Two-day conference on “Studying the Causes of Extremism” starts in Doha

Qatar moves forward to strengthen its bilateral, international and multilateral partnerships to address this phenomenon. In a press statement on the sidelines of the conference “Studying the Causes of Extremism” started in Doha yesterday, Maj Gen Alex Anzato said Qatar has implemented many programmes in the field of combating terrorism and its financing, in addition to concluding co-operation agreements in this regard, whether international, bilateral or multilateral. He stressed Qatar is an example in this regard.

The international conference on studying the causes of extremism is organized by the Social and Economic Survey Research Institute at Qatar University and Qatar’s Ministry of Interior. The two-day event, the first of its kind in the Middle East, gathers international experts, scientists and decision-makers from a number of countries around the world. Maj Gen Alex Anzato pointed out that Qatar has a document which was issued by the United Nations to establish a centre in Doha to combat terrorism and to understand the phenomenon of violent extremism and evidence-based policies and programmes inspired by behaviors to prevent and combat violent extremism leading to terrorism.

During the first sessions of the conference, Maj Gen Alex Anzato presented the experience of Qatar in combating terrorism and its financing in its various stages. He added the convening of this conference, which will result in the launch of an international initiative to study the causes of extremism in the world, to be a global reference for researchers and decision-makers. Executive Director of the Counter-Terrorism and Extremism Directorate (CTED) Michelle Constance said research and training efforts should be conducted in this regard to help in taking preventive and enforcement actions.

Former Asst. Secretary for the National Security Coordination at the United States Department of Homeland Security Douglas Addle- Eshel stressed the importance of adopting scientific mechanisms to understand the current situation and future developments.

Senior Director of the National Security Coordination at the United States Department of Homeland Security Douglas Addle- Eshel stressed the importance of adopting scientific mechanisms to understand the current situation and future developments.

CIS to host lecture on role of Awqaf

The College of Islamic Studies (CIS) at Hamad Bin Khalifa University (HBKU), as part of its mission to stimulate intellectual debates and academic discussions on Islam, will host a public lecture on ‘The Role of Awqaf in Supporting the Social, Economic and Cultural Welfare of Qatari Society’. The public lecture will take place from 6:30 pm to 8:30 pm on September 11 at the auditorium, minced (CIS building).

Sheikh Dr. Khalid bin Mohamed al-Thani, director general, General Department of Awqaf at the Ministry of Endowments (Awqaf) and Islamic Affairs, will introduce the concept of Waqf, or charitable endowment, and consider how it has contributed to the multi-dimensional development in Qatar, and its key elements to promoting national well-being.

Discussions will focus on the country’s six endowment banks, which include: Waqf bank for the service of mosques; Waqf bank for family and child welfare; Waqf bank for scientific and cultural development; Waqf bank for health care, and Waqf bank for philanthropy and charity. The lecture will also discuss the mechanisms of Waqf governance in Qatar, modern-day Waqf projects, as well as investment methods and future prospects for the development of the Waqf sector as a key pillar for community advancement, according to a press statement by HBKU.

Dr. Mohammad El Kadi, associate professor at the College of Islamic Studies, said that the lecture aligns with the colleges’ aims to address aspects of Islam among the wider community, while enhancing the educational importance of Waqf in Qatar, and the effectiveness of current policies that have led to the increase in the number of Waqfs and financial endowments, as well as how efforts to support the recipients of Waqf. Further, the lecture explores the mandates of Qatar’s six endowment banks and their role in the social, economic and cultural spheres.

CIS works regularly with the Ministry of Endowments (Awqaf) and Islamic Affairs to support academic debates on the role of Waqf as a backbone of Qatar’s social, economic and cultural development. The lecture aims to re-emphasise the foundational importance of Waqf in Qatar, and the concept of Waqf, or charitable endowment, and consider how it has contributed to the multi-dimensional development in Qatar, and its key elements to promoting national well-being.

The public lecture will take place from 6:30 pm to 8:30 pm on September 11 at the auditorium, minced (CIS building).

CIS hosts public lectures and conferences to promote a deeper understanding of the various aspects of Islam among the wider community. The college hosted the CIS-QFC Global Conference on Waqf and the National and contemporary overview of Waqf and its social-economic impacts, Waqf’s models and management systems, performance and the applicability of Waqf to the blockchain era.

The lecture will be presented by Sheikh Dr. Khalid bin Mohamed al-Thani.

2nd semester exams at Holy Qur’an Education Centers conclude

The Department of Da’wa and Religious Guidance at the Ministry of Awqaf and Islamic Affairs has concluded the second semester exams for 2019, at the Ministry of Awqaf and Religious Guidance department.

Al-Jaber stressed the great importance of awqaf and Islamic Affairs to support academic debates on the role of Waqf in a multi-dimensional development in Qatar, and its key elements to promoting national well-being.

The final exams for some 1,500 students of the Holy Qur’an Education Centers and test committees were held before (446) committee members.

Al-Jaber stressed the great interest of officials and teachers of the centers in these exams, which help in strengthening the students of the Holy Qur’an, which helps to strengthen all students in their fields of memorization and study of the Holy Qur’an by assessing the students’ performance after each test conducted by the department.

Qatar condemns bombing in Iraq

Qatar has strongly condemned the bombing in northern Iraq, causing deaths and injuries.

In a statement yesterday, the Ministry of Foreign Affairs condemned the bombing in Iraq, which killed and injured a number of people.

The statement expressed Qatar’s condolences to the families of the victims and its government and people of Iraq, wishing the injured a speedy recovery.

The president of Angola, Joao Manuel Lourenco, arrived in Doha yesterday, on an official three-day visit to Qatar. He was greeted upon arrival at Hamad International Airport by HE the Minister of Transport and Communications, Jassim bin Ahmed Al-Sulaiti, Qatar’s ambassador to Angola Abdullah Al-Husayn Al-Jaber, and Angola’s ambassador to Qatar Jose De Leon.

Brazilian president congratulated Qatar's Amir

HE the Amir Sheikh Tamim bin Hamad Al-Thani last night congratulated the Brazilian President Jair Bolsonaro on the occasion of Brazil’s Independence Day.

The Amir congratulated Bolsonaro, on the occasion of his country’s Independence Day. He wished Brazil prosperity and stability and wished Bolsonaro good health and success in his duties.

HE the Amir appreciated the strong relations between Qatar and Brazil and stressed the importance of enhancing bilateral relations in various fields. He expressed Qatar’s full support for the development work in Brazil.

HE the Amir expressed appreciation for the role of Brazil in the development and progress of the Islamic Ummah and the Muslim world, and the Brazilian president’s efforts to develop bilateral relations between Qatar and Brazil.

HE the Amir wished Bolsonaro good health and success in his duties and confirmed Qatar’s full support for the development work in Brazil.
The International Conference on Studying the Causes of Extremism kicks off

The International Conference on Studying the Causes of Extremism kicks off in Doha today. The two-day event gathers international experts, scientists and decision-makers from around the world.

The event includes five sessions, each one going to bear on the role of evidence-based policy in combating extremism, assessing risk factors for this phenomenon, ways to control and combat it, processes of extremism and resilience, with a view to building a comprehensive model of understanding extremism and resilience.

Qatar has a leading role in combating terrorism and extremism and is part of Qatar’s ongoing efforts to strengthen the fight against terrorism in bilateral and multilateral forums.

The conference is the first-of-its-kind in the Middle East and is part of Qatar’s ongoing efforts to strengthen the fight against terrorism in bilateral and multilateral forums. It is part of Qatar’s ongoing efforts to strengthen the fight against terrorism in bilateral and multilateral forums.

Dr. Hanan Al-Kuwari, president, Qatar University, said in a speech that experts will discuss the factors and risk of extremism and the mechanisms to address them, with the aim of carrying out a comprehensive assessment of the international efforts to monitor and combat radiations and violent extremism, noting that these scientific events are in line with the continuous efforts exerted by the Qatar University and the International Cooperation Department. Dr. Al-Kuwari said: "This indicator will be an essential tool in measuring the phenomenon."

The phenomenon of extremism is global and requires an international index to measure the level of extremism leading to violence and study its developments, and track them over time and space, with a view to having access to international data on the phenomenon to be shared by researchers and policy makers.

Addressing the opening session, Major General Abdul Aziz Al-Ansari, chairman, National Counter-Terrorism Committee, underscored the importance of knowledge-based policy in countering terrorism and extremism and its role in advancing Qatar's role as an active player on the international level in this field. He referred to the agreements signed by Qatar with the United States and the United Arab Emirates to form the National Counter Terrorism Executive Directorate (CTED), said that research centres play an important role in countering extremism in the general and political context.

Al-Ansari pointed to emerging areas for research and studying the causes of some phenomena, especially those that threaten community peace. He stressed the need to build a close relationship between decision-makers and researchers, institutions and research centres so that the policies adopted to confront the phenomenon of violent extremism are based on evidence to extract its essence and effectiveness in the face of this phenomenon.

Al-Ansari pointed to emerging areas for research and studying the causes of some phenomena, especially those that threaten community peace. Education City Speaker Series welcomes UN climate change expert

A national and international leader against climate change will discuss the matter in Doha. He says time is running out, and there is no time to waste if the future of the planet is to be secured, as he becomes the latest global thought leader to participate in Qatar Foundation’s CPY Series. Stephane Ipert, director of Cultural Heritage and Conservation and Conservation and Education City Speaker Series director of Cultural Heritage and Conservation, highlighted the ‘USB Museum’, which showcased experts from a number of international institutions and covered topics such as digital tools and conservation techniques. Stephane Ipert also highlighted recent work on ‘Reflection Imaging’, a computational imaging technique used to capture an overview of the object’s features.

The talk opened a dialogue opportunity to share the library’s efforts in the field of digitisation and raise awareness of the National Library’s digitisation tools, books, documents and multimedia library. A subsequent panel, formed by experts and professionals from Qatar National Library, highlighted the ‘USB Museum’ and its impact.

In his presentation, Ipert highlighted the importance of forensic techniques and how digital tools are used to understand the composition of library materials in determining the most appropriate conservation treatment. Knowledge of the materials and standards for storage and exhibition help librarians to protect books, manuscripts, paintings and other materials.

A cheque presentation also took place in celebration of the Qatar National Library’s 10th anniversary. Qatar National Library (QNL) Board Member Areef Badr, deputy executive secretary of the United Nations Framework Convention on Climate Change (UNFCC), delivered the open cheque.

QNL experts lead workshop at global libraries conference

A high-level delegation from Doha hosted by the president of the Brazilian Chamber of Deputies, Rodrigo Maia, visited QFN and explored more investment opportunities and sustainable options to invest in Qatar Free Zones (QFZ). The delegation was welcomed by Ahmad Al-Malih, director of Cultural Heritage and Conservation and Education City Speaker Series director of Cultural Heritage and Conservation, on QFN’s latest projects and activities, as key initiatives that have helped make Qatar a ‘highly preferred investment destination for foreign direct investment (FDI)’. Al-Malih highlighted the Brazilian delegation’s visit to Qatar, which has been welcomed by the QFN and highlighted the latest projects and opportunities to invest in Qatar Free Zones.

QFN’s efforts are aligned with Qatar National Vision 2030, pursuing a vision where Qatar has a strong value proposition, primarily based on logistics, chemicals and emerging technologies. Al-Malih added, "The meeting with the Brazilian delegation is part of a strategy to open up opportunities to invest in both Qatar’s core economic activities, such as logistics, chemicals and emerging technologies, and its core, cross-sectoral and inter-sectoral activities, such as logistics, chemicals and emerging technologies. The meeting is part of a strategy to open up opportunities to invest in both Qatar’s core economic activities, such as logistics, chemicals and emerging technologies, and its core, cross-sectoral and inter-sectoral activities, such as logistics, chemicals and emerging technologies. Qatar Charity, with funding from the Qatar Fund for Development (QFFD), continues to provide relief assistance to flood victims in Sudan. This aid comes as part of the Qatar efforts to alleviate the suffering of those affected by floods and rains that swept vast areas of Sudan.

The relief assistance, funded by QFFD, aims to rescue and support 110,000 flood victims in Sudan’s White Nile, Al Jazirah, and Kassala states. Of them, there are 49,500 children, including 8,000 children under five, in addition to 50,000 women.

The assistance also includes 13,650 food baskets for 4,000 families, and sheltering aids for 4,000 families. Also, health, water, and sanitation services will be provided, in addition to six mobile clinics for medical services.

Upon the directives of His Highness the Amir Sheikh Tamim bin Hamad al-Thani, the first relief flight to support Sudan flood victims has earlier taken off from Doha. Qatar assistance includes food items and supports the health and environmental sanitation sectors.

In July and August this year, floods and heavy rains hit Sudan, affecting fifteen states of the country out of its eighteen states and causing the death of seventy people according to reports released by government agencies and UN organizations.

International agencies have pointed out that the most important relief needs to cope with the disaster are tents, food and non-food items, clean water supplies, maintaining temporary health services in the affected areas, repairing disrupted water stations and damaged latrines, and providing medicines for children and adults.

Qatar Charity

The Urgent Relief campaign is distributed through a mobile campaign, through the website and the QR code and through the SMS Award. 220,000 damaged homes and 170,000 displaced persons and affected by floods and heavy rains are the main beneficiaries of this campaign, with a need for the following to be provided:

- 2,000 hygiene kits
- 1,000 food baskets
- 1,000 livelihood items
- 1,000 repairing damaged homes

Qatar's efforts in combating graft stressed at UN events

Qatar proposes to host the 10th session of the Conference of States Parties to the United Nations Convention against Corruption (UNCAC) and the accompanying forum to be held in Doha in 2023. The meeting discussed enhancements to UNODC and the participating states to the Committee of Experts on the Conventions and the accompanying forum to be held in Doha this year. He also held a meeting with a number of non-governmental organizations (NGOs), which participated in the UN meetings, including panels of states to discuss the issues of international cooperation and changing expertise that were discussed.

HE Hamad bin Nasser al-Missned extended an invitation to UNODC and the participating states to the Conference of States Parties to the United Nations Convention against Corruption (UNCAC) to host the 10th session of the Committee of Experts on the Conventions and the accompanying forum to be held in Doha in 2023. The meeting discussed enhancements to UNODC and the participating states to the Committee of Experts on the Conventions and the accompanying forum to be held in Doha this year. He also held a meeting with a number of non-governmental organizations (NGOs), which participated in the UN meetings, including panels of states to discuss the issues of international cooperation and changing expertise that were discussed.

Qatar Chamber wins GCC award

The Qatar Chamber’s efforts in combating graft were highlighted at the 10th session of the Conference of States Parties to the United Nations Convention against Corruption (UNCAC), which was hosted by the Sultanate of Oman last week. Al-Kuwari, Executive Director of UNODC in Vienna, stated: “Qatar has made significant strides in combating graft, and these efforts have been acknowledged at the UN level.”

The meeting discussed enhancements to UNODC and the participating states to the Committee of Experts on the Conventions and the accompanying forum to be held in Doha this year. He also held a meeting with a number of non-governmental organizations (NGOs), which participated in the UN meetings, including panels of states to discuss the issues of international cooperation and changing expertise that were discussed.

Qatar Chamber won the GCC award for its efforts in combating graft, which was presented by the Qatar Chamber during the UNODC meeting in Vienna.

Doha summit to discuss good governance in sport

The summit, hosted by the Qatar Chamber of Commerce and Industry, will bring together thought leaders and international partners to discuss the role of sport in promoting good governance, transparency, and integrity.

The meeting discussed enhancements to UNODC and the participating states to the Committee of Experts on the Conventions and the accompanying forum to be held in Doha this year. He also held a meeting with a number of non-governmental organizations (NGOs), which participated in the UN meetings, including panels of states to discuss the issues of international cooperation and changing expertise that were discussed.

Troops strike after rocket attack

Erdogan to discuss Syria with Trump

Turkey is set to discuss Syria with US President Donald Trump at the US president's residence in Mar-a-Lago next week.

The meeting comes amid growing tensions between Ankara and Washington over the fate of the Syrian Kurdish military group, the People's Protection Units (YPG), and the situation in the war-torn country.

Trump has suggested that Turkey should not be allowed to take control of the Kurdish region in northern Syria, and has threatened to impose economic sanctions on Turkey if it does not stop its offensive.

Turkey, however, has said it will not be deterred by US threats and has continued its military operations in Syria.

Zimbabweans mourn Mugabe, but confused over burial

Zimbabweans are mourning former President Robert Mugabe, but there is confusion over where his body will be buried.

Mugabe, who was in power for over 37 years, has died aged 95 in Singapore. His body was flown back to Zimbabwe but there are conflicting reports about where it will be laid to rest.

Mugabe's family and the government have different plans, with some wanting him to be buried in the capital Harare, while others want him to be interred in his native village in Mozambique.

The country is facing a crisis of leadership, with no clear successor to Mugabe having been named.

Iran fires advanced centrifuges in new move

Iran has fired up advanced centrifuges in its nuclear programme, sparking concern among Western powers.

The move, which comes as talks continue in Vienna on Tehran's nuclear programme, has raised concerns about the country's intentions.

Iran has repeatedly denied allegations of trying to develop nuclear weapons.

Four killed in separate Iraqi attacks

At least 16 members of the pro-government Hashd al-Shaabi forces were killed in separate attacks in the southern and central parts of the country.

The attacks, which targeted bases and checkpoints, were claimed by the Islamic State in Iraq and the Levant (ISIL) and the Islamic State in Iraq and al-Sham (ISIS).
A ceremony to celebrate the Grenada's Independence Day was held on the island, where people gathered to sing, dance, and perform traditional cultural activities. Islanders were dressed in their finest attire, celebrating the country's rich history and traditions. The ceremony included speeches, musical performances, and a parade, showcasing the vibrant culture and diversity of Grenada. The atmosphere was filled with joy and pride as people came together to honor their heritage and achievements.

The event also included a special recognition of local heroes and leaders who have contributed significantly to the country's development. It was a momentous occasion where the island's spirit was on full display, reflecting the resilience and unity of the Grenadian people. The celebration ended with a Grand Finale, featuring a fireworks display that illuminated the sky, adding a spectacular finale to the day's festivities.

**Hong Kong police foiled what experts estimated to be worth $30-$60bn. in assets of royal properties, authorities announced last year. The estimate was quadrupled and beefed up to $75bn.**

The protests have hit tourism hard, with more than 20 flights being delayed and some passengers trapped on planes.

On Friday night, hundreds of demonstrators gathered near Hong Kong's international airport, the main gateway to the city, and shut down operations.

The police said they were responding to a crowd of around 500 people who had gathered near the airport, blocking access to the main terminal.

They added that they had used pepper spray and other crowd control measures to disperse the crowd.

Urges probe into missing activist

**Body:**

**Rights groups have urged the Thai authorities to investigate the disappearance of a missing activist.**

The activist, who was last seen in Bangkok on August 26, is believed to be connected to the political opposition movement.

The groups said they were concerned about the missing activist's safety and called for an immediate investigation.

**Typhoon Lading hits North Korea**

**Headline:**
Typhoon

**Subheadline:**
Lading hits North Korea

**Body:**

**A powerful typhoon knocked out power to some 10 million people in South Korea and the North also reported damage.**

The typhoon, which made landfall on Friday night, hit South Korea's southern Jeju island, where 10 people were killed and more than 100 people were injured.

In North Korea, the country's official media reported that the typhoon caused extensive damage, including flooding and landslides.

The overall risk level remains moderate, but the typhoon could bring strong winds and heavy rain to parts of the country.
PM short of options as rebels seek Brexit delay

British Airways has told its pilots to prepare for the possibility of a short strike if its demands for a new pay deal are not met.

The airline, which recently announced a series of delays and cancellations due to industrial action, said it would start preparing for a potential strike if it does not receive a satisfactory response from the government.

British Airways, which is owned by the International Airlines Group (IAG), said it had been in talks with the pilots’ union, Balpa, for several weeks and had offered a new pay deal.

However, the airline said it had not yet received a formal response from the union and was therefore preparing for the possibility of a strike.

A spokesman for British Airways said: “We have been in discussions with Balpa and we’ve offered a new pay deal. However, we have not yet heard back from them.

“British Airways is committed to keeping its customers informed and ensuring that it can continue to operate as usual.

“We are doing everything we can to avoid any disruption to our flights and will continue to work closely with Balpa to resolve this matter.”

British Airways’ decision to prepare for a strike follows a series of industrial action last week, which saw the airline cancel more than 1,000 flights.

The company has said it is working to ensure that passengers’ travel plans are not disrupted and that it can continue to operate as usual.

In a statement, Balpa said: “We have received a new pay deal offer from British Airways and are continuing discussions with the company.

“However, we remain committed to ensuring that our members are fairly paid and that our airline customers receive the highest level of service.”

The airline’s announcement comes as part of a wider dispute between the airline and its pilots, who say they are being unfairly treated.

The pilots’ union has said that the airline is not offering enough pay increases and that the offer is “not good enough”.

The strike, which is due to start next week, is expected to affect around 100,000 passengers.

The infighting in the Kerala Congress-Mani Pakkam faction, which has left its candidate and party leader P. R. Jayakumar in a spin, is likely to affect the outcome of the Pala byelection.

The Pala byelection became a key test for the new Congress unit led by Mani Pakkam, who took over as the Kerala Congress (O) president after the death of his father, Mani. The bypoll will be held on Sunday, September 13, and the results will be announced on September 16.

Kerala Congress (M) state leaders have been divided in their views on the candidates. While some are in favor of the Pala candidate, Neerja Bhanot, others are against her. The party's decision to field Neerja as its candidate has caused a rift within the party, with some members calling for the withdrawal of the candidate.

Neerja Bhanot, a social worker and former student leader, has been active in the party for several years and has won the support of many within the organization. However, some members of the party have raised concerns about her ability to connect with the electorate and win the bypoll.

The bypoll is being seen as a crucial test for the new Congress unit led by Mani, who has been trying to reassert his leadership in the party. The outcome of the bypoll will be closely watched, as it will set the tone for the party's performance in the upcoming Assembly elections.

No further Karnataka cabinet expansion for now: BJP

Congress inifter president Sonia Gandhi yesterday met Madhudi Madhavi Chief Minister Kamal Nath and expressed concern over infighting in the state.

The chief minister, who arrived in New Delhi last night met Madhya Pradesh Congress chief in a speech at mission control yesterday after militants vanquished the Chandrayaan-2, which will circle and study the moon's surface for a year, is however "healthy, intact, functioning normally and in the Lunar South Pole."

The Chandrayaan-2 orbiter, which has sufficient amount of fuel onboard for it to operate for 20 days after the landing, is functioning normally and is however "healthy, intact, functioning normally and in the Lunar South Pole."

The ISRO said Chandrayaan-2's orbiter and lunar lander mission managers have ensured a long life of about seven years for the Chandrayaan-2 orbiter instead of the planned one-year life.

The prime minister had hoped to launch the in a successful mission, but yesterday it was shifted to early October in view of the Tyagi brothers. The ISRO said Chandrayaan-2's orbiter and lunar lander mission managers have ensured a long life of about seven years for the Chandrayaan-2 orbiter instead of the planned one-year life.

Pakistan listed as one of the least competitive tourist destinations

Pakistan has been listed as one of the least competitive tourist destinations in the World Economic Forum's (WEF) Travel and Tourism Competitiveness Report 2021. The report assesses 140 countries based on 14 pillars, including health and safety, infrastructure, ease of doing business, and air transport services.

Pakistan is ranked 105th out of 140 countries in the report, highlighting areas where it can improve to become more competitive in the tourism sector. The report suggests that Pakistan needs to focus on enhancing its infrastructure, improving health and safety standards, and streamlining business procedures to attract more tourists.

Punjab sets its sights on tourism

Punjab, a province of Pakistan, has set its sights on becoming a leading tourist destination. The government has announced plans to develop the province into a world-class tourist destination, focusing on historical sites, cultural heritage, and natural beauty.

The Punjab government is planning to invest heavily in infrastructure development, including road networks, hotels, and attractions, to make the province more attractive to tourists. The goal is to attract both domestic and international visitors, promoting Punjab as a must-visit destination.

However, the report also stated that Pakistan had made strides in improving its tourism sector, identifying it as one of the countries showing significant improvement in this area. The country's efforts in improving safety and security, as well as its rich cultural and natural heritage, were noted as positive developments.

Social media helps bring justice for family

The social media campaign against the police in the Punjab case has gained momentum, with thousands of people sharing videos and images of the victims. The case has drawn widespread attention, and the public has demanded justice for the family.

The family of the victims has been subsequently offered a financial settlement by the government, but they have refused it, insisting on a full investigation and justice. The case has sparked a nationwide movement against police brutality and corruption, highlighting the need for accountability in the justice system.

Terror alert in the Indian capital

The Indian government has issued a terror alert in New Delhi, amid concerns over potential militant activities. The alert has been issued in response to intelligence reports indicating the possibility of militant movements in the vicinity of the Indian capital.

The government has urged citizens to remain vigilant and to report any suspicious activities to the authorities. Security forces have been put on high alert, and additional personnel have been deployed in sensitive areas.

Pakistan denies Indian president’s use of airspace

Pakistan has denied the Indian president’s request to use its airspace, following tensions over the disputed territory of Kashmir. The move comes amid increasing tensions between the two countries, following India’s decision to revoke the special status of Kashmir awarded to Pakistan.

Pakistan defense minister Khawaja Asif has reportedly said that the country would not allow India to use its airspace, emphasizing that Pakistan would not tolerate any violation of its territorial integrity.

Judges hearing PML-N leaders’ cases recalled

The Pakistani government has recalled judges hearing high-profile cases against PML-N leaders, including the cases of former prime minister Nawaz Sharif and his family. The moves have raised concerns about the independence of the judiciary and the government’s efforts to influence judicial decisions.

The recall of judges has sparked protests and criticism, with opposition parties accusing the government of interfering in the judicial process. The government has defended its actions, saying it is necessary to ensure the fair and impartial hearing of cases.

Women police officer prevents hand-called lawyer who slapped and abused her to court

A woman police officer has prevented a hand-called lawyer from entering the court and slapping the defendant, after he refused to answer her questions.

The lawyer, identified as Jamshed Ali, was accused of Hours of Neglecting a Negligent employee in the court, and was asked to answer the officer’s questions. However, the lawyer refused to answer and started abusing the officer.

In response, the woman officer took action and prevented the lawyer from entering the court, citing the need to maintain decorum and order in the court.

The incident has sparked a debate on the need for better training and discipline of lawyers and legal professionals, with calls for stricter measures to deter such behavior.
The decommissioning process is considered a major step towards ending the long conflict. It involves the return of combatants and their weapons to the government, allowing them to transition to civilian life. The process is supervised by the Office of the President and the Department of Justice, ensuring that the decommissioning is done in a fair and transparent manner.

President Rodrigo Duterte along with more than 1000 ex-rebels,umpiers and other officials of the agency should be paid P10,000 for her husband’s release.

The decommissioning of the MNLF marks a significant step forward in the peace process in the southern Philippines. The MNLF was a breakaway faction of the Moro National Liberation Front (MNLF) and was involved in the Moro conflict for over three decades. The decommissioning process involves the turnover of firearms and other weapons to the government, allowing former combatants to transition to civilian life.

Europe gains total access to reliable Qatar LNG supplies

Qatar is the only gas producing country with long-term contracts for imports of LNG into North West Europe. Located along the coasts of four seas and six gas pipelines meet, the terminal plays a key role in Europe’s natural gas supplies. The terminal is operated by Fluxys LNG, part of Belgian independent natural gas transport company Fluxys. The terminal is a key market for its European natural gas (LNG), which is highlighted by the Minister of State of Energy Affairs, H.E. Sherida Al-Kaabi, also the President and CH of Qatar Petroleum, at the signing ceremony in Brussels.

Al-Kaabi said, “We are delighted to sign this landmark agreement with Fluxys. This is a further indication that Qatar will further support our customers in Belgium and Europe in general, by providing access to reliable LNG supplies from Qatar and allowing our customers to maximise the utilisation of such supplies.”

Qatar Petroleum has long-term and interconnected gas supply in Europe, a key gas market, as part of our supply destination portfolio diversification strategy. We continue to be committed to supporting the EU’s energy policies and providing reliable energy supplies into the EU, Al-Kaabi added.

Global LNG leader Qatar is already ramping up its liquefied natural gas production by launching the North Field Expansion project, which includes setting up four mega LNG trains that would expand the country’s LNG production from 77mn tonnes per year to 110mn tonnes by 2024.

### Political divide deepens in Thailand

By Yves-de-Sepulchre, Paris, Data/Climate & Mattias Tellewius

**A** new term is gaining ground in Thailand's political to-do list: deflation. This is not the grim, wintry term that translates roughly as “coldness” in Thai. The term is used by anti-government protesters as a weapon. Protesters and police alike refer to the “cold hands” of the Constitutional Court, a reference to a recent frosty decision which, in the protesters’ view, closed the door on the possibility of a constitutional change to revert the monarchy system to the 2006 constitution.

The Thai opposition, led by Thaksin Shinawatra, uses the term “deflation” to refer to the economic effects of the constitutional crisis and polarization in the country. They argue that the current government, led by Prime Minister Prayut Chan-o-cha, is failing to address the root causes of economic problems, such as high inflation and low consumer spending.

**Thailand’s government**

Prime Minister Prayut Chan-o-cha, who leads a coalition of parties called “Future Forward,” has said that the country is facing a “deflation of ideas” and a “loss of hope.” The government has announced a number of measures to boost economic growth, including tax cuts and increased spending on infrastructure projects. However, many analysts believe that these measures are insufficient to address the underlying issues.

**The right-wing New Right**

The New Right, led by the Palang Pracharat party, has been campaigning on a platform of economic growth and national pride. They have accused the government of being too soft on China and have called for a more assertive foreign policy.

**The military**

The Thai army has been a powerful force in Thai politics for many years. It has been known to intervene in political disputes, and it has been accused of using its influence to shape the political landscape. The army has been critical of the government’s handling of the constitutional crisis and has called for a stronger role for the military in political decision-making.

**Deflation in practice**

In recent months, Thailand has experienced a marked slowdown in economic growth, with the GDP growth rate falling to its lowest level in years. This has been attributed to a number of factors, including the constitutional crisis, political uncertainty, and a decline in tourism. The government’s efforts to boost economic growth have been met with skepticism, with many analysts believing that the measures are insufficient to address the underlying issues.

**The ECB’s obsession with deflation**

The European Central Bank (ECB) has been concerned about deflation in recent years, and has taken steps to combat it. This has included lowering interest rates and stimulating demand through quantitative easing. However, some economists have argued that deflation is not necessarily a bad thing, and that it can be beneficial in certain circumstances. For example, deflation can help to boost exports and investment by making products cheaper for foreign buyers.

**The ECB’s policy debate**

The ECB’s policy debate has been a topic of much discussion in recent months. Some economists have argued that the ECB is too focused on deflation, and that it should be more concerned about inflation. Others have argued that the ECB is too focused on inflation, and that it should be more concerned about deflation.

**The ECB’s dilemma**

The ECB is faced with a difficult dilemma. On the one hand, it is concerned about deflation, which can be harmful to the economy. On the other hand, it is concerned about inflation, which can be equally harmful. The ECB must find a way to balance these two concerns, and to design a monetary policy that is effective in both respects.
Amir visits Katara falcon festival

WCM-Q welcomes new medical students with White Coat ceremony

Dr Javaid Sheikh, dean of WCM-Q, said the White Coat Ceremony is one of the highlights of the college’s academic year and a memorable and significant milestone for the trainee medical students. These young people are the very future of medicine in Qatar, delivering world-class healthcare to all of the country’s citizens, serving as the backbone of Qatar’s medical system, delivering world-class medical training with the highest standards of professional conduct expected of them, Sheikh said.

“The white coat is recognized throughout the world as a symbol of compassion and healing and it gives me great pleasure to present them to our new medical students. These young people are the very future of medicine in Qatar. During their careers, they will learn new medical technology that physicians today can only dream about. They will innovate, they will acquire knowledge and progress in their time and our talents to help others. You don’t need to have the answer to this question now, but you do need to have and cultivate the intellectual curiosity to ask and find-out,” Sheikh said.

Dr Sarah al-Khawaja, who holds the position of chief resident, dermatology and venereology at Hamad Medical Corporation, and is an clinical associate in dermatology at Weill Cornell Medicine, introduced the students and assembled audience to the key note speaker, WCM-Q alumna Dr Sanjiv Shahi, who holds the position of chief resident, dermatology and venereology at Hamad Medical Corporation, and is a clinical associate in dermatology at Weill Cornell Medicine.

Dr Shahi told the audience that being a doctor is a journey, not only a journey to acquire knowledge and progress professionally, but a journey of self-discovery. “How can we use our time and our talents to help others? You don’t need to have the answer to this question now, but you do need to have and cultivate the intellectual curiosity to ask and find-out,” Sheikh said.
