SIDRA MEDICINE

First Internet Exchange Point of Qatar launched

By Jerry Aguilera

T he first Internet Exchange Point in Qatar (QIXP), a state-

of-the-art facility that will allow local networks to connect

to the international network, was inaugurated yesterday.

QIXP aims to organise Internet users in the country to allow them to

achieve a higher level of access to digital content. According to the

plan, the Internet Exchange Points will be activated during 2012 by

using the data centres of telecom serv-

ice providers or any other technically

qualified partner, in order to facilitate the

internet connection for them.

The plan is to launch the first QIXP, which is a new achievement in

developing the essential components of Internet infrastructure in the

Information and Communications Technology (ICT) sector in Qatar, in

an attempt to further

Improve the country’s interna-

tional network readiness rankings and

to attract global content providers, in

addition to enabling the new genera-

tions for creativity in the digital con-

nect and to the growing digital infra-

data, thus contributing to achieving Qatar National Vision 2030

goals by providing worldwide content infra-

structure and information technologies

and a knowledge-based economy that

contributes to developing the nation’s

accomplishment of "the information

 revolution". In addition, the project

meets a key indicator point between inter-

net providers and digital content serv-

ice providers for exchanges of data and information.

US denies Talibian claim of downing jet

The US military has confirmed that one of its aircraft crashed in eastern Afghanistan but said it was not immediately clear if the aircraft was involved in the recent downing of a US aircraft in eastern Afghanistan. A Taliban spokesperson had claimed that the US aircraft had been shot down, and the group had released a photo of an American fighter jet. A US defence official, speaking on condition of anonymity, said that the aircraft had not been involved in any recent downing. The official added that no aircraft had crashed or fallen down.

Don’t trust ‘virus’ rumours: MoPH

The Ministry of Public Health (MoPH) has confirmed that “no cases of the China novel coronavirus have been detected in the country as yet, the ministry called upon the public not to worry, but to take any information not issued by trusted authorities. The MoPH will continue to keep the public updated, the statement added.”

Sunday, a top official at the MoPH as-

sed that Qatar has taken all precautions against the spread of the coronavirus and the situation is under control. Qatar has also been taking steps to prevent the spread of any suspicious case reported until now,” Dr Mohammed bin Abdulali Al-Sadi, director of the Public Health Department, MoPH, told the media.

GAC taking steps to simplify customs procedures: al-Jamal

HE the Chairman of The General Authority of Customs (GAC), Ahmed bin Abdullah al-Jamal has announced that the Authority is working to develop and simplify customs procedures and apply the latest regulations and international standards and practices.

Delivering a speech on the occasion of the International Customs Day (ICD), which falls on January 26 every year, HE al-Jamal said the Authority is also committed to continuously improving its operation with its partners and the public sector.

HE al-Jamal said the Authority is keen, through celebrating the International Customs Day, to stand with the Ministry of Finance Ali bin Abdullah al-Khalifa in support of economic development in the country.

He said that the Authority had contributed to supporting and enhancing the efforts of the National Committee to combat money laundering and terrorist financing, two main means of understanding, were signed between the GAC and the Qatar Red Crescent and the Ministry of Finance, the General Authority of Customs and the Qatar Red Crescent, and the electronic program was launched, where the instructions to the authorities provided by the World Bank's global supply chain, are recorded and transferred to the financial information unit through an electronic link between the two parties.

In the context of efforts to create an attractive investment environment, HE al-Jamal said that the Authority had contributed to supporting and strengthening the two countries, in addition to facilitating the expansion of goods transport by sea to the maximum possible extent, through international standards and customs entitlements to the countries through which the goods transported in this system are carried out.

He added that there are special working committees that coordinate their work with the relevant authorities, such as the Ministry of Finance, the Ministry of Commerce and Industry and the Ministry of Public Health once a year in this regard.

Sidra Medicine aims to improve care for women with new services

**By Joseph Varghese**

Sidra Medicine recently announced that it had opened a new women’s centre at its Al Ghanim Branch, offering patients a one-stop-shop for all their healthcare needs. The centre, which opened its doors on 17 December 2019, is part of Sidra Medicine’s ongoing efforts to improve care for women in Qatar.

The new centre offers a range of services, including gynaecology, obstetrics, and chronic care. It is equipped with state-of-the-art facilities and staffed by highly trained professionals. The centre is designed to provide a comfortable and welcoming environment for patients.

Dr. Aisha Yousuf, medical director of the Women’s Centre, said, “Sidra Medicine has proven itself as a pioneer in the field of women’s health care for the women of Qatar. Using our minimally invasive techniques such as advanced non-invasive prenatal screening tests, introduction of lactation services and IVF techniques among others.”

The centre’s services include pap tests, which check for cell abnormalities; gynaecology services; pap tests, which check for cell abnormalities; and IVF techniques, which help couples with the latest and minimally invasive infertility treatments.

Dr. Yousuf also said that the hospital is taking initiatives to enrich the business customers’ digital lives, best fixed and other digital services. The centre also offers a wide range of IVF services, including the latest and minimally invasive treatments aimed at improving the success rates of IVF procedures.

At the Division of Medicine, University of Edinburgh in northern London, the Centre for Maternal and Foetal Medicine (CMFM) is expanding its services and will be offering new services that will be launched in 2020 to support the advancement of women’s health in Qatar. The centre will offer the latest and minimally invasive treatments aimed at improving the success rates of IVF procedures.

Sidra Medicine is located on the Arabian Peninsula, close to the border with Saudi Arabia. The centre is equipped with state-of-the-art facilities and staffed by highly trained professionals. The centre is designed to provide a comfortable and welcoming environment for patients.

H
t the Chairmen of Qatar Civil Aviation Authority (QCAA) Abdullah bin Nasser Turki Al-Jahraiouni revealed that the civil aviation sector in Qatar has witnessed good developments in the last two years with many achievements, the most important of which is the country’s leading position in the field of aviation safety and security. "At this stage, it does not seem to be a bad era, which proved gulf-wise," he said. "Civil aviation is one of the most important sectors in the country’s economy and it plays a crucial role in facilitating the movement of people and goods, and connecting the country to the rest of the world."

Al-Jahraiouni added that the QCAA has prepared comprehensive development projects related to the Qatar Airways, increased aircraft numbers and modernizing the different sites and routes used in the aviation sector. "The QCAA has prepared a comprehensive plan to modernize and improve the management system of the civil aviation system," he said.

Recently announced that Qatar is among 48 states that have fully developed to comply with the regulations of the European Civil Aviation Safety Agency (EASA), which is considered the first body currently in the world in the relation to the aviation sector.

"The QCAA is working hard to ensure that all our aviation system, through which it verifies the compatibility of the programme (USOAP), record in the results of the safety oversight audit of civil aviation system.

Qatar Civil Aviation Authority has previously set a new record in the results of the safety oversight audit of civil aviation system according to the International Civil Aviation Organization (ICAO)."

ICAO has conducted an audit of the QCAA and its safety areas, through which it verified the compatibility of the’ country’s aviation standards with the standards established and standardised contained in the Convention on International Civil Aviation and its amends.

Qatar, says Dr Verjee, has precautions in place to prevent the virus being unwittingly carried into the country. "The authorities have been very quick to act and immediately deployed special thermal cameras at Hamad International Airport, which screen people for high body temperature upon arrival."

"As for measures that people can take, they should regularly wash their hands with some soap or for at least 20 seconds; not touch their eyes, nose, and mouth; and maintain a safe distance of at least one metre from people who are visibly sick and coughing or sneezing, as well as covering their own cough. And he says differentiating between potential signs of the virus and standard flu symptoms should be one of the main elements. "The flu symptoms are cold, cough, and fever. But the new virus, coronavirus, may present with symptoms of being sick in the early stages. It can spread much more easily than the flu."

Such symptoms may appear within two days or after acting in 14 days.

"Qatar Civil Aviation Authority has previously set a new record in the results of the safety oversight audit of civil aviation system according to the International Civil Aviation Organization (ICAO)."

ICAO has conducted an audit of the QCAA and its safety areas, through which it verified the compatibility of the’ country’s aviation standards with the standards established and standardised contained in the Convention on International Civil Aviation and its amends.

Qatar to chair 105th Session of Economic and Social Council
Qatar will chair the 105th session of Economic and Social Council on 20 March. The meeting will discuss the follow-up to the 10th Ministerial Conference of Economic and Social Council (ECOSOC) held in 2009. The chairmanship will be seen as an indicator of the country’s growing role in regional and international arenas.

The Ministry of Commerce and Industry, in co-operation with the Qatar Chamber, announce the recall of LOL Glamper Asst model of 2019 due to the recall of US Glamper Asst model of 2020 due to the risk of leakage of gas due to a manufacturing defect. The Recall of Glamper toy model involves the potential risk of injury to children from the recall of LOL Glamper Asst model of 2019 due to the recall of US Glamper Asst model of 2020 due to the risk of leakage of gas due to a manufacturing defect.

THUMBS UP
A Qatari man was praised for his quick thinking and actions in preventing a potential incident at a local airport. The man, identified as Ahmed Al-Naimi, noticed a bottle of water placed on a bench near the security check point and immediately reported it to the authorities. His quick action prevented potential harm to passengers and staff at the airport.

The man’s action demonstrates the importance of community involvement in maintaining safety and security at local airports. It also highlights the need for increased awareness among the public about potential security threats and the importance of reporting any suspicious activity to authorities.

A local community group is calling for more awareness campaigns to educate the public about potential security threats at local airports. They are also urging authorities to provide regular training to their staff on how to identify and respond to potential security threats.

QU hosts workshop on WMD agreements
A workshop was held on 22 March to discuss the implementation of the Biological Weapons Convention (BWC). The workshop, held under the patronage of HE al-Subaie, the Deputy Prime Minister and Minister of Defence, and the Qatar Civil Aviation Authority (QCAA), aimed to increase awareness about the importance of compliance with the BWC and the need to prevent the proliferation of biological weapons.

The workshop was attended by representatives from various countries and organizations, including the International Civil Aviation Organization (ICAO) and the United Nations Office for Disarmament Affairs. The participants discussed the role of international organizations in promoting compliance with the BWC and the importance of national efforts in this regard.

The QU president praised Qatar’s efforts to implement the BWC and its commitment to the peaceful use of atomic energy. He highlighted the country’s role in promoting non-proliferation and disarmament efforts and emphasized the need for continued efforts to prevent the proliferation of weapons of mass destruction.

The workshop concluded with a call for continued efforts to implement the BWC and prevent the proliferation of weapons of mass destruction. The participants emphasized the need for international cooperation and the importance of national efforts in this regard.

(book to boost physicians’ communication skills)

The doctors devised a new, comprehensive step-by-step approach to facilitate communication with patients while maintaining the coordination more systematically and effectively.

The campaign will now impact farms in Al Khuwair and Al Shamal municipalities.

He said these farms should be used only for the designated purpose of contributing to achieving food production in the country. In the light of the various challenges, the doctors are planning to hold a training camp where the conclusions of the initiatives against food speculation would be presented with training in which the steps of the campaign would be carried out targeting feeding farms and warehouse violations at undersized yards and places.

The MME Public Relations Department has been carrying out a programme under the name “MME Farm Forces”, which mobilizes the owners of farms across the country to call for the regulatory and administrative actions with the aim of using farms exclusively for agricultural production.
Marzooq Shamal Al Shamlan is today a leader in Qatar's business world. "This event is mainly organised to express gratitude to improving the quality of the key components of internet infrastructure and ensure provision of advanced, innovative and reliable local internet services. QIXP is a big milestone for Meeza and the country, which enables content owners such as Google, Amazon and the country, to contribute to achieving the goals of the Qatar National Vision 2030," Al-Mannai added.

The CRA, Al-Mannai added, ensures that the best international practices are applied to improve the internet infrastructure and nine provincial governments and national and international service providers. "The launch of QIXP confirms that we are taking natural steps towards contributing to the development of a knowledge-based society, because Internet exchange points reduce the cost of interconnection. Interested entities can submit an application to the Committee for consideration," he added.

Qatar's intralogistics need game-changing solutions like STILL says Jaidah Group

"Tonight is a celebration of 70 years of Marzooq Shamal Al Shamlan holding, professional excellence, innovative practices and leadership through vision, commitment and success," said Marzooq Tariq Al Shamlan, newly appointed Group Chairman. "Since the company's first days, international partnerships have been the foundation of the company's success story. The steady growth and diversification through the years earned the company recognition for its premium service and team's cross-cultural capability. "The success and achievements of MSSH are the result of the exceptional contribution of our employees, who, as we go by the group's most valuable asset. Looking ahead, we will keep up with the market development and grasp the opportunities arising with a focus on providing comprehensive and bespoke products and solutions, which will be the best fit to the fullest satisfaction." The evening featured awards and recognition for outstanding employees who were selected among the holding's different business units: Q-Tire and International Tire Center, International Construction, Ooredoo Qatar, Karcher Center Doha and Marzooq Shamal & Sons ( Crimes and Watch Center).

In addition, special awards and certificates were presented to staff members in acknowledgment of their five and 10 years of service. Marzooq al-Shamlan, MSSH is today the group's most valuable asset. "On behalf of the entire group, I wish to thank our employees for their hard work in the past year as well as to welcome the year ahead," said Al Shamlan.

Founded in the 1950s by the late Engineer Marzooq Shamal al-Shamlan, MSSH is today a leading multi-company enterprise in Qatar's trading sectors, through an extensive portfolio of well-known international business partners, making it a "pioneering business in its sector in Qatar," the statement added.

Tunisia's Ennahda rejects new government proposal

A coalition government structure distributed over the parliamentary seats of Ennahda, which has been part of other coalition parties, would not be constitutionally legal. It proposes a new government coalition which means that instead of taking it as the major political force, its role would be a role of participation in the government. But as an independent party, it holds a parliamentary base of its own.

Although, Ennahda, the majorly represented political party in the Tunisian political system, it does not have a majority government. Ennahda has 55 seats out of the 117 total seats, so it is a minority government. But as an independent party, it holds a parliamentary base of its own.

Thailand

**EU urges Myanmar to comply with ICJ ruling on Rohingya**

The European Union (EU) called on Myanmar on Tuesday to comply with the International Court of Justice (ICJ) ruling to implement provisions of the 1948 Genocide Convention in the Rohingya Muslim minority dispute. The EU took a crucial step towards acknowledging the country’s violations of human rights and the disproportionate use of force by Myanmar’s military and security forces. EU foreign policy chief Josep Borrell said in Brussels that the EU had noted the “serious violations of human rights and the military’s repeated use of disproportionate force” in Myanmar. He added that the military’s decision to deploy more troops to the state was a “serious concern.”

**Thailand**

**Bangladesh screening travellers from China**

Bangladesh authorities have tested all passengers arriving from China for the deadly novel coronavirus, with 120 people tested and 10 from China passengers found. The authorities have also ordered a review of all international flights to ensure the safety of passengers. The screening is being conducted at all international airports and seaports. The government has also urged all passengers to stay at home if they have been in contact with someone who has tested positive for the coronavirus.

Influential Aunt of Kim Jong-un makes first public appearance in six years

Kim Jong-un is facing a year of key external and domestic politics, as international and domestic relations remain strained and international sanctions persist against North Korea. The reappearance of his aunt, a North Korean media expert, has raised speculation about what it means for North Korea, Madrid said.

“Even if she does not have a political office or formal position in this regime, making a personal appearance like this is a public demonstration of support for her nephew,” he said. “It’s a strong expression of Kim family unity.”

Kim Jong-un’s repositioning of his influential aunt, who has been officially named, has been followed by reports of her travel to Spain, France, and Italy. The timing of her visit to Madrid is significant, as it comes just weeks after the annual NAM meeting in New York.

“Her visit to Madrid is seen as a gesture of support and solidarity towards the Spanish government, which has been a close ally of North Korea in recent years,” the post said.

That said, her sitting next to the man who ordered her husband’s execution, who is thought to have been killed in the wake of her husband’s assassination, is a stark reminder of the perils of being associated with the North Korean regime.

“Their relationship is complex and fraught with danger,” the post continued. “But their relationship is strong enough to keep her in the capital, and to keep her in the limelight.”

A security personnel uses an advanced thermos camera to scan a woman at a subway station entrance in Beijing yesterday. China says more than 2,800 infected; Hong Kong bars visitors from worst-hit province; Crisis of city officials mounts on social media; Virus has spread to more than 10 countries including US, Japan

China’s President Li Keqiang will “urgent and direct” aid to the city after an inspection of Wuhan and promised relief measures after his visit to the city. Wuhan and its prefecture were placed under isolation due to a sudden coronavirus outbreak and the government has warned that the city could be locked down for a month.

Meanwhile, Hong Kong officials have confirmed the first case of coronavirus in the city, with a 62-year-old woman from Wuhan being flown to hospital in Hong Kong. The woman had been to Thailand and Japan before returning to Hong Kong a day ago. She was later transferred to a hospital in Hong Kong’s Eastern District.

Australia woman dies in cake-eating contest

A woman died in a cake-eating contest in Australia, with the death sparking a series of concerns about the safety of such events. The woman, who was participating in a cake-eating challenge, died after taking a bite of a chocolate cake. She had received medical treatment but was pronounced dead. The incident has sparked calls for greater regulation of such events.

**Scotland must have own powers on immigration, says Sturgeon**

**Guardian News and Media**

Nicola Sturgeon has called for immigration powers to be devolved to Holyrood as part of the devolution settlement.

In a speech at a conference in Edinburgh, the Scottish First Minister said the UK government’s “pathetic” stance was not about immigration at all. She said the SNP would always stand up for Scotland’s interests.

She went on to say that immigration was just one of a series of powers that had been devolved under the Smith Commission and that it was time for the next stage of devolution.

Ms Sturgeon said that if the UK government refused to devolve immigration powers to Holyrood, the SNP would seek to enshrine the right to take such decisions in law.

Referring to the Home Office’s recent admission that it had used immigration enforcement powers to break up NHS partnerships, Ms Sturgeon said: “We need to make sure immigration is decided in Edinburgh, not London.”

Ms Sturgeon also said that the SNP would introduce a Scottish visas scheme designed to attract the highly skilled to Scotland.

She added: “We need to make sure immigration powers are devolved so Scotland can make decisions that are right for our country, with appropriate oversight of course.”

Ms Sturgeon also said she wanted to see family reunification made easier for Scottish citizens, and that there should be a provision for hardship cases.

She added: “The SNP will ensure that new powers will be used to attract and retain the best and brightest of Scotland’s future. Our scheme will be targeted at those who can make a real and lasting contribution to Scotland.”

Ms Sturgeon’s comments come as immigration figures show that the number of people arriving in Scotland has fallen sharply in recent years.

The number of people arriving in Scotland has fallen by over 25% in the past five years, with a significant drop in the number of people coming from the European Union.

In her speech, Ms Sturgeon said: “The SNP will work hard to ensure that the right things happen and that Scotland’s interests are protected.”

A spokesperson for the Scotland Office said: “The Scottish First Minister has long argued that immigration powers should be devolved to Holyrood. However, the UK government is determined to keep them in London.”

**Suspect must be tried in absentia: Dunn’s family**

**Guardian News and Media**

The family of Harry Dunn, who was killed in a crash last August, will ask Britain’s highest court to order an inquest into his death.

The Dunn family, who are represented by solicitors Weir & Co, have already been advised that an inquest will be held, but they are now seeking a coroner to be appointed to investigate the crash.

The family’s solicitor, Mark Minehan, said: “We are now in the process of preparing for a coroner to be appointed to investigate the crash. We believe that this is necessary in order to ensure that justice is done.”

The Dunn family’s legal team is made up of lawyers from Weir & Co, who are experienced in dealing with cases involving fatalities.

Mr Minehan said: “We believe that this is necessary in order to ensure that justice is done. We will be working closely with the Dunn family to ensure that they are represented effectively.”

**Grenfell fire inquiry’s second phase begins**

**Reuters**

A public inquiry into the 2017 fire at London’s Grenfell Tower, which killed 72 people, yesterday began its second phase, focusing on the manufacture of cladding and the role of wider construction industry.

The Inquiry, which was established by the government in the wake of the fire, is led by Sir Martin Moore-Bick, a former judge.

Sir Martin, who was appointed by the government in the wake of the fire, said: “The inquiry will consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.”

Sir Martin also said that the inquiry would consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.

Sir Martin’s second phase of the inquiry will focus on the manufacture of cladding and the role of wider construction industry.

Sir Martin said: “The inquiry will consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.”

Sir Martin also said that the inquiry would consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.

Sir Martin’s second phase of the inquiry will focus on the manufacture of cladding and the role of wider construction industry.

Sir Martin said: “The inquiry will consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.”

Sir Martin also said that the inquiry would consider the role of the wider construction industry in the fire and the impact of the fire on the wider community.

Sir Martin’s second phase of the inquiry will focus on the manufacture of cladding and the role of wider construction industry.
Italy’s Salvini fails to win key regional election

By Nicola Prudenti

FLOrence — Italy’s right-wing League party, which won a bruising national election last March, saw its leader Matteo Salvini fall short in the contest for the regional government of Tuscany last Sunday. The vote was seen as a bellwether of the country’s political mood after a series of elections that have seen Salvini’s party lose ground.

Salvini’s League, which has been in power in Tuscany since 2016, faced off against the centre-left Democratic Party (PD) with the centre-right Libertas party, a breakaway faction from the League.

The result was a blow for Salvini’s party, which has struggled to translate its national election success into regional victories.

The vote was held in the northwestern region of Tuscany, which is home to the city of Florence, the birthplace of the Renaissance, and the island of Elba, where Napoleon Bonaparte was exiled.

Tuscany, which has a population of about 4.2 million, is one of Italy’s most important cultural regions, with its rich history and art treasures.

The region is also known for its wine production, particularly in the Chianti area.

For nearly a week, a series of earthquakes hit the area, with the strongest measuring 6.5 on the Richter scale.

The earthquakes were felt throughout the region, and thousands of people were evacuated from their homes.

The region’s capital, Florence, is home to the Uffizi Gallery, one of the most famous art museums in the world, and the Boboli Gardens, a large public garden.

The earthquakes caused significant damage to buildings and infrastructure, and there were reports of power outages and gas leaks.

The Italian government has declared a state of emergency in the affected areas, and has deployed rescue teams and emergency services to help those affected.

The result of the election has implications for Italy’s political landscape, with Salvini’s party declining in popularity.

The vote was seen as a test of Salvini’s popularity, and his party’s ability to translate its national election victory into regional wins.

The PD, which has been in power in Tuscany since 2014, has been facing challenges from Salvini’s League, which has been on the rise in recent months.

The result of the election is a setback for Salvini, who has been a vocal critic of the PD and its leader, Nicola Zingaretti.

Zingaretti has been in power since 2014, and has been facing challenges from Salvini’s League, which has been on the rise in recent months.

The result of the election is a setback for Salvini, who has been a vocal critic of the PD and its leader, Nicola Zingaretti.

Zingaretti has been in power since 2014, and has been facing challenges from Salvini’s League, which has been on the rise in recent months.

Brazil's top bank eyeing recast as privatisation bid fails, say sources

**Bloomberg**

Brasilia, May 26

Brazil's top bank admitted it could not make a privatisation bid, even as the government plans to sell a majority stake and seeks to increase its profitability, according to two people familiar with the matter.

The bank, Banco do Brasil SA, named Economy Minister Luis Arce as chairman last year after the former Finance Minister was convicted of corruption. The government hopes to sell a majority stake in the bank to raise funds to pay for infrastructure spending. The bank's board discussed plans to privatise earlier this year, but they were not previously reported.

Luis Arce, who oversaw the privatization of state-run firms like Petrobras and the state-run rail operator, has said the talks were "preliminary".

"The government has decided that it will not proceed with the privatization of the bank,” one of the sources said.

"We have seen the decision to not privatize the bank," the other one said.

Banco do Brasil SA's shares were up 0.8% in early trading on Tuesday.

**Peru opposition crushed at legislative elections**

**AFP**

Penelope Póvara

Lima, May 26

A new Congress in Peru was elected on Sunday and opposed party lawmakers dominated the legislature, defeating the pro-government Popular Force party's bid to retain control.

President Francisco Sagasti, who took office in November after the resignation of his predecessor, Manuel Merino, led the group. The new Congress will be sworn in on Friday, after which Sagasti and Legislator Miguel Benavente are expected to outline their agenda for the new legislature.

"The opposition has won in a landslide," Legislator Raúl Zavala said.

The opposition, which includes the right-wing Popular Force party, Fuerzas Perú, the center-left Apra and the left-wing Frepap, won 73 of the 130 seats, giving it a majority in the legislature.

The pro-government party, which had hoped to win 65 seats, won only 26. The center-right People's Power party won 17. The left-wing Frepap won 8.8% of the vote, giving it 10 seats.

President Sagasti, who was appointed by the previous administration to fill the term of the late President Vizcarra until new elections were held, will now have to reach a compromise with the opposition to pass legislation.

**Argentina lauds US decision on steel tariffs**

**AFP**

Mariana McDonald

Buenos Aires, May 26

Argentina welcomed the US decision not to impose tariffs on steel and aluminium imports from the South American country that are not already subject to duties.

"We are very happy with the decision of the US to not impose tariffs on steel and aluminium that are not already subject to duties," President Alberto Fernández said in a statement.

"We have seen the decision with satisfaction. We are happy," he said.

The US Steel and Iron Association welcomed the US decision, saying it "is a relevant force, which no longer appears the case."

Argentina's steel and aluminium sector has been hit by US tariffs imposed in 2018, which have led to a decrease in exports and a reduction in the country's foreign exchange reserves.

"The US decision means that the aluminium tariff s."

Argentina has been seeking a reduction in the aluminium tariffs, which are currently at 25%.

"It is a victory for Argentina," President Fernández said.

"We have seen the decision as a victory for Argentina," he said.

Official: All 500 Pakistani students in China are safe

Pakistani expatriate doctors to launch knowledge exchange project

Pakistani authorities have reassured the world that all 500 Pakistani students who were registered online at pakjb.org are well and there has been no report of any学生 being under threat or harm.

The DUHS is running the program, which was made available to the students in the country, Pakistanis and overseas-student leaders said. The program is aimed at medical students and overseas Pakistani doctors.

"We want to create a database where physicians will be provided with a platform to.network and exchange ideas, share, hand-on seminars, new technologies, and professional knowledge," Dr. Shafique Ahmed said that this program is inspired by a technology-driven initiative of the Dow University of Health Sciences (DUHS), which has so far benefited thousands of students.

"It will be an electronic database where doctors from different countries around the world can connect with each other, exchange ideas, share information on new technologies, and professional knowledge," Dr. Shafique Ahmed said.

Palace says other agreements with US to continue
Kobe Bryant's relentless spirit leaves behind an inspiring legacy

Kobe Bryant used a ferocious competitiveness and unmatched work ethic to lead the Los Angeles Lakers to five NBA titles, leaving behind a legacy that has influenced the newest generation of league talent and fans worldwide.

From his 81-point game, the second-highest scoring performance in NBA history, to five NBA titles in 2000, 2001, 2002 and 2004, Kobe Bryant played with a passion that has left a lasting impact on the sports world.

His death in a helicopter crash last year not only saddened millions of fans, but also inspired a new generation of players to strive for greatness.

Bryant scored 65 points in a 2007 win over Portland, only to be passed in the list on February 1 of the same year by LaMarcus Aldridge, but Bryant's spirit lived on.

In 2016, Bryant became the oldest player in NBA history to score 50 points in a game, scoring 60 against the Cleveland Cavaliers.

Bryant's legacy is one of hard work and dedication, inspiring generations of athletes around the world to push themselves to their limits.

To his fans, Kobe Bryant was a true icon, a symbol of determination and resilience.

Bryant's death was a loss for the world of basketball, but his legacy lives on through the memories and lessons he left behind.

Kobe Bryant's spirit is a reminder to never give up, to always push ourselves to be the best we can be, and to leave a lasting impact on those who come after us.
Winning the electrification race

By Aditya Turner

T hroughout an electrification race that by the end of 2020, the world will produce three times as much electricity from carbon-free sources as it did in 2010. Coal will be confined to the past, and the rise of renewable energy will be a global policy. But to present potential climate change, a zero-carbon global economy must be achieved by the year 2050.

That, too, is possible, but only with strategic vision and strong leadership.

Electricity will dominate the future energy system. It accounts for only 20% of final energy demand today, but this share will rise to 40%. While electricity use has long been most common in developed countries (such as Japan), the efficiency and cost savings of electrification will make it increasingly attractive in developing countries. For example, internal-combustion engines typically burn 6%–8% of all the energy they use, whereas household and industrial processes use less electricity, which is more efficient and cleaner. For example, electric heat pump boilers can deliver more than three times the electrical energy to boilers, while electrically heated air is much cheaper than natural gas.

In Morning Consult’s latest poll of Democratic voters, Mike Bloomberg has seen his polling numbers fall. Democratic strategist Lynda Tran says Mara Dolan, co-founder of the Transitions Commission, was Chair and totally clean energy. But it is

And though solar and wind costs have plunged, we also need to consider a significant disincentive to new investment required to build new solar- and wind-energy projects: the amount of about 1.4% of GDP per year will be needed to incentivize demand for renewable energy in the US and the rest of the world. This will require a significant increase in the cost of electricity, which is already significantly higher than fossil fuels.

In a separate analysis, the researchers found that electric vehicles are cheaper to operate than gasoline cars, and that electric heating systems can be useful in many homes.

Children may face higher psoriasis risk if mother smoked while pregnant

C hildren born to women who smoked during pregnancy are at higher risk of developing psoriasis, according to a new study. In a study of 5,466 children and their parents, researchers found that smoking during pregnancy is associated with a 40% increased risk of psoriasis in children, and that this increased risk occurs with the number of cigarettes smoked during pregnancy.

The study was conducted by the American Academy of Dermatology and the University of Cambridge. The researchers examined the medical records of 5,466 children and their parents, and found that children born to mothers who smoked during pregnancy were more likely to develop psoriasis than those born to mothers who did not. The study was published in the journal Pediatric Dermatology.

Qatar Charity launches series of programmes for children, women

There is a set of data specified by every natural or legal person, whether a citizen or an expatriate and all his/her transactions with governmental and non-governmental bodies are completed based on these data.

Registration of the national address began yesterday through the Metrash2 app and the Ministry of Interior (MoI) website. People can also register directly at any of the MoI service centres. In a statement on Twitter yesterday, the MoI urged the public to register their address within the specified period of six months. The ministry also issued a reminder that the provided address includes details such as residential address, fixed telephone and mobile numbers, e-mail address, address of the employer for government and private sector employees, permanent address abroad if available, and any other data specified by the competent authority.

For the first time, Shop Qatar featured a fashion show for children, women and non-Arabic-speaking students. Targeting children, girls and mothers, the programmes aim to acquaint participants with the Qur’anic environment and teach non-literate mothers the correct pronunciation of letters and words of the Arabic language. The programmes will continue until mid-April. The programmes will feature local designers and renowned brand names.

The programme will also feature art classes for learning Arabic calligraphy, as well as "This is Muhammad," a course for acquainting participants with the Prophet (PBUH) as a role model.

Fashion shows featuring leading international and local designers dazzled audiences during Shop Qatar

Fashion shows featuring leading international and local designers dazzled audiences during Shop Qatar. For the first time, Shop Qatar featured a fashion show for children, women and non-Arabic-speaking students.

Lebanese designers Nicolas Jebran presented his latest collection at Al Mana on January 24 at his first solo show in Qatar. A large number of fashion enthusiasts and the designer’s fans attended the show and praised the collection's bold designs and crafting outfits that tell a complete story.

Drawing inspiration from his surroundings, his bold designs have won him an international following from celebrities such as Madonna, Celine Dion, Cardi B, Paula Patton and Katy Perry. (Almana created his eponymous brand in 2000, a year after placing second in reality television competition Studio El Fan. Having majored in fashion and jewelry design at the Lebanese American University in Beirut, Jebran designs couture, ready-to-wear, accessories, bags and shoes.

For the first time, Shop Qatar featured a fashion show for the little ones on January 24 at Al Mana Mall where Al Mana Group of brands presented the latest in children’s wear. The Saturday evening show brought together the rich group of local designers who showcased their creations through their programmes and received applause from the audience as well as international fashion critics.

Featured designers included Waad, Vanessa Massour, Hayat Shaker, Yamal Al-Salan, and Yasmine al-Hajj. The show featured popular local brands Modish, Laila Al-Salhi, and the Black Pearl who gave a school look at modern fashion by blending traditional alone with Western influenced suits, hats and accessories.
