Ashgahl completes 75% of School Zone Safety Programme

About 20,000 public school students in Qatar are benefiting from a recently completed road safety programme, which includes the installation of barriers and crossing points.

Minister of State for Public Works, Engineer Akbar Ali Saad Al-Kharafi, said the programme was implemented in collaboration with the Ministry of Education and Higher Education in the framework of the Qatar National Strategy for Transport Development 2030.

“Under the National Strategic Transport Development Plan, the government has prioritised the safety and security of students and the public at large. This programme is part of our commitment to ensure the safety of the students who use the roads daily to get to school,” Al-Kharafi said.

As part of the programme, barriers were installed along roadways to prevent vehicles from crossing wrong ways and to separate pedestrian and motorized traffic. In addition, pedestrian crossings, with painted stripes, have been installed at busy intersections.

Al-Kharafi said the project saw the installation of 150 barriers along school zones across the country, which will help in reducing traffic accidents and ensuring the safety of students, teachers, and other road users.

The barriers were installed by the Public Works Authority (Ashgahl) in coordination with the Ministry of Education, which identified the schools with high traffic density and accident risk.

As of now, 75% of the School Zone Safety Programme has been implemented, and the remaining 25% is expected to be completed by the end of the year.

Public bus ridership in Qatar jumps 40%

Public bus ridership in Qatar has increased by nearly 90% over the last year and exceeded pre-COVID rates, according to Hamad Al-Sada, Minister of State for Public Works.

In a statement, Al-Sada said the project was launched in response to the increasing demand for public transport, especially in the aftermath of the COVID-19 pandemic.

“The increase in public bus ridership is a clear indication of the importance of public transport as a means of reducing traffic congestion and improving the quality of life for Qatari residents,” Al-Sada said.

The minister also noted that the increase in ridership is also a reflection of the government’s efforts to promote sustainable and environmentally friendly modes of transport.

Al-Sada said the government is working on expanding the public transport network and introducing new services to meet the growing demand.

“The government is committed to providing a reliable and efficient public transport system that meets the needs of all residents,” he added.

Public transport in Qatar is provided by ASAS and Mowasalat, which operate a fleet of over 1,000 buses.

The government has also announced plans to introduce electric buses and expand the network of bus routes to cover more areas.

For more information, visit www.mopw.gov.qa.

Ashgahl starts works on 2-Ring Road project

The Public Works Authority (Ashgahl) has started work on the 2-Ring Road project, which is part of the $5 billion 2030 Transport Development Plan.

The project aims to reduce traffic congestion in the capital and improve road safety.

“Construction work on the 2-Ring Road is expected to be completed in 2024,” said Engineer Nasser Al-Mohannadi, Ashgahl’s Director of Development Projects.”

The 2-Ring Road project involves the construction of a 19-kilometre-long road network that will connect the Al Rayyan area to the West Bay area, passing through the industrial zones of Umm Salal, Al Wakra, and Al Asimah.

The road will have six lanes in each direction, with a number of exits and interchanges to facilitate access to commercial and residential areas.

In brief

Amir congratulates Ukrainian president

His Highness the Amir Sheikh Tamim bin Hamad Al-Thani congratulated Ukrainian President Volodymyr Zelensky on the occasion of his birthday yesterday.

“Your success in bringing about positive changes in Ukraine and improving the well-being of its people is a testament to your firm commitment to the country’s progress,” the Amir said in his message.

The Amir, who extended his best wishes to the Ukrainian people, said Qatar stands ready to support Ukraine in its fight against Russian aggression.

Environment

A new report published by the Intergovernmental Panel on Climate Change (IPCC) has warned that efforts to combat climate change are not enough to prevent a dangerous level of global warming.

The report, which was released on Monday, stated that reducing greenhouse gas emissions is essential to keep global warming below 1.5 degrees Celsius.

The report also highlighted the need for a rapid transition to renewable energy sources and the importance of sustainable land use.

It called for a “well-balanced and just transition” to a low-carbon economy, with policies that support the development of new technologies and industries.

Read the report in full online at www.ipcc.ch.

Squabbles erupt as G7 leaders open summit

Twice-outgoing US President Barack Obama opened the G7 summit on Monday, warning that the world was facing the “first test” of the Trump administration’s new global strategy.

Obama, who is attending the meeting in Biarritz, France, urged the leaders to work together to address challenges ranging from climate change to trade tensions.

“I think the United States has never been more important,” Obama said in a surprise appearance at the opening session.

He said that the US was “in positions of strength” and that “we are a great ally and partner to many of the countries that are here.”

Obama’s comments came as the leaders of the G7 countries, including US President Donald Trump, gathered in Biarritz for the annual summit.

The leaders are expected to discuss issues such as trade, climate change, and global security.

Obama’s appearance at the summit is seen as a signal of his continued influence in global affairs.

The US President, who is not attending the summit, sent a video message to the leaders.

Trump, who is in the midst of his second term, said he was “honored” to be hosting the summit.

“Thank you for being here with us,” Trump said.

Patients benefit from language services at The Cuban Hospital

24-hour translation service helping improve clinical care and reduce delays

A 24-hour translation serv-ice has benefitted patients at The Cuban Hospital. This Norwegian-run health-care provi-dor is considered one of the best medical institutions in the region, due to its services and reputation in the community.

According to Liza Reinberger, the hospital’s_Safety and Health Officer, “We’ve seen an improvement since the service was intro-duced.”

The Cuban Hospital has benefitted from not having to wait for translators to arrive, and they can now translate on the spot. ‘This has helped improve clinical care and reduce delays,’ added Reinberger.

The initiative, which consists of Arabic-speaking patient care teams, has benefitted both Arabic-speaking patients and doctors. Reinberger said, “This has improved the patient experience within the hospital’s inpatient, outpatient, and emergency departments, and also resulted in better patient care. The service has been introduced since 2016. The hospital has also supported the public health system as a whole, caring for patients in Qatar and Cuba. It was opened in January 2012 as part of a joint project between the governments of Qatar and Cuba. The hospital is in collaboration with the Ministry of Health and Prevention of Qatar, and has 450 Cuban staff members.

The Cuban Hospital provides all medical and surgical services to more than 2,100 patients. The hospital has a pharmacy, a lab, and an outpatient department. The hospital has also expanded to meet increased demand associated with the heavy rain and flash floods in many parts of the country.

A relief team has been formed to provide services to affected areas. The team includes a doctor, a nurse, and a translator. The team works closely with the government and partners to launch an emergency intervention as soon as possible. A direct result of large stagnant water masses is the spread of mosquitoes and other disease-borne insects, which poses a serious risk of malaria, diarrhoea, and other infections. Many health facilities, schools, and mosques were damaged, and the destruction of tents is expected to have a bad environmental impact.

Thundery rain, strong winds forecast for today

Thundery rain is expected in the coming days, with strong winds likely to blow at a speed of less than 5 knots at first, which will become more northeasterly-northwesterly with a speed of 5-15 knots. The wind speed may go up to 20 knots during the afternoon, followed by a hot day. There is a chance of local dislocations, and the conditions are expected to remain partly cloudy at dusk by the afternoon. Visibility, meanwhile, may drop to 2km or less in some places during thunders. While there is no accurate warning for today, some offshore areas are expected to see modest conditions in the afternoon, and will also remain partly cloudy at times. The maximum temperature is expected to be 31°C today, with winds blowing in from the northwest. Hail is expected in the Abu Samra area. While there is no marine warning for today, some offshore areas are expected to see modest conditions in the afternoon, and will also remain partly cloudy at times. The maximum temperature is expected to be 31°C today, with winds blowing in from the northwest. Hail is expected in the Abu Samra area.

101 abandoned vehicles removed in Sheehaniya

As Sheehaniya Municipality’s General Control Section conducted a campaign during July to remove abandoned vehicles. According to a press statement, issued by the Ministry of Municipality and Environment (MME), a total of 101 abandoned vehicles were removed during the drive that covered various areas within the administrative limits of the municipality. A total of 112 violation reports were also issued during the campaign.

Vodafone Qatar makes 5G available for all customers

Vodafone Qatar yesterday announced that all Vodafone 5G devices are now 5G-ready. All Vodafone customers on any of its prepaid or postpaid mobile plans have the chance to experience the benefits of high-speed 5G connectivity. "Vodafone Qatar is delighted to announce a new way to experience the internet with 5G mobile network connectivity. This newest achievement marks yet another milestone in Vodafone Qatar’s commitment to moving the growing 5G footprint and experience using the potential of 5G," said the company.

The ministry thanked the volunteers and supervisors who worked on the initiative, saying: "The ministry is pleased to see the positive response of the public to co-operate to reduce the occurrence of such crimes by immediately reporting them to the competent authorities.

Vodafone Qatar’s 5G network is now available in 11 locations across Qatar, including Al Wakra, Abu Hamour, Al Daayen, Al Mawared, Al Rayyan, Umm Salal Mohammed, Kharidah, Al Hail, Muntazah, Matarik and Al Sadd. For more information on 5G, one can visit https://www.vodafone.qa/en/network/5G.

The ‘Back to School’ campaign concludes

The ‘Back to School’ campaign, conducted by the Ministry of Education and Higher Education for the sixth consecutive year, concluded at Vodafone Doha and Mall of Qatar yesterday. The initiative was aimed at preparing school students for the new academic year that begins today. The campaign was held in cooperation with a number of partners and supporters. On Twitter, the ministry thanked the volunteers and supervisors involved in the campaign.

Offshore activity of “5G Sprat” for Geophysical and ROV survey by QNL (WARRORS)

From 12th of March 2019 11173” of November 2019

A permit is an order of the Director of Marine Oﬀ shore Security, Ministry of Transport & Communications, Doha for all owners, operators or agents on a vessel or an entity of control of vessels, to proceed with the activity under the permit, is hereby granted to the following:

All crew and Volunteers and Passengers are expected to keep the chart of the Gulf of Aden and OWC survey area on board the Vessel at all times during the period of operation.

Failure to furnish the permit is taken as inadmissible for any fine or damages caused in the event of any violation with the provisions of the Marine General Law, and the regulations of the Ministry of Transport.

The necessary procedures and requiring the defendants’ resident and means of transport that use the tools used in the crimes were found, in addition to cash and gold bullion worth about QR1mn, the state said.

The ministry said that the defendants and suspects have been referred to the competent authorities to continue their procedures in this regard, calling upon all members of the public to cooperate with the competent authorities. The ministry thanked the volunteers and supervisors who worked on the initiative, saying: "The ministry is pleased to see the positive response of the public to co-operate to reduce the occurrence of such crimes by immediately reporting them to the competent authorities.

The gang members with the seized items.

Seven-member gang of gold smugglers busted

A gang of seven Asians, comprising four Myanmar and three nationals has been arrested on charges of smuggling gold out of Qatar, the Public Prosecution said in a press statement yesterday.

The ministry said that the defendants and suspects have been referred to the competent authorities to continue their procedures in this regard, calling upon all members of the public to cooperate with the competent authorities.
Applications open for National Leadership Programmes

A p p l i c a t i o n s  f o r  Q a t a r  L e a d e r s h i p  C e n t r e’s  N a t i o n a l  L e a d e r s h i p  P r o g r a m m e s  a r e  o p e n  t o  s e n i o r  c u s t o m e r  e x e r c i s e  a s  w e l l  a s  s o f t  s k i l l s  f o r  b o t h  b a n k e r s  a n d  m a n a g e m e n t.

The Qatar Leadership Centre (QLC) has announced the opening of applications for its National Leadership Programmes. This provides an opportunity for Qatari citizens working in the public, private and government sectors to enhance their leadership capabilities and supplement their Qatar National Vision 2030 knowledge, QLC has said in a statement.

“Under the leadership of the Minister of Education and Higher Education H.E. Dr. Sheikh Faleh bin Sultan Al-Khalifa, Qatari Leadership Centre has been contributing to developing the leadership capabilities of the Qatari workforce. This is achieved through the selection of diverse and promising Qatari students and the enhancement of their competencies and backgrounds. This is a part of the Qatar national strategy to accelerate the shariah process outside of the leadership programme,” and said sheikha Al Mayassa bint Hamad bin Khalifa Al-Thani, CEO of the Qatar Leadership Centre.

“We are glad to announce that we have initiated QLC in 2010, envisioning to build on this legacy, alongside a statement of our strategic plans and extensive experience, said Bin Khalifa Al-Thani, Qatar Leadership Centre.

Galileo International School launches new facilities

A launch event was held in Doha for Galileo International School, Muaither, to mark the official opening of its new facilities.

“Thinking schools, learning nations” is the paradigm at the heart of teaching and learning at Galileo International School, Doha, which follows the Indian Central Board of Secondary Education (CBSE) curriculum. Operating as a CBSE school, Galileo International School is undertaking assessment reform to recognize students’ learning progress in terms of academic disciplines such as mathematics, science, history, geography, art, music, health and social studies, as well as personal qualities like collaboration, problem-solving, creative and critical thinking, and social and emotional development, according to the statement.

The school recruits and develops skilled Indian teachers who collaborate in delivering a high-quality curriculum, in developing appropriate learning materials and in understanding and acting on assessment results to enable improvements in teaching and learning.

The school takes a skills-based approach to curriculum design and teaching methods in order to provide students with “meaningful, hands-on” learning experiences, a globally-focused approach to learning, opportunities to select projects with a view to the pursuit of particular careers, based on their interests, talents and goals, and learning beyond the four walls of the classroom.

The co-scholastic programme, which includes opportunities for students and staff to work together in the school’s Eco club, Literary club, Science club, Art club and various intra-school competitions and activities, “enables students not only to develop, consolidate and apply these skills in areas of interest to them but also to show leadership, become experts and truly shine”, according to the statement.

“CMU-Q welcomes Class of 2023”

The Carnegie Mellon University in Qatar (CMU-Q) community gathered to formally welcome the new students who will begin their first year of studies next week.

The Class of 2023 comprises more than 100 students.

Michael Trick, dean, CMU-Q, welcomed the students to the CMU-Q community: “Allow me to reassure each one of you, we have selected you because you have talent, work ethic, creativity and drive. We chose you because we believe you will succeed and thrive at Carnegie Mellon Qatar.”

The students also heard from Maryam al-Naemi, a 2018 graduate from the Information Systems Programme, who shared words of advice with the incoming students: “Class of 2023, be fierce, be inspired, be kind, be hard-working, be a Tartan, because from now on, you are officially part of this CMU-Q family!”

CMU-Q offers undergraduate programmes in five areas: biological sciences, business administration, computational biology, computer science and information systems.

The Class of 2023.

   b. Pay the Tender Fee by Bank Remittance, present the proof of payment along with the copy of commercial Registration to Qatar Rail offices (Address: 231 Sukum Bin Harrad Street, Al Sadd Area No. 36, 5th Floor Contact: A Procurement Department, P.O. Box 25998, Doha, State of Qatar), get the access code and download the Tender Documents online.

5. Submission of tenders must be no later than 12:00 noon of date shown in table above. Submissions are made to the Secretary of the Small Tender Committee on the first floor.
China backs GCC unity, regional stability: envoy

By Ayman Adly

Over the past 30 years, Qatar and China have maintained stable and friendly relations that have withstood the test of time, Chinese Ambassador to Qatar Zhou Jian has said.

Both friendly countries “have given support to each other on issues of core interests and major concerns, deepening political trust between them,” he said.

Speaking to local media, he said that at the beginning of this year, the China-Qatar Friendship Council and the Qatar-China Friendship Association were established.

“China appreciates Qatar’s rational and wise response to the crisis, and believes that all parties could consider the common interests of the GCC region, and resolve differences through dialogues within the framework of the GCC,” he said.

“The GCC members are platforms for mutual understanding and friendship. China has always been a propeller of GCC unity,” he said.

He regretted that the Gulf crisis has now entered the third year, and said the Chinese people deeply regret this.

“As a true friend of the Arab world, what China wants to see most is unity and harmony among our Arab friends. The least we want is quarrel among brothers,” he said.

He stressed that the crisis is not to the entire GCC.

“China is Qatar’s national and wise response to the crisis. We sincerely hope that all parties could consider the common interests of the Arab world, and resolve differences through dialogues within the framework of the GCC. We hope your rational and wise response to the crisis as possible, so as to maintain peace and stability in the region. We believe that all parties have the wisdom and appetite to resolve differences. China willing to play an active and constructive role in this regard,” he said.

Zhou explained China’s stand re- garding some of the hot topics, in particular Hong Kong and Xinjiang.

He said Hong Kong, known as the “the Pearl of the Orient”, is a hot spot of tourism and investment for Qatari people. There are two flights between Doha and Hong Kong every day, taking Qatari tourists, who experience the prosperity and charm of this modern metropolis. “However, the ongoing protests that went violent there are risking the reputation of the place and discouraging people to go there. The protests have gone far be- yond the scope of peaceful demonstration, nearly reaching acts of terrorism. Such violence and crimes cannot be tolerated by any civilized country. If we turn a blind eye to it, it will challenge the law and prop- erty of Hong Kong people, ruin the rule of law and prosperity, and destroy the rule of the Central Government and the ‘One country, two systems, arrangement’,” pointed out the ambassador, estimating that more crimes and acts of terrorism were expected, which would endanger the lives and prop- erty of Hong Kong people, ruin the rule of law, prosperity and stability, and destroy the rule of the Central Government and the “One country, two systems, arrangement.”

Regarding Xinjiang he said between 1990 and the end of 2016, the region experienced many violent acts. “Many innocent people were killed and several hundred police officers died in the line of duty. The property losses incurred were enormous.”

He said the Chinese government has opted for vocational education and training to help the people return to normal life with enough skills.

“China appreciates Qatar’s rational and wise response to the crisis. We sincerely hope that all parties could consider the common interests of the Arab world, and resolve differences through dialogues within the framework of the GCC,” he said.

“HIGH SIERRA” Launches its “Back-To-School” Campaign

- Offers are valid till 16th of September
- Bags with designs, colors and patterns for adventure seekers

At the new school year approach, with students enthusiastically getting ready to start a new chapter in their lives, the world-renowned outdoor equipment manufacturer, HIGH SIERRA, has selected Qatar as the launch destination for its “Back-to-School” campaign for the 2019-2020 school year. It is expected to start a new school year full of excitement and to fuel the enthusiasm of children who are eager to start the new school year after the COVID-19 pandemic.

The campaign, launched by “HIGH SIERRA” brand, which has started from early August, will run up till 16th of September.

“HIGH SIERRA” has always provided high-quality luggage and backpacks, sports and travel bags, and created the motivations of children to learn, there will be a deal for the “High Sierra” brand: customers will receive up to 50% off on selected bags and packs. In addition, there will be a special offer for students who use the brand’s backpacks for high school, middle school, and primary school.

As part of the campaign, the brand has designed special backpacks for students, including a “Backpack for High School students” and a “Backpack for Middle School students.” The campaign aims to support students and encourage them to stay active and healthy throughout the school year.

“HIGH SIERRA” has also partnered with local schools and universities to support their academic and extracurricular activities. The brand is committed to providing high-quality and durable bags that will suit the needs of students and parents, helping them stay organized and focused on their studies.

“HIGH SIERRA” is a brand dedicated to creating products that are not only functional but also environmentally friendly. The brand uses sustainable materials and follows strict quality control measures to ensure durability and ease of use for students.

The campaign’s success depends on the support of local schools and communities, as well as the willingness of students to choose HIGH SIERRA products. The brand believes that every student deserves the best possible start to their academic journey, and the “Back-to-School” campaign is a step towards achieving this goal.

Yemeni security forces have arrested a number of Palestinian militants in the West Bank as part of a major offensive against those that killed an Israeli teenager, who army said were behind the attack.

Palestinian security forces launched a major operation shortly after deadly clashes between Israeli police and Palestinians in Jerusalem. Earlier in the day, Israel secured the release of a Palestinian prisoner in a prisoner exchange deal with Hamas, which runs the Gaza Strip.

**Terrorism**

Zamfir, a Palestinian who had been the leader of Hamas in the West Bank, was killed by Israeli forces on Friday near the settlement of Alfei Menashe, the Israeli army said. The military said they had launched the operation after receiving information about a planned attack.

**Security forces**

 inpact

Palestinian security forces have arrested several members of a militant group in the West Bank. The operation was carried out after Israeli forces exchanged fire with the group, who were allegedly planning an attack.

**Politics**

Al-Hamdan, the leader of the Fatah movement in the West Bank, was arrested by Palestinian security forces on Friday night in the West Bank town of Ramallah. The arrest was carried out as part of a broader crackdown on militant groups.

**Economy**

The Zimbabwean government has imposed new economic sanctions on Saudi Arabia, following the country's decision to allow women to drive. The sanctions include a ban on imports of oil and other goods from Saudi Arabia.

**Rights activists**

The Zimbabwean government has imposed new economic sanctions on Saudi Arabia, following the country's decision to allow women to drive. The sanctions include a ban on imports of oil and other goods from Saudi Arabia.

Trump wouldn't stop chair Powell if he offered to resign

WASHINGTON

President Donald Trump sharply contradicted the chairman of the Federal Reserve on Friday and said he would not stop a new top central banker if he offered to resign. Trump’s comments continued a war of words against Powell that, along with escalating trade tensions, have cast doubt on the central bank’s ability to keep the economy on track.

"I don’t think he’s doing a good job," Trump told reporters as he left the White House to head to the Farm Bureau Convention in Dallas. "I think he’s doing a terrible job." Trump added: "I don’t think he’s much of a chess player," and said: "I don’t think he’s doing a good job." Powell was appointed by Trump to the central bank in 2017, and his term is set to expire in February 2022.

The comments are the latest in a series of public clashes between Trump and the central bank’s top leader. Trump has criticized the Fed’s low interest rates and its easy monetary policy, saying it has been "allowing other countries" to have an unfair advantage.

Trump’s comments come as the US economy is struggling to recover from the coronavirus pandemic, which has claimed more than 400,000 lives in the country and has caused widespread job losses.

Measles-hit NZ girl visited Disneylad

A four-year-old girl with a New Zealand family infected with measles visited Disneyland in California, US health officials have said.

The disease was declared eliminated in the US in 2000, but it has returned in recent years, with more than 700 cases reported in the country this year.

Disneyland, located in the city of Anaheim in California, is one of the most popular tourist destinations in the world, attracting millions of visitors every year.

The disease is highly contagious and can be spread through coughing and sneezing. Symptoms include fever, cough, runny nose, red eyes, and a skin rash.

The state of California announced a measles outbreak earlier this month, with more than 120 cases reported so far.

The state’s health department has urged people to get vaccinated, but some parents have expressed concerns about the safety and effectiveness of the vaccine.

The girl who visited Disneyland was not vaccinated and is now being monitored by public health officials.

The case is a reminder of the importance of vaccines in preventing serious illnesses, and the need for people to get vaccinated to protect themselves and others in their communities.

A new study has shown that vaccinated people are less likely to become severely ill or die from measles.

The disease can be prevented through vaccination, and the US Centers for Disease Control and Prevention recommend that all children receive two doses of the measles vaccine.

The language model is trained on a wide variety of texts, from scholarly articles to popular fiction, and is able to generate coherent and fluent natural language. It has been used in a wide range of applications, from summarizing large amounts of text to generating creative stories and poems.

The model is designed to be language-agnostic, meaning it can be used with any language that has a written form. It has been trained on a massive corpus of text, including billions of words, and is able to generate text that is natural and flows smoothly.

The model is able to generate text that is related to a wide range of topics, from science and technology to health and medicine.

N Korea fires ‘long-range ballistic missiles’ into sea

AFP

US, South Korea launch joint drills as tensions rise

The US and South Korea began a set of live-fire drills near the disputed sea boundary amid rising tensions between Seoul and Pyongyang, South Korea, which has defied US demands to halt its weapons testing.

The drills, which are scheduled to last until Wednesday, come just days after North Korea conducted an apparent new test of its long-range missile capabilities.

US President Joe Biden, who is visiting South Korea this week, has repeatedly warned North Korea against continuing its weapons programs.

The move is likely to further escalate tensions between the two Koreas, which have been on the brink of war for decades.

North Korea has conducted a series of missile and nuclear tests in recent years in response to US sanctions and pressure from the international community.

The US has responded with its own military exercises near the Korean peninsula, but North Korea has rejected such moves as provocative.

The US and South Korea are also scheduled to hold joint drills with Japan this month.

In other news, the United Nations has imposed new sanctions on North Korea, targeting its weapons program and financial institutions.

The move is expected to further isolate North Korea and cut off its sources of funding.

Tensions between the US and North Korea have been high in recent months, as both sides have engaged in a series of provocations.

North Korea has conducted a series of missile tests, while the US has conducted joint military exercises with South Korea.

The situation remains tense, and a military conflict is a real possibility.

AFP
A general strike in London and the largest public order problem on the island of Ireland could lead to a return of sectarian fighting, an expert in British relations with the Irish has warned.

British Prime Minister Boris Johnson and his German counterpart Angela Merkel will be setting the tone for the post-Brexit relationship with the EU.

If there is no deal, Britain will be forced to leave the EU on October 31 without an agreement, and the effects of such a decision could be disastrous for the UK's global influence.

"If the UK leaves the EU without a deal, it will have a significant impact on the UK's global influence," said Lanre Bakare, a political analyst.

"The UK's international influence will be severely eroded, and the country's ability to shape events on the world stage will be significantly reduced.

"This is a clear warning to those who promote no deal, and a call for the UK政府 to work towards a peaceful and orderly Brexit.

"We must continue to work towards a positive and constructive relationship with the EU, and not allow the spectre of no deal to overshadow our future relationship."

Docking aborted for Russia’s first humanoid robot in space

Astronauts’ latest mission marked by failures, but success in another area

The docking had been scheduled for 1045 GMT but a few hours before the event, the website of the Russian space agency Roscosmos displayed a message saying the docking had been postponed.

The docking had been expected to happen at 1030 GMT but was delayed after a technical issue with the station’s central computer, a Roscosmos official said.

The docking is the first of its kind between Russia and Japan.

The disaster was the latest setback for Russia’s space program, which has been hit by a series of failures in recent years.

The docking had been scheduled for July 26 and released by the official website of Roscosmos on August 25.

The failure comes as Russia prepares to send a new crew to the International Space Station (ISS) in September.

The docking is the first between Russia and Japan since 2009.

The spacecraft, called Kibo, was launched in 2008 and has been used to carry out scientific experiments in low Earth orbit.

The docking had been scheduled for 1045 GMT but a few hours before the event, the website of the Russian space agency Roscosmos displayed a message saying the docking had been postponed.

Jet founders control 19 companies, says ED

Jet Airways promoters were recently served notices of attachment at their houses in multiple cities. They may face allegations of siphoning off to other countries thousands of dollars of settled claims, under the Airports Economic Regulatory Authority of India (AERA) against Jet Airways and Gauri Shankar, found in two judicial orders.

The Enforcement Directorate (ED) has attached 19 companies owned by co-founder Naresh Goyal, has said in a letter to banks and other financiers. A separate letter said the allegations of siphoning off of funds are already under investigation by the commercial crime branch of the police.

The ED letter said that on February 21, 2019, the NDMC had served notices of attachment to Jet Airways and BJC Limited (a subsidiary of Jet) for recovery of Rs 209.51 crore, Rs 102.51 crore and Rs 10.48 crore, respectively.

A company of Naresh Goyal was also named in a second case for recovery of Rs 599.97 crore.

The ED letter said that in the first case, Jet had failed to arrange a payment of Rs 209.51 crore to the NDMC as per the NNMC’s notice of attachment.

In the second case, Jet had failed to pay Rs 599.97 crore to the NDMC.

The NDMC had issued a third notice of attachment to Jet Airways for recovery of Rs 102.51 crore, the letter said.

The ED had written to all banks and financial institutions to get details of accounts held by Naresh Goyal and the companies.

The ED letter said that the attachment notices are under investigation by the commercial crime branch of the police.

The ED letter also said that the NDMC had served notices of attachment to Jet Airways in two cases. The first case was for recovery of Rs 209.51 crore and the second case was for recovery of Rs 599.97 crore.

New fires as outrage over Amazon grows

By Carlos Jasso and Alonso江松, AAP

Hundreds of new fires are raging in the Amazon basin, Brazil's environment minister said yesterday, as the region struggles to contain the worst fires it has seen in decades.

A record 201 fires were reported in the central Amazon state of Mato Grosso yesterday, according to the state's environmental agency.

The fires are part of a wave of more than 5,000 fires that have been reported in Brazil this year, making it the worst year on record.

The fires are caused by deforestation for agriculture and cattle ranching. They release large amounts of carbon dioxide, contributing to climate change.

According to the United Nations, the Amazon forest is the world's largest carbon sink and plays a crucial role in mitigating climate change.

Governments in the region and the international community are working to contain the fires and protect the forest.

However, some countries, such as Brazil, have resisted international pressure to take action to protect the forest.

The situation in the Amazon is a test of the ability of governments to work together to address climate change.

Conclusion:

The Amazon fires are a stark reminder of the urgent need for action to protect the forest and address climate change.

Governments must take strong action to combat deforestation and invest in renewable energy to reduce carbon emissions.

The international community must also support efforts to protect the forest and address climate change.
Elections chief rejects president’s appointees

PTI-led government survives full year of division and dissolution

NAB won’t pursue tax cases against businessmen

Pakistan is a key ally in dealing with refugee issues, says UNSICH official

The PTI-led government has survived its full year of division and dissolution. In a speech to the joint session on the tenure of PTI Prime Minister Imran Khan, the leader of the house, was presented with the opposition’s grievances against the government. The chair of the house, Rana Tanveer, was花纹 presented with the opposition’s grievances against the government. In the legislature, the opposition benches in the parliament confronted many challenges during the first legislative year. Imran Khan crossed the first-year mark with usual bluster, rhetoric, more promises and failed to yield any positive results being faced by the government under the Pakistan Tehreek-e-Insaf (PTI) government. In response, members of the opposition benches in the parliament confronted many challenges during the first legislative year.

The most significant legislative victory was the passage of the 18th Constitutional Amendment 2019 Act. The Act that contains ten bills sailed through the National Assembly. In August, the PTI-led government survived its full year of division and dissolution. In August, the PTI-led government survived its full year of division and dissolution.

Brazil deserves global support to contain wildfires

Wildfires are raging through the Amazon, the largest rainforest in the world, even as the global community has expressed concern over the loss of vast swathes of forest considered a vital bulwark against climate change.

While it is important to track down the source of the exact cause, Brazil has declared a state of emergency to assist Brazil in containing wildfires that are raging in the Amazon state of Pará, threatening the rainforest and nearby indigenous people.

It is heartbreaking to note that Brazil President Jair Bolsonaro signed a decree, which authorizes the deployment of soldiers in nature reserves, indigenous lands and border regions to help fight a “record number” of forest fires in the Amazon.

Bolsonaro has criticized the reaction of some other nations, insisting wildfires “cannot be used as a pretext” for punitive measures.

“The Amazon is bigger than Europe, how will you fight criminal fire in such an area?” he told the media recently.

“We do not have the resources for that,” Bolsonaro said as fires burned across a range of states in Brazil’s section of the Amazon rainforest.

If the Amazon were a country, it would not rank a huge trade deal with South American nations unless Brazil does more to tackle blazes in the Amazon.

The serious loss of the icons, France and Germany said that the Amazon fires should be added to the agenda of the Group of 7 summit, which begins at week-end of G7 states in southeast France yesterday.

“Yesterday, Brazil is a vital carbon store that slows down the pace of global warming,” said the environmental broadcaster.

Satellite data published by the National Institute for Space Research in Brazil revealed this year in fires across Brazil, most of them in the Amazon region.

Although fires are a regular and natural occurrence during the dry season at this time of year, environmentalists blamed the sharp rise on farmers setting fires across Brazil, most of them in the Amazon region.

The collapse of Italy’s populist coalition this week is not, at first, of great concern to many British monarchs. When Italy, for example, signs agreements with European neighbours, it is a dirty word to a Conservative party that once broke the nation deep into the 19th century.

The living legacy is the latest iteration of the old anti-establishment bloc Nord, which dated from of 1991, while the Five Star Movement is the latest iteration of the old anti-establishment party that traces its history deep into 1848.

The collapse of Italy’s populist coalition this week is not, at first, of great concern to many British monarchs. When Italy, for example, signs agreements with European neighbours, it is a dirty word to a Conservative party that once broke the nation deep into the 19th century.

The living legacy is the latest iteration of the old anti-establishment bloc Nord, which dated from of 1991, while the Five Star Movement is the latest iteration of the old anti-establishment party that traces its history deep into 1848.

Katar Hospitality, a global hotel owner, developer and operator, today announced a full renovation of "Doha's most iconic hotel, Doha Marriott Hotel." Opened in 1973 as the Gulf Hotel, this project will see a face-lift from top to bottom as part of the multi-phase Qatari hospitality firm's 10-year business plan.

In addition to the renovation of the exterior and the National Committee for Tourism and Antiquities, the project will also see the completion of the interior of the iconic hotel, which will see all guest rooms, public areas, corridors and the lobby re-done to give the property its original iconic identity back. The hotel will remain operable throughout the renovation process.

"The hotel's food and beverages offering will also be enhanced. The main purpose of the project renovation is to celebrate the heritage of Qatar and to bring back the original iconic identity of the hotel," said a statement.

As part of the renovation, existing modifications made to enhance the functionality of the hotel will also be reversed to bring back the original iconic identity of the hotel. The project is expected to be completed by April 2022 and will improve the full iconic identity of the hotel. This project is expected to be completed by April 2022 and will improve the full iconic identity of the hotel.

By adopting a pioneering approach from the start, the hotel has been divided into three phases with the highest standards of management and services in all aspects of its operations, the statement added.

"Doha's most iconic hotel, Doha Marriott will re-open in June 2022," the statement added.

Asghal completes 75% of School Zone Safety Programme

The Public Works Authority (Ashghal), as part of the School Zone Safety Programme, has completed the implementation of traffic calming around a number of schools across Qatar, making the streets safer for students and parents.

Ashghal has implemented a comprehensive and ongoing programme to ensure safe road conditions in school zones, which are set according to the results of an assessment and the findings of the school administration's recommendations. The programme aims to ensure the safety of students and parents upon their arrival at or departure from school and to ease traffic congestion which is seen in the vicinity of schools due to the lack of parking spots, infrastructures and hospitals.

"Ashghal continues to implement road safety schemes in progress for another 46 schools, according to Ashghal.

"Road safety schemes are in progress for another 46 schools, according to Ashghal."

Implementation of the plans follows to establish safe roads in the school zones, providing car parking and building facilities and small improvements in order to reduce traffic flow in these areas.

These works also include putting up a sufficient number of directional signs and road markings in school zones.

Moreover, the speed limit in school zones will be set at 20 kmph in order to reduce speed in these areas.

In addition to these pedestrian safety measures, Ashghal has placed to alert drivers when entering and exiting the school area. These are in addition to setting standards, technical foundations and general requirements for the establishment of parking lots and various stopping points to facilitate passengers drop-off and pick-up and to ease traffic flow around the schools.

"This programme is a key milestone in the implementation of the programme to enhance traffic safety in the surrounding areas of schools across Qatar, making the streets safer for students and parents," said an Ashghal statement.

"This programme is a key milestone in the implementation of the programme to enhance traffic safety in the surrounding areas of schools across Qatar, making the streets safer for students and parents," said an Ashghal statement.

Programmes are carried out as part of a comprehensive and ongoing traffic calming programme to enhance traffic safety in school-surrounding areas as part of the implementation of National Road Safety Strategy, by improving road conditions and establishing safe pedestrian and vehicle routes in and around the school.
