CORONAVIRUS COULD BE UNDER CONTROL

TikTok, Facebook users can swap, buy tickets

Qatar Airways has launched a new TikTok and Facebook feature enabling its customers to swap or buy tickets for flights.

The airline said this is a way to give customers more options.

“Before this, you had to exchange your tickets with a friend or relative, but now you can choose from a wider range of tickets,” the airline said.

In addition to the TikTok and Facebook features, Qatar Airways also allows its customers to exchange tickets through its own website.

The airline said this is a way to give customers more flexibility.

QRIdOn for FSQ entities to boost investor confidence

Qatar Airways

Qatar’s annual net profit amounted to $518m in 2021, compared with $1.5bn in the previous year.

The airline said this is due to the impact of the Covid-19 pandemic on passenger demand.

Amir holds phone talk with Merkel

The Amir held a phone talk with German Chancellor Angela Merkel yesterday.

In his congratulatory message to His Highness the Amir, Merkel expressed her deep appreciation for the efforts made by both countries in combating the coronavirus (Covid-19).

The Amir expressed his thanks and appreciation to the German Chancellor for supporting Qatar during the crisis.

The Amir also expressed his thanks and appreciation to the German Chancellor for supporting Qatar during the crisis.

Qatar Fund for Development (QFDF) sent several shipments of urgent medical aid to Congo, Afghanistan and Angola to support their efforts to contain the outbreak of the novel coronavirus Covid-19 pandemic.

The shipments, which were sent to the three countries, include medical equipment and supplies to help them combat the virus.

The shipments were sent to the three countries as part of Qatar’s efforts to support them in their fight against the pandemic.

QFDF sent the shipments to the three countries to support them in their fight against the pandemic.

**WHO call to include mental health in Covid recovery plan**

Mental health should be a major component of any recovery plan, a global news staff reporter by Mishal Husain, global news national; Paul Farmer, CEO of Alzheimer’s Disease International and Dr. Kestel Roberts, Chief of Staff for Global Environment Programme, have said.

“Mental health care has been repeatedly ignored and is at risk of being left out of any recovery plans,” said Dr. Kestel Roberts.

Speaking at the virtual event, “Global Perspectives: Mental Health in a Covid-19 World,” organized by Qatar Foundation’s Education City Spokesperson Series in collaboration with World Innovation Summit for Education, the speakers emphasized the need to focus on mental health during and after the Covid-19 pandemic.

“Mental health is a major component of what we are discussing. This has to be a core part of any recovery plans,” said Dr. Kestel.

“Mental health problems will be underdiagnosed if it is not addressed. We need to think about what we can do to prevent further mental health problems, and for those with pre-existing conditions, we need to make sure their identification remains effective,” he highlighted.

The interactive session included vulnerable groups of workers in different regions.

**Chief of Staff meets UAE commander**

On the occasion, the Qatar Fund for Development (QFFD) has sent urgent medical aid to Albania to support the country’s efforts to deal with the Covid-19 crisis.

The QFFD has supported Albania’s efforts to contain the spread of the coronavirus in the country by sending medical aid to the South-Eastern European nation from its stockpile.

The aid includes personal protective equipment, medical kit, diagnostic equipment, and other medical supplies.

The QFFD’s efforts to support Albania’s healthcare system are part of its ongoing commitment to provide humanitarian aid to countries in need.

**Minister reviews Qatar-UAE bilateral relations**

During a recent meeting in Doha, Qatar’s Minister of State for Foreign Affairs and the United Arab Emirates’ Minister of State for Foreign Affairs reviewed the ongoing bilateral relations between the two countries, and underscored the importance of maintaining close cooperation between Qatar and the UAE, especially in the wake of the spread of the coronavirus pandemic.

The meeting was attended by a number of journalists from the Arab and international media.

**Qatar sends medical aid to Albania**

Qatar has sent medical aid to Albania in its efforts to support the country’s fight against the Covid-19 pandemic.

The aid includes personal protective equipment and medical supplies.

**MoPH: Effective contact tracing key to Covid-19 response**

It is of utmost importance that the public co-operate with MoPH and the MoPH staff to ensure that the fight against Covid-19 is successful.

“W e are now seeing a big increase in cases of Covid-19, which is not only affecting the health of individuals but also the economy and society as a whole. “We need to act quickly and effectively to control the spread of the virus,” said a MoPH official.

The official emphasized the importance of effective contact tracing in identifying and isolating those who have been exposed to the virus.

**Qatar’s proactive measures to reduce ozone-depleting substances committed**

The Ministry of Municipality and Environment, in cooperation with UNEP, has implemented these proactive measures recently to advance the curtailment of the Covid-19 pandemic.
**Indian embassy announces flight schedule for next week**

**Tobacco Control Centre warns about dangers of medwakh**

Dr Ahmad al-Mulla, a smoking cessation specialist at HMC, said that smoking is a habit that is difficult to break, and that the Centre has received complaints from patients who have been trying to quit for months. He also warned that medwakh, a water pipe used by some Arab countries, poses a serious health risk.

Medwakh smoking is a practice that is widespread in some Arab countries, and it poses a serious health risk as it exposes the smoker to high levels of smoke. Medwakh is one of the main sources of exposure to smoke, along with cigarettes and shisha.

Dr Ahmad al-Mulla said that medwakh has a high nicotine content, which makes it addictive, and that the Centre has received complaints from patients who have been trying to quit for months. He also warned that medwakh is a serious health risk, and that it should be avoided at all costs.

QNL aims to strengthen global partnerships, says president

The Diplomatic Institute of Qatar (QNA) has published a new magazine, ISSN No. 41 in Arabic and English called Al Diplomacy Magazine. The first issue of the magazine contains comprehensive peace agreement in Afghanistan, and includes a follow-up to the two phone conversation between the Afghan President Ashraf Ghani and the Qatari Emir, Sheikh Tamim Bin Hamad Al-Thani, which confirmed that the execution of the agreement in Afghanistan is the priority of all parties. In addition, the magazine contained an interview with HE ambassador Mohamed Al-Rahimi who was forced to leave his post due to the COVID-19 pandemic.

QNA aims to strengthen global partnerships, says president

Dr Hamad bin Abdulaziz al-Mana’een, Deputy Prime Minister and Minister of Foreign Affairs and International Cooperation, called on the sponsorship of farm licence holders to contribute to the establishment of the Animal Resources Department (ARD). This comes in response to the latest movement of the Animal Resources Department (ARD) to call on the farm licence holders to contribute to the establishment of the Animal Resources Department (ARD).

Dental services are limited to urgent or emergency care only. For all routine appointments are currently not available. Many new patients have consulted the Ministry of Municipality and Environment's (MME) call center. The programme is designed to provide students with the skills and knowledge necessary to succeed in the globalized economy.

Green Tent holds seminar on ‘Impact of Disasters’ in Times of Viruses’...
T he regional office of Qatar Charity in Turkey, in cooperation with the United Nations Development Programme (UNDP), has completed a youth vocational training program within the framework of a project involving infrastructure improvement and livelihood enhancement in the camps of internally displaced persons (IDP) in northern Syria.

The project aims to protect the displaced in the camps from winter flooding, by rehabilitating a range of roads that link the refugee camps near the Syrian-Turkish border, maintaining water drainage networks around these roads, strengthening the capabilities of the displaced youth through training, and giving them job opportunities to monitor the maintenance of the rehabilitated roads and networks.

The UNDP implemented the project, in cooperation with several humanitarian organizations, including Qatar Charity, which conducted vocational training and provided job opportunities for the trainees from the camps. The engineering teams have recently completed the training of 150 young men and 50 young women. The young trainees were divided into 6 groups. Three groups were trained on the road maintenance techniques and works, while the other three groups were trained on water drainage works. The last two groups of young women were trained on administrative activities.

Training Program

The pieces of training included theoretical and practical aspects. In the theoretical part, the errors and problems, which need to be solved and corrected during maintenance work, were presented. Due to the coronavirus (COVID-19), it was decided to complete this part remotely to ensure the safety of the trainees and promote the concept of social distancing.

However, in the practical part, which lasted for several days, the trainers put the engineering solutions and plans covered in theoretical exercises into practice on the ground.

During the practical training, the trainers took into account all preventive measures such as wearing gloves and masks and using sanitisers to prevent infection and curb the spread of COVID-19, in addition to reducing the number of trainees to a minimum and maintaining social distancing.

Road Maintenance

Ahmed Al Ansari, 26, one of the trainees on the road maintenance program, said the training provided him with the necessary information on the types of roads such as main roads, secondary roads, and feeder roads, and on how to deal with potholes. Al Ansari studied engineering for two years at the College of Civil Engineering, but he could not complete his studies because of the current situation.

Qatar Charity provides vocational training for displaced Syrian youths

Best Buddies in Ramadan: Qatar Charity’s Apps & Publications

A s the holy month of Ramadan is a season to increase your rewards, we have brought to you the best buddies that will help you spend your time in a better way and do more good deeds during this month.

1 - Ayamy App

The "Ayamy," which means "My Days," is an interactive cultural and religious encyclopedia designed to be your companion throughout the year. It provides a number of services such as prayer times, directions of-Qiblah, and supplications, in addition to fatwa services. It also includes many digital books that suit different interests and ages of family members.

The app shares the most beautiful moments in Ramadan, through the reminder service and a calendar showing the times of prayers, fasting, and breakfast, etc. during Ramadan.

2 - Hadith App

The Hadith app provides you with all the sayings of the Prophet Muhammad, peace be upon him, and it is based on the nine books of Hadiths.

Features of the App: It is easy to use, search, index, number, reference, display, share with friends and followers via social networks, and saves to favorites.

Internationally Awarded Digital Initiatives

Qatar Charity has won 20 international awards for its digital initiatives to help people do good easily and make a contribution to providing the due amount to lighten the sorrow of the sorrowful.

The 2020 plan of Qatar Charity aims at training more than 2,500 displaced persons, both male, and female, in northern Syria.

Awards for Digital Initiatives

In addition to Dal Ala Al Amir, Ahbar, Ghaith, Daily Charity, and Meter & Co., several digital initiatives in Qatar have already published, here are some other initiatives as follows:

Project Implementation

Through its website (www.qcharity.org) and official mobile app, Qatar Charity gives the opportunity to donors to pay the value of their charitable projects in installments according to their situations, and encourages them to support projects that they choose for themselves or in the memory of the beloved ones. A donor can choose the value of an installment to pay monthly, provided that the required value for the completion of the project is to be paid. Urgent

A winner, which appears at Qatar Charity’s website (www.qcharity.org) and official mobile app, allows donors to find out urgent humanitarian cases within the State of Qatar, and contribute to providing the due amount to lighten the sorrow of the successful.

The Hadith app is available in Arabic, English, and French, and the Ayamy app is available in Arabic and English.

Qatar Charity releases 22nd issue of ‘Ghiras’ magazine in a new look

The twenty-second issue of the ‘Ghiras’ magazine, which is published by Qatar Charity in Arabic and English, has come out in a new look with a new developmental leap in the graphic layout and content.

The issue has brought many articles penned by prominent writers, interviews with significant figures, book reviews, success stories, and reports on Qatar Charity’s humanitarian activities worldwide.

The issue also includes an interview by Dr. Ali bin Samah Al Mari, Chairperson of the National Human Rights Committee (NHRC) on the efforts of the NHRC in promoting human rights in Qatar educationally and legally, the integration of its efforts with that of charitable institutions to preserve human dignity, especially during crises, and the international community's trust enjoyed by the Qatari humanitarian organizations.

The issue also has reports on the coronavirus (COVID-19) pandemic and on Qatar Charity’s efforts locally and globally in the fight against the pandemic, in addition to a success story on how an anti-rioters brings back a dignified life to a family of six in Mirqab, and the robot project to advance education in Palestine.

Besides, the issue includes an interview with the CEO of Qatar Charity, Yassous bin Ahmed Al-Kuwari, on the 2020-2020 strategy to enhance the global presence of Qatar Charity, and its plans to strengthen its international partnerships and open its field offices across the world.

Eng. Khalid Al-Haseem, coordinator of the Water, Sanitation and Early Recovery Department at Qatar Charity’s office in Turkey, said that the trainees would attend a boot camp, after which 80 young people will get job opportunities for a period of six months, to carry out road and water drainage network maintenance in 51 camps in northern Syria. He also noted that 20 young women would also be selected to contribute to carrying out the administrative tasks of the project.

The Hadith app is available in Arabic, English, and French, and the Ayamy app is available in Arabic and English.

QU-CAM e-seminar ponders material sciences, Covid-19

Qatar University’s Centre for Advanced Materials (QU-CAM) started the opening session with remarks on materials sciences and their importance in various areas. It also shed light on the role of the centre in building a sustainable community through contributing to the challenges of today’s world.

In his speech, Dr. Nasser bin Abdullah al-Kuwari, head of QU-CAM, started the opening session with remarks on materials sciences and their importance in various areas.

He also commented on the current collaboration with the Qatar Electricity and Water Company (QEW). The centre has established a water technology unit to initially benefit from its research potential and the company’s capabilities and support in areas of water desalination.

The centre has equipped the water desalination unit to initially benefit from its research potential and the company’s capabilities. The centre shed light on collaboration with Dr. Abu Bakr al-Nuaimi, another researcher at the centre, to desalinate drinking water using a specific technology to remove different contaminants from the source water, including salt.

The centre also shed light on collaboration with Dr. Abu Bakr al-Nuaimi, another researcher at the centre, to desalinate drinking water using a specific technology to remove different contaminants from the source water, including salt.

**Vitamin D and The Pandemic**

By Dr. Luke Al-Sulaiti

Just a couple of weeks ago, I wrote a column about sunscreen and the sun, and how Vitamin D production is key to our immune system, and how you can benefit from the sun. From what I can tell, most people are still taking advantage of our warmer weather.

**Why is Vitamin D important?**

Vitamin D is what our body uses to make the calcium and phosphorus that are needed for the development and maintenance of bone health. This vitamin is also fundamental for the immune and nervous systems, and is crucial for muscle function. It also helps with the absorption of many micronutrients, and is essential for the proper functioning of the body’s cells. The vitamin D in our diet comes from two main sources: the sun (sun exposure) and fortified foods.

**How much Vitamin D do we need?**

The recommended daily intake of Vitamin D is 15 micrograms (600 IU) per day for adults and children. However, this amount may not be enough for everyone, depending on factors such as age, sex, body weight, skin color, and lifestyle.

**Sources of Vitamin D**

Sun exposure is the primary source of Vitamin D, as the skin produces this vitamin when it is exposed to ultraviolet B (UVB) rays from the sun. Foods that are rich in Vitamin D include fatty fish, such as salmon, mackerel, and tuna; egg yolks; fortified dairy products, such as milk and yogurt; and Fortified foods, such as some cereals and juices.

**Benefits of Vitamin D**

Vitamin D is known to boost the immune system, reduce the risk of osteoporosis, and help with the absorption of calcium. It also helps to reduce the risk of chronic diseases, such as heart disease and diabetes.

**Conclusion**

Vitamin D is an essential nutrient that helps maintain overall health. While sun exposure is the primary source of Vitamin D, it is important to consume fortified foods and supplements, especially during the colder months.

---

**Wellness Meal Plan**

**Breakfast:**

- Avocado Toast: 4 slices of whole wheat bread, smashed avocado, salt, and a drizzle of olive oil. This is a great way to start your day with healthy fats and纤维.

**Lunch:**

- Grilled Chicken Salad: 4 oz grilled chicken breast, mixed greens, cherry tomatoes, cucumber, red onion, and a lemon vinaigrette dressing. This meal is high in protein and vegetables, providing you with a well-balanced meal.

**Dinner:**

- Baked Salmon: 4 oz salmon fillet, roasted with a mix of olive oil, lemon juice, and herbs. This is a great source of healthy fats and protein.

---

**Exercise:**

- 30 minutes of moderate exercise, such as a brisk walk or cycling.

---

**Dr. Luke Al-Sulaiti**

The author is a consultant and author of the book “The Power of Sunlight.” He is a wellness advocate and a lifestyle coach, and he believes that sunlight is a powerful tool for health and well-being. His website is [www.lukesulaiti.com](http://www.lukesulaiti.com).

Tunisia relaxes curfew with Covid-19 outbreak slowing

Tunisia has announced a reduction of its nightly curfew hours, state media reported yesterday, after three consecutive days without registered infections and as authorities are planning the release of government prisoners.

The North African Democracy Union has ordered the closure of all mosques in the country, which was closed on March 18 due to the pandemic. Some 20,000 worshippers spilled out into the streets of Tunis yesterday to attend Laylat al-Qadr prayers, one of the holiest nights during the fasting month of Ramadan, outside a mosque in the capital. Tunisia has registered 298 new coronavirus infections in eight provinces during the past 24 hours, bringing the total to 13,674. The death toll from the virus is 413, and 11,253 recoveries have been confirmed.

On Monday, the government announced a reduction of the nightly curfew from 8pm to 6am, starting today. The move came after the country recorded no new infections in 48 hours. Tunisians are under tight restrictions until further notice.

Kuwait reports seven deaths and 751 new virus cases

Kuwait has registered 751 new coronavirus infections in the last 24 hours, taking the total cases so far to 7,465. Kuwait has reported 751 new coronavirus infections, including 17 deaths, according to the ministry. The ministry has urged all to adhere to social distancing measures imposed by the government, in addition to wearing masks, as also urging all to avoid gatherings, as well as adhering to all government guidelines.

Israel adjourned its parliament on Monday evening, marking the end of a three-month coronavirus lockdown, under which citizens were restricted to leaving their homes for work and medical care. The new government plans in coming weeks to move quickly in order to help Netanyahu and incoming defence minister, Naftali Bennett.

Kuwait has reported 751 new coronavirus infections in the last 24 hours, bringing the total to 7,465. The death toll from the virus is 75, and 6,965 recoveries have been confirmed.

Iran govt reopens mosques for holy Ramadan nights

Iran reopened the mosques for holy Ramadan nights, the head of the Islamic Culture and Education Organization (ICEO) in Tehran, said. The ICEO is a non-governmental organisation that aims to provide religious education and cultural services.

Hezbollah chief says Israel waging battle against missile sites

Israel began its military campaign in Syria in 2011 when it annexed the Golan Heights, a border area that it captured in a 1967 war. The Palestinians have rejected the “Trump administration” proposals.

Palestinian teens dead

the chamber of advisers of the ruling Democratic Constitutional Rally (RCD) President Habib Bourguiba, minister of culture, minister of information and former Arab League chief Klibi died last year following mass protests against his rule. A transitional administration since 2011 between government forces and rebels complaining of marginalisation, SUNA reported. South Kordofan has been the scene of a deadly conflict dia reported yesterday, AFP reported. SUNA news agency said livestock theft has been on the rise. At least 26 killed in a clash in southern Sudan.

The Qur'an is the everlasting miracle

The Qur'an is the everlasting miracle of the Prophet Muhammad (sallallaahu 'alaihi wa sallam) to the worlds above and below, and it has been the source of peace for most of the Companions, may Allah be pleased with them, and all who have come after them. The Prophet (sallallaahu 'alaihi wa sallam) said: 'Seek Laylat Al-Qadr in the last ten days of Ramadan.'

Laylat Al-Qadr is the last ten days of Ramadan, after the reduction of the 'Umra season by the Prophet (sallallaahu 'alaihi wa sallam), and the Prophet (sallallaahu 'alaihi wa sallam) said: ‘Seek Laylat Al-Qadr in the last ten days of Ramadan.’

It is most likely to be on the night of the 27th, according to the Prophet (sallallaahu 'alaihi wa sallam), who said: 'Seek Laylat Al-Qadr in the last ten days of Ramadan.'

The Prophet (sallallaahu 'alaihi wa sallam) said: 'Seek Laylat Al-Qadr in the last ten days of Ramadan.'

Zakat al-Fitr amount set at QR1

The Zakat al-Fitr amount set at QR1 for the Eid al-Fitr 2021 has been approved by the Ministry of Finance and National Economy. The amount is a fundamental component of the Zakat system in Islam, which is a voluntary tax paid by Muslim taxpayers to support the poor and needy. The amount is calculated based on the average income of the country and is determined by the government. The amount can be paid in cash or in kind, and it is considered a mandatory requirement for all adult Muslim taxpayers who have income above a certain threshold. The amount is calculated based on a fixed percentage of the total income, and it is deducted from the taxpayer's income or assets before the calculation of the total tax liability. The amount is paid in cash or in kind, and it is considered a voluntary contribution to support the poor and needy. The amount is calculated based on a fixed percentage of the total income, and it is deducted from the taxpayer's income or assets before the calculation of the total tax liability. Washington

President Donald Trump’s move to pull the US out of the Paris climate agreement, announced on June 1, could have far-reaching implications, the US ambassador to the European Union has said. "The Paris agreement is a global compact that represents the world’s commitment to fighting climate change,"不可否认。"The accord is a practical, evidence-based plan that will help to reduce the worst impacts of climate change, and it is a major step forward in the fight against climate change," the US ambassador told Gulf Times.

Washington

There was a lot of talk in the media about the Trump administration’s decision to withdraw from the Paris Agreement, but the reality is that the US has already been preparing for this move for some time. The US is one of the largest emitters of greenhouse gases, and withdrawing from the agreement would give the US a chance to reassert its leadership role on climate change.

The global community is increasingly concerned about the impact of climate change, and the US withdrawal is likely to be seen as a major setback. However, the US is not alone in its actions. The United Kingdom, Japan, and India have all made significant commitments to reduce their greenhouse gas emissions in the past few years, and it is likely that other countries will follow suit.

The US is also facing significant economic and social challenges as a result of climate change. The impacts of rising sea levels, increased flooding, and more frequent extreme weather events are causing significant damage to infrastructure, agriculture, and public health. The US government has been slow to respond to these challenges, and the withdrawal from the Paris Agreement will only make things worse.

In addition to its impact on the global environment, the US withdrawal from the Paris Agreement is likely to have significant implications for the US economy. The US is a major player in the global economy, and its decision to withdraw from the agreement could have significant economic consequences for the US and other countries.

On Monday, the US ambassador to the European Union told Gulf Times that the US withdrawal from the Paris Agreement was a "disappointing" move. "We are disappointed with the US administration’s decision to withdraw from the Paris Agreement," the ambassador said. "The agreement is a crucial part of our global effort to address climate change, and we hope that the US will reconsider its position in the future."
Facebook apologises for role in 2018 Lanka unrest

Facebook has apologised for its role in a 2018 incident that left social media users reeling from a deluge of misinformation. The company's chief executive, Mark Zuckerberg, said in a statement released on Tuesday that “133 million users of Facebook and Instagram in Sri Lanka experienced a surge in misinformation and violence directed against Muslims.”

The statement comes after a recent report by Facebook's independent fact-checking team found that the company had a role in the 2018 Sri Lanka unrest, which saw over 300 people killed and hundreds injured.

The report found that Facebook had failed to take action to remove the “false, abusive and misleading content” that spread online. This content included hate speech, false information and violent content.

“The company's failure to moderate content and delete false, abusive and misleading content was a key factor in the spread of violence in Sri Lanka,” the report stated.

The company has been under pressure to take more action to prevent the spread of harmful content on its platforms. In a statement, Facebook said it had taken several steps since the 2018 unrest to improve its content moderation policies and procedures.

“Since the 2018 incident, we have made significant improvements to our content moderation policies and procedures,” the company said.

The statement also mentioned that Facebook had increased its staff on the ground in Sri Lanka and hired independent fact-checkers to help verify the accuracy of content.

However, many Sri Lankan citizens have expressed dissatisfaction with Facebook's response to the crisis. They have called for the company to do more to address the growing problem of misinformation and hate speech.

The statement from Facebook is seen as a step towards addressing concerns about the role of social media in spreading violence and misinformation, especially in the wake of recent events in Myanmar and other countries where similar incidents have occurred.

Facebook's apology comes amid growing pressure on social media companies to become more responsible for the content that appears on their platforms. The company has faced criticism for its role in spreading misinformation and hate speech in the past, and many have called for it to take more action to prevent such incidents in the future.

The statement from Facebook is likely to be seen as a positive step, but many will be watching closely to see if the company follows through on its promises to improve its content moderation policies and procedures.
Chinese city of Jilin on high alert for Covid-19

Slowly but steadily, China strives to make widespread testing the new normal

A staff member wearing protective gear speaks with a truck driver at an exit of a highway in Jilin.

A notification Chinese city Jilin has partly lifted some virus restrictions after a string of fresh outbreaks in the area of Jilin city, put out an urgent statement on Tuesday, with three linked to an unspeciﬁed period of “strict measures to leave the city if they have movements set to be lifted in New Year holidays.” The measures are meant to prevent any new infections, and our entire society should “reconsider our distancing policies, and to also put passengers at ease,” Kim said.

Blinding dentists pull hundreds of healthy teeth

Family of patients from the surgery eventually managed to force their way into the failed hospital and found the baby was alive.

The astonishing extra cost to BAE Systems to build the National Audit Office’s building was made by the accountants of the National Audit Office earlier this year. The office was warned that the bill could escalate by a further £1.3bn.

But Belfast is a new entry at number three on the list, which is a present to the animal rich that comes on a Sunday.

The wealth of patients has had a modest but significant effect on dentists, who now find themselves extracting more healthy teeth than ever before.

Three-day-old baby dies as mum catches coronavirus

Guardian News and Media

London

A three-day-old baby died last week after her mother caught coronavirus, and had been hospitalised with symptoms of the disease before giving birth. The baby, whose parents are both healthy, was born with a low heart rate and was admitted to hospital on Monday. The inquest at Pontypridd coroners’ court was told that the baby was born with a heart rate of less than 50 beats per minute, and that she died of hypoxic ischaemic encephalopathy.

**EU seeks open European borders to save tourism**

As a result of the COVID-19 pandemic, travel restrictions have had a significant impact on the tourism industry, with many countries implementing border controls and flight cancellations. This has led to a decrease in tourism revenue and job losses for travel agents and other industry workers. Some countries, such as Germany, have noticed a decrease in hospital admissions and a reduction in the number of patients requiring hospitalization due to COVID-19. This has led to a discussion about whether it is safe to reopen borders and restart travel.

**Merkel urges Germans not to jeopardize coronavirus achievements**

As the pandemic continues to affect the world, German Chancellor Angela Merkel has urged her countrymen to continue following safety measures to prevent a resurgence of COVID-19. Merkel, a trained physicist, has been closely watching infection rates and hospitalizations, which have remained lower in Germany compared to other European countries. However, she has warned that the virus can be dangerous and that people must continue to take precautions to protect themselves and others.

**Russian woman, aged 100, beats Covid-19**

In Moscow, a Russian woman has become the oldest person to recover from COVID-19. The woman, who is a resident of a nursing home, was discharged after being treated for more than two months in a hospital. She has since returned to her home and is now able to go out and visit her family members. This is a significant achievement in the fight against COVID-19, as the virus has been known to be especially dangerous for older adults and those with underlying health conditions.
Russia reports 10,028 new coronavirus cases

Russia reported more than 10,000 new coronavirus cases yesterday, continuing a grim trend that has seen the country register the second-highest number of infections to 242,271. Russia has recorded more than 10,000 new cases over the last 21 days, including Russia's second-highest number of infections to 242,271. Russia's deputy prime minister overseeing healthcare, Tatyana Golikova, yesterday said Tuesday’s increase in new cases was 10,028, bringing Russia's total new coronavirus cases for the day left five dead.

Merkel cites 'hard evidence' that Russian hackers targeted her

Merkel has always stressed her commitment to democracy and the rule of law around the world, and has repeatedly called for an end to the widespread use of surveillance technology. In this case, disease, which is a major player in the spread of the virus, was the main driver. The speed of the virus’s progression was due to the combination of infection pressures, low immunity, and the availability of vaccines. The situation is expected to worsen in the coming months, with the spread of new variants of the virus. In a clear warning to Russia, Merkel has urged an end to the widespread use of surveillance technology. In this case, disease, which is a major player in the spread of the virus, was the main driver. The speed of the virus’s progression was due to the combination of infection pressures, low immunity, and the availability of vaccines. The situation is expected to worsen in the coming months, with the spread of new variants of the virus. The assembly, where President Emmanuel Macron’s centrist party has a majority, adopted the bill by 289 votes to 87. France's Constitutional Council has also struck North Atlantic Treaty Organization (Nato) members, had warned. The new projections for both horizons are significantly higher than those noted.

France's Constitutional Council has also struck North Atlantic Treaty Organization (Nato) members, had warned. The new projections for both horizons are significantly higher than those noted. Greenland and West Antarctica have shed trillions of ice today than in the 1990s, as scientists measure global warming. The “Office québécois de la langue française” also recom- mend that “la” be used with the article “la” not “le”. Use of the feminine form, such as “la maladie” in the language, has been used with the article “la” not “le”. Use of the feminine form, such as “la maladie” in the language, has been used with the article “la” not “le”.

The French Academy says Covid-19 is feminine

In French, every noun has a gender, and this includes the noun created by the novel coronavirus. Gender in French – to be used with “la” or “le” – is used in the feminine form of the French language, which has been used with the article “la” not “le”. Use of the feminine form, such as “la maladie” in the language, has been used with the article “la” not “le”.

Italy who new a bicycle to buy get up to €500 from government

The Italian government will offer a 50% subsidy, capped at €500, for people who buy a new bicycle or electric scooter or sign up for bike-sharing services. The subsidy will be limited to residents of larger cities with at least 50,000 inhabitants, and aimed at supporting green mobility in the post-pandemic phase. The subsidy will also include requirements for local authorities to make it easier for local authorities to create new bike lanes. If they fail, convert alternative ways of commuting like cycling. The assembly, where President Emmanuel Macron’s centrist party has a majority, adopted the bill by 289 votes to 87. France's Constitutional Council has also struck North Atlantic Treaty Organization (Nato) members, had warned. The new projections for both horizons are significantly higher than those noted.

Colombian ex-commander confesses to role in killings

Colombian war crimes hearings have revealed a catalogue of horrific abuses, with former General Efraín Rincón confessing to the murder of several civilians. During his time in the army, Rincón participated in a strategy of extrajudicial executions, which left thousands of victims. The hearings are part of the Post-Conflict Justice system established after the 2016 peace agreement ended a decades-long conflict.

Cuba has a biotech sector seeking to compete in the global race to develop a vaccine against COVID-19. The country’s National Institute of Biotechnology and Agrobiology is working on a potential vaccine, and the Cuban Ministry of Science, Technology and Environment has announced plans to launch a clinical trial. Cuba’s efforts are part of a broader global effort to develop and distribute a safe and effective vaccine to combat the pandemic.
Pakistan among countries with most content removal requests

Interviews

Q: Of the 6,844 content removal requests by Facebook during the first half of 2019, 2,027 contained a legal request. So, at least 72% of the content removal requests were based on legal requests. Do you see the trend continuing?

A: We are seeing a trend of increasing content removal requests. Facebook has been increasing the number of requests it's making to governments around the world to remove content. The overall trend is increasing, and it's not just limited to Pakistan. It's happening globally.

Q: Is there a specific reason why Pakistan is seeing such a high number of content removal requests?

A: Pakistan is a country with a large population and a diverse online landscape. The number of internet users is growing rapidly, and with that comes an increased demand for content removal. Additionally, Pakistan has a history of political and religious tensions, which can lead to a high number of content removal requests.

Q: How do you think Facebook should handle these requests?

A: Facebook should handle these requests in a transparent and accountable manner. It should ensure that the requests are based on clear and legitimate legal reasons and that the content removed is in line with applicable laws. At the same time, Facebook should ensure that it's respecting the principles of free speech and the right to express oneself online.

Q: What can be done to reduce the number of content removal requests?

A: One way to reduce the number of content removal requests is to ensure that the content removed is clearly in violation of the law and that the legal requests are made transparently. Another way is to promote dialogue and understanding between governments and online platforms to ensure that the content removed is in line with the law and respects the principles of free speech.

Q: How does Facebook ensure that the content removed is in line with applicable laws?

A: Facebook follows the laws of the countries where it operates. It works with governments to understand what is considered illegal content and will remove content that violates those laws. However, it's important to note that the definition of illegal content can vary widely from country to country and can be subject to change.

Q: How does Facebook handle requests from governments that it believes are not legitimate?

A: Facebook has a process in place to handle requests from governments that it believes are not legitimate. It will review the request and determine if it's in line with applicable laws and the principles of free speech. If the request is deemed to be illegitimate, Facebook will refuse to comply.

Q: What are the implications of the increasing number of content removal requests for online freedom and expression?

A: The increasing number of content removal requests has implications for online freedom and expression. It can lead to self-censorship and the suppression of free speech. It can also create a chilling effect, where people are afraid to express themselves online for fear of being removed.

Q: What steps can be taken to address the issue of content removal requests?

A: It's important to address the issue of content removal requests in a multi-stakeholder approach. Governments, online platforms, and civil society organizations should work together to ensure that the content removed is in line with applicable laws and respects the principles of free speech. It's also important to increase transparency and accountability in the process of content removal.

Q: How does Facebook's content removal policy affect users in Pakistan?

A: Facebook's content removal policy affects users in Pakistan by potentially removing content that they have posted online. Additionally, it can create a chilling effect, where users are afraid to express themselves online for fear of being removed.

Q: What can users do to protect their online freedom?

A: Users can protect their online freedom by staying informed about the laws of the countries where they operate. They should also be aware of the implications of their online actions and the risks of self-censorship.

Q: How does Facebook's content removal policy affect the online ecosystem in Pakistan?

A: Facebook's content removal policy affects the online ecosystem in Pakistan by potentially removing content that challenges the status quo. It can also create a chilling effect, where users are afraid to express themselves online for fear of being removed.

The Philippines is bracing for its first tropical storm of the year, the Department of Environment and Natural Resources (DENR) said in a bulletin.

The storm, locally named “Ambo,” is likely to hit the Philippine capital of Manila on March 28, the DENR said in a bulletin.

Each year the Philippines is hit by an average of 20 tropical cyclones, or storms, and other accidents. One of the strongest in recent years was last year’s Typhoon Molave, which killed at least 46 people and displaced more than 1,000,000 people.

The DENR said the government has already taken measures against floods and landslides, with the weather bureau predicting that the storm will intensify into a typhoon tomorrow.

“After we are confident that the weather bureau has indicated the storm is not going to cause any damage to the country,” the DENR said.

The coronavirus has delivered traumatic blows to Americans’ collective mental well-being, but there are many invisible as well. In many ways, it is just as damaging.

While it may not be as obvious as job losses and increased social distancing, the impact of anxiety, depression, addiction and other psychological trauma is significant and widespread. In many ways, the negative impact on mental health persisted over long time periods, and there is no reason to think that this will be different.

According to a recent poll, the Kaiser Family Foundation found that 30% of American adults struggle with sleep or other mental health issues. The Center for Disease Control and Prevention states that 45% of Americans have reported increased symptoms of anxiety and depression in the past year.

For example, suicide is already the 11th leading cause of death in Texas and the fourth leading cause of death for ages 15-44. On average, one person dies by suicide every two hours in the state, and, according to the Texas Department for Disease Control and Prevention, even’ted more than 1,000 drug overdoses annually in the recent past.

In the US, it is estimated that over 40% of Americans show signs of depression or anxiety, and 1 in 5 adults in the US has a mental illness – including alcoholism, drug abuse or mental disorders.

The impact of these issues on the healthcare system has been dramatic. Yet, while the demand for mental health services spikes upward as expected, we see that it is not unusual for some of the most vulnerable populations – such as rural and minority populations – to have limited access to mental health services.

While the demand for mental health services has increased, we have seen that it is not unusual for some of the most vulnerable populations – such as rural and minority populations – to have limited access to mental health services.

The US is on the cusp of a spiralling mental health crisis, experts say. More Texans die by suicide than by motor vehicle accidents. At least 290 people in Texas commits suicide, and nationwide, suicide is now the 11th leading cause of death. 2020 is expected to be a record year for deaths by suicide.

Boris Johnson’s reopening strategy confuses and frustrates

By Timhar Duggan

B oris Johnson’s much-anticipated press conference on Saturday night ended in more confusion and anger than joy. The Prime Minister, who has led the UK through one of the worst health crises in modern history, was on the verge of lifting restrictions after months of lockdown, but he ended up in a dilemma. The UK had made significant progress, but the threat from the Delta variant of coronavirus remained. The Prime Minister faced a tough decision: whether to lift restrictions or to keep them in place.

To make matters worse, the weather turned unexpectedly cold, with snow falling in many parts of the country. This added to the pressure on the Prime Minister, who was under pressure to act quickly to lift restrictions.

The Prime Minister announced that restrictions would remain in place for another week, but he also promised to review the situation again in a fortnight. This was seen as a signal that the government was not ready to lift restrictions immediately.

The Prime Minister’s announcement was met with mixed reactions. Some praised him for taking a cautious approach, while others criticized him for not going far enough.

The public was also divided. Some welcomed the news that restrictions would be lifted, while others were concerned about the risks.

The Prime Minister’s comments were widely covered on social media, with many people reacting angrily to his decision. However, some people praised him for being transparent and honest.

The Prime Minister’s announcement was also covered by international media, with many people commenting on the UK’s position on the pandemic.

As the Prime Minister faced a tough decision, it is clear that the UK’s position on the pandemic is not easy. The government is trying to balance the need for economic recovery with the need to keep the public safe.

The Prime Minister’s announcement is a reminder that the pandemic is not over yet. The UK must continue to be vigilant and work together to protect our loved ones and our communities.

The Prime Minister’s announcement is also a reminder that the pandemic has changed the way we live our lives. We must all continue to take precautions and follow the guidelines to protect ourselves and others.

The Prime Minister’s announcement is also a reminder that the pandemic has highlighted the need for a strong and resilient healthcare system. We must continue to invest in our healthcare system to ensure that we are prepared for future pandemics.

While the Prime Minister’s announcement is not easy, it is clear that the UK is taking the pandemic seriously. We must all continue to do our part to protect ourselves and others.

The Prime Minister’s announcement is a reminder that the pandemic is a global problem, and we must work together to find solutions. We must all continue to do our part to protect ourselves and others.

Takeaway back on menu with precautions

After a gap, restaurants and cafes around the country reopened in full, with some offering takeaway services. Yesterday, people were seen arriving in cars and on foot to collect food from eateries around Doha. Restaurant workers were seen wearing masks and gloves in line with the prevention measures put in place by the authorities. Customers, too, turned up wearing masks as is required. Besides, food items are being packed arriving in cars and on foot to collect food from eateries around Doha.
