Qatar to hold Shura Council elections in October next

Elections will take place in accordance with the Constitution on which a referendum was held in 2003 and promulgated in 2004.

T he Shura Council election will be held in October next year, His Highness the Amir Sheikh Tamim bin Hamad al-Thani announced yesterday.

He was speaking after inaugurating the 49th ordinary session of the Shura Council at the Council’s headquarters. The Prime Minister and Minister of Defence, Abdullah al-Thani, also attended the ceremony.

His Highness the Amir reiterated his call for nationals to participate in the polls actively.

The preliminary results showed that Qatar’s health system has proven its reliability in dealing with the pandemic. The accuracy of our resilience in the economic facilities affected by the negative effects of low oil and gas prices on the general state has also taken urgent and necessary measures to mitigate.

The preliminary results showed that the budget deficit during the first half of this year limited to QR1.5bn, although deficit projections for 2020 were much higher. This was achieved by concentrating spending on health, education and infrastructure projects continues as planned.

Low oil and gas price have not been able to dent Qatar’s development plans.

A series of opinion polls showed a Democratic nominee for Biden leading President Donald Trump in US elections. A New York Times/ Siena College poll showed Biden ahead in Pennsylvania, Florida, Michigan, and Arizona, the states that Trump carried in 2016. A CNN poll showed Biden up in Arizona, Michigan and North Carolina, also states Trump won in 2016.

US elections officials and media organizations that usually call states on election night, such as Fox News, have stressed that the outcome of the election will not be clear by midnight on Tuesday. That would not be unusual — the count has gone past midnight in three of the last four elections, in 2000, 2004 and 2016.

**Qatar Chamber supports nation’s economic diversification strategy**

The Qatar Chamber of Commerce and Industry (QCCI) has called for a comprehensive and sustainable strategy to support economic diversification and localisation efforts.

In his speech, QCCI President H.E. Sheikh Khalid bin Mohamed Al Thani said that Qatar Chamber supports this move, and it is working closely with the Ministry of Economy and Commerce to encourage businesses to enter into new projects and investment sectors that contribute to economic diversification and localization of products, as well as the establishment of industrial projects that depend on modern technology.

He added: “Qatar Chamber stands firmly behind the government’s efforts to ensure the stability of the local economy and its ability to withstand shocks. The Chamber is working to support the private sector in its efforts to diversify its production and endeavors to strengthen the country’s economy. The Chamber is also working to support the private sector in identifying new investment opportunities and providing the necessary support to overcome any challenges.”

He also emphasized the importance of diversifying the private sector’s production to ensure the sustainability of the local economy and its ability to withstand shocks. The Chamber is working to support the private sector in identifying new investment opportunities and providing the necessary support to overcome any challenges.

Ooredoo’s Nojoom offer on mortgage finance with QIB

O oreedoo has teamed up with Qatar Islamic Bank (QIB) to offer Nojoom members a great deal when they take mortgage finance with the bank. QIB has launched new mortgage deals and, as part of this launch, the bank is offering Nojoom members thousands of QR points on top of the other preferential benefits. Members will get 10,000 QR points for every QQR1 million of mortgage finance taken, as well as QIB benefits, including cashback, instant approval, interest-free property valuation, and flexible repayment options. Members should inform the bank staff that they are a Nojoom member and provide the mobile number registered under their QIB and Nojoom accounts.

The QIB aims to add value to its customers’ loyalty and to bring them closer to the bank through its innovative, flexible mortgage deals. The bank will then process the applicants in accordance with standard finance procedures. Ooredoo public relations director Tahab Khalaf Al-Kuwari said: “We’re delighted to be partnering with the QIB with this exciting offer. We’re committed to rewarding our valued customers for their loyalty, and this promotion is one of our biggest in recent months,” he added.

“Ooredoo knows our customers’ priorities and is always looking for ways to help them. We aim to have the most competitive rates starting from 4.5% APR, for every QQR500,000 of mortgage finance along with the awesome deals and, to celebrate, the bank is offering thousands of QIB QR points on top of the other preferential benefits,” added Al-Kuwari.

LuLu Qatar showing ‘true leadership’ in sustainability

LuLu Qatar has released its commitment to sustainability in an effort to ensure harmonious coexistence and sustainable development. It is working to improve its operations, selecting cartons and paper products that are generated and segregated and sold by the mill for use in LuLu's eco-friendly store. The initiative aims to reduce carbon emissions and contribute to reducing carbon emissions and food waste.

Dr Ali Al-Hammadi, LuLu Qatar's Donor Relations chief, said: “LuLu Qatar has a long history of selecting cartons and paper products that are generated and segregated and sold by LuLu to help in the construction of eco-friendly stores. This will be a real and lasting step to reducing carbon emissions and food waste. As part of our commitment to Qatar National Vision 2030, we have been working actively to ensure that our operations are sustainable and in line with the national vision. LuLu Qatar is committed to sustainable development and will continue to strive for excellence in this area. We are proud to announce our latest initiative to reduce carbon emissions and food waste.”

Other demonstrable sustainability measures taken by LuLu Qatar include:

- Reducing the planet-friendly food options at LuLu, including coffee and juice dispensers.
- Channelling the planet-friendly products at LuLu, including coffee and juice dispensers.
- Introducing a ‘borrowing’ system to encourage customers to take reusable bags from LuLu’s outlets.
- Setting in place a policy to ensure that products are disposed of properly and used.
- Designing new buildings for superior energy efficiency in mind and shifting to LEDS from conventional lights. This strategy also includes the introduction of energy-efficient refrigeration systems and battery banks.
- Filling cafes about water at LuLu.
- Working with LuLu’s local area to incorporate parking in LuLu to encourage and facilitate customers.
- Introducing an innovation in an eco-friendly process to minimize waste by breaking it down into water for use in new material and function, which are then generated and reprocessed.
- Current staff is being trained in the use of various waste recycling tools.

LuLu Qatar’s commitment to the environment is part of its broader strategy of supporting the community, customers and the planet. LuLu Qatar is committed to continue its efforts to reduce carbon emissions and food waste.

Qatar Charity installs, operates flour mill in northern Syria

Qatar Charity has installed and inaugurated a flour mill in northern Syria with support from Qatar Environment and Wildlife Fund (QSWF), aiming to provide flour for 70,000 displaced people in the area. The flour mill is a joint project with the United Nations Food and Agriculture Organization (FAO) and its local partner, the Syria food company Al-Masraa. The flour mill is located in the city of Marea, which is home to around 150,000 displaced people. The flour produced by the mill will be distributed to the displaced people in the area, where it will be distributed to the displaced people. The flour produced by the mill will be distributed to the displaced people in the area, where it will be distributed to the displaced people.
Workshop discusses challenges workers face in contracting sector

The Ministry of Administrative Development, Labour and Social Affairs (MADLSA), recently issued a guide for the Labour Re-employment Platform. The guide is available in Arabic and English, provides detailed information on how to use the electronic platform, which was launched in cooperation with MADLSA, to help companies obtain appropriate employment to ensure the continuity of projects and businesses in the local market.

The guide contains a detailed explanation on the required procedures and steps needed to successfully register online on the platform. It offers information about the registration for companies looking for new employment, as well as guidelines on how to identify the candidates’ resumes.

The guide also includes an explanation of the registration procedures for candidates. The guide can be found on Qatar Chamber’s website and the chamber’s social media channels. The electronic platform uses a simple interface to help companies easily find skilled laborers and shortlisted candidates. The platform also enables candidates to follow the new platform’s progress and benefit from its services.

The website is designed to facilitate the process of registering companies and benefit from the services provided. The platform was developed and updated by Qatar Chamber to facilitate the registration of companies.

The workshop in progress.

The workshop discussed the importance of preserving the rights of workers’ communication and identifying their problems, a mechanism followed in the interest of the employer, enhanced economic and secure workers, which guarantees care and provides their due rights in addition to ensuring occupational health and safety. Qatar has set up the Labour Dispute Resolution Committee with the aim of improving access to justice by resolving labor disputes within three weeks of submission of a complaint by a migrant worker, besides providing a hotline for complaints.

Qatar takes part in meeting of GCC anti-corruption agencies

Qatar participated in the 10th meeting of the Committee of GCC anti-corruption agencies, which was attended by the GCC anti-corruption agencies and represented by His Excellency the Secretary General of the GCC. The meeting took place in Doha, on Wednesday, November 4, 2020.

The meeting was attended by the Second Secretary General of AIDC, Mr. Khalid Al-Sadder, and the Secretary General of the Anti-Corruption and Transnational Crime Agency, Mr. Ahmed Al-Mahmoud. The meeting was chaired by His Excellency the Secretary General of the GCC, Mr. Ahmed bin Mohamed Al-Mahmoud.

The meeting discussed various issues related to anti-corruption, including the adoption of the second and fifth regional guidelines on preventing money laundering and combating the financing of terrorism, which were presented by H.E. Mr. Al-Mahmoud, the Secretary General of AIDC.

The meeting also discussed the need for cooperation between the GCC anti-corruption agencies to address any challenges that may arise in the fight against corruption.

SARATTO INTRODUCES A NEW EVERYDAY TWIST TO ITS ICONIC HAPPy COLLECTION

A new chapter in the SARATTO collection with a joyful twist is here. The Mini Happy collection perfectly reflects summer and contemporary chic, set with sparkling diamants and inspired by the sisterhood of joy that women can experience in a joyful way from day to evening. Beautifully crafted in 18K gold, the Mini Happy collection follows the trend by paying tribute to those feats diamond rings never fail to exalt, cut, and create. Comfortable and soft to wear in its subtle beauty, the Mini Happy collection is the perfect everyday diamond jewelry that you will never want to wear away.

Professionally masterfully designed, the collection is available in these golds, and a range of designs mark designs depending on your personality and character.
**CCO launches 2 BA courses in project, HR management**

The Community College of Qatar (CCO) has announced the launch of two new bachelor’s degree programmes: Bachelor in Project Management and Bachelor in Human Resources Management (HRM) from Fall 2022-2023.

The new bachelor’s degree programmes are the first bachelor’s level degree programme in PM and HRM offered by a higher education institution in Qatar, and are part of the Qatar Higher Education Programmes (QHEP) and the Ministry of Education and Higher Education’s joint effort to upskill Qatari professionals in key fields.

The new addition to CCO’s degree portfolio is a response to Qatar’s ambitions to develop a sustainable knowledge economy. With many opportunities to advance the Qatari knowledge economy becoming necessary to manage projects, especially those of high-tech enterprises, the new programmes will help attract more investments and job opportunities.

When developing the study plans and courses for these programmes, CCO has been working on over 25000 students over the past 10 years to examine the vital role that CCO plays in developing the nation’s workforce, and in support of Qatar’s vision to become a knowledge-based economy.

The new academic programmes will contribute to Qatar’s human resource development and providing them with up-to-date knowledge that will help them lead the future.

The new academic programmes – 2 study plans, with a total of 120 credits each – are offered to Qatar’s national cadres in project management and human resource management, among others.

The ‘Community College of Qatar’ has been working on over 25000 students over the past 10 years to examine the vital role that CCO plays in developing the nation’s workforce, and in support of Qatar’s vision to become a knowledge-based economy.

**NKU-Q professor publishes new books on journalism**

T he final episode of Season 12 of Star’s science talent show ‘Malaeb’ airs this Saturday, Wednesday, November 4, 20208, after the competition reaches its climax.

The finale will see the three finalists pitched against each other; you are provided with the public’s voting and the jury’s decisions for the best project of Season 12, which will award the three finalists a QR 100000 cash prize and a dinner with Abdulaziz Al-Mulla, CEO of Qatar Telecom.

The co-hosts recognise that the finale has come as the result of months of hard work from the contestants, with each one being judged on their skills and knowledge to achieve the goals of Qatar National Vision 2030. They emphasise that the signing of the agreement by Qatar Telecom, which Lugo-Ocando says “is a step forward in the 21st century’s digital communications,” will provide the necessary support for the competition to achieve its objectives and benefit the public, industry and the country.

**HBKU’s college launches Covid-19 policy tracker**

The College of Public Policy (CPP) at Hamad Bin Khalifa University (HBKU) has launched Q-Policy Tracker, a Covid-19 policy tracker under the Qatar National Research Fund under the Qatar National Council for Science and Technology. The tool will provide policy makers and government scholars with real-time insight and tracking of the responses to Covid-19, providing policymakers, academics, and the public with vital information to support decision-making and formulate policy in the region.

The new tool will monitor, analyse, and report the policies and measures implemented in the region to control the spread of the virus and protect the community. The data is presented in a manner that can be used by researchers, policymakers, and citizens to better understand the actions taken by governments to contain the virus and improve the public’s opinion and promote the country’s efforts to control the spread of the virus.

**MoCI partnership with GU-Q aims to support community development**

The Ministry of Culture and Industry (MoCI) has signed an MoU with the Gulf University for Qatar (GU-Q) to support the development of community development programmes ever since the reorganisation of the MoCI in 2009. The framework aims to ensure that the community development programmes will continue to co-ordinate and co-operate in various fields related to social and economic research, research, strategic development and training.

The MoU was signed by Tariq Hussain al-Khalaf, Director General of the Ministry of Culture and Industry (MoCI), in co-operation with Patrick O’Malony, CEO of National University of Ireland (Biological Sciences), which Lugo-Ocando says “is a step forward in the 21st century’s digital communications,” will provide the necessary support for the competition to achieve its objectives and benefit the public, industry and the country.

The new academic programmes – 2 study plans, with a total of 120 credits each – are offered to Qatar’s national cadres in project management and human resource management, among others.

By working with the University of Ireland, the new academic programmes will be developed with the necessary expertise and research in the field of education.

The MoU aims to enhance the collaboration between the two bodies to provide the necessary support for the development of community development programmes and to benefit from the university’s academic programmes, faculties and strategic studies.

Under the MoU, both parties agree to cooperate in various fields of social research and economic research and strategic studies in accordance with the ministry’s agenda and the University’s agenda. This agreement will contribute to the continued development and training of the MoCI’s workforce. The MoU was signed by Tariq Hussain al-Khalaf, director of the ministry’s Human Resources Department; Abdulaziz Al-Mulla, CEO of Qatar Telecom; and Patrick O’Malony, CEO of National University of Ireland (Biological Sciences), which Lugo-Ocando says “is a step forward in the 21st century’s digital communications,” will provide the necessary support for the competition to achieve its objectives and benefit the public, industry and the country.

The MoU aims to enhance the collaboration between the two bodies to provide the necessary support for the development of community development programmes and to benefit from the university’s academic programmes, faculties and strategic studies.

**Violators warned**

Qatar’s Commercial and Consumer Affairs Authority (MoCI) has launched a recall campaign of Honda Civic 2015 models in Qatar, which Lugo-Ocando says “is a step forward in the 21st century’s digital communications,” will provide the necessary support for the competition to achieve its objectives and benefit the public, industry and the country.

The recall campaign comes within the context of the MoCI’s initiatives and projects to enhance the quality of products and services, and to benefit from the university’s academic programmes, faculties and strategic studies.

**GU-Q research forum explores history of Islam’s holiest cities**

By Jeyo Ayuk

The National Museum of Qatar (NMoQ) has announced the winners of its book publication competition, which was launched earlier this year. The competition was open to students from across Doha and the wider region, and the world around the topic of the First Islamic Empire, Islamic Architecture, and the Indian Ocean basin (2022) published by Oxford University Press.

On October 12, the Ministry of Municipality and Environment’s (MME) Public Relations Department announced the winners of the Best Book Writing (2020-2022) award, in cooperation with Al Jazeera Without Borders Foundation. PME students who won the award, 12 first-year students, included two international students and two Kuwaiti students. The award recognizes the best book writing in the government and two institutions. The winners were:

1. Alaa Muntasir
2. Abdulaziz Al-Saleh
3. Fatimah Al-Khalaf
4. Noura Al-Masri
5. Hamza Al-Abbasi
6. Mohammad Al-Rawi
7. Mohammad Al-Ameen
8. Fahad Al-Omran
9. Majed Al-Hasan
10. Fahad Al-Abbasi
11. Abdullah Al-Abbasi
12. Faridah Al-Abbasi

The Indian Ocean Book Writing Group (IOWG) research initiative at Qatar Foundation-partner Georgetown University in Qatar (GU-Q) organised a two-hour research forum on Thursday. The forum gathered together scholars from across Doha and the wider region to discuss their research on the topic of the First Islamic Empire, Islamic Architecture, and the Indian Ocean basin. The forum was held at the National Museum of Qatar's auditorium and was moderated by Dr Karen port, a vetran researcher in the field of museums, by Dr Karen port. The forum was attended by about 50 scholars and researchers.

"The book provides a unique look into the lives of people who were part of a system that was built around the idea of a holy city," said Dr Karen port.

"This book also provides an insight into the architecture and the urban planning of the city of Mecca," she added.

"The book highlights the importance of the city of Mecca in the Islamic world, and its impact on the development of other cities in the region."

Dozens feared drowned in boat capsize

The European Union (EU) said yesterday it would make an urgent new appeal for emergency funding to help migrants trying to reach Europe by boat, after scores were feared drowned in the latest such incident.

The EU’s Migration Commissioner, Dimitris Avramopoulos, said a new appeal was needed to meet the rising number of people attempting to reach Europe by sea. 

He said that more than 2,600 Ivorian refugees had arrived in Liberia yesterday following the filing of two mass applications in connection with the weekend protest in Abidjan.

UNHCR calls on Ivorian political and opinion leaders to refrain from instigating acts of violence against people based on ethnic grounds.

The UNHCR is monitoring the situation and has alerted its international network in the region.

Ivory Coast opposition declares parallel government

Uganda’s police said robbers had ransacked a police station in the north of the country yesterday following the fatal shooting of a policeman in the area, sparking protests.

Police spokesman Erasto Mubiru told AFP that the police station in Munyonyo, a mainly residential area in the capital Kampala, had been “ransacked”.

“Some of our police officers have been injured and some of our police equipment have been lost,” he said.

Robbers also ransacked a police station in the town of Kikyusa in Western Uganda, where two policemen were injured in the attack.

The causes of the attacks are not yet clear, but police said they were investigating.

The police officer, identified as Simon, was killed in the attack.

Ivory Coast opposition leader Guillaume Soro launched plans to announce a parallel government in the country yesterday.

Soro, who is the country’s former vice president, said that he would announce a “legitimate government” in the country.

He said he would announce a parallel government in the country.

A Leading opposition politician in Tanzania, Chama Cha Mapinduzi (CCM) member of parliament (MP) Freeman Mbowe, has been arrested.

Mbowe was arrested this morning on Monday (November 4, 2019) at his home in the capital city, Dar es Salaam.

The Tanzania Human Rights Commission (THRC) has called on the government to ensure that human rights are respected.

The THRC has also called on the government to ensure that all political prisoners are freed.

The arrest comes after Mbowe had been sentenced to four years in prison last month.

THRC Executive Director Emilian Benjamin said the arrest is a violation of Mbowe’s right to freedom of expression.

The arrest came after Mbowe had been sentenced to four years in prison last month.

North Korea has a large submarine fleet but only one known experimental submarine capable of carrying a ballistic missile. “One of the submarines being built by North Korea is capable of carrying a ballistic missile,” said Steven Marshall, Australia’s defense minister.

The comments come in the wake of reports earlier this year that the secretive state could soon deploy an operational missile submarine. "They have a lot of experience and expertise, " Marshall said. "The submarine’s weapons system could soon be deployed, " he said.

The submarine’s weapons system could soon be deployed, " he said.

But the US intelligence community has yet to confirm the reports. "We’re still very concerned about North Korea’s current nuclear proliferation capabilities, " said one US official.

Meanwhile, North Korea’s nuclear weapons program continues to advance, with the country firing a series of ballistic missiles in recent months. In July 2018, North Korea tested a medium-range missile that is capable of reaching the US. In August, the country fired two medium-range missiles, one of which hit Japan.

The submarine is being built at the country’s most powerful shipyard, the Korean People’s Army Shipyard in Pyongyang. "It is the country’s most advanced submarine, " said Kaufman, a former US navy admiral who served in the country during the Cold War.

California mayors plead for reopening theme parks

**WEATHER**

"Extremely dangerous" case nowrague

Hurricane Eta, one of the most destructive to hit Central America in years, struck a series of Caribbean countries early yesterday, rallying mayors who noted that Eta was deadlier in the region. The Febricaribbean Island nation of Grenada was the hardest hit. The French government's disaster management agency, Bfmdicp, said that 50 people died in the storms. The region was hit by the highest-ever recorded wind speeds, downing trees and power lines, and causing flooding. The situation was described as "extremely dangerous." New York Mayor Eric Garcetti condemned Eta, saying that hundreds of thousands for reopening theme parks. California mayors plead

Walmart to end experiment with robots in stores

Retail giant has pulled the plug on a programme to automate a series of stores. The company said that it would end its efforts to use robots in around 1,000 of its 4,700 US stores. But the company is planning to continue to use robots in around 1,000 of its 4,700 US stores. Walmart has pulled the plug on a programme to use robots to scan items in stores and help people pick up groceries, officials announced yesterday. The retail giant has pulled the plug on a programme to automate a series of stores. The company said that it would end its efforts to use robots in around 1,000 of its 4,700 US stores.

**Decision**

Peru’s Congress to retry President for impeachment

Peru’s Congress has voted to retry its ex-president, Martin Vizcarra, for alleged manipulation of election results. After he served a total of three terms, the Congress decided yesterday to retry his case. Vizcarra was governor of the Moquegua region in the wake of the pandemic, which dragged into commenting on a diplomatic conundrum. "We're not out of the woods yet," said a senior department of homeland security secretary, Chad Wolf, who oversees national security. "We're not out of the woods yet," Wolf told a press conference earlier yesterday.

**Verdict**

Man sentenced to 25 years for selling to churchgoers

A man has been sentenced to 25 years in prison by federal court in Louisiana. The man is a former pastor of a small church in Biloxi, Mississippi, who had confessed to selling indecent videos to children. He is the second pastor in recent years to be convicted of child sex crimes.

**Chances of contested vote have US allies on edge**

A US court decision to reject the vote of US allies makes landfall in Biloxi, Puerto Cabezas, Nicaragua, yesterday.

**Mysterious robocalls warn voters to stay at home**

...made landfall in Biloxi, Puerto Cabezas, Nicaragua, yesterday. Palm trees blow in the wind as Hurricane Eta makes landfall in Biloxi, Puerto Cabezas, Nicaragua, yesterday. National Hurricane Center said Eta is an "extremely dangerous" case nowrague. Nationals most restrictive tier. The situation was described as "extremely dangerous." The retail giant has pulled the plug on a programme to automate a series of stores. The company said that it would end its efforts to use robots in around 1,000 of its 4,700 US stores.

**Back to school**

Assessment: some states make more traditional threats in form of illegal robocalls. According to state and party officials, "Remember, sometimes tech- nology fails and it breaks," he said. "But those worries did not materialize as more Walmart's announcement came in an unexpected wave of early morning votes — too late to the 34 -states' time zone. He said that Walmart, which has a wealth of political and financial power, was "very nervous about the election." But worries did not materialize as Walmart's announcement came in an unexpected wave of early morning votes — too late to impact the election.

UK to test all Liverpool residents for coronavirus

**Reuters**

**Britain**

Britain will launch a Cov-19 testing scheme in the northeast of the country, where authorities plan to test everyone for coronavirus by the end of October, the government said on October 19. The scheme in the North of England will involve using mobile testing centers to perform tests on everyone, including those with symptoms and those without, in order to find a way to stop the spread of the virus. The government hopes to test 10,000 people per day in the region, which has seen a rise in cases. The scheme is expected to cost £10 million to set up and run. Prime Minister Boris Johnson announced the scheme during a visit to Wrexham, near Liverpool, where he said: “This is the largest-scale testing programme ever seen in Europe, and it is only going to get bigger.”

**UK fund cuts risk of severe threat to terrorism, security minister says**

Ministers have acted to prevent the UK from falling into a second national lockdown tomorrow, the government has said. But ministers have warned that the threat to the UK from all forms of terrorism remains, and that there is a risk of a further increase in the number of severe or even catastrophic attacks.

The government has introduced a range of measures to prevent the spread of the virus, including the introduction of a new tiered system of restrictions for England. This allows the government to vary the level of restrictions in different areas, depending on the level of transmission in those areas. The government has also announced plans to increase testing and contact tracing, and to introduce new measures to limit social gatherings.

**UK trade deal negotiations stall on fishing, Northern Irish beef**

The EU and the UK will continue to negotiate on the trade deal, but progress has stalled due to disagreements over fishing and Northern Irish beef.

The EU has set out its demands for a trade deal, including access to UK fishing grounds and the right to be able to export Northern Irish beef to the UK. The UK has rejected these demands, and has instead offered to negotiate a deal that would allow the EU to access UK fishing grounds and export Northern Irish beef to the UK.

The negotiations have been held up by the EU's refusal to accept the UK's offer of a trade deal that would allow the EU to access UK fishing grounds and export Northern Irish beef to the UK.

**EU, Britain fail to bridge gaps to secure trade deal**

The EU and the UK have failed to reach an agreement on a trade deal, with the sides remaining apart on the issue of fishing and Northern Irish beef.

The EU has set out its demands for a trade deal, including access to UK fishing grounds and the right to be able to export Northern Irish beef to the UK. The UK has rejected these demands, and has instead offered to negotiate a deal that would allow the EU to access UK fishing grounds and export Northern Irish beef to the UK.

The negotiations have been held up by the EU's refusal to accept the UK's offer of a trade deal that would allow the EU to access UK fishing grounds and export Northern Irish beef to the UK.

**UK virus curbs 85,000 out of work**

The government has estimated that around 100,000 UK workers will be temporarily laid off due to the new lockdown measures. The estimate was based on data from the London and Northern Ireland regional job centres.

The government has also announced plans to increase testing and contact tracing, and to introduce new measures to limit social gatherings. The government has also announced plans to increase testing and contact tracing, and to introduce new measures to limit social gatherings.
Europe’s coronavirus case load exceeds 1 mm

The number of confirmed cases worldwide crossed 1 million this week as the number of deaths approached 50,000.

The milestone comes as the first countries begin lifting their lockdowns to try to strike a balance between saving lives and maintaining economic activity.

But there are warnings that the worst of the pandemic is still to come, even as some European countries ease restrictions to allow people to return to work.

The World Health Organization has said that the number of new cases worldwide is expected to peak in the coming weeks as lockdowns are lifted and testing ramps up.

In Europe, many countries are starting to ease lockdowns and restrictions, with some allowing people to return to work and others allowing businesses to reopen.

However, there are concerns that this could lead to a second wave of infections.

The European Union has warned that countries need to be careful as they ease restrictions and that they should continue to monitor the situation closely.

The EU has also urged countries to share information about new cases and to work together to combat the virus.

In other news, the number of confirmed cases in the United States has surpassed 1 million, according to data from Johns Hopkins University.

The US has the highest number of confirmed cases in the world, followed by Brazil and India.

The number of cases in the US has more than doubled in the past week, with the country reporting more than 10,000 new cases per day.

The number of deaths in the US has also surpassed 60,000, with more than 1,200 new deaths reported in the past 24 hours.

The US has been slow to respond to the pandemic, with some states reopening businesses before the outbreak was brought under control.

This has led to concerns about a second wave of infections, with some experts predicting that the US could see as many as 500,000 new cases per day in the fall.

The WHO has also warned that countries need to be prepared for a possible second wave of infections, and that they should continue to take measures to control the spread of the virus.

The WHO has advised countries to continue to monitor the situation closely, and to be ready to implement further measures if needed.
Kerala CPM in matters; future of Kerala, Kodiyeri hangs in balance

The party may be forced to re-configure its group of at least one-and-a-half to suit the two senior leaders, as both have health issues and have finished a few rounds of treatment in the last one year. It means the third phase of elections will not do much good.

The CPM certainly knows that if it happens, it would be more harmful than good, as it could well be accepting the hard facts on the ground by its leaders in the state and would mean their careers could be finished off.

When it comes to a shock for the CPM the situation is even worse. The two senior leaders, Vijayan and Kodiyeri, the chief minister and the general secretary, will not be able to appear in the rear on their seats.

As it is, the CPM fared well in the recent elections in two-and-a-half months, but the party also has some serious problems.

Will fulfill all aspirations of Bihar if voted to power: PM

T he election commission said the third phase of elections in Bihar will start from March 5 and will continue till March 10.

Prime Minister Narendra Modi today appealed to the people of Bihar to vote for NDA under his leadership and said, “If you vote for me, I will fulfill all your aspirations.”

In an election day address from Aligarh, PM Modi said, “Now, from 2021 to 2030, it is time to fulfill more aspirations of 5 million Hindus. I want to announce that we will conduct Phase 3 of trials and will deliver to the world a safe and fully effective vaccine.”

Bihar, with its fourth highest level of COVID-19 infection, has the third and final phase of trials in the state.

“Phase 3 trials will be conducted in the worst-affected parts of the state, where reports of COVID-19 are maximum,” said the Prime Minister.

Meanwhile, the CPM is ready for the third phase of elections in the state, “The CPM is ready to contest the election in the coming days,” said state secretary Ramesh Chennithala.

Covaxin seen to be safe in early trials: official

A poster of Democratic vice-presidential candidate Kamala Harris is displayed along with Democratic presidential candidate Joe Biden and his son in Tamil Nadu. It is facing allegations of wrongdoings.

But Heichert, which has recently reached approval candidate Phase 1/2a clinical trial from India’s first indigenous candidate vaccine Covaxin, says it has been involved in the safety of vaccine development in Phase 1/2a. He said it is the first time to do a trial design, we take into account the safety of the vaccine, which has been shown to be fully effective.

“The Phase 1/2a trials will be conducted in the worst-affected parts of the state, where reports of COVID-19 are maximum,” said the Prime Minister.

Meanwhile, the CPM is ready for the third phase of elections in the state, “The CPM is ready to contest the election in the coming days,” said state secretary Ramesh Chennithala.

Amir commends Shura Council’s local, global efforts

The Big Tech, despite its overarching global reach, is facing tough times amid the ongoing traffic jam, both for the users and regulators.

The rise of technology superpowers like Microsoft, Amazon, Apple, Facebook, and Google has created new challenges for policymakers and regulators, who enforce antitrust laws around the world.

More so in the European Union, the most aggressive and expansive in terms of antitrust enforcement, than in the US.

The EU has spent two decades targeting the tech giants. A long and drawn-out Microsoft was followed by record-breaking fines for Google of more than 8 billion euros.

It’s currently grappling with antitrust investigations going into Amazon and Apple as well as an ever-steadily growing Facebook. Determined to end a trend, a new set of unwieldy legislation meant to regulate the growth of the smartphone market, the US has now lifted its ban on Chinese tech companies.

Data compiled by Bloomberg shows the Big Five—Alphabet Inc’s Google has more than $200 billion in market value, more than all the next nine largest tech companies combined.

In the US, the Justice Department and the Federal Trade Commission, among others, have a long list of antitrust investigations.

Some of these investigations have already been decided, like in the case of Facebook’s acquisition of Instagram and WhatsApp.

For example, the Competition and Markets Authority in the UK has ordered Facebook to sell Instagram and WhatsApp, and the US Department of Justice has filed a lawsuit to block the acquisition of Twitter and Snapchat.

On the other hand, the European Commission has approved the acquisition of TikTok by Oracle, subject to certain conditions.

The investigation into Microsoft’s acquisition of LinkedIn is ongoing, and the EU has raised concerns about the potential implications for the market.

As a result, the costs of acquiring growth on the global level this year are at all-time high levels in the economic environment that may reach the levels of the global financial crisis of 2008.

It is estimated that an economic crisis could be a direct result of energy prices.

Accordingly, all gas-exporting countries have a direct stake in the global energy stability. It is the other hand, the US, EU, and others are working hard to ensure that the global energy market is stable and that gas prices do not become too high.

The preliminary results showed that the budget deficit during the first half of this year had reached 1.5 trillion euros, with the US government projecting a deficit of $1.9 trillion.

In the US, the Biden administration has proposed a $1.9 trillion stimulus package to boost the economy, while in Europe, the EU has approved a €1.8 trillion recovery fund to help member states recover from the pandemic.

Amir bin KhaltuN Al-Thani delvers his speech at the inauguration of the 47th ordinary session of the Shura Council

The preliminary results showed that the budget deficit during the first half of this year reached 1.9 trillion euros. However, despite deficit projections were much higher.

Chairman of the 49th Ordinary Session, Hamad bin Ahmad Al-Thani, addressed the session’s opening in the Shura Council, expressing his gratitude to the Council for their support and for their continued efforts to ensure the success of the session.

He said that the Shura Council is a cornerstone of democracy in Qatar, and its role is essential in ensuring that the country’s values and principles are upheld.

Amir bin KhaltuN Al-Thani, the Emir of Qatar, also addressed the session, underscoring the importance of the role of the Shura Council in the country’s development and progress.

He emphasized the need for the Council to continue to support the government’s efforts to achieve the country’s strategic goals, particularly in the areas of economic development, social welfare, and environmental sustainability.

Amir bin KhaltuN Al-Thani also highlighted the importance of the role of the Shura Council in promoting dialogue and understanding between the various segments of society.

He called on the Council to continue to engage with citizens and stakeholders to ensure that their voices are heard and that their concerns are addressed.

Amir bin KhaltuN Al-Thani also emphasized the importance of the role of the Shura Council in maintaining the country’s stability and security, and in ensuring that the country’s policies and programs are in line with the aspirations of the people.

He concluded his speech by expressing his confidence in the Shura Council’s ability to continue to serve the country and the people of Qatar effectively.

Amir bin KhaltuN Al-Thani’s remarks were met with a standing ovation from the Council members.

The 49th Ordinary Session of the Shura Council is scheduled to run until the end of August.
Amir commends Shura Council’s local, global efforts

From Page 19

There has also been a notable increase in establishing foreign companies and the volume of direct investment. In the field of environment, the country has embarked on a national agenda for sustainable development, with a focus on reducing carbon emissions and adopting renewable energy sources. In the health sector, Qatar has made significant progress in improving access to healthcare services and strengthening the healthcare system, including the rollout of COVID-19 vaccinations. In education, there has been a focus on expanding access to quality education and developing the human capital base. Overall, these developments reflect Qatar's commitment to sustainable development and its role as a global player in various international initiatives.

The late Amir will always be present in our hearts, and the voice of wisdom, the Speaker said, will continue to guide us. The unjust blockade that was imposed on Qatar by the Arab states in June 2017 was a major challenge, but thanks to the leadership of His Highness Sheikh Tamim bin Hamad Al-Thani, the country has succeeded in overcoming the blockade and maintaining its economic growth. The Speaker highlighted Qatar's efforts to enhance economic diversification and increase the volume of foreign companies and the volume of foreign direct investment, which has helped to diversify the sources of income and reduce the country's dependence on oil revenues. The Speaker underscored the need for continued efforts to strengthen the country's economic resilience and prepare for future challenges.

At the end of the current session of the Shura Council, the Amir Hamad bin Mohammad Al-Thani addressed the members, thanking them for their contributions and achievements. He expressed his appreciation for the Council's efforts to enhance the development of Qatar's various sectors, including education, health, and environment. The Amir also emphasized the need for continued dialogue and cooperation among all stakeholders to ensure the success of the country's development programs.

The Speaker added that the Council has been in the forefront of Qatar's efforts to enhance economic diversification and increase the volume of foreign companies and the volume of foreign direct investment, which has helped to diversify the sources of income and reduce the country's dependence on oil revenues. The Speaker underscored the need for continued efforts to strengthen the country's economic resilience and prepare for future challenges.

In conclusion, the Speaker wished the Council a fruitful legislative term, as you have always been a partner and loyal citizens of this country, as you have always supported the government and community. The Speaker concluded by emphasizing the importance of continued dialogue and cooperation among all stakeholders to ensure the success of the country's development programs.

The Speaker highlighted the Council's role in enhancing economic diversification and increasing the volume of foreign companies and the volume of foreign direct investment, which has helped to diversify the sources of income and reduce the country's dependence on oil revenues. The Speaker underscored the need for continued efforts to strengthen the country's economic resilience and prepare for future challenges.

The Speaker concluded by emphasizing the importance of continued dialogue and cooperation among all stakeholders to ensure the success of the country's development programs.
