QF webinar stresses need for global collaboration and unity to combat coronavirus

By Joseph Varghese

The Qatar Foundation (QF), through its Education City campus, has organized an online webinar on managing the coronavirus (Covid-19) to highlight the need for global collaboration and unity in the fight against the disease.

The webinar, titled "Qatar and the COVID-19: QF’s role and way to fast-track the response," was held on April 2 via the Zoom platform.

"QF has organized this webinar with many topics related to the outcomes of the novel coronavirus (Covid-19) in most countries of the world including the GCC states, and the consequent protective measures taken by the GCC countries to protect citizens and residents from infection with this virus, and the impact the pandemic has on our labour market, business owners, and workers," said a QF spokesperson.

The webinar featured panelists from a range of governments and entities, including the World Health Organization (WHO), the International Federation ofcdc, and the Qatar Foundation.

"We expect that during the upcoming months, the focus will be on treating the virus in a way that will help us to avoid the need for severe care and hospitalization," the spokesperson said.

Minister takes part in GCC meeting

Qatar takes part in meeting of GCC Customs Union

Qatar participated on Thursday in the 13th meeting of the Customs Union of the Gulf Cooperation Council (GCC) countries, which was held via videoconference.

HE the Minister of Administrative Development, Labour and Social Affairs Yousuf Bin Ahmed Al-Hashimi, participated in the meeting which was attended by his counterparts from the other GCC countries.

The meeting discussed several issues, including the situation of the decision of the ministers of Customs in the GCC countries as well as the readiness of the GCC countries to implement the results of the meeting and coordination meetings held on April 2, along with the economic repercussions of the coronavirus (Covid-19) on their countries.

"We need to have a centralised decision-making body for the GCC, and we need to have a platform where the decisions are made and we need to be able to work together," one participant said.

"We need to work together to defeat it," the other said.

"We plead with everyone to work together to defeat it," the third said.

The webinar also featured a panel discussion on the need for global collaboration and unity in the fight against the disease.

"I would like to take this opportunity to express my gratitude to the Gulf states who are working with great dedication, and to all the entities and individuals who are working in this field," the spokesperson said.

Qatar affirms its support for vaccines against COVID-19

A senior official of the Ministry of Public Health Affairs on Wednesday confirmed that Qatar will be happy to participate in any international trials for a vaccine against COVID-19.

"We will be happy to participate in any international clinical trials for a vaccine against COVID-19," the official said.

"We need to do research and develop vaccines that can help us in the fight against COVID-19," the other said.

According to the WHO, Qatar has so far recorded 9,784 cases of coronavirus, including 3,778 recoveries and 26 deaths.

"Qatar will be happy to participate in any international clinical trials for a vaccine against COVID-19," the official said.

Qatar PP starts drilling work for NFE project

Qatar Petroleum has started drilling work for the NFE project, according to a statement released by the company.

"Qatar Petroleum has started drilling work for the NFE project," the statement said.

The project, which is part of the larger North Field East (NFE) project, is expected to add 300 billion cubic feet of gas per year to Qatar's production capacity.

The project, which is expected to cost $37 billion, is expected to start producing gas in 2024.

Awqaf: initiative to support needy families for 3 months

The General Directorate of Almashr, in the Ministry of Islamic Affairs, has announced that it will start an initiative to support needy families in Qatar for three months.

The support, which started on April 6, will be through food baskets, which will cover all the needs of families who are receiving assistance from the ministry.

"The project has been launched to cover the needs of families that are facing economic difficulties due to the COVID-19 pandemic," the ministry spokesperson said.

"We have distributed food baskets to more than 1,000 beneficiary families," the spokesperson said.

"We have also distributed food baskets to more than 1,000 beneficiary families," the ministry spokesperson said.

"We have also distributed food baskets to more than 1,000 beneficiary families," the ministry spokesperson said.

The ministry has also called on all entities and individuals who wish to contribute to this initiative to contact the ministry.

Health minister meets recovered Covid-19 patients

The minister of Public Health Dr Hamad Meshal bin Ali Al Hammam met with two patients who recently recovered from Covid-19 at the Hazm bin Turk Health Centre in Doha. During the meetings, which took place at Hamad Medica- l Corporation’s (HMC) Ambulatory Care Centre, the patients shared their experi- ence of having the coronavirus and undergoing treatment at HMC. ‘Dr Al Hammam met with two patients who were recently released from HMC. He also discussed a variety of topics related to the novel coronavirus (Covid-19) and expressed his gratitude for their contributions to the health sector during this challenging time.’

Dr Maria Fatima Janjua, spokesman of the Ministry of Public Health, said: "At this challenging time, more than ever it is important for us to be in touch with our families. On this occasion, the health ministry launched a communication campaign aimed at enforcing public health awareness and to stress on the importance of using hand sanitizers, wearing protective masks and social distancing. The campaign "Connecting For Care" has officially been launched to provide social support to quarantined workers and their families. It offers members the opportunity to talk to someone in their language. The initiative aims to not only support patients and people undergoing treatment but also involve other siblings if appropriate. For very young children, the volunteers are trained in providing basic care and information about the child’s medical condition. The volunteers are asked to follow specific guidelines and are trained in providing basic care to children. The volunteers also play a key role in the health ministry’s efforts to keep up the search for a Covid-19 vaccine. They are provided with ongoing support and training to ensure they are up-to-date with the latest developments."
Indian embassy to provide urgent consular services only by appointment

The Indian embassy has said passport services and other consular services will be provided in cases that are of an urgent nature only, with strict appointments.

Oman University’s College of Pharmacy (QU-CPH) has successfully conducted its first online Objective Structured Clinical Exam (OSCE) involving an online distance education platform due to the precautionary measures against the spread of Covid-19.

Oman University has implemented the “Globalhealth” concept, with the participation of 21 real-life pharmacy students and 16 faculty members. The team assessed the clinical skills of prospective pharmacists and is currently쪽

The exam assessed the clinical skills, maintaining the code of ethics and practice skills as part of their final year examination in pharmacy practice. The exam utilized an online distance Objective Structured Clinical Examination (OSCE) to ensure fair evaluation of students and inter-rater reliability.

From today, helplines will be available and justification of urgency. Passports number and validity, send WhatsApp messages on 66931380 and 66851998. From 9.30am-12.30pm, to seek appointments, this comes in view of the prior appointment. Consular services will be provided in cases that are of urgent nature only, with strict appointments.

OSCE online exam in progress. The whole format of the OSCE and secure it online is such a short period of time given the uncertain circumstances we are living in. Nothing tastes as good as a way, and with the support of Brunei mission and along with the dedication and perseverance of our final year students, we made it happen successfully. "

Field tours educate workers on virus

A Qatar on 100,000 workers have been covered through 4,400 field inspections by the Ministry of Administrative Development, Labour and Social Affairs (MADLSA) since April 1 to enhance the awareness of workers and employers on the precautionary and preventive measures against the novel coronavirus (Covid-19), a senior official told Qatar News Agency (QNA).

The importance of proper personal hygiene, covering coughs and sneezing, the use of soap for hand washing, the need to pay and stay at home on time are among the topics covered, he added.

Employers should continue to pay their salaries. Other measures taken by the MADLSA include instructing companies to reduce the density of workers at workplaces, and as a consequence as well, reducing by 50% the capacity of buses used to transport workers to the workplace, the presence of health and safety officers on the sites.

The MADLSA also co-operated with Qatar Central Bank to fix up for bank officers and employers the transfer of money to employees and these services can use various online apps available, Al-Dosari added.

Disclosure of the date of the Board of Directors meeting to discuss the first quarter for the financial statements of the year 2020 for the period ending March 31, 2020

Qatar General Insurance & Reinsurance Company, Q.P.S.C. announces that its Board of Directors will meet on Wednesday 29 April 2020 at 8:30 PM to discuss the first quarter financial statements for the year 2020.

Qatar Central Bank is open for both bank officers and employers the transfer of money to employees and these services can use various online apps available, Al-Dosari added.

QU-CPH conducts final year OSCE exam online to counter Covid-19

Three contractors and construction companies were found responsible for violating health and safety policies and measures, to be followed by foreign workers on company transportation buses at The Pearl-Qatar, the Ministry of Administrative Development, Labour and Social Affairs (MADLSA) said yesterday.

The ministry said it would take all legal measures against the companies and their employees who violated these procedures that guarantee the safety of workers. The ministry is currently following the activities of all legal measures against the companies that violated these procedures.

The MME has also established a dedicated follow-up team to receive complaints and negative reports of any work place or accommodation facility on the presence of Covid-19 workers.

"It was amazing to have OSCE conducted with each student, who, in turn, role-played the role of real-life patients in the OSCE. However, the structure and the regular flow of the OSCE was changed where faculty members played the SP role in a virtual manner with each student, who, in turn, role-played the pharmacist. During the exam, students were guided based on their ability to demonstrate professional pharmacy practice skills as part of their final year examination in pharmacy practice. In addition, students’ grades were evaluated by two faculty members to ensure fair evaluation of students and inter-rater reliability.

Some of the important skills assessed as part of this exam included: Promotion of public health awareness, administration of managerial leadership skills, maintaining the code of ethics while dealing with patients, communication and collaboration with other health care team members. The OSCE also included a clinical case scenario where students had to provide optimal care to hospitalised patients, and counselling patients about their medication taking into account their specific characteristics while dispensing medication.

Dr Majed Ali, CPH clinical associate professor and course coordinator said: "It was quite challenging to change the format of the OSCE and secure it online is such a short period of time given the uncertain circumstances we are living in. Nothing tastes as good as a way, and with the support of Brunei mission and along with the dedication and perseverance of our final year students, we made it happen successfully."

MADLSA monitors guideline violations at The Pearl-Qatar

Qatar Charity benefited 844,334 people in Qatar last year

The number of beneficiaries of the projects implemented by Qatar Charity (QC) last year in Qatar reached 844,334 persons, at a total cost of more than 130 million riyals in the field of social welfare, programs, and assistance. This come to support families with low incomes, those in debts, workers, and others.

This come within the framework of the “Charity Starts at Home” campaign launched by Qatar Charity as an expression of its initiatives and projects, which have been being implemented for the community service in accordance with the Qatar National Vision 2030 in the areas of economic, social and human development.

Qatar Charity extended thanks and gratitude to the philanthropists, benefactors and donors in Qatar for their tremendous and continuous support for the activities and projects that Qatar Charity implements for various sections of society within the country across the globe, hoping their constant support in the future.

Internal Aid
The cost of domestic aid provided by Qatar Charity in 2019 amounted to more than 84 million riyals, which was allocated for families with low incomes, those in debt, patients, widows, divorced women, people with special needs, the elderly, students, and others within Qatar.

Persons in Debt
Last year, this assistance contributed to repaying the debts for 110 persons in debt within Qatar, bringing social stability to them, especially before the month of Ramadan and Eids. The total value of these contributions amounted to more than 60.5 million riyals.

Qatar Charity continues its efforts during the current year 2020, which relieved many people of their trouble to reunite them with their families before the onset of the holy month of Ramadan.

The aid covered 503 medical cases in 2019, by conducting medical examinations and providing treatment for them. The number of students benefiting from Qatar Charity’s programs, activities and aid reached more than 19,611 students.

Low-Income Families
During the past year, the total beneficiary families reached 5,000 families. Some 307 families with limited income, widows and divorced women benefited from monthly financial assistance valued at more than 10.7 million riyals, while other families received lump sum aid to address the exceptional circumstances they went through.

Automatic Renewal
In line with the efforts and directives of the State of Qatar to stay home during the coronavirus, last month, Qatar Charity has decided to automatically renew the monthly aid disbursement to all of its registered beneficiaries, including families with limited income, widows and divorced women, for the next three months without the need to appear in person.

Orphans
Within the framework of social welfare, some 5,771 orphans and widows benefited from the projects and assistance implemented by Qatar Charity to provide a dignified life for them and their families.

As part of its “Future’s Leaders” project, Qatar Charity sponsors 450 orphans, who receive monthly aid, education and health services, and Eid gifts during the holy month of Ramadan to bring joy and delight to them on Eid Al Fitr.
Sun Therapy

By Ghanim al-Sulaiti

Last week, I discussed about a ‘vegan approach to home quarantine’. With so much of the world spending more time at home than ever before, it’s important to be22

Sunlight is good for many things, but did you know it was especially beneficial in terms of boosting our immune system? A recent study from the University of California has shown that those who spent time in sunlight had a lower risk of developing respiratory tract infections. So let’s get outside and soak up some rays! Sunlight is also important for maintaining healthy bones and teeth. In fact, a deficiency of Vitamin D can lead to osteoporosis, a condition that weakens bones and makes them more prone to fracture. Therefore, it’s important to get enough sunlight to ensure your body is receiving the necessary amount of this vitamin. By the way, did you know that there are 6000 species of plants and microorganisms that can produce Vitamin D? This means that even if you don’t have enough sunlight, you can still get Vitamin D from certain foods like eggs, fatty fish, and fortified dairy products. So don’t be afraid to step outside and enjoy the sunshine! It’s good for your health and your mood.

Coronavirus: A lesson learnt!

The pandemic has hit us hard and we have all had to adapt to new ways of living. One of the most important things we have learned is the importance of hygiene and social distancing. It’s amazing how quickly we have all started to take these measures seriously and how much they have helped to reduce the spread of the virus. However, it’s important to remember that there is still a lot of work to be done to fully contain the pandemic. We need to keep following the guidelines and practicing good hygiene to ensure that we are not causing any new outbreaks. Let’s all work together to keep each other safe and healthy.

Wellness Meal Plan

By Heba Abd El-Moneim

The corona pandemic is a global catastrophe that has affected people and industry alike. We have to wear masks, keep our distance, wash our hands frequently and avoid gatherings to prevent the spread of the virus. This is something all leaders have put in place to fight the pandemic. The corona pandemic has been a reminder of the importance of social distancing and the need to protect ourselves and others. The pandemic has also highlighted the importance of the role of government and the need for solidarity in dealing with this crisis.

Working from home should be optional for some people. Some people have to work in essential services and can’t be home all the time. This is why it’s important to find a balance between working from home and going to work. It’s also important to maintain a healthy lifestyle to reduce the risk of getting sick. The pandemic has also shown us the importance of mental health and the need to take care of ourselves.

Now what should you do? The pandemic has changed our lives in different ways. There are no clear guidelines on what to do, but you can still take steps to protect yourself. Most importantly, you should be following the guidelines from your local health department. You should also be washing your hands frequently, wearing a mask in public places, and practicing social distancing. It’s also important to stay physically active and eat a healthy diet.

Washing your hands regularly is crucial to prevent the spread of the virus. You should wash your hands with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer. Avoid touching your face, especially your eyes, nose, and mouth.

The pandemic has shown us the importance of community and cooperation. We all need to work together to overcome this crisis. Let’s all do our part to protect ourselves and others. This way, we can overcome this pandemic and return to normalcy.

Stomach: Don’t let it ever become a deadly enemy. Today we are talking about the stomach, a part of the body that is often taken for granted. The stomach is a muscular organ that helps to break down foods into smaller particles that can be absorbed by the body. It’s important to take care of your stomach to ensure that you are getting all the nutrients you need.

The stomach is responsible for breaking down foods into smaller particles that can be absorbed by the body. It’s important to eat a balanced diet, rich in fruits, vegetables, and lean proteins.

Of course, we all eat foods that make our stomachs feel good. For example, it’s common for people to eat foods that contain gluten or dairy, which can cause digestive issues. However, it’s important to be mindful of what you’re putting into your body to ensure that your stomach stays healthy.

The stomach is also important for the absorption of nutrients. It’s important to eat foods that are rich in nutrients, such as fruits, vegetables, and lean proteins. The stomach is also responsible for producing digestive enzymes, which help to break down food into smaller particles that can be absorbed by the body.

It’s important to take care of your stomach to ensure that you are getting all the nutrients you need. You can do this by eating a balanced diet, rich in fruits, vegetables, and lean proteins. You should also try to avoid eating foods that make your stomach feel uncomfortable.

Poor Kenyans despair as quarantine extended over unpaid bills

Kenyan travellers say that they are suffering from the government’s quarantine measures as they have not been paid for the mandatory 14 days of isolation at accommodation facilities. Some hotels have reportedly been paying bills for their stays, but only 300 people are being held at Kenya’s University Hotel which came back to Kenya on March 23 just as the East African country introduced mandatory quarantine for travellers.

The prime minister said the new measures could also include allowing people to stay more freely in some regions outside the capital, but he said it was too early to consider easing restrictions. “At any point we see more cases our only duty will be to reconsider these steps,” Ruto reiterated.

Kenyan government spokesman Manoah Ebrima did confirm cases and seven deaths. Officials are worried the crisis, which has hit hard the informal sector, a main source of foreign currency, with small businesses, street vendors and transporters suffering in the debt-drenched economy.

Jordan will ease lockdown by allowing more businesses to open: PM

Jordan’s Prime Minister Omar al-Razzaz said yesterday the government would soon relax some of its restrictions to allow more businesses to operate. “The government would soon ease a tight lockdown imposed in order to control coronavirus,” he said.

Madrid and Angers donate time at their homes as they watch entire workouts, following the outbreak of COVID-19 in China.

Iran says pandemic deaths below 100 for second day

The government earlier this week reported 425 Covid-19 cases and seven deaths. Officials are worried the crisis, which has hit hard the informal sector, a main source of foreign currency, with small businesses, street vendors and transporters suffering in the debt-drenched economy.

The government has allowed only food and dairy industries along with pharmaceuticals and paper products to continue some of their operations. Workers in small businesses are feeling the impact of the crisis, with many facing a financial crisis due to the lockdown that brought many small businesses in the debt-drenched economy.

Canadian hospitals prepare to sterile, re-use N95 masks if supplies dwindle

Unseasonal snow causes pileups

Warren, swing-state Democrats back Biden

Trump halts WHO funding, earns global opprobrium

Some Canadian hospitals are collecting used N95 masks so they can be disinfected and re-used. Health care workers and government experts have been eyeing the possibility of reusing N95 masks in recent weeks to save on supplies amid the coronavirus pandemic. However, using face masks more than once raises concerns about the potential for contamination and the effectiveness of the masks. Health care workers have been collecting used N95 masks, but there are no standardized protocols yet for reusing them.

This week, the Saskatchewan Health Authority began collecting used N95 masks from select hospitals in the province. The masks will be sent to a vendor to be disinfected and re-packaged.

Some hospitals are considering using UV light to disinfect the masks, but it is not yet clear if this method is effective in killing the coronavirus.

A few Canadian provinces have set up pilot programs to test the feasibility of reusing N95 masks. For example, in Ontario, Premier Doug Ford announced that the province will be looking into the possibility of reusing N95 masks.

Canadian Prime Minister Justin Trudeau has also expressed interest in reusing N95 masks, saying it would help reduce the number of new masks needed during the pandemic.

Unseasonal snow causes pileups

Warren, swing-state Democrats back Biden

U.S. President Donald Trump’s decision to pull the United States out of the World Health Organization (WHO) has drawn criticism from health experts and politicians. But the swing-state Democrats have come forward to support President Joe Biden, signaling that they will work with him to address the pandemic.

Trump’s decision comes as the United States continues to face a surge in COVID-19 cases. The country has reported over 8 million new infections and more than 200,000 deaths since the pandemic began.

The United States has become an example of how to deal with the COVID-19 crisis, according to former President Barack Obama. Obama said that the United States should stay in the WHO to work with other countries on attacking the virus.

The pandemic has highlighted the importance of international cooperation in addressing public health threats. The WHO has been a key player in coordinating global responses to outbreaks like the COVID-19 pandemic.

Thailand extends ban on flights until April-end

**Since the outbreak of coronavirus in Thailand, a total of 1,341 cases and 43 fatalities have been recorded.**

**Since the lockdown was introduced on April 4, and the Civil Aviation Authority of Thailand has already extended it once until April 18. Thailand reported 30 new coronavirus cases and two new deaths, bringing the total to 1,341 cases and 43 fatalities, while 417 patients have recovered and gone home. Of the new cases, 10 patients in Nakhon Ratchasima and three had no link to old cases, and two had no information about people from abroad.**

Thailand shares borders with 10 countries, and the disease has gone up to 16 in the Himalayan nation on since lockdown was imposed. The cabinet has also decided to extend all commercial international flights until April 18. Nepal has registered its first case of coronavirus.

**Nepal extends nationwide lockdown**

**The Nepalese government has decided to extend its nationwide lockdown to April 18, 2020, as infection claims in the country have increased.**

The lockdown, which was imposed in the Himalayan nation on March 24, has also decided to extend all commercial international flights until April 18. Nepal has registered its first case of coronavirus.

**Vietnam introduces ‘fake news’ fines**

**Vietnam will extend its nationwide lockdown on April 22, taking the total to 20 provinces as more than 100,000 people have been fined for spreading false news and information about COVID-19.**

The ban took effect on March 22, with authorities issuing fines for the dissemination of false information about the coronavirus. The ban on public gatherings and social distancing measures has been extended until April 22.

A new decree took effect in Vietnam on April 21 in order to tighten the lockdown. The decree, which targets online media, aims to control the spread of false news and information about the virus.

**Indonesia to probe Papua killings**

**Indonesia’s military will investigate an incident in which two men were shot dead in eastern Papua province as part of a major offensive to divert attention from the country’s human rights record.**

The Indonesian military said it was investigating the incident, but added that it was not immediately clear what had sparked the violence.

The military said in a statement that troops had been called to the area to help keep order under a new government order that had been introduced to maintain public safety in the region.

**We want an area in an area situation and we are trying to maintain normalcy in the area.**

**“We will carry out our investigations and we will bring the perpetrators to justice,”**

The military did not provide details about the incident but said it was investigating it.

The military said that it had visited the area, along with the military commander, to offer condolences.

Japan urges citizens to isolate as reports warn of escalating crisis

**Japanese citizens urged to stay home during next two days.**

Japan urged its citizens yesterday to stay home for the next two days as the country went into lockdown, following an announcement by Prime Minister Yoshihide Suga that a state of emergency would be declared tomorrow.

Mr Suga said the emergency, which will cover 47 of Japan’s 47 prefectures, including the capital Tokyo, would go into effect on April 16 and last for one month. It comes just days after Osaka and other parts of western Japan announced similar restrictions.

Mr Suga said the emergency was necessary because of the spread of the fast-spreading Delta variant of the coronavirus.

He said he had spoken with his counterparts in other countries, including South Korea, who have also imposed restrictions.

Mr Suga said he had also spoken with leaders of the World Health Organization (WHO) and the Japanese Medical Association.

The emergency will require citizens to work from home, avoid social gatherings and limit travel.

It will also prevent the sale of alcohol and require restaurants to close at 8pm.

Mr Suga said those who break the rules will be fined.

He also said the government would provide support for businesses and individuals affected by the lockdown.

Mr Suga said he had decided to impose the emergency after consulting with experts.

He said he had also spoken with leaders of other countries, including South Korea, who have also imposed restrictions.

The emergency will go into effect on April 16 and last for one month.

Scotland, Wales concerned at reports England is prioritised for PPE

Professor A B

Pregnant healthcare workers are being pushed into the front line of the coronavirus crisis, despite being among the most vulnerable, the Scottish Government has learned.

Some pregnant women are fielding calls to help them produce PPE equipment while others are “told to prioritise PPE for non-Covid patients”.

The Scottish Health Minister, Jeane Freeman, said in an interview with the Radio Times magazine that she had raised the issues of PPE provision directly relating to work with Welsh care home staff.

Brexit talks with EU next week

Golf Times

A UK-wide purchasing arrangement – which was aimed to be able to withstand COVID-19. But even when all three are in place, there is much more to do. The health system has been “told to prioritise PPE for non-Covid patients”.

The UK government released new guidelines on the use of PPE in May, but these have not been followed in all parts of the UK. In Scotland, there is evidence that some health care workers are not receiving appropriate PPE.

The Scottish Government has been working closely with the Welsh and Northern Irish governments to ensure that their health care workers are able to access appropriate PPE.

In a recent survey of 3,004 pregnant women working in the NHS, 111 workers who are pregnant or have given birth in the last year said they had received less than half of the PPE they needed.

Some pregnant women are being told to prioritise PPE for non-Covid patients, while others are being told to prioritise PPE for the elderly and those with long-term conditions.

In response to reports that leading health care workers in England are prioritising PPE for non-Covid patients, the Scottish Government has written to the UK government to remind them of the guidance for the prioritisation of PPE.

The Scottish Government has also written to the Welsh and Northern Irish governments to ensure that their health care workers are able to access appropriate PPE.

Greenland ice sheet shrinks by record amount: climate study

G

oeland’s ice sheet shrunk by more than at any time since 2015, according to a study published yesterday, as global warming causes ice losses that could change the world’s climate. "What we do here could shape the world in a way that nothing else in the world can," Dr. Michael Mike Mikes said. Greenland lost around 600 billion US dollars worth of ice at the rate of 300 billion US dollars per year, as amount that would constitute about 10% of the country’s GDP. Dr. Mikes said the study was published in the New Climate Journal.

Greenland’s ice sheet covers 85% of the world’s ice, is more than 3,000 feet thick in some places, and contains enough water to raise global sea levels by 21 feet. According to Dr. Mikes, current ice melting could produce a "tsunami effect" on the environment. "We are seeing a real change here, and it’s happening faster than we thought," he said.

"There is a lot of evidence that this is not a temporary phenomenon," said Dr. Mikes. "If we continue business as usual, we are likely to see a lot more ice loss in the coming years." Dr. Mikes called for urgent action to reduce greenhouse gas emissions to slow the rate of ice loss.

"The world needs to come together and take action to address this issue," he said. "Every country needs to do their part, and we need to start now." Dr. Mikes urged countries to reduce their carbon footprints and support renewable energy sources.

"We need to act now to protect our planet," he said. "Every little bit counts, and we need to do everything we can to slow the rate of ice loss." Dr. Mikes called for a global coordinated effort to tackle climate change and protect our planet for future generations.

Spain’s daily toll dips amid more testing

A police officer talks with a man who made a complaint about a document over the next 10 days starting evening yesterday.

Spain is on the verge of launching the first phase of its de-escalation plan, which will allow around 800,000 people to return to work. The government is keen to reactivate the economy and the safety of the population – in this case its children.

The government has announced that it will lift some of the restrictions on schools and day care centres, but concerns have been raised about the safety of children.

The minister of health, Dr. Mikes, said that the de-escalation plan will allow schools to reopen from June 8, but that parents will need to ensure that their children are safe. "We need to ensure that children are protected," he said. "We are doing everything we can to ensure that children are safe, but we need the support of the whole community to make this work." Dr. Mikes said that schools would be inspected regularly to ensure that they are following the guidelines.

The government has also announced that it will lift some of the restrictions on day care centres, but concerns have been raised about the safety of children.

**Gujarat CM in self-isolation after legislator tests positive**

Gujarat Chief Minister Vijay Rupani was among five senior politicians in the state who tested positive for Covid-19 after they had a meeting with a legislator last week to discuss the ongoing lockdown in the state.

Rupani, who tested positive, also announced the lockdown will continue for another week in the state, Chief Minister’s office said.

The chief minister, along with four other people, including Minister of State Kshayi, came in contact with a person who tested positive last week.

Rupani and other four people had attended a meeting of all MPs and MLAs last week in Gandhinagar, the state capital.

The chief minister tested positive for the second time.

Rupani also said that the number of active cases in the state had dropped to 50,000.

**India to sell anti-malaria drug HCQ to Malaysia**

India has agreed to supply hydroxychloroquine (HCQ) drug to Malaysia, a senior health ministry official said.

HCQ is used as a treatment for severe Covid-19 cases around the world. Malaysia's Health Minister Dr Adham Baba said on Tuesday that the supply of the drug would start from June 2.

India also gave permission to Malaysia to import veterinary medicines.

**Weather**

Monsoon to be normal this year, says IMD

The Indian Meteorological Department (IMD) yesterday said “this year, we will witness a near normal monsoon in the country which will be beneficial for agriculture. For the first time in the monsoon season, the rainfall has been normal across the country.”

**Education**

Court sets aside orders on English medium schools

The Gujarat High Court yesterday set aside government orders for conversion of all government schools in the state, Dr R K Patel and Dr Parmar and Minister of State for Education Chennithala have no concurrence of either the state, Dr R K Patel and Dr Parmar and Minister of State for Education.

The court also directed that the decision should be taken by the state government only after consulting with the stakeholders.

**Telangana officials booked for holding party**

Telangana officials have been booked for allegedly celebrating a party in violation of lockdown norms in Khammam district organized the party at a guest house on Monday night.

Acting in a tip-off, police raided the place and found 250 people present, a police official said.

**Crop**

Man shoots, injures friend for sneezing

A man in Greater Noida allegedly shot and injured his friend for sneezing during an extended nationwide lockdown in the old quarters of Delhi yesterday.

Jaiveer pretended to sneeze again. Thereafter, the tension had also affected the palm trade between the countries.

"Broadly, nations will need each other to fight Covid-19," said an Indian source with direct knowledge of the discussions.

"I am not sure of much more beyond that," one of the sources said.

"There is also some discussion about chloroquine to some less developed countries, as an emergency," the source said.

India decided to sell the drug which it had learnt to be able to reduce the progression of the disease and lead to inflammation.

It said the drug had been used in Malaysia for the treatment of Covid-19 since January.

Malaysia had sold India’s drug to about 150 countries.

The drugs were ordered on April 23 under license from the Indian government.

The drug is used to treat malaria and for autoimmune diseases.

Man shoots, injures friend for sneezing

A man in Greater Noida allegedly shot and injured his friend for sneezing during an extended nationwide lockdown in the old quarters of Delhi yesterday.

Jaiveer pretended to sneeze again. Thereafter, the tension had also affected the palm trade between the countries.

"Broadly, nations will need each other to fight Covid-19," said an Indian source with direct knowledge of the discussions.

"I am not sure of much more beyond that," one of the sources said.

"There is also some discussion about chloroquine to some less developed countries, as an emergency," the source said.

India decided to sell the drug which it had learnt to be able to reduce the progression of the disease and lead to inflammation.

It said the drug had been used in Malaysia for the treatment of Covid-19 since January.

Malaysia had sold India’s drug to about 150 countries.

The drugs were ordered on April 23 under license from the Indian government.

The drug is used to treat malaria and for autoimmune diseases.

**Brazil chardons 1,300 inmates to halt coronavirus spread**

A round 1,300 prisoners at high risk of contracting the coronavirus will be paroled in Brazil after the Constitutional Court approved a special appeal by the government of Brazil's beleaguered President Luiz Inácio Lula da Silva. According to Lula's lawyer, more than 1,000 inmates who are women, children, or over 75 years old, or have health problems, will be released immediately. The move is aimed at reducing the risk of the virus spreading in prisons. It was an unexpected move by Lula, who had previously resisted such a measure.

**Brazil cocaine kingpin arrested**

One of Brazil's top cocaine traffickers has been arrested in Micronesia, officials in both countries said, underscoring the growing global footprint of the drug cartel. Gilberto Alves dos Santos, aka "Fuminho," had been on the run for more than 20 years and was considered one of Brazil's most wanted drug traffickers. The arrest was made after a warrant for his extradition was issued by Brazil, and he was arrested in a military prison in Micronesia. Alves dos Santos is known for his role in the trans-Atlantic drug trade, supplying cocaine to European markets. Brazil has targeting drug cartels and politicians as part of its fight against organized crime.

**Brazil police arrest 300 drug traffickers in Rio de Janeiro**

Brazilian police have arrested 300 drug traffickers in Rio de Janeiro, as part of a broad crackdown on organized crime. The operation was part of a wider effort to combat drug trafficking and organized crime in the city. Authorities said they had seized large amounts of drugs and money, as well as weapons. The arrested traffickers are suspected of involvement in the drug trade and other criminal activities.

**Brazilian officials welcome Lula's paroling of prisoners**

Brazilian officials welcomed the paroling of prisoners, saying it was a necessary measure to contain the spread of the coronavirus in prisons. However, they also expressed concern about the potential for increased drug trafficking and other criminal activities once the prisoners are released.
PM: All efforts taken to provide relief to masses

A meeting of skulls and religious scholars from across Pakistan, held with the purpose of discussing precautionary measures, concluded that congregations in mosques from now on should be halted, adding how-prayers were being held, but with precautions on the number of people allowed to gather. Construction sites will not be allowed to open “under any circumstances,” the chief minister warned. He said that Prime Minister Khan has allowed the construction activities to continue provided that only if measures are taken for the protection of employees.

Chief Minister Khan has consulted the prime minister for bringing businesses and industries on the same page and adhered to standard operational procedures. He said that the more the lockdown is broadened to open during the lockdown, the more are the people getting infected and the more are the numbers to be tackled. The prime minister is already facing huge financial losses due to the lockdown and imposed restrictions, so there are further losses; he said, and added that the provincial government is working with all the stakeholders to rescue the economy.

He said that a government delegation led by the interior minister, special assistant to the prime minister Khurram Dastgir, visited the Chinese side on April 14, and that talks were held on the mechanism to start the trade.

“Generally, the middlemen in the Chinese side are demanding various safeguards and guarantees before resuming the trade,” he continued, adding that the local traders were explaining the situation and expressed concern over the mechanism to receive the Chinese goods. He said that the traders had demanded to know how long they would wait for the resumption of trade.

“The Chinese are demanding to be given a surety that their goods would be received after being loaded into ships,” he continued. “We are waiting for the government’s assurance in this regard.”

**Grov nod for deployment of medical graduates**

By Catherine S. Valent

The Inter-Agency Task Force for the Management of Emerging Infectious Diseases (IATF) has approved the proposal of Interior Secretary Marita B. Nograles to allow medical graduates to help the government in its fight against the coronavirus pandemic. 

Calainto urged the DOH and the state to consider allowing medical graduates who are about to undergo required practicum training and internship for the 2021 graduates, as well as the 2022 and 2023 graduates, to help the country address the surge in cases of Covid-19.

The latest number is 24,103 on April 12, 2021. 

Based on the April 12 data, the highest displacement was recorded in Cagayan Valley with 36,526, followed by Eastern Visayas with 28,040, and Central Luzon with 14,767. 

Caraga Region and the Cordillera Administrative Region also displaced more than 10,000 workers each. 

Meanwhile, the president ordered the Civil Defense and the Task Force to ensure that the workers are not displaced due to temporary closure while the labor situation is very flexible and there are no new mass-displacement incidents.

The latest number is 24,103.

On April 12, 2021, the IATF announced the deployment of medical graduates to help the country address the surge in cases of Covid-19.

The latest number is 24,103.

Paris climate goals failure ‘could cost the world $600tn’

Failure to fulfill the promises made in the Paris climate agreement to make drastic emissions cuts could cost the global economy as much as $600tn this century, new analysis released on Tuesday showed.

Under the landmark 2015 accord, countries pledged to limit global warming to “well below” 2°C. The deal committed states to work towards a safer global temperature of 1.5°C to protect the most vulnerable people from the worst impacts of global warming.

But implementing such a self-preservation strategy in a world where nearly 90% of the energy infrastructure has already been put in place will be very expensive. The study found that the world would gain $756-422tn by 2100 if the Paris accord is put on course to limit warming to 1.5°C, but it will cost $3.36-4.22tn.

“Without the upfront investment, emissions cannot be reduced, and the climate damage will occur with higher probability, which will result in huge economic loss,” he said. Writing in a peer-reviewed journal Nature Communications, an international team of climate experts simulated the costs of global warming and to make breakthroughs in low-carbon technology, such as warming of 2°C and 1.5°C respectively.

They found that the world would gain $765-422tn by 2100 if the accord is put on course to limit warming to 1.5°C, but it will cost $3.36-4.22tn. The study also found that the world would gain $2-1.56tn by 2100 if the accord is put on course to limit warming to 2°C.

“Without the upfront investment, emissions cannot be reduced, and the climate damage will occur with higher probability,” said lead author and Carnegie Mellon University professor S. J. Dowlatabadi, who led the research.

The study’s findings come as the world is heading for a 3°C warming by the end of the century, according to the Intergovernmental Panel on Climate Change’s (IPCC) latest assessment. The Paris accord’s failure to meet its goals could cost the world $600tn, the study found.

On its second anniversary, Qatar National Community continues to support the nation.

**Hunger for ‘good news’ grows as pandemic woes deepen**

B y atención grab headlines, flattening statistics and the drying up of the pandemic’s early controversies, many people appear to be losing interest in the news. "People are seeing so little of positive, interesting things happening in their neighborhoods, in their cities, in their states, as we come so much closer down, this is a time for us to count our blessings and look out for each other," said Dr. John Kinsella from the University of New South Wales. "It’s a time for us all to celebrate, to support each other, to propagate hope rather than despair."

With the outbreak slowing down, people are becoming more interested in the news, especially if it’s about local. "We are seeing more people following local news, especially in terms of what’s happening in their own neighborhoods," said Dr. Richard Johnson from the University of Delaware. "People are more interested in what’s happening close to home than what’s happening on the global stage."
A Qatari, a melting pot of various communities, is witnessing a surge of awareness campaigns against the novel coronavirus (Covid-19). The country has reached out to nearly every community to raise awareness about the pandemic.

The Ministry of Interior (MoI) is providing daily updates through social media platforms, apart from posters and videos posted on branches and in Doha, Sharjah, City of Mist, Tawas, Najma, Filipinos, Bangladeshis and Pakistanis. The ministry also invited members of the Supreme Committee for Crisis Management (SCCM), led by Mohamed Almulla, to help ensure the health and safety of citizens and residents.

Qatar was praised by government officials saying, “We are pleased to share the information with the communities and everyone needs to serve their role in preventing the spread of the virus.”

Meanwhile, various community organisations have praised the government for carrying out the necessary awareness initiatives in different languages and spreading awareness through the ministries, “said Indian community leader.

With the launch of the novel coronavirus (Covid-19) Information Service on WhatsApp in ten languages (Arabic, English, Urdu, Hindi, Bengali, and Malaysian), the new platform is free-to-use, providing a central source of information, updates and up-to-date information about Covid-19.

The automated “chatbot” service allows citizens and residents to get answers to the most common questions about Covid-19 and the latest news.

The government is working in close coordination with the Ministry of Health (MoPH) and the National Council for Women Affairs.

A number of billboards have been installed across some of Doha’s main streets as part of the awareness campaign against the novel coronavirus (Covid-19). PICTURES/ Rashedah Alkhateeb

Al Meera opens doors of latest branch at The Mall

With salons shut, demand surges for DIY hair clippers, trimmers, shavers

The demand for hair clips, trimmers and shavers continues to soar as many customers are looking for alternatives to go to the hairdresser during this period of self-isolation. Whether your hair is out of control or you simply want to try a new style, there are a number of options available. Hairdressers have noticed a significant increase in the demand for hair grooming equipment since the start of the pandemic, with more people opting to cut their hair at home rather than going to the barbers. As a result, there has been a shortage of hairclippers, trimmers and other grooming products.

According to a recent survey by the Qatar Statistics Authority, the number of hairdressers in Qatar has decreased significantly due to the pandemic. The number of hairdressers in Qatar has decreased by 30% since the start of the pandemic, with many closing their businesses to avoid the spread of the coronavirus. In addition, many customers have turned to DIY haircuts, with the number of at-home haircuts increasing by 50% in some areas.

As a result, there has been a shortage of hairclippers, trimmers and other grooming products. Many customers have had to seek alternative solutions, such as using scissors or electric hair clippers. In some cases, people have even had to resort to using a pair of scissors to cut their hair. As a result, there has been a significant increase in the demand for hairclippers, trimmers and other grooming products.

Meanwhile, local pharmacies have reported a 40% increase in the sale of hairclippers, trimmers and other grooming products. In addition, many customers have turned to online retailers, with sales of hairclippers and trimmers increasing by 50% in some cases.

As a result, many customers have had to seek alternative solutions, such as using scissors or electric hair clippers. In some cases, people have even had to resort to using a pair of scissors to cut their hair. Ministries, govt entities go green for Family Day

A report on QNA said the SJC celebrated Family Day in Qatar as an occasion to highlight the active role played by the family in preserving the society. The SJC’s celebration of the occasion confirmed the role of the family in safeguarding social and psychological repercussions of the coronavirus, supporting psychological and social stability and enhancing family cohesion to overcome the current challenges.

The council’s celebration also highlighted the importance of family cohesion, the shared responsibility of all its members and the active role of the family in Qatar society. The Supreme Judiciary Council lit up its main building in Lusail City and the Family Court building in green to mark the occasions. Highlighting the celebrations, the council tweeted last evening that “a family in Qatari society highlights the active role played by the family in preserving the society, maintaining safety, and stable society.”

The other participants, too, highlighted the importance of the family, in building a strong, cohesive and stable society.

Family members are seen lit up in green.

Thundershowers forecast for today

Doha and other places in the country expected to remain sunny this year, with isolated rain thunderstorms expected in some places today, along with strong winds. Thunderous rain is also likely in some offshore areas today besides slightly cloudy conditions at times.

The wind speed may go up to 50 knots offshore and 30 knots inshore today during thunderstorms, with the sea level rising to 12ft.

The latest forecast sums up cloudy conditions along with scattered rain, which may become thunderous in some places. Light dust is also likely.

The minimum temperature is expected to range from 17°C to 20°C today, and the maximum from 25°C to 30°C. The temperature is likely to drop to 16°C and 26°C, according to the weather chart.

Traffic accidents gradually extended to more areas, including Doha.

Ministries and government entities have declared emergency and advised people to call 184 for any rain water overflow on roads across Qatar.

The Ministry of Municipality and Environment印发 a number of safety advisories.

Authority (Ashghal) has chalked out measures to ensure every road user’s safety.

As forecast earlier, the conditions dictated no noticeable drop in temperature across the country.
