Qatar Airways Airlines honours with 21,000 complimentary tickets

● **Giveaway will continue until 3.59am on October 8**

O n the occasion of World Teachers’ Day, observed on October 5, Qatar Airways has launched a complimentary ticket offer for teachers to thank them for their vital role in shaping the future of children. The airline has introduced the ‘Noon’ initiative to launch a round-the-clock hotline for teachers to help them in the midst of the ongoing Covid-19 pandemic. It has also launched a three-day campaign period.

The daily allocation will be released at 4am Doha time, in the same way as the previous two, until 3.59am on October 6 and 7, and 3.59am on October 8. Instantly after registration, the ticket will be credited into the individual’s Qatar Airways frequent flyer account. Tickets will be valid for travel up to September 30, 2021. Qatar Airways Group Chief Executive Akbar Al Baker said: “We at Qatar Air- ways are incredibly grateful for the commitment and hard work of teaching people throughout the world. We have the privilege to educate our young people from the United States to the Middle East and everywhere in between. We know that it has not been an easy task for them, and we are incredibly recon- ciled, to honour and engage, and other methods.

We have the privilege to educate our young people from the United States to the Middle East and everywhere in between. We know that it has not been an easy task for them, and we are incredibly reconciled, to honour and engage, and other methods.

Qatar Charity (QC) has launched World Teachers’ Day with the theme, ‘Teachers: Leading in crisis, re- framing the future’, which will run until 3.59am on October 5. The day, which is observed annually on October 5, comes at a time of unprecedented chal- lenges posed by the Covid-19 pandemic, that has led to new hardships for the education sys- tem worldwide.

The pandemic will alter the traditional teaching and training approach, while the world will come together as one. The celebration will take place on December 10.

Qatar Airways has been the leading flexible travel brand in the world, and the airline’s leading flexible travel campaign is being offered in conjunction with the airline’s leading flexible travel campaign, which is being offered in conjunction with the airline’s leading flexible travel campaign. The campaign has been launched in 2012 by Her Highness Sheikha Moza bint Nasser to significantly reduce the number of children worldwide who do not have the right to education. Qatar Airways passengers are invited to ‘Educate a Child’ on board and at gateways, and to support the Children’s Miracle Network page during the online flight booking process.

Each year, Qatar Airways marks the world total of on board passenger dona- tions. The airline also dis- plays the foundation’s video content related to the topic. The news raises awareness and encour- ages teachers who manage the gifting campaign in the front of the airline’s leading flexible travel campaign.

Msheireb Properties, QF to launch Gulf Sustainable Urbanism book

The chief architect Arab Engineering Ibrahim Jaidah, Group CEO & dedicated on-line virtual platform Msheireb Museums and on a regional stage, will be held at Msheireb Properties on a dedicated on-line virtual platform.

Speakers at the occasion will be UAE's Dr Pourvaziry, First Global Advocate, and Qatar's Dr Rogaia Abush, Professor of Anthropology, Harvard University; and Reza Arafa, Professor of Anthropology, Harvard University; and Reza Arafa, Professor of Anthropology, Harvard University.

The launch event will be followed by virtual panel discussions on October 14 and 21 to discuss different phases of the book and a special session titled "The study of the past informs the present" in the Gulf region, the role of heritage, urbanism, and public health in the Gulf region. The study is the result of more than nine years of research.

"We are proud to launch this important book that provides a compelling and in-depth study on sustainable urbanism in the Gulf. We are grateful to all the contributors to this project, and we thank Harvard University for the great effort to sponsor this book, which covered eight countries and 10 cities bordering the coastal zone of the Gulf: Qatar, Saudi Arabia, Oman, Iran, Iraq, and Afghanistan.

Msheireb Properties and Qatar Foundation (QF), in collaboration with the United Nations Human Rights Office (UN-Habitat), have launched the Gulf Sustainable Urbanism book on October 2, 2020.

The book, authored by Dr Pourvaziry, First Global Advocate, Dr Rogaia Abush, Professor of Anthropology, Harvard University, and Reza Arafa, Professor of Anthropology, Harvard University, is a comprehensive and in-depth study on sustainable urbanism in the Gulf. The book is the result of more than nine years of research.

Members of Woqod team would like to extend their gratitude to all concerned parties who have contributed to the completion of the project. The new Al Waajba petrol station is spread over an area of 1,500 sq m and has three lanes with two dispensers for the selling of petrol and LPG cylinders 'Shafaf', in addition to a convenience store, manual car wash, and a repair shop for light vehicles.

Qatar opens Al Waajba petrol station

Qatar Petroleum (QP) yesterday opened its first petrol station in Al Waajba. The station is the first of 10 new stations that will be opened in the country to meet rising demand for petroleum products and raise its network of petrol stations to 35.

"We are pleased to open a new petrol station in Al Waajba," said Abdullah Al-Hamaq, QP’s managing director & CEO. "Qatar Petroleum is dedicated to provide the best-in-class products and support for petroleum products and raise its network of petrol stations to meet the rising demand for petroleum products and raise its network of petrol stations to 35.

"The GSU book results from more than nine years of research. It started in 2012, with the first phase completed in 2020. The study covers eight countries and 10 cities bordering the coastal zone of the Gulf: Qatar, Saudi Arabia, Oman, Iran, Iraq, and Afghanistan.

"Woqod managing director & CEO, Saad Rashid al-Muhanraz, said, "We are pleased to open a new petrol station in Al Waajba. Woqod aims to meet the rising demand for petroleum products and raise its network of petrol stations to meet the rising demand for petroleum products and raise its network of petrol stations to 35.

"The book is a reference for academic institutions, universities, libraries, and academic institutions. It provides a comprehensive and in-depth study on sustainable urbanism in the Gulf. We offer this book to all parties interested in forwarding sustainable urbanism and working towards the development of friendly cities. We thank Harvard University for the great effort to sponsor this book, which covered eight countries and 10 cities bordering the coastal zone of the Gulf: Qatar, Saudi Arabia, Oman, Iran, Iraq, and Afghanistan.

Qatar Charity impalements largest relief intervention for Sudan’s flood victims

Qatar Charity (QC) carried out the largest relief intervention to benefit those affected by the torrential rains and floods in Sennar State, Sudan, providing shelter and food aid to the victims.

The field teams of Qatar Charity managed to reach out to the affected, using ferries and boats after the land roads were cut off due to the rains, torrents and floods that hit Sudan badly. Al-Mahi thanked the leadership and people of Qatar for contributing to easing the plight of those affected by the floods, praising the efforts made by Qatar Charity.

Hussein Karmash, director of Qatar Charity’s Sudan office, said that the convoy comes within the framework of supporting those affected by the torrential rains and floods as part of the "Peace for Sudan". He revealed that 1,200 food baskets, 2,400 blankets and 300 tents were provided for the affected during the first phase.

The leaderships of the affected areas in Sudan welcomed relief interventions carried out by Qatar Charity. Qatar Charity had earlier sent hundreds of tons of food and shelter aid to Sudan. The fifth plane will arrive in Khartoum within the next two days, along with a ship carrying nearly 330 tons of food aid for those affected by the flood, which will arrive in Port Sudan soon.

Qatar Charity marks World Teachers’ Day to support educators’ efforts

Qatar Charity (QC) marked the World Teachers’ Day to celebrate teachers with the theme “Teachers: Leading in crisis, reimagining the future”, focusing on the works of the educators.

The day, which is held annually on October 5, comes in light of unprecedented challenges posed by the coronavirus pandemic that altered usual boundaries of the education sector and shifted the use of the digital tools by the teachers.

During the coronavirus pandemic, the teachers are playing a significant role in remotely providing education to children worldwide, shaping the future and profession of education at the same time.

Under these circumstances, Qatar Charity has already launched ‘Noon’, a distance-teaching, training and empowering platform, to meet the cultural, educational and social needs of society in this time of adversity.

A distance course was offered to remotely teach the Holy Qur’an and the phonetic rules of Qur’anic recitation, in cooperation with qualified teachers.

As Qatar Charity attaches significant attention to the education sector, it works on creating an appropriate environment for teachers to help them carry out their duties in various schools they supervise.

In the field of education, Qatar Charity works in more than 30 countries across Africa, Asia and Europe. It also cooperates with the governments of those countries to achieve sustainable development goals. Furthermore, it works on establishing and furnishing educational institutions, training teachers and providing books and bags to eligible students.

Some 31,000 pupils of more than six countries benefited from Qatar Charity’s education projects implemented last year at a cost of QAR14mn.

Two months since Beirut blast, angry Lebanese mourn dead

D uring a minute’s pause held near what remains of Beirut’s port, some Beirutians were reduced to tears as they marked the second anniversary of the August 4 explosion that killed over 200 people and injured over 6,500, causing huge economic damage and widespread destruction.

Two months since Beirut’s port exploded, killing 207 people and injuring thousands, Lebanon’s political class has failed to implement reforms to tackle corruption and mismanagement that led to the tragedy.

The anniversary of the blast has been marked with a moment of silence at 4:30pm, the time when the explosion struck on August 4, 2020.

SafwaSaadwa’s mother, who died at the work at the port, ‘was like a father to me’, she said.

How could God forgive them, she asked. ‘How could God forgive them and the second with 24 others prepare to release white balloons to commemorate the second month since the explosion which killed 207 people and injured over 6,500’.

The explosion on August 4, 2020, destroyed much of Beirut’s port, damaged nearby neighbourhoods, and killed at least 207 people, while more than 6,500 were injured.

The blast, one of the world’s largest爆炸 ever, was caused by 2,750 tons of ammonium nitrate stored illegally at the port.

Lebanese authorities have released the names of 10,000 of those who died, while other senior officials also say that during negotiations, local communities were not consulted by military and civilian officials.

Yemeni return home after ‘mercy flight’ to Jordan

Y emeni children, who were among 2,200 residents who were evacuated from a residential area threatened by conflict in the northwestern city of al-Raymah, have arrived in Jordan on a Jordanian government-chartered plane.

The UN organized two evacuation flights to Amman in February, the first carrying 700 children and the second with 1,500 others.

“Children, parents and theirouniversals have experienced difficulties and uncertainties, but we are happy to see that our children are safe,” a Jordanian government official said.

The children, who are all from the same families, arrived at the airport in the central Jordanian city of Amman, where they were welcomed by Jordanian authorities and relatives.

The evacuation flights were organized as part of a joint effort between the Jordanian government and the United Nations to provide humanitarian assistance to vulnerable communities affected by the conflict in Yemen.

The conflict in Yemen, which began in 2015, has led to a devastating humanitarian crisis, with millions of people facing food insecurity and a cholera outbreak.

The evacuation flights were funded by the Jordanian government and supported by the United Nations.

The children were transported to Jordan for medical treatment and education, with the aim of providing them with a safe environment.

The Jordanian government has been working closely with the United Nations to ensure the safe and smooth evacuation of vulnerable populations from Yemen.

The children will be provided with food, clothing, and medical assistance, and will be encouraged to continue their education.

The Jordanian government has been working closely with international organizations to ensure that the evacuation flights are successful and that the children are provided with the necessary support.

Yemenis say the flights are a positive step towards ending the conflict, which has caused immense suffering and displacement in the country.

The flights are also seen as a sign of hope for a country that has been in conflict for years and has seen little progress towards a peaceful resolution.

The Jordanian government has praised the United Nations for its efforts in organizing the evacuation flights, and has emphasized the importance of international cooperation in addressing the humanitarian crisis in Yemen.
France, Italy step up rescue bid after floods

President Donald Trump's COVID-19 condition improving, say doctors

The government last week told migrants they must leave the country after as much as 60 centimetres of rain fell in 24 hours in the worst-affected areas. Italy confirmed two people died and 11 remained missing after five people were swept away when a flash flood hit a mountain village.

Migrants seeking to enter Britain were also killed or injured as their homes were destroyed or scavenged. More than 1,600 people were rescued on Monday.

A police officer walks amongst vehicles submerged in mud in Breil-sur-Roya, south-eastern France.

President Johnson said during an interview after the vote that a new trade deal in place but they need to understand that we’re still going to be in the same relationship and the same problems that we had in the past.

Trump tested positive for the coronavirus on Friday morning, and that his live condition is improving, Dr Brian Garibaldi said.

Doctors said the president was in intensive care on Oct. 2, but he left the hospital and was isolated elsewhere in the White House that day.

PM doesn't want no-deal Brexit 'but can live with it'

President Johnson’s office said there was no change in the UK’s position. Even if Britain were to enter into talks, it would not mean that the UK and EU would reach an agreement on issues like the Irish backstop.

Johnson said during an interview that he believes Britain could live with a no-deal Brexit, even if it means leaving the EU without a deal.

**India seeks up to 500mn Covid vaccine doses by July**

India hopes to ramp up from about 30mn doses of coronavirus vaccines administered so far to over 400mn doses this month, government officials said yesterday, as infections in the world's second-worst affected country showed signs of easing.

The country has already reported 5.3mn cases of Covid-19, including 250,000 people who have died, according to official figures.

India has set up committees to assess the feasibility of introducing several doses of the vaccine. However, all vaccines that have been approved by the country's drug regulator need to be approved by health regulators in the United Kingdom, US and other countries before being adopted for Covid-19 vaccination.

India has been working with several vaccine manufacturers to assess the feasibility of introducing several doses of the vaccine. However, all vaccines that have been approved by the country's drug regulator need to be approved by health regulators in the United Kingdom, US and other countries before being adopted for Covid-19 vaccination.

Global warming, melting of ice sheets and rising sea levels are interlinked and regularly appear in news from time to time. The fear is that Greenland’s ice sheet, which contains enough water to raise global sea levels by 248 ft, is melting at a much faster rate than expected, as pointed out by a new study, published in the journal Nature.

Over the last 29 years, melt water from Greenland has raised sea levels by 0.4 inches. It is currently the world’s biggest contributor to sea level rise. An ice sheet is a mass of glacial land ice extending more than 60,000 sq km. The new ice sheet on Earth today covers most of Greenland and Antarctica. During the last ice age, ice sheets also covered much of North America and Scandinavia.

Together, the Antarctic and Greenland ice sheets contain more than 90% of the freshwater ice on Earth. The Antarctic Ice Sheet extends almost 14m sq km, roughly the area of the contiguous United States and Mexico combined. The Antarctic Ice Sheet contains 30mn cubic km of ice. The Greenland Ice Sheet extends about 1.7m sq km, covering roughly 79% of the surface of the country, and is the second largest ice body in the world, covering roughly 79% of the surface of the country.

The Greenland Ice Sheet extends about 1.7m sq km, covering roughly 79% of the surface of the country, and is the second largest ice body in the world, covering roughly 79% of the surface of the country. The Greenland Ice Sheet is the world’s biggest contributor to sea level rise. An ice sheet has raised sea levels by 0.4 inches, and it is currently the world’s biggest contributor to sea level rise.

### Sea level rise is likely to exceed 3ft by the end of this century if emissions are not reigned in

Antarctica holds enough water to raise sea levels by about 100ft, and scientists have recently discovered alarming vulnerabilities in some of its most important glaciers. A report last year from the Intergovernmental Panel on Climate Change warned that sea level rise is likely to exceed 3ft by the end of the century if greenhouse gas emissions are not reigned in. Another recent study estimates that rising global sea levels will be about 2.5m higher by 2100 than they are today, due to the melting of the Greenland and Antarctic ice sheets. During the last ice age, the world’s average sea level was about 120m lower than today, relative to land.

### Global warming: Greenland’s melting ice raising concern

The rate of melting of glaciers is accelerating. Global warming is melting glaciers faster than ever before. Some 13 years later, it is now time to learn about the latest news on this topic. This is why I decided to write this letter to you, Mr. President, to inform you about the latest findings on this topic.

My time in Qatar has been one of the happiest and most rewarding in my professional career. I have been working in Qatar for the past 3 years, and I have been extremely happy with my work. Besides this, I have also been working as a consultant for a number of companies in Qatar. I have been working in Qatar for the past 3 years, and I have been extremely happy with my work. Imran sounds warning on Covid-19 wave in winter

The prime minister of Pakistan, Imran Khan, has warned of a “strong” second wave of the coronavirus pandemic that is expected to hit the country in winter.

In a televised address to the nation on Monday, Khan said that the government had “done its best” to prevent the spread of the virus, but that it was now time to take “precautionary measures” to protect the country from a second wave.

Khan said that the government had already taken steps to control the spread of the virus, including the closure of schools and universities, the imposition of lockdowns, and the implementation of a nationwide vaccination programme.

“Let’s all work together to overcome this challenge,” Khan said.

The prime minister also called on the people of Pakistan to continue to follow the guidelines of the country’s health officials, and to stay home as much as possible.

Khan’s warning comes as the country continues to grapple with a third wave of the virus, which has seen a sharp increase in cases in recent weeks.

As of Tuesday, the country had recorded 1,098,095 cases of Covid-19 and 22,288 deaths.

Seven suspected drug dealers held

Seven drug suspects were arrested when police stopped a bike on a street in Islamabad on Saturday.

Police stopped the bike on the I-8 road while they were carrying out random checks.

A man named Jahangir was killed and another man named Muhammad Ahmed was arrested.

Police recovered a licensed pistol and a mobile phone from the bike.

Jahangir was a resident of the Koral police station and worked as a shopkeeper.

The police also recovered a mobile phone from the suspect.

The suspect was shifted to the I-8 police station for further investigation.

Medical college closes girls’ hostel over coronavirus cases

A medical college in Islamabad has closed its girls’ hostel after three students tested positive for the coronavirus.

The college administration said that the students had been quarantined and that the rest of the hostel had been sealed.

The college had previously reopened its hostels after months of closure due to the pandemic.

The closure of the girls’ hostel comes as the country grapples with a third wave of the virus, which has seen a sharp increase in cases in recent weeks.

As of Tuesday, the country had recorded 1,098,095 cases of Covid-19 and 22,288 deaths.

Further, F-7/2 college has also been sealed as four students from the college tested positive for the virus.

The college administration said that all the students of the college had been screened for the coronavirus and that the college had been closed as a precautionary measure.

The college administration also said that the students had been quarantined and that the rest of the hostel had been sealed.

The college had previously reopened its hostels after months of closure due to the pandemic.

A 24-hour festival of international arts and culture that was held this weekend in Paris, inspired by traditional rug patterns, such as the Persian, North African, or Turkish, created a Persian carpet as a giant living rug on the floor of the natural and human heritage. Inspired by Qatari flora and fauna as well as traditional patterns, a Persian carpet was created with new animation techniques by Bonjour Interactive Lab. The installation comprises patterns of plants and flowers growing interactively as the visitor walks on the carpet.

A motion-activated Persian carpet was designed by Qatari artist Ghada al-Khater, in collaboration with French artist of Cité Internationale Jardin de Lumière, to form the central portion of the Nuit Blanche Lumière art installation, which was created for the Qatar-France 2020 Year of Culture, as part of the Qatar-France 2020 Year of Cultural Exchange, as part of the Nuit Blanche Paris festival. The installation reimagines a Persian carpet as a giant living carpet, where cells can grow as if they were in the body of a living organism. It celebrates the growth of organisms and makes reference to a familiar proverb that formed a significant part of Ilja HIGHNESS the animal health. The installation of Ghada Khater, which was held at Nuit Blanche in Paris, is part of the Qatar-France Lumière collaboration, which celebrates the long-standing friendship between both nations and enables us to showcase local talents beyond the borders of Qatar.

The hawksbill turtle was returned to the sea at Al Ghariya beach. Al-Khater, a Virginia Commonwealth University graduate student, showcased her installation, the Natural Reserves of Qatar’s Ministry of Municipalities and Environment’s (MME) beach. The installation comprises patterns of plants and flowers growing interactively as the visitor walks on the carpet. The installation is created with new animation techniques by Bonjour Interactive Lab.
