court.

'Dozens killed' as Syria regime forces battle militants

P re-regime forces were locked in heavy fighting with insurgents yesterday near the town of Ayn Arab, located south of the capital Damascus. The fighting came hours after government forces launched an offensive to retake the town from rebels who had taken control of it earlier this week.

According to local media, at least 30 people were killed in the fighting, including civilians and soldiers. The government forces are reportedly backed by Russian air strikes.

The fighting is part of a larger offensive launched by the government to retake control of the southern part of the province of Idlib. The province is a strategic area that has been held by opposition forces for years.

Man charged over NYC scare from rice cookers

A young Manhattan man has been charged with planting pipe bombs around Chelsea, New York, and is expected to face more charges after allegedly attempting to blow up a second device in a series of attacks that have sparked fear and panic in the city.

The suspect, 26-year-old Ahmad Khan Rahami, was arrested on Saturday after police found him in a apartment on the Lower East Side.

Rahami, who has been charged with placing explosives at multiple locations across the city, had previously been arrested on charges of attempted murder and terrorist activity.

According to police, Rahami had been living in the city for several years and had been known to authorities for his extreme views.

The charges, which include the manufacture and possession of fireworks and explosives, were announced on Monday afternoon.

The New York Police Department said in a statement that the suspect had been arrested at 1:30 a.m. and was being held at the Metropolitan Correctional Center.

In a press release, the department said that Rahami had been arrested after he was found with a backpack containing numerous materials that were believed to be related to the explosive devices.

The statement also said that the suspect had been arrested for a number of other crimes in the past, including robbery and theft.

It was not immediately clear if Rahami had any connection to the recent attacks inez.

Rahami was one of several suspects that have been arrested in New York in recent weeks, including a man who had been charged with planning a bomb attack on a subway station, and another who had been arrested for making threats against a local police department.

In each case, the suspects have been linked to extremist groups, and have been accused of planning attacks against high-profile targets.

The attacks have caused widespread concern, with officials warning of a growing threat from homegrown terrorism.

Meanwhile, the Department of Homeland Security has raised its terror alert level to code orange, meaning that the threat is considerable and that Americans should take extra precautions.

The department said in a statement that the alert level had been raised due to "belief that the threat may be imminent but specific information supporting this belief is not yet available.

The department said that Americans should remain vigilant, and that they should be prepared to respond to any terrorist attacks.

It also urged people to report any suspicious activity to local authorities.

In other news, the FBI has been investigating a series of suspicious packages that were sent to high-profile targets in recent weeks.

One package was sent to the New York City Police Department, and another to the New Jersey Attorney General's Office.

Both packages contained explosive materials, and were later determined to be hoaxes.

The FBI has not yet determined whether the packages were sent by the same person.

Meanwhile, the Department of Homeland Security has said that it is working with law enforcement agencies around the country to ensure that all threats are properly investigated.

The department has also urged the public to report any suspicious activity to local authorities.

In other news, the Department of Homeland Security has announced that it will be increasing its presence in airports and other public areas around the country.

The department said that it would be increasing its presence in New York City, which has been targeted in recent attacks.

The department said that it would be increasing its presence in New York City, which has been targeted in recent attacks.

The department has also urged the public to report any suspicious activity to local authorities.

Protesters hold peace march in Hong Kong

AP Story

Protesters held a march in Hong Kong today, demanding peace and an end to the violent demonstrations that have been a constant feature of the city for the past few months.

The march, which was organized by the Coordinating Committee for Civil Disobedience, passed through the streets of the city without any incidents, in contrast to recent events where clashes between protesters and police have been frequent.

One of the organizers, a student named Jonathan, said: "We hope that today's peaceful march will help bring a sense of calm to the city. We are fed up with the violence and we want things to change."

The march started at the Victoria Park, a popular gathering point for protests, and ended at the government headquarters in Admiralty. Along the way, there were speeches and music, with people waving flags and chanting slogans.

Hundreds of thousands of people participated in the march, according to organizers. The police reported that there were no major incidents.

The march was part of a broader wave of protests across Asia, as people in countries like Indonesia and Thailand have also been organizing peaceful demonstrations.

Indonesian police shoot suspect militant after attack

AP Story

Indonesian police shot and killed a suspected militant after he attacked a police station in Jakarta today.

The suspect, a man believed to be linked to the Islamic State, was reported to have entered the police station and opened fire, killing two officers before being shot down by police snipers.

The attack was the latest in a series of militant incidents in Indonesia in recent months. Authorities have stepped up security measures in response to growing concerns about terrorism.

Chinese police investigate风情 forecast containing gangland

AP Story

Police in Southeast China's Fujian province have launched an investigation into a report that contained information about gangland activities.

The report, which was distributed by a local newspaper, contained information about recent arrests and convictions of gang members. It also included details of an alleged assassination attempt.

The police said they were investigating the report to prevent the spread of gangland activities.

High-end rebrand makes life sweet for Japan’s ‘ice farmers’

AFP Story

Japan

A traditional Japanese craft is seeing a renaissance as high-end companies are looking to use natural ice for desserts.

Yutaka Tanaka, a 43-year-old farmer in Nikko, north of Tokyo, has been producing natural ice for over 10 years. He uses traditional methods, including using a conch shell as Yuichiro of Tōkyō, a priest blows n a mountainous area north

He said that, "Natural ice is a gruelling task. The soil is hard and the ground is wet. We have to be careful not to slip and fall."

Tanaka's product is popular in high-end restaurants and hotels in Japan, and he has been approached by several companies interested in using his ice for desserts.

"The demand for natural ice is increasing," he said. "People are looking for something different, something that is not mass-produced."

Tanaka is hoping to expand his business and reach more customers in the future.

"I think it's important to keep traditional crafts alive," he said. "They are a part of our culture and history."
UK faces food, fuel, drug shortages, claims contested leaked document

By Sarah Marsh

10 August 2019

BRITAIN

B ritain will face shortages of food, fuel and medicines if it leaves the European Union without a deal, according to leaked official documents reported by The Times on Saturday.

The documents, obtained by the newspaper under freedom of information laws, say that a no-deal withdrawal would mean the government would need to “urgently consider action” to prevent “food, fuel and medicines shortages that would have the potential to cause serious harm”

The leaked documents indicate that there could be “severe disruption” to the flow of goods into Britain and that the UK would face shortages of fuel, food and medicines if it left the EU without a deal.

The documents also suggest that there could be “considerable disruption” to the supply of medicines and that the government would need to “urgently consider action” to prevent shortages.

The government has said that it has taken measures to prepare for a no-deal Brexit, but the leaked documents suggest that it has underestimated the potential impact of a no-deal outcome.

The Times reported: “These are the most worrying and detailed pictures of the government’s preparations for a no-deal Brexit yet, and raise serious questions about its readiness.”

The documents were obtained by the newspaper under freedom of information laws and are based on leaked government documents.

The government has said that it is planning for all possible outcomes, but the leaked documents suggest that it has not been adequately prepared for a no-deal outcome.

They warn that a no-deal Brexit would lead to shortages of food, fuel and medicines and could cause serious harm to the British population.

The documents also highlight the potential impact of a no-deal Brexit on the economy, with concerns raised about the potential for a recession and job losses.

The leaked documents indicate that the government has underestimated the potential impact of a no-deal Brexit and has not taken adequate preparations to prevent shortages and disruption.

The government has said that it is planning for all possible outcomes, but the leaked documents suggest that it has not been adequately prepared for a no-deal outcome.

Trump seriously looking into buying Greenland

President Donald Trump announced Monday that he is considering purchasing Greenland, even though its leaders have firmly rejected the idea.

“I want to take Greenland,” Trump said in a tweet. “Why not?”

The tweet came just days after Trump said he was interested in buying Canada, which has been considering selling Greenland to the US.

The news was met with a mixture of laughs and derision on social media.

“Seems like the epitome of the Trump presidency: looking for a future territory to buy because you can’t buy the present one,” wrote one Twitter user.

Another added: “Welcome to the Global Policeman Republic. First Cuba, now Greenland!"

Greenland was once a Danish colony and is now a self-governing territory within the Kingdom of Denmark. The island has a population of about 56,000 people and is roughly the size of Texas.

Trump’s interest in Greenland comes as the US and its allies are increasingly concerned about China’s growing influence in the region.

Secretary of State Mike Pompeo recently said China’s activities in the region were a threat to US national security.

But Trump’s plan to buy Greenland is likely to be met with resistance from the island’s government.

Jeppe Kolding, the prime minister of Greenland, said in a statement: “We have no interest in selling Greenland to the US or any other country.”

The move to purchase Greenland would also be a major departure from US foreign policy, which has traditionally emphasized maintaining alliances and partnerships rather than acquiring new territories.

It is unlikely that Trump’s announcement will lead to any concrete action, as Greenland’s government has already said it is not interested in being sold.

However, the prospects for Greenland are likely to be of interest to US officials, who may see the island as a potential base for military operations or as a source of resources.

Greenland is rich in minerals, including iron, nickel, copper, and lithium, which are important for the US military.

The island is also home to scientific research centers that study the Arctic, including NASA’s Greenland Ice Sheet Project.

Trump’s interest in Greenland is also likely to be of interest to US climate change officials, who have long warned about the impacts of climate change on the Arctic.

Greenland is one of the fastest warming regions on Earth, with temperatures rising at twice the global average.

The melting of the island’s glaciers is of particular concern, as it could lead to rising sea levels and increased flooding in coastal areas.

The US military has been expanding its presence in the Arctic, with bases on the island and in Norway.

But many experts believe the US’s current strategy is not sufficient to address the challenges posed by climate change.

“Greenland is a microcosm of what we are seeing happening all over the Arctic,” said Sarah Harder, a climate change expert at the University of Alaska.

“Greenland is a place where we can see the impacts of climate change in real-time, and it’s a place where we can see the impacts of climate change on our military.”

Some experts believe the US should be doing more to support Greenland’s transition to a sustainable economy, rather than simply seeking to acquire the territory.

“Greenland is a place where we can see the impacts of climate change in real-time, and it’s a place where we can see the impacts of climate change on our military.”

Sarah Harder, a climate change expert at the University of Alaska.

“I think it’s important to take a step back and look at the broader implications of what’s happening in Greenland, and what this means for our national security.”

But Trump’s interest in Greenland is unlikely to be met with much support from Greenland’s government or from the US’s allies in the region.

“Greenland is a microcosm of what we are seeing happening all over the Arctic,” said Sarah Harder, a climate change expert at the University of Alaska.

“I think it’s important to take a step back and look at the broader implications of what’s happening in Greenland, and what this means for our national security.”

Sarah Harder, a climate change expert at the University of Alaska.

A expedition by the Indian Space Research Organisation (ISRO) to the Dhaka Glacier in the Himalayas has resulted in the recovery of the remains of 90 crew members of a missing aircraft.

The Indian Air Force (IAF) plane, AN-12 BL-534, had been forced to land in the Dhaka Glacier after it went missing in 1968 during a flight from Calcutta to New Delhi. The plane was carrying 43 crew members and 59 passengers, including a cockpit door, the army said.

Requests for the recovery of the remains of the missing crew members had been made by the families of the passengers who were also recovered.

The expedition was jointly organized by the Ministry of Defence and ISRO. The plane had flown to the Dhaka Glacier with 60 tons of fuel to supply tundra-based scientists. The expedition involved a Central Bureau of Investigation inquiry into the tragic incident.

The tragic incident occurred when the boys were removing a 15ft iron pole mounted on a mud-filled drum used to hoist the national flag. On this day in 1945, Netaji went on a flight from Bose’s house in Calcutta to an undisclosed destination and was never heard from again.

Bose’s family and some researchers believe that he might have flown to Japan to take up the cause of the struggle against the colonial powers. However, other sectors of the family and researchers and admirers of the revolutionary leader have rejected the theory.

The Indian government has not made any official announcement on the causes behind Bose’s disappearance.
Tamil Nadu getting ready for general poll strategies

Tamil Nadu, the host of several assembly elections in the recent past, is getting ready to set the tone for the national political roll-up. Tamil Nadu is expected to set the tempo and the trend for the forthcoming Assembly elections in Himachal Pradesh,Odisha,Manipur and Arunachal Pradesh.

The Delhi-based MPR Group has the services of Konda Reddy, the Union Minister of State for Development of North Eastern Region who was instrumental in setting up the group's think-tank, to study discussions on various issues.

The ruling All India Anna Dravida Munnetra Kazhagam (AIADMK) in the state has already announced that they would hold a special party meeting on September 15, the last day of the Tamil Nadu Assembly session, to discuss the issue of renaming the state capital.

Meanwhile, in New Delhi, the national capital of India, the government has decided to rename New Delhi as New Chandigarh.

In the light of the recent developments, the state government has decided to rename the city of New Delhi as New Chandigarh in order to promote tourism and attract more tourists to the city.

The decision was taken after a detailed examination of various factors and consultation with experts in the field of urban planning and architecture.

The new name, New Chandigarh, is expected to attract more tourists and investors to the city, thereby boosting the local economy.

The decision has been welcomed by various stakeholders in the real estate and tourism sectors, who believe that it will help in attracting more business and tourism to the city.

The government has also decided to make necessary amendments in the laws and regulations to facilitate the renaming process.

The new name, New Chandigarh, will be officially adopted from the next fiscal year, and the state government has already started the process of changing all the official documents and records.

The decision is seen as a major step in the government's efforts to modernize and develop the city, and it is expected to bring in significant changes to the city's面貌 and infrastructure.

The renaming of the city is expected to bring in a new wave of development and growth, and it is hoped that it will help in attracting more tourists and investors to the city and its surrounding areas.

The government has also announced that it will invite bids for the construction of new residential and commercial buildings in the city, and this is expected to create new job opportunities for the local population.

The renaming of the city is expected to bring in a new wave of development and growth, and it is hoped that it will help in attracting more tourists and investors to the city and its surrounding areas.

Govt warns language training centres against overcharging

The Manila Times

M
t

The Philippines Overseas Employment Administration (POEA) has warned foreign workers and employers against overcharging the latter for language training programs that they will be enrolling in. 

These are under the Technical Intern Training Program (TITP) and the project for housekeeping and light industrial Special Skills training (SST). 

“Employers must be reminded that even if language training programs are considered as part of the cost of employment, they can only charge the foreign worker of an amount which are affiliates of authorized recruitment agencies and POEA approved foreign training institutions,” POEA assistant director, Michael Chan said.

Farms support call for review of rice tariff law

By Bernardette E Tamayo

Farms expressed their support for Sen. Marlon_months to initiate tariff adjustment, resulting in a number of imports having higher tariff rates. This, however, was not welcomed by the Department of Agriculture (DA), which argued that these higher tariffs would hurt farmers and agribusiness.

When asked if she had any suggestions regarding the aging issue, the DA said that they are already conducting studies on the feasibility of implementing a mandatory retirement age for agricultural workers.

Lorenzena criticises envoy over comment on OFWs

The Manila Times

M

The Philippine ambassador to China Zhao Jianzhong has defended his statement that Chinese workers in the Philippines are “over-priced” compared with Chinese workers in other countries.

Lorenzena, however, maintained that her statement was to make a point about the overcharging of Chinese workers in the Philippines rather than to compare their salaries with those in other countries.

JGRAG have the right to establish their own industries and businesses, or to work in the private sector, as long as the rights of Chinese workers are protected.

Buked Chinese ambassadors to the United Nations and other international organizations, where they are prohibited in China. 

Reacting to the senator’s statement, Panfilo also said that the Chinese embassy has its say on the matter and that the Chinese ambassador has the right to speak on their behalf because China is a sovereign state.

But when asked whether Pal- ene could focus on “5G user experience” or 5G technology, an expert said. 

This statement was a response to a query from a media reporter on the senti- ments of Chinese Ambas- sador Zhao's opinion. Perhaps in re- sponse to the statement of the Chinese ambassador, he also slammed Panelo’s comments, saying that the presidency could not be a “5G user experience.”

and presented several key findings. 

The 5G technology, which is expected to bring faster internet speeds, lower latency, and greater connectivity for various applications, is being considered as a game-changer for the future of the telecommunications industry.

In the Philippines, the Department of Information and Communications Technology (DICT) has been exploring the potential of 5G technology, and has been working with local universities and companies to develop 5G applications.

EXPerts are warning investors to prepare for a possible downturn

When Huanggang's former mayor started pushing the idea of the Belt and Road in 2014, it was with the aim of promoting economic development and investment in central and eastern Europe.

In an exclusive interview with AFP, China's ambassador to Hungary Meng Xuedong highlighted the importance of the Belt and Road initiative.

This month, the Chinese government formally invited Hungary to be one of the first countries to participate in the Belt and Road Initiative.

The initiative has been praised for its potential to boost trade and investment among participating countries.

However, some experts have raised concerns about the long-term sustainability of the project and the economic benefits it may bring.

Huang, who left his position as mayor of Huanggang in 2016, said that the Belt and Road Initiative is a "key project" that will help China achieve its goal of becoming a "modern socialist country with Chinese characteristics". He also noted that the project is expected to boost trade and investment among participating countries.

In addition to promoting economic development, the Belt and Road Initiative is also seen as a way to strengthen political and cultural ties between China and other countries.

Huang said that the initiative will help China achieve its goal of becoming a "modern socialist country with Chinese characteristics".

He added that the project is expected to boost trade and investment among participating countries.

"The Belt and Road Initiative is a key project that will help China achieve its goal of becoming a modern socialist country with Chinese characteristics," Huang said. "It is expected to promote economic development, improve trade and investment among participating countries, and strengthen political and cultural ties between China and other countries."
**Nightmare as Egypt aided to deport Uighurs**

By Anthony Golick

Gone is your time, your poor, your huddled masses yearning to breathe free. 

Give me your tired and your poor, your huddled masses yearning to breathe free. 

Give me your tired, your poor, your huddled masses yearning to breathe free. 

It's been said that when it comes to the “new immigration,” the people, is fuelled by racism or xenophobia. 

The public charge rule has already done that policy change, which, the Migration Policy Institute said, can affect around 6,000 people to about 50 families.

They have lost their belief and have families.

The researchers also point to education centres” are necessary to help these people and endure political indoctrination.

**Furniture flame retardants may not stifle deadliest home fires**

By Corayla Crist

The flammability of smoke-producing materials like furniture, mattresses, children's mattresses, and fabrics may be a more effective way to reduce deadly home fires than smoke detectors, researchers say.

The study team notes that the fire-exposed furniture, mattresses, and fabrics that increase the likelihood of a home fire are the most common cause of home deaths.

The researchers also point to the fact that smoke detectors may not stifle these deadly home fires, which often cause death and injury.

In 2017, the Consumer Product Safety Commission (CPSC) issued a recall for 4 million smoke detectors due to the risk of smoke detector fires.

The report also notes that smoke detectors are often not installed in bedrooms, where they are most likely to be found.

The researchers also point to the fact that smoke detectors are often not installed in bedrooms, where they are most likely to be found.

They recommend smoke detectors be installed in bedrooms, where they are most likely to be found, and that smoke detectors be installed in bedrooms, where they are most likely to be found.
The biggest ‘Summer in Qatar’ (SiQ) programme wrapped up on Friday with a grand finale at the Lusail shopping malls. The programme, which was launched in February, featured a variety of activities and rides at any of the 10 participating malls.

The final week of SiQ featured a lineup of multicultural music, comedy, theatre and movie award shows. The final draw for the grand prize was held at Mall of Qatar, with winners of the first and final raffle drawn at Wafik, Souq Al Wakrah, Katara and the Cultural Village.

The winners of the final draw were
- 230892 (QR100,000);
- 1996, QAD continues to attract students back to school. Outside the classroom, QAD offers a comprehensive academic environment, including 27 prizes worth QR300,000, while one lucky winner took home the grand prize: a McLaren Spider 570s (2018 model).

“This is all about strengthening our holistic learning environment and ensuring that our students to explore their talents and roles, and how to use the techniques to craft exceptional stories. The programme will run local Arabic literature,” said the workshop’s instructor.

The school has been actively involved in a complex, rapidly changing world. QNL hosts series of writing workshops. The school offers innovative experiential learning and community engagement programmes.

Qatari Academy kicks off new academic year

By Joey Aguilar

Qatar Academy Doha (QAD), part of Qatar National Library, announced the start of the 2019-2020 academic year, and approximately 2,700 students had the opportunity to explore and learn about many things. Firstly, it broadens their potential learning, enabling students to explore their talents and roles, and how to use the techniques to craft exceptional stories. The programme will run from September 7 until September 28.
