Sheikha Moza opens WISH 2020 summit, salutes health workers

From Page 1

‘Covid-19 is not beaten yet. Our strategy remains one of vigilance and focused action tempered by a controlled return to normality, while keeping our people safe. We await, with the rest of the world, the development of a safe, effective vaccine. ’

HE the Minister of Public Health Dr Hanan Mohamed Al-Kuwari yesterday said Qatar’s response to Covid-19 had been ‘more than successful’. Speaking at the opening session of the World Innovation Summit for Health (WISH) 2020, the minister said a key factor in Qatar’s success in its number of universal healthcare coverage, pointing out that in nearly all of its measures, the government, irrespective of nationality or social condition, and that all patients received the same high standard of care. At the continuous held under the theme of ‘One World One Health’ and the main theme ‘Every death is a tragedy, but we are fortunate that our cases, in global terms, remain low. This stands as testimony to the sentiment and commitment of our doctors and nurses and the entire healthcare workforce. This is also testament of our healthcare workforce to keep us safe, ’ she said.

HMC wins top award for Covid response

HMC has worked alongside its healthcare partners, including the Ministry of Public Health and Primary Health Care Corporation, and played a central role in the nation’s response to protect population, embrace every patient, and ensure a safe patient journey. Our comprehensive strategy to combat Covid-19 has successfully suppressed the spread of the virus and maintained Qatar’s low Covid-19 mortality rates in the region. As the global-first in outpatient care, HMC has maintained continuous expansion across its network of outpatient facilities and hospitals while limiting the number of new intensive care beds. The safety and care of patients in all of HMC’s hospitals in Education City and Lusail, were designated as dedicated Covid-19 treatment facilities as part of a strategy that allowed HMC to ensure the right care was available at the right time and place.

The award also recognized the measures put in place by HMC to ensure the safe continuation of services to patients with non-Covid-19 conditions, which included the introduction of virtual and telemedicine services, managing outpatient consultations, urgent and emergency care, and mental health.

The Gold Initiative's Awareness Campaign, under the theme of "At Home for Safety", was introduced to keep all citizens who work from home informed. It encourages all Qataris to stay home and communicate effectively with Qatar’s population throughout the pandemic by providing daily health and safety updates that are backed by scientific and medical evidence, with the aim of flattening the curve and limiting the spread of the virus.

HMC is the main provider of secondary and tertiary healthcare in Qatar.
Ooredoo has announced the launch of an innovative new programme, built on the most advanced personalized digital customer experience that will revolve around monthly plans and mobile services in Qatar.

The new service, aptly named “Shahry Me” (Shahry, meaning “family” in Arabic), is developed together with the National Centre for Human Rights (NHRC), the Qatar Genome Programme, at Qatar Foundation, and experts at a panel discussion on precision medicine for the last five years. It is the way for precision medicine, “he said.

“The launch of this tool is the culmination of various programmes and research,” said Dr Said Ismail, director-general of the Qatar Genome Programme, at the panel discussion.

“With a lot of time and effort, this tool is developed to provide data and use it for the service of precision medicine,” he said.

“What is the right time to launch it, this is when we have achieved and progressed over the last five years. It is the right time to have this tool in place and ready for the service of precision medicine,” Ismail said.

In his speech, Zainab al-Mahmoud, professor of human rights policy at the Institute of Trayon and飞吻, director of Healthcare Research and Policy at UQ, said: “This will basically show the patients that this can impact their life or save their life.”

There is also a broader understanding of precision giants resulting in more effective treatments – particularly for lung and breast cancer.

There is a significant increase of patients who have taken medical advice from a specialist. The panel also included Dr Victor Dzau, president of the US National Academy of Sciences, and Dr Sheikh Chouchane, professor at Weill Cornell Medical College.

The report, sponsored by Qatar Foundation, discusses the promise of precision medicine, including integrating genomics, personal genomics, and health information technology, into existing healthcare systems.

“When we look at the policy briefs that we have drafted, we want to develop guidelines. It is reasonable to develop new policy for all educational stages, using various means, including brochures, colouring books, short films,” he said.

Dr. JIBER, professor of human rights policy at the Institute of Trayon and飞吻, director of Healthcare Research and Policy at UQ, said: “This is a step forward towards achieving our ultimate goal, and we're sure this is the right move, so we're going to work on this.”

The report hints that perhaps the biggest challenge will be developing a workforce a palette of clinicians delivering precision based on their own individual needs.

“Much has been said about precision medicine generating savings, and there is also evidence.”

MG offers ‘best-in-region’ manufacturer’s warranty on all its cars across ME

MG’s new seven-year/200,000km manufacturer warranty gives customers the peace of mind that their vehicles will have the best possible care. The warranty, which is consistent with the demands placed on the car by the Middle East’s 2020 Car of the Year – the MG ZS EV, will benefit from the brand’s first all-electric model, as well as the MG RX8 SUV. The warranty is transferable, and includes the ‘Battery and Drive Unit’-specific warranty of six years/200,000km (whichever comes first). It is available on all models, including the Middle East’s 2020 Car of the Year – the MG ZS EV – and the brand’s first all-electric model, as well as the MG RX8 SUV.

T he Ayal Film Festival, proposed by the Doha Film Institute (DFI), will be offering film lovers a six-day-long film experience with an eclectic array of screenings of the first hybrid edition of Ayal, and audiences can enjoy screenings in a safe environment with the current global situation.

Left: A film poster shows the story of teenage climate activist Greta Thunberg.

Below: An Ayal poster features the image of a young man with a caption that reads, "Why are we still watching while the climate is dying?"

The new approach is far less invasive and carrying less risk of complications or negative outcomes. The technique is less expensive, as it does not require an overnight stay in a hospital, and the recovery time is much shorter, usually within a week. The patients are discharged the same day, which is significantly better than the four to six days usually required for open reconstructions.

A total of 105 students and those sponsored by QC were honoured at the ceremony.

QC honours Qatar School's top students in Albania

U nder the patronage of the Dita emirate of Albania, the capital of Albania, the 10th international students of the Qatar School as well as those who have graduated from there; honored them at the end of the semester at the end of the semester.

The ceremony was held in the presence of the Dita emirate and the president of the Qatar School, Al-Khulili, and the minister of education and higher education, and the president of the College of Arts and Sciences, professors, educators, and students.

During the ceremony, 24 male and female students of the Qatar School were honored, and those who graduated in the past years were also honored in the presence of the Dita emirate, the president of the Qatar School, and other dignitaries. The ceremony included presentations of certificates and medals to the honored students.

The pass rate of the Qatari students in the School of Medicine in 2019-2020 was about 75%, which is significantly higher than the average in the country. The School of Medicine has a high pass rate due to its excellent curriculum and the level of teaching provided.

The ceremony was attended by dignitaries, including the minister of education and higher education, the minister of health and higher education, and other officials.

Ambulance efficiency, traffic safety awareness among students highlighted

The telephone response times for accidents in less than five seconds, while the arrival time of ambulances at the site of the accident is less than eight minutes inside the city of Doha and less than 13 minutes outside, is a concern health officials and those responsible confirmed.

Sheikh Dr Mohamed bin Ha- mad Al-Thani, the director of the Public Health Department at the Ministry of Public Health (MoPH), made the observation while speaking on the country’s work in the field of road safety in which Qatar commemorates the World Day of Remembrance for Road Traffic Victims yesterday.

The World Day of Remembrance for Road Traffic Victims is observed every November 25, in order to remember those who were killed or injured in road accidents last year, as determined through which Qatar commemorates the World Day of Rememberance for Road Traffic Victims yesterday.

For his part, NTSC secretary Brigadier Mohamed Abdallah Al-Sayed said that since the formation of the committee, the committee has planned the issue of traffic safety as part of the National Road Safety Strategy - an ambitious strategy aimed at reducing the death rate to six per 100,000 people in 2019, when Qatar launched its traffic safety strategy, the corresponding rate was 9.3.

He emphasized that these figures indicate the great progress made Qatar in achieving road safety, despite the efforts exerted by all parties.

Meanwhile, Public Health Department Director Sheikh Dr Mohamed bin Ali Al-Sadd stressed that theNTSC and head of the team to follow up on the implementation of the National Road Safety Strategy and the efforts of the Ministry of Interior, Ministry of Commerce and Industry, and the General Authority of Customs to improve road safety have achieved great progress and success in reducing the number of deaths in road accidents.

He added that the committee has implemented traffic safety strategies, and that co-ordination has been made with the NTSC to transmit to teachers’ awareness, raising awareness of students, employees and parents. For the past year, during the month of April, the month of traffic safety, the NTSC and the general authority of customs signed an MoU on strengthening and improving the road safety strategies, and the Ministry of Interior, Ministry of Commerce and Industry, and the General Authority of Customs signed a Memorandum of Understanding between the two sides on the project to improve road safety and reduce the number of people killed and injured on the road.

He noted that the countries that have implemented measures to improve road safety have achieved great progress and suc- cess in reducing the number of deaths and injuries resulting from these accidents.

He noted that the countries that have implemented measures to improve road safety have achieved great progress and suc- cess in reducing the number of deaths and injuries resulting from these accidents.

For his part, NTSC secretary Brigadier Mohamed Abdallah Al-Sayed said that since the formation of the committee, the committee has planned the issue of traffic safety as part of the National Road Safety Strategy - an ambitious strategy aimed at reducing the death rate to six per 100,000 people in 2019, when Qatar launched its traffic safety strategy, the corresponding rate was 9.3.

He emphasized that these figures indicate the great progress made Qatar in achieving road safety, despite the efforts exerted by all parties.

Meanwhile, Public Health Department Director Sheikh Dr Mohamed bin Ali Al-Sadd stressed that theNTSC and head of the team to follow up on the implementation of the National Road Safety Strategy and the efforts of the Ministry of Interior, Ministry of Commerce and Industry, and the General Authority of Customs to improve road safety have achieved great progress and success in reducing the number of deaths in road accidents.

He added that the committee has implemented traffic safety strategies, and that co-ordination has been made with the NTSC to transmit to teachers’ awareness, raising awareness of students, employees and parents. For the past year, during the month of April, the month of traffic safety, the NTSC and the general authority of customs signed an MoU on strengthening and improving the road safety strategies, and the Ministry of Interior, Ministry of Commerce and Industry, and the General Authority of Customs signed a Memorandum of Understanding between the two sides on the project to improve road safety and reduce the number of people killed and injured on the road.

He noted that the countries that have implemented measures to improve road safety have achieved great progress and suc- cess in reducing the number of deaths and injuries resulting from these accidents.

Tigray region claims rocket strikes on Eritrea airport

**AFP**

The Tigray People's Liberation Front (TPLF) said on Thursday it had launched rocket attacks on the Eritrea airport, in what Eritrea said was the first time the region had been targeted by TPLF.

Eritrea greeted the attacks as an attempt by TPLF to divert the international community’s attention from the ongoing conflict in the region, which has not been claimed by any group.

Prime Minister Abiy Ahmed last week ordered the TPLF to stop the attacks on Eritrea, giving the group until Sunday night to withdraw from the border region.

The TPLF has denied the attack.

A statement from the TPLF’s military information office said the attacks were part of a plan to “halt” the flow of weapons and other supplies to the TPLF from the Eritrean government.

The TPLF said the attacks were in response to what it described as “false and baseless” claims by Eritrea that it was supporting the TPLF.

Eritrea had previously accused the TPLF of attacking its forces in the region, prompting the TPLF to respond with its own attacks.

The TPLF has been fighting to overthrow the government of Eritrea, which it says has committed human rights abuses.

The TPLF said it had launched the attacks with the “approval and support of the local population” in the region.

Eritrea has accused the TPLF of attacking its forces in the region, but the TPLF has denied the attacks.

The TPLF has accused Eritrea of supporting the TPLF’s rivals in the region, but Eritrea has denied the accusations.

The TPLF has also accused Eritrea of supporting the TPLF’s rivals in the region, but Eritrea has denied the accusations.

The killing of a rare white moose has shocked residents of a southern Ontario community and prompted one First Nation man to offer a reward to anyone who can help officials apprehend the suspected poacher.

Residents around the city of Thunder Bay have long heard stories of a ghostly white moose population occasionally moving silently through forests of aspen and pine.

Now, the tale is becoming reality as a living, breathing, white moose was found dead over the weekend near a remote service road.

“Ghost moose” is out and real. Why would you shoot it? It is a rare moose, a beautiful animal, “ said Flying Post columnist, Don Meek.

Meek describes the moose as unique, including one with said: “There is no evidence that the moose was hunted on private land. It was found on a public land./n

The remains, including its head, were left undisturbed after it was found. The Department of Natural Resources is investigating the incident, and the Ontario Society for the Prevention of Cruelty to Animals (OSPCA) is working to get samples of the moose.

The moose’s coat was not injured, and it appeared to have been shot at a close range.

“I was just driving through the area and I saw a white moose walking on the road,” said Meek.

To preserve the moose’s remains, Meek intends to drive to the site and collect samples of the moose before it is removed.

“Everybody is outraged and upset,” Meek said.

More cases of Covid-19 curbs to come: Italian study

The government has warned there will be further restrictions to prevent the spread of the disease.

**EUROPE**

By Samuel Cross

More than a thousand Belgians have been arrested as the country battles a second wave of infections.

President Emmanuel Macron has announced a new ban on gatherings and protests.

He said the number of Covid-19 cases in France was growing "at an unacceptable rate".

Reform

The reform would see the country's territorial units changed into 16 regions.

The changes would also see the number of regions reduced from 22 to 11.

**Azerbaijan extends deadline for Armenia to withdraw from disputed region**

Azerbaijan has extended the deadline for Armenia to withdraw from a disputed region in Nagorno-Karabakh.

The deadline had been set for November 25 following an appeal from Armenia and mediation efforts.

The new deadline will allow for the withdrawal of Armenian forces from the disputed region.

The extension of the deadline follows a decision by Azerbaijan to extend the deadline for Armenia to withdraw from the disputed region.

The extension of the deadline is intended to allow for further negotiations and mediation efforts.

**Bulgaria to block EU access talks**

Bulgarian Prime Minister Boyko Borisov has announced that his country will not participate in accession talks with the European Union.

The decision comes after Bulgaria withdrew its candidacy for the European Union's pre-accession program.

The move is seen as a response to the EU's failure to address Bulgaria's concerns on EU structural funds and rule of law.

**Moldovan vote yields mixed results**

The Moldovan presidential election has yielded mixed results.

Sandu, a former prosecutor, has won the election with 52% of the vote.

The result is seen as a victory for the opposition and a setback for President Igor Dodon.

**Moldova plans to host exhibition commemorating Marie Antoinette**

Moldova has announced plans to host an exhibition commemorating Marie Antoinette.

The exhibition will mark the 250th anniversary of her death and is set to take place in Chisinau.

The exhibition will feature items belonging to the queen, including her shoes and a white shoe made of silk.

It will also feature items belonging to other members of the royal family.

Unmasking the reality of poorly done masking

Face mask has become the new normal across the world, as part of the preventive and precautionary measures against Covid. The US Centers for Disease Control and Prevention (CDC) wearing a mask correctly is one of the most effective protective measures against respiratory droplets, it protects you as well. The basic requirement is to two weeks, or until reuse is impossible at a time, presented to the public prior to the imminent threat. A recent study found that two types of cloth masks to be the least effective in some of its findings, “in addition to level of filtration, we have to pay attention to fit,” Allen continued. “You want the mask going over the bridge of the nose, below the chin and on the face, not around the neck. You want your breath going through the filter media and not escaping out the sides.” Cloth masks with higher thread counts seem to be an excellent choice, according to the new guidance from the CDC. Lead researcher Joseph Gardner Allen of the Buildings programme at the Harvard T.H. Chan School of Public Health. Stay away from bandanas and gaiter masks. Buildings programme at the Harvard T.H. Chan School of Public Health. Stay away from bandanas and gaiter masks.

Tunisian president keen on enhancing Qatar ties

Tunisian President Kais Saied during his interview with Qatar News Agency.

Even the most protective mask will fail if you wear it wrong. Full face coverage is necessary at all times

The CDC says that polypropylene, one of the most commonly produced plastic in the world, may “enhance filtering effectiveness” because it is a pleated carbide – or in simple terms, static cling. That electrical static traps both your outgoing respiration and any droplets heading your way from others. Because cotton is a more comfortable fabric on the skin, polypropylene is often used as filters that can be placed inside of a two- or three-ply mask. Though washing kills the electrical charge, a brisk rub between the filter media and not escaping out the sides.” Cloth masks with higher thread counts seem to be an excellent choice, according to the new guidance from the CDC. Lead researcher Joseph Gardner Allen of the Buildings programme at the Harvard T.H. Chan School of Public Health. Stay away from bandanas and gaiter masks. Buildings programme at the Harvard T.H. **Pak rupee takes flight as US dollar falls to 8-month low**

**Interviews**

The exchange rate yesterday further strengthened on the ongoing week of gloom taking against US dollar. The rupee has remained slightly above 81-Rs US dollar. However, the experts opined that the exchange rate is not much stabilized.

"The rupee improved after elections in the United States (US) as the experts fear internationally," said Malik Faisal, President, Pakistan Forex Association (PFA).

Among other international currencies, the Euro was traded at Rs157.17 on October 12 when I have stocked it on Rs158.00 on November 19. Similarly, the British pound was traded at Rs160.19 on October 12 which rose to Rs162.19 on November 19. The German mark was traded at Rs159 on October 12 and rose to Rs161 on November 19.

During the week, dollar prices increased high currency’s surplus in the open market. As per rupee exchange portions, they are securing US million rupees in both the market. The rupee exchange portions are demanding a good profit by increasing the prices in both the markets. However, the experts predicted a further increase in the market.

The market is not seeing a strong profit on the rupee exchange portions. There is high demand in the open market. Some parties are not paying for the rupee exchange portions due to the heavy losses.

Currency dealers said that on average, the rupee price per day by 40 paisa is being sold in the open market by Pakistanis.

"The rupee has improved after the US elections as the United States President is the main source of the rupee," said Malik Faisal.

**Voters defy cold to turn up at GB polls**

**Interviews**

Voting began at 8am and continued until 7pm without any interval. Polling in most constituencies was顺利 during the day. In Gilgit-Baltistan, all polling stations were closed.

**Marriage hall owners reject SOPs**

Kachki Marriage Hall Owners Association submitted its new SOPs to the National Command and Operation Center (NCOC) regarding marriage halls, which are violating the NCOC’s rules.

"The NCOC’s main purpose was to protect the health of those who are engaged in marriage halls," said a representative of the Kachki Marriage Hall Owners Association.

The price hike for filling vacant posts in various departments, which has been felt across Pakistan, has revealed that price hike has been increased.

The forum stressed the need for filling vacant posts in various departments. Notably, the forum also stressed the need for providing relief to the marriage hall owners.

**Tribal districts to have 15 colleges**

Chief Minister of the northwest Khyber Pakhtunkhwa province Buzdar Khan yesterday dir- ected the higher education depart- ment to prepare a comprehensive study for setting up 15 colleges in the tribal districts.

Regarding the overall develop- ment of the tribal district, it was stated that development of the tribal district has been reflected in the Annual In- vestment Programme (AIP) for Khyber Pakhtunkhwa.

The tribals will be able to get benefit from the AIP in the tribal districts. The meeting was held at the Khyber Pakhtunkhwa Assembly.

The meeting was also updated about the role of newly elected leaders in the tribal district and full-fledged universities in Central Kurram.
His Highness the Amir Sheikh Tamim bin Hamad al-Thani and Tunisian President Kais Saied held an official talks session at the Amiri Diwan yesterday. At the outset of the session, the Amir greeted the Tunisian president and the accompanying delegation, praising the depth of the two countries' relations. President Saied was accorded an official reception ceremony on his arrival at the Amiri Diwan.

Qatar-Tunisia ties all set to flourish: envoy

The relationship between the leadership and the people of Qatar and Tunisia have become a model for brotherhood and co-operation regionally and internationally, Qatar's ambassador to Tunisia, Saad Nasser al-Hamidi, told the local Arabic daily Alrayah.

In an interview to coincide with the ongoing visit of Tunisia President Kais Saied to Doha, the envoy described Qatar as an important partner and a strategic ally of Tunisia. His Highness the Amir Sheikh Tamim bin Hamad (TH) had visited Tunisia at the beginning of this year, he recalled.

Ambassador al-Hamidi pointed out that the two leaderships agreed to improve the coordination of the partnership between the two countries, and that this would open new joint projects in the health and agricultural sectors, followed by financial ones.

"The Qatar Fund for Development will implement a project to build an $82mn children's hospital in the city of Manouba in Tunisia, in addition to important projects in the field of infrastructure and economic empowerment as part of a $250mn plan. The fund provided important investments also to finance new projects for youth, and the number of beneficiares reached 39,000 between direct and indirect jobs."

The ambassador affirmed that important agreements will be signed during the next meeting of the Joint High Committee, noting that Qatar is the largest Arab investor in Tunisia, and the second largest strategic economic partner with $10bn direct investments.

Tunisians are keen to deepen the Qatari-Tunisian relationship, which derives its legitimacy from history, religion, culture and language.

On successful Qatari investments, the envoy cited Qatari Diar's Anantara Tozeur Resort project, which opened in south Tunisia in December 2019, as an example.

"Qatari investments in Tunisia are continuing and will witness a remarkable increase in the future," al-Hamidi added.
