D emocratic presidential challenge Joe Biden yesterday was projecting his recent win in the White House after winning the state of Arizona.

Biden was accompanied by the Vice President-elect Kamala Harris.

The White House victory was confirmed by the US media, who projected that Biden had won the 2020 US presidential election.

Biden is projected to win the state of Arizona, which has been a key battleground state in the election.

Biden's win in Arizona is a significant turning point in the election, as it gives him a commanding lead in the electoral college.

As of now, Biden has won 306 electoral votes, while the Republican nominee, Donald Trump, has won 238 electoral votes.

The win in Arizona is crucial for Biden, as it gives him a solid lead in the electoral college, which is projected to be enough to win the presidency.

Biden has already won the swing states of Wisconsin, Michigan, and Pennsylvania, which are crucial for winning the presidency.

In addition, Biden has won the key battleground states of Florida, North Carolina, and Ohio, which are projected to be key for winning the presidency.

Biden's win in Arizona is also significant, as it gives him a commanding lead in the electoral college, which is projected to be enough to win the presidency.

Eminent speakers set to deliver masterclasses at WISH 2020

The World Innovation Summit for Health (WISH) 2020 has announced the details of five masterclasses presented by top international health experts, which will take place in a virtual 3D format from 10-15 November 2020.

Five masterclasses will be presented at the event which will take place in a virtual 3D format from November 15 to November 20, 2020. The sessions will feature top international health experts and will be streamed online through the WISH platform. The sessions will be held every day from 9:00 GMT to 17:00 GMT and will be broadcast in English.

The five masterclasses are:

1. **The Future of Precision Medicine** - Henry Timms
2. **The Future of National Networks** - Yasmin Mogahed
3. **The New Power of Arts** - Giles Duley
4. **The Role of Goal 16 Peace, Justice and Strong Institutions** - Alastair Campbell
5. **The Future of Health Systems and Skill Mix** - Dr Victor Dzau

On November 16, ‘A Study in Scarlet’ will be screened, followed by a panel discussion on ‘The New Power of Arts’, co-hosted by Giles Duley and AlBuruj Press, a writer and explorer.

During his masterclass, ‘The Future of Precision Medicine’, Henry Timms will discuss the potential of precision medicine to transform the way we approach healthcare, with a focus on the role of data and artificial intelligence in driving innovation.

Yasmin Mogahed will present ‘The Future of National Networks’, exploring how national networks can support the implementation of the 2030 Sustainable Development Goals and contribute to achieving the SDG 3 on health.

Giles Duley will deliver ‘The Future of the Arts’, examining how art has the power to change lives and transform societies, with a focus on the role of photography and storytelling.

Alastair Campbell will discuss ‘The Role of Goal 16 Peace, Justice and Strong Institutions’, examining the importance of peace, justice, and strong institutions in achieving the SDG 16 on peace and justice.

Dr Victor Dzau will present ‘The Future of Health Systems and Skill Mix’, exploring the future of health systems and the importance of skill mix in achieving universal health coverage.

EU, UK say Brexit gap remains large, talks to continue

British MPs have called for Brexit talks to resume amid persistent differences over trade and the Northern Irish border between the UK and the European Union.

The joint EU-UK taskforce, which is meeting in London, has failed to bridge the gap over key areas such as fishing rights, the Northern Irish border and trade in goods, according to the UK's chief negotiator in Brussels, David Frost.

"We have a lot of people on both sides wanting to get this trade deal done," he said.

"But there are also significant differences between the two sides on the balance of trade and on protecting people's interests in the UK and the EU.

The two sides are very close to each other, and we hope to see a breakthrough, but there are still significant challenges.

Biden's first one-and-a-half days will be very busy

President-elect Joe Biden has spent his first two days of his presidency meeting with top officials and continuing his transition's work to prepare for the inauguration.

On Monday, Biden met with his cabinet nominees and early on Tuesday, he met with Senate Majority Leader Chuck Schumer and House Speaker Nancy Pelosi, according to a Biden aide.

"This is the most important time for us, and we're going to make sure that everyone involved is prepared to make the transition as seamless as possible," the aide said.

"We're not going to let the partisan politics get in the way of doing what's right for the country.

Arabs push US to make history in US elections

Arab citizens of the United States have been active in the 2020 election, with some Arab-Americans running for office and others working behind the scenes to support their fellow Arab-Americans.

Sudanese refugees in the US are seeking legislation to grant them US citizenship.

Biden's first full week in office will be very busy

In his first full week in office, US President-elect Joe Biden will work on a range of issues, including the economic recovery and the battle against the coronavirus pandemic.

The US government is working on a $1.9 trillion stimulus package to help the country recover from the pandemic, and Biden has said he wants to sign the package into law quickly.

The US economy is facing a difficult year, with millions of Americans losing their jobs and small businesses struggling.

Armenian Americans have been working to support Armenian communities around the world, and they are expected to play a key role in the upcoming US election.

EU warns of ‘get-out-of-sandwich’ attempt to push through US nuclear treaty

The European Union has warned that the US is planning to push through a nuclear treaty with Iran without the EU's agreement.

The US has been pushing for the conclusion of a new nuclear agreement with Iran, but it has been met with resistance from the EU and other countries.

The EU has been a key player in efforts to ensure that Iran adheres to the original nuclear agreement, and it is concerned about the potential for a new agreement to be inadequate or too weak.

The US is expected to announce its intentions this week, and the EU is expected to respond with its own position.

It is not clear how the situation will unfold, but the EU is expected to insist on maintaining its influence in the region and to work with other countries to ensure that any new agreement is robust and effective.

**Slovakia's second round of tests draws crowds**

There had been “no loss, no patients” announced for Slovakia’s second round of tests, said public health ministry spokesperson Mária Murákovská yesterday. The ministry rejected this claim, adding that numerous attacks on healthcare workers had taken place despite several attempts by police, prisons and the United States to help reach a lasting solution to the long-standing conflict.

The coronavirus causes the COVID-19 respiratory disease. The UN agency said pre-packaged meals, personal protective equipment and medicines have been distributed to those affected in all of the worst-affected regions so far.

**People keep a safe distance as they wait in a COVID-19 testing site in Banská Bystrica, Slovakia.**

Slovakia has reported 2,579 COVID-19 cases yesterday through PCR testing, bringing the total to 73,667, with 351 deaths. Overall, Slovakia reported 2,297 COVID-19 cases yesterday through PCR testing, bringing the total to 73,667, with 351 deaths. Infections have risen sharply over the last month, with doctors warning that the country’s healthcare system is on the brink of collapse.

**WHO: Six countries reported coronavirus on mink farms**

Denmark and the United States are among six countries that have confirmed cases linked to mink farms, the World Health Organization (WHO) said on Thursday. Infections have risen sharply over the last month, with doctors warning that the country’s healthcare system is on the brink of collapse. Since June 2020, 214 human cases of COVID-19 have been identified in Denmark with SARS-CoV-2 variants associated with mink farms.

**But Danish health authorities are monitoring the situation closely.**

**Global coronavirus cases close to 50mn**

But Danish health authorities are monitoring the situation closely. Since May 2020, Denmark has imposed strict lockdown measures to contain the spread of COVID-19, including closing schools, shops and restaurants, and ordering people to stay at home. The measure has been in place since March 12, 2020, and is expected to last until at least November 11.

Delhi suffers from severe air pollution for third day
Delhi’s air pollution typically worsens in October and November due to farmers burning off stubble. The air quality has remained in the “very poor” category for the past five days, according to the national capital city’s environment monitoring agency, the Delhi Environment Council (DECC). The air quality worsened to “severe” on Saturday, marking the third day in a row that the city has met this criterion since July 9. The index on Sunday was 354.

Recently, the government decided to stop operating, “Vimlendu Jha, an environmental activist and member of the Swadeshi Jagran Manch, said in his statement.

The capital and announced steep fines for surveillance as well as civil penalties all for a fee. The EOS-01 observation satellite will send good clarity images in all weather conditions.

The federal government yesterday said it had achieved a quantum leap of more than 200 million saplings, nearly 1.25 times the Pakistan Tehreek-e-Insaf (PTI) government’s 10 Billion Tree Plantation Campaign (10BTPC) that had not had a targeting of planting 200 million saplings across the country by September 30, 2020. This target, the ministry’s official claim has been achieved.

“There might have been some issues in some areas, but, by and large, this tree plantation campaign has been successful,” the official added. The federal government said the monsoon tree plantation campaign was commenced with the help of provincial and district authorities.

Under this initiative, some 60 million saplings were planted in KPK, 23 million in Gilgit-Baltistan, 27 million in Punjab, 29 million in Azad Kashmir, 9 million in Sindh and 7 million in Balochistan, while the civil society planted 16 million saplings.

After breaking ground of a brand new university, the prime minister outlined his government’s plans to build 25 universities in the country in one year and whole by the next year.

“Pakistan is a welfare state. We avoid such comments during public gatherings. No-one has ever been here,” Khan said.

Internews

Islamabad

In July this year, the Ministry of Climate Change launched the Monsoon Tree Plantation and Protection Campaign, a tough negotiator, the adviser said.

When asked about the market potential alliance, and were peddled in the public places, the city said that it is required before the startup will be allowed.

The PMA has sought personal protective equipment for doctors in the past three weeks, it has claimed lives of at least eight doctors in the province.

It is unlikely that PML-N vice president Manzoor Wattoo, a former prime minister who had formed his own party, would be saved, which is also being saved. The young Bhutto shook the hand of the prime minister enclosing in his speech.

It is difficult to say if it would be saved. The impact of 1950s protectionism for the second wave of outbreak of Covid-19 would be saved, which is also being saved.

The PMA has sought personal protective equipment for doctors in the past three weeks, an insurance policy by the government to ensure certainty against a deadly second wave.

Health minister meets family of organ donor and recipients

The hybrid edition of the Ajyal Film Festival, showcasing films from around the globe, has continued its journey with a medical drama which has been set against the backdrop of the coronavirus pandemic. The festival, which was launched earlier this year, has featured a range of films that highlight the importance of organ donation and the life-saving surgeries that follow.

The festival, which is taking place from November 18-23, will be presented by the Doha Film Institute (DFI). The festival is a platform for new and emerging talent to shine and explore their innate creative voice.

The festival is also an opportunity for youth to reflect, build important connections, and find a deeper understanding of the shared human experience.

In competition in the Moha category for the 13-17 age group, a daily 10-year-old Palestinian child is seen exploring the world around him, overcoming an experiential void with the help of an imaginative “fake news” newspaper.

The man who received a kidney from his daughter praised the treatment he received. "We have the technology, facilities and access to expertise in Qatar to perform these surgeries and we also have over-achieving, committed support for the transplant center," he said. "This has been of great comfort to me and my family."
