Malls, shopping centres to open from 8am-8pm from tomorrow

AstraZeneca to supply Europe with 200mn doses of vaccine

Private clinics allowed to operate at 40% of capacity

Work can resume across all specialties from tomorrow

Gulf Times (Qatar) Corp (GTC) on Monday announced its 2019-2020 financial results. The company posted a net profit of QR17mn, down from QR27mn in 2018-2019, mainly due to increased operating expenses.

The results were announced on the first day of the Qatar National Day, which falls on Monday, and was attended by the company’s board of directors and senior officials.

GTC’s CEO, Abdullah bin Hamad al-Thani, said the company is working on developing new projects to diversify its revenue sources and increase its profitability.

The company’s board of directors also approved the distribution of a dividend of QR1.50 per share, which will be paid to shareholders of the company.

Bin Hamad al-Thani said the company is committed to supporting the government’s efforts to develop the country’s economy and create job opportunities for the youth.

He also praised the company’s employees for their hard work and dedication.

GTC is a leading media company in Qatar, with operations in print, digital, and broadcast media.

GTC蛰伏两年后，再次发布业绩。

GTC在2019-2020财年发布了其年度业绩，净亏损为1.71亿卡塔尔里亚尔，而2018-2019财年的净亏损为2.71亿卡塔尔里亚尔，主要由于运营费用的增加。

GTC在周一发布了2019-2020财年的业绩，当天恰逢卡塔尔国庆日，公司董事和高级官员出席了该活动。

GTC的CEO阿卜杜拉·本·哈马德·阿勒萨尼表示，公司正在努力开发新产品，以多样化收入来源并提高盈利能力。

该公司董事会还批准了每股1.50里亚尔的股息，将支付给公司的股东。

阿勒萨尼表示，公司致力于支持政府发展经济和创造青年人就业机会的努力。

他还赞扬了公司员工的辛勤工作和忠诚。

GTC是卡塔尔一家领先的媒体公司，从事印刷、数字和广播媒体。

Top South Korean honour for Qatar’s ambassador

Qatar ambassador to China Mohammed bin Abdullah al-Dehaimi in a speech at an award ceremony held at the premises of the Ministry of Foreign Affairs of the Republic of Korea.

Qatar ambassador to China Mohammed bin Abdullah al-Dehaimi said on Sunday that the top South Korean honour awarded to him was not only an appreciation of the government of the Republic of Korea for Qatar’s ambassadorial efforts but also an expression of the appreciation of the government of the Republic of Korea for the efforts made to enhance co-operation between the two countries and the positive role played by the ambassador in all the contributions made by him to strengthen the bilateral relations.

The ambassador also said that the visit to Seoul was significant for Qatar’s relations with Korea. He added that the visit, which was the first by the ambassador of the Republic of Korea to China, strengthened the bilateral relations.

The ambassador thanked the Qatari authorities for their efforts to enhance co-operation and co-operation, saying that more than half of the Qatari community in China have already reached their home countries due to the current Covid-19 pandemic.

The ambassador also thanked the authorities of the Korean community in China for their efforts to enhance co-operation and co-operation, saying that more than half of the Qatari community in China have already reached their home countries due to the current Covid-19 pandemic.”

Qatar Red Crescent Society’s QRCS has created a plan to lift restrictions and regulate the movement of citizens to fight the current fight against Covid-19. It is a sub-committee of the larger Covid-19 Crisis Management Committee and was formed to respond to the measures taken by the government. Chaired by Muna Fadel al-Khulaifi, executive director of QRCS’s Volunteering and Local Development Division, the new 15-member committee will be responsible for assessing the needs of QRCS’s field and volunteer sections to protect the country against the virus.

QRCS’s ad hoc committee to regulate work of volunteers

• QRCS volunteers ‘dedicated to protecting Qatar’

The Ministry of Public Health (MoPH) yesterday reported 55,252 total Covid-19 recoveries. The ministry reported 150 new recoveries as a result of contact with confirmed cases, bringing the total number of recoveries in Qatar to 232.

MoPH reports 55,252 total Covid-19 recoveries

T he Ministry of Health and Population (MoPH) last week announced new initiatives to combat the spread of the Covid-19 virus, beginning on June 15, to lift the restrictions that have been imposed to combat the epidemic. A four-phase lifting of restrictions in the country begins on June 15, followed by operations on July 1, then August 1, and finally September 1.

It is a sub-committee of the larger Covid-19 Crisis Management Committee. Also, the ad hoc committee underlines the importance of maintaining all volunteer management processes and procedures, as well as maintaining the protection of volunteer managers, precautionary steps and guidelines of MoPH, and reporting and response in the event of a crisis.

The ministry recommends that the adherence of all citizens and residents and the following of pertinent measures and precautionary measures are mandatory. It is also important to all individuals to wear masks and wash hands regularly, keep safe physical distance from other people, wear protective clothing, avoid social gatherings, avoid the crowded and confined spaces, and avoid contact with the sick.

The ministry states that, based on the continuous data and study of the concerned authorities in the country, Qatar will begin, starting tomorrow, June 15, to lift the restrictions imposed to combat the epidemic gradually in four stages that will last until September 1.

The Ministry of Health and Population (MoPH) yesterday reported 55,252 total Covid-19 recoveries in Qatar. Eight parks to open for sports

The Ministry of Public Health (MoPH) yesterday reported 55,252 total Covid-19 recoveries in Qatar.

Ahmed Ali al-Khulaifi, chairman of the ad hoc committee, commended the initiatives of the “Safe Step” to help “facilitate” return of activities launched by QRCS two months ago.

He believes this mechanism helped avoid crowds and made shopping easier.

In this initiative, the diversity of volunteers is considered in order to cater to different backgrounds and walks of life.” Al-Khulaifi commented.

“Volunteers are trained in how to follow and guide the public. As per the Ministry of Public Health’s guidelines, each shopping centre has to ensure that at least 20% of its staff are volunteers registered within the last 12 months.

Among the areas in which QRCS volunteers are providing services at quarantined facilities include the Ministry’s Workers’ Quarantine Centers, taking part with some of the Ministry of Municipalities and Environment’s social services, and conducting health inspections in housing districts.

Ahmed al-Salhi, head of the 9th Health Directorate of the MoPH, added that no Covid-19 positive patients have been admitted to intensive care to date, which led to the conclusion of the virus to the country.

Each stage will be subject to amendments and updates according to the latest developments in this regard. Any violations of the decisions will be subjected to legal accountability and procedural penalties.

The ministry states that the application of preventive measures remains the most important step in reducing the spread of the Covid-19 in Qatar and advises all individuals to strictly follow the preventive measures in place as stated in the statement.

QRCS volunteers stationed around shopping centres, to help in the organization of trade, temperature, disinfect markets and guide and advice social distancing,” he said.

It is also important to all individuals to wear masks and wash hands regularly, keep safe physical distance from other people, wear protective clothing, avoid social gatherings, avoid the crowded and confined spaces, and avoid contact with the sick.

Malls, shopping centres to open from 8am-8pm from tomorrow

**QF school’s 2020 graduates experience mix of emotions**

Qatar Foundation’s (QF) latest graduate cohort has experienced a full range of emotions as they prepare to leave the university. Many have expressed sadness over the pandemic, as they learn to live with new restrictions and adapt to the new normal. However, there is also a sense of excitement as they prepare to embark on new journeys after graduation.

**54 baby hawksbill turtles released to sea at Fuwairit**

The Ministry of Municipality and Environment (MME), represented by the director of the Environmental Protection Agency (EPA), has announced that 54 baby hawksbill turtles have been released to the sea at Fuwairit. The release is part of the ongoing efforts to protect and conserve marine life in Qatar.

**Deadline extended for QU admissions**

Qatar University (QU) has extended the deadline for submitting applications for undergraduate and postgraduate programs. The extended deadline is until June 10, 2021. This extension is aimed at allowing applicants more time to complete their applications.
Turkey, Russia to hold talks on Libya, Syria

T he latest round of talks on Libya and Syria is scheduled to take place in the capital of Russia on May 26, with Turkey and Russia set to uphold their existing positions. Turkey and Russia, along with other countries, have been seeking to stabilize the region through diplomatic efforts and military actions.

Russia, which has been a key player in the region, is looking to maintain its influence in Syria, while Turkey is preparing to launch an assault on the Turkish-backed Syrian National Army (SNA) in order to prevent the Turkish-occupied Libyan National Army (LNA) from collapsing. The two countries have been actively engaged in a series of talks in an effort to bring about peace in the region.

On the other hand, Syria is facing a difficult situation as it struggles with the aftermath of the civil war and the ongoing conflict with the Islamic State. The region is heavily dependent on international aid, and the situation has been worsened by the coronavirus pandemic.

Moreover, the situation in the region has been complicated by the presence of other actors, including Iran and Turkey. The two countries have been engaged in a proxy war in Syria, with Iran supporting the Syrian government and Turkey backing the opposition.

The talks are expected to focus on the situation in Libya and Syria, with both countries seeking to defuse tensions and find a path to peace.

The talks are also expected to be attended by representatives from other countries, including the United States, the European Union, and the United Nations.

The talks are an opportunity for all parties to come together and work towards a resolution of the conflict in Libya and Syria. The international community is watching closely to see if the talks will lead to a peaceful resolution.

Conflict, blinding vision response in Libya

A hand-made weapon fired by militants in Ghat, a town in the western mountains of Libya, on May 11, 2020. Militants have been engaging in a conflict with the Libyan government and its allies, resulting in widespread destruction and displacement.

Militants have been battling with the Libyan army and its allies, causing significant losses in both lives and property. The conflict has been designated as a threat to the stability of the region and the international community.

The conflict in Libya is a complex issue that has been exacerbated by regional and international politics. The situation is worsened by the presence of foreign forces and militias, who have been involved in the conflict for their own gains.

The conflict has led to the displacement of thousands of people, who are living in camps and makeshift shelters. The situation is dire, with many people facing food and water shortages.

The international community has been providing humanitarian aid to those affected by the conflict, but the situation remains dire.

The United Nations has called for an immediate ceasefire and a political solution to the conflict, but the parties have been unable to agree on a ceasefire.

The conflict in Libya is a complex issue that requires a multi-faceted approach to find a peaceful resolution. The international community needs to work together to find a solution that will benefit the people of Libya.

Rouhani decrying reduced respect for pandemic rules

P rime Minister Hassan Rouhani yesterday decried a “sloppy” attitude among Iranians towards the coronavirus pandemic measures designed to stop the spread of the novel coronavirus.

“The respect of measures by our people has greatly diminished, up to 10% of them reached the health centers of some places and played by the rules between 2 and 10%,” Rouhani said, citing a report.

“The managers and political people in some places should be considered accountable in this regard,” Rouhani said.

The health ministry yesterday announced that the coronavirus disease over the past 24 hours and 1,061 new cases of the disease in the country.

“Of course, the government of the Islamic Republic of Iran has always opposed people who break the rules of the COVID pandemic. Officials must make greater efforts against local wear, social distancing and collective Hygiene,” Rouhani said.

“I will also hold some meetings about the coronavirus pandemic today,” Rouhani said.

Iran has been one of the hardest hit countries by the pandemic in the world and it has suffered a significant economic impact due to the pandemic and the recent oil price collapse.

The government has been taking measures to control the spread of the virus, such as restricting public gatherings and imposing travel restrictions.

The president also said that the government will have to control the pandemic in the country, and that officials must make greater efforts against local wear, social distancing and collective Hygiene.

The government has been taking measures to control the spread of the virus, such as restricting public gatherings and imposing travel restrictions.

African nations call for racism debate at UN rights council

By Anthony Trosca and Daniel Muñoz, Reuters

Africa's nations have called on the UN Human Rights Council to urgently debate racism and police brutality amid the unrest in the United States. But the council will not do so until at least 2021.

Zimbabwe opposition rally opposing levy denies ended violence in DC

The military has ended violence during a rally by the Movement for Democratic Change (MDC) opposition party in Harare. The protests, which began on June 20, were sparked by the demolition of a trade union building by the police.

The MDC, which has been facing increasing pressure from the government, has called for a peaceful protest. The military has said that the situation is under control and that the protesters will be allowed to continue.

But the opposition has accused the government of using force to suppress the protests. The military has said that it is protecting public order.

The government has said that the protesters were not authorized and that they were causing disruptions. The military has said that it is ready to use force if necessary.

The economic crisis in Zimbabwe has added to the tensions. The government has said that it is working to address the situation, but has struggled to find solutions.

The opposition has called for international sanctions to be imposed on the government. The government has said that it is ready to negotiate with the opposition.

Trump ducks controversies at West Point graduation

President Donald Trump has been criticized for ducking direct mention of the racial injustice at the United States Military Academy, but his policies have not been free of controversy.

Trump has repeatedly expressed his support for policies that could be considered controversial, such as his stance on immigration and his handling of the COVID-19 pandemic. His administration has also faced criticism for its handling of the economy and its role in the ongoing conflict with Iran.

Despite these controversies, Trump has remained popular among his supporters, and he has continued to pursue policies that he believes are in the best interests of the country. The upcoming election will likely be characterized by increased political polarization, and it remains to be seen how the country will move forward in the coming years.

### Beijing district locked down after dozens test positive for covid-19

Beijing's first Covid-19 case in two months, announced on Thursday, had visited Xinfadi, Beijing's windy and wild wholesale market outside the city. The market had been largely empty for two months due to the lockdowns that were imposed after the virus was detected last year.

The market has been closed for business since the new cluster was identified, and and food safety inspection focusing on beef and fish in supermarkets, warehouses and markets. Beijing's Fengtai district has established a "war-readiness mechanism" to deal with the situation.

### Nepal House approves new map as land row with India escalates

Nepal's lower house of parliament has approved a new map of the country as the land row with India escalates. The map must also be passed by the required two-thirds majority of Nepal's House of Representatives before it can be enacted into law. The map shows a sliver of territory along the Indian border that was claimed by Nepal's House of Representatives.

### Thousands march for racial justice in Australia

A thousands-strong march of protesters called on social media in cities across Australia to join an online campaign to express their outrage over the country’s handling of the pandemic. The protesters have been marching for five weeks, and one group has been marching for more than three months.

### China sentences Australian to death for drug trafficking

China is Australia's largest trading partner, as well as a major provider of foreign aid for the country. Relations have been strained after China arrested Australian journalist Cheng Zhi, who had been covering the country's handling of the pandemic. The journalist is now on trial in Beijing.

### Seven foreigners arrested at anti-govt protest in Nepal

The protests have been in response to the government's handling of the pandemic, including its closure of the border with India and the lockdown of several cities. The protests have been met with a heavy police response, including tear gas and water cannons. The protesters have been calling for the resignation of the government and the release of political prisoners.
Govt rules out removal of controversial statues

By Aamna Mohdin

BAME communities have called for urgent publication of the Covid-19 report by the government on how to protect BAME communities from the coronavirus, but the prime minister has said there will be no removal of “offensive” statues.

In his letter to health secretary Matt Hancock, the BMA said that the lack of actions intended to address race or gender disparities in mortality rates or make recommendations on possible reasons for the disparities had been “appalling.”

PHE said the recommendations were not addressed in the final report. “We intend to both formally and informally engage with a significant number of individuals and organisations as our work continues,” PHE said.

In Poole, the council abandoned plans to remove the statue of Robert Baden-Powell, the founder of the Scout movement, which is a call for equality.

The organised protests were not the only demonstrations against perceived racism that were planned in the run-up to the 2 June. In parallel, Prof Kevin Fenton, on PHE’s behalf, warned that the coronavirus has yet to be contained in the UK and that efforts should continue to curb its spread.

By late afternoon, sirens continued to wail as hundreds of police mobilised to the Trafalgar Square square, where police had imposed strict conditions on the gathering for a demonstration against perceived racism.

“Black Lives Matter” (BLM) protests gathered pace on Friday because of allegations that pages containing the names of Robert Baden-Powell, the founder of the Scout movement, were boarded up before the publication of the final report, and could not be removed without the loss of “offensive” statues; but the protests were dissolved soon after the demonstration against perceived racism was held in the same area.

The episode, first aired in 2003, was included in the show’s 100 greatest episodes – a list that was later changed to conform with current standards of taste.

By Damien Gayle

Queen Elizabeth views a military ceremony by soldiers from the 1st Battalion Welsh Guards, to mark the 75th anniversary of the victory in Normandy, in London's Trafalgar Square.

The 94-year-old monarch and the chief of the defence staff, the Duke of Cambridge, were among those who attended.

The safeguarding proposals emerged from a review that was initially commissioned by the health secretary in 2016, after the suicide of an NHS mental health patient in 2015.

The decision to take the episode off the air was announced by home secretary Priti Patel during a press conference on Friday.

The episode, which first aired in 2003, was included in the show’s 100 greatest episodes – a list that was later changed to conform with current standards of taste.

Dr Chaand Nagpaul CBE, the chair of the British Medical Association, said the BMA had received a “number offilesystems” about the decision and had called on the government to release the full report at a time not only that it would be received as “democratic and transparent,” but also that the government would be able to act on its findings.

The episode, which first aired in 2003, was included in the show’s 100 greatest episodes – a list that was later changed to conform with current standards of taste.

EU in deal to buy 300mn coronavirus vaccine doses

AP STORY

Germany, France, Italy and the Netherlands have signed an agreement with pharmaceutical group AstraZeneca to ensure the EU will receive at least 300mn doses of a possible coronavirus vaccine, the German government announced yesterday, one of several deals the bloc has struck globally.

AstraZeneca had not yet revealed a timeframe for when it would be able to deliver vaccine supplies, but any of the doses would be reserved for EU citizens.

To win the supply deal, he said, the bloc had to show a willingness to work together.

The European Commission also signed a deal today with GlaxoSmithKline to acquire doses of its vaccine,heim.

The supplies would be made available to all 27 member states.

EU health commissioner Stella Kyriakides said that the agreement would ensure the EU’s vaccines are available to all 27 countries.

It’s the latest in a string of agreements the EU has signed to secure supplies of vaccines.

The bloc has already struck deals with Moderna, Pfizer and Johnson & Johnson.

The bloc has also reached agreements with AstraZeneca, the Swedish company AstraZeneca, the French company Sanofi and the German company CureVac.

On Friday, the EU signed a deal with BioNTech and Pfizer to acquire 300mn doses of its vaccine.

The two companies have already supplied vaccines to the US, which purchased about half of the doses.

The EU has been trying to secure enough doses to cover its population, which has topped 450mn people.

The bloc has faced criticism from countries that have secured their own vaccine doses.

The French government has also been locked in a standoff with the EU over the supply of vaccines.

The bloc has also reached agreements with AstraZeneca, the Swedish company AstraZeneca, the French company Sanofi and the German company CureVac.

India sees biggest single-day jump in virus cases

Agencies

New Delhi

India reported its biggest single-day jump in coronavirus cases yesterday, adding 4,88,348 new infections, according to data from the health ministry. In a single day since the coronavirus outbreak began, the country added more than 76,000 new cases, more than double the previous daily record of 24,426 cases. The surge in cases comes after a week of rising positive test rates in many states, particularly in southern and north-eastern states.

A four-month-old baby in Tamil Nadu has recovered from Covid-19 and has become the youngest case of coronavirus to recover in the state, the Tamil Nadu government said.

The baby, who was admitted to the Government Medical College (GMC) in Tirunelveli on May 2, had been found to have the virus on May 3.

The baby had been in contact with his mother, who had tested positive for the virus.

The baby was admitted to the GMC and was treated under the supervision of the government health department.

The baby was tested twice and found negative, and was discharged on May 15. The baby's health has been monitored regularly by doctors at the GMC.

The recovery of the baby is a positive sign for the state, where the number of active cases has been declining in recent weeks.

In other news, the Indian government has announced plans to increase the number of Covid-19 tests in the country, with a target of conducting 70 million tests per month by the end of the year.

The government has also announced plans to increase the number of Covid-19 vaccination centres, with a target of having 10,000 centres by the end of the month.

In addition, the government has announced plans to increase the number of oxygen concentrators and oxygen cylinders, with a target of having 100,000 concentrators and 1 million cylinders by the end of the month.

The government has also announced plans to increase the number of intensive care units (ICUs) and high-dependency units (HDUs), with a target of having 10,000 ICUs and 50,000 HDUs by the end of the month.

Kashmiris fed up with militancy: army chief

General Naravane's spoke on the ground that 15 to 16,000 state syllabus schools, as per the endeavour.

Varsha Naravane's, an Indian Army general, who was absconding, had come over a land dispute in the district. Marandi, 18, was one of seven members of Kisku, along with the police and army launched a joint operation in the area on the basis of a specific intelligence input. The final till June 13, 1984... resultant, the court granted his release.

C sources and intelligence officials said.
Brazil Covid-19 death toll continues to rise

The death toll from Covid-19 in Latin America and the Caribbean topped 50,000 on Friday after reporting more than 2,000 new fatalities in the past 24 hours, according to the World Health Organization (WHO).

As of Friday, the continent had recorded a total of 3,450,654 confirmed cases, up from 8,000 in March, and 511,272 confirmed deaths, up from 27 in March.

The number of fatalities has doubled since the beginning of August, and the continent remains second behind South Asia in terms of the number of deaths.

However, the region has been experiencing a steady decline in the number of new cases, with some countries already beginning to lift restrictions and return to normalcy.

Several countries, including Brazil, Mexico, and Colombia, have seen a significant increase in new cases in recent weeks, with Brazil alone accounting for more than half of the continent’s new infections.

The latest figures come as the WHO has launched a new initiative aimed at strengthening the region’s preparedness and response capacity to future pandemics.

The initiative, which is being led by the WHO’s Health Emergencies Programme, aims to improve the region’s ability to detect, investigate, and respond to future outbreaks, and to strengthen the region’s capacity to prevent and control the spread of infectious diseases.

The initiative will focus on seven key areas: strengthening health surveillance and early detection; improving laboratory capacities; enhancing case investigation and contact tracing; strengthening laboratory capacities; improving risk communication and public engagement; strengthening health systems; and improving the region’s ability to provide technical support to other countries.

The WHO has already begun working with countries across the region to implement these initiatives, and is urging all countries to take action to strengthen their preparedness and response capacities to future pandemics.

The region has also been working to develop a regional strategy to help countries prepare for future pandemics, and to ensure that the region is better equipped to respond to future outbreaks.

The strategy will be based on four key pillars: strengthening health systems; improving risk communication and public engagement; strengthening laboratory capacities; and improving the region’s ability to provide technical support to other countries.

Pakistan's literacy rate increases by 2%: Economic Survey

The Supreme Court of Pakistan in a recent judgment ruled against the Railways Secretary, who is the top civil servant of the Pakistan Railways. The court directed the railways secretary to be present in court on February 10th as the avalanche continues to rage and the section of the railway line remains closed. The Supreme Court has also directed the railways to ensure that the avalanche is cleared and the railway line is opened to traffic as soon as possible.

A cluster of coal-fired power plants in the Thar desert, which is home to one of the largest coal reserves in the world, have been generating electricity for industrial and residential use in Pakistan. However, the local community living near these plants are experiencing severe health issues due to the pollution caused by these plants. The local government has been receiving numerous complaints from the residents about the air and water pollution caused by these plants.

Pakistan’s coal-fired power plants are located in the Thar desert, which is characterized by a hot and arid climate. The plants have been in operation since the 1980s, and they have been expanding their capacity over the years. The local community living near these plants has been subjected to severe health issues due to the polluted air and water.

One day after bomb blast in Rawalpindi

The Pakistan Railway’s (PR) Board of Directors on Sunday approved several important recommendations that were made by the expert panel on regulating industries (ICCI) president Mohamed Sohail Ahmed. The recommendations were aimed at improving the railway’s financial situation and enhancing the railway’s efficiency. The ICCI president also welcomed the government’s move to give concessions to small business owners in the railway sector.

The Punjab government has announced a disappointing budget for the railway sector. The government presented a budget of Rs100,000 or more. The ICCI president also welcomed the government’s move to give concessions to small business owners in the railway sector.

**Police chief sacked**

A city police chief in the western Philippines has been sacked after a series of clashes that left a police officer dead and 14 others injured for allegedly beating up and arresting suspected drug dealers by the Environment Depart- ment. The Philippine National Police (PNP) said a day after clearer heaven was prejudiced against Balonglong, allegedly led a group of officers who interrogated and arrested the two individuals at the Brgy. Antuco Police Station, even though they were not involved in any illicit drug activities. The PNP said the two officers were quoted in a telephone conversation as saying that the two individuals were “to be arrested to prove any possibility of something against them.”

**Call for law to ban dual citizens from media ownership**

By市市H.K.Cheung

The issue is one of the grounds put forward by the Department of Justice in the ongoing application for the return of $30 billion in proceeds of a 2015 fraud trial against a former Philippine President, who is facing corruption and racketeering charges.

The Philippines and China have a long history of cooperation in various fields, including the development of vaccines. In 2019, China provided the Philippines with assistance in the development of a vaccine for the coronavirus disease (Covid-19). The Philippines has had a significant number of cases of Covid-19, with over 400,000 infections and over 12,000 deaths as of April 2021. The government has been working to develop a national vaccination strategy, and China has been a key partner in this effort.

The Philippines has been working closely with China and other international organizations to develop a vaccine for Covid-19. The country has been providing support in the form of financial assistance, technical expertise, and medical supplies. In addition, the Philippines has been working to develop its own vaccine, with the government announcing that it would begin clinical trials in September 2020.

The case of the dual citizenship of ABS-CBN Corp President and Chief Operating Officer Carlo Katigbak, who is also a citizen of another country, is in contention. The character of the key player, who certainly has allegiance to two different countries, would be prohibited from holding office, said Justice and some lawmakers that the justice department should be prosecuted for sedition. Justice and some lawmakers that the justice department should be prosecuted for sedition.

Defensor believed that the hearings “showed that allowing a Filipino, who is at the same time a citizen of another country, is immoral to national security and the state’s interest.” He countered the position of the Department of Justice and some lawmakers that the justice department should be prosecuted for sedition. Justice and some lawmakers that the justice department should be prosecuted for sedition.

Defensor refuted the claim that Congress has the authority to look into the ownership of media by Filipinos. “I think the character of the key player, who certainly has allegiance to two different countries, would be prohibited from holding office.” He further stated that in his letter to Xi, Duterte expressed gratitude for the Philippines’ support in the Covid-19 pandemic and mentioned the ongoing cooperation with China.

The exchange of letters demonstrated the importance of China and the Philippines in the global community and the need for further cooperation. The two nations have been working closely to address the Covid-19 pandemic, and the Philippines has benefited from Chinese medical expertise and supplies.

The Federal Reserve (Fed) rates are likely to remain at record lows until at least mid-2023, with Secretary of the Treasury Janet Yellen expressing confidence that the economy has weathered the coronavirus pandemic, which has already caused a drop of 0.9% in the labor market and jobs licenses.

At its June meeting the US central bank kept benchmark interest rates at 0.25% and signalled that it planned to keep them there for some time.

The Fed’s “dot plot”, which reflects the forecasts of the central bank policymakers, is showing no rate hikes this year or any time soon.

While some analysts expect the Fed to pause and assess the economic landscape before making any further actions, which could come at September’s meeting.

The central bank repeated its commitment from the April meeting that it “expects to maintain its target for the federal funds rate at this level until labour market conditions improve and it is reasonable to expect inflation will be 2% on average over time. The FOMC continues to believe these conditions are unlikely to be met until well past the end of 2022.

The Fed, according to CNBC, also said it would continue to increase its bond holdings, targeting Treasury purchases at $80bn a month and mortgage-backed securities at $40bn.

In early March, the Fed, following the example of the Bank of England, slashed the target range for its overnight funds rate to 0-0.25%, where it last stood during the financial crisis of 2008.

Professor in Economics at the University of Otago, New Zealand, also noted that many economists believed the Fed is likely to keep the rate “close to zero” for some time.

The coronavirus pandemic has brought “tremendous human and economic hardship” upon people around the globe, according to the World Health Organization (WHO).

In the past year, the COVID-19 pandemic has claimed millions of lives around the world and caused widespread economic disruptions, leading to a global recession.

The pandemic has also highlighted existing inequalities and vulnerabilities, particularly in healthcare systems and economic stability.

The WHO has called for a global response to the pandemic and emphasized the importance of international cooperation in addressing the crisis.

The WHO also urged people to adhere to public health measures such as wearing masks, social distancing, and getting vaccinated, as these measures have been shown to be effective in reducing the spread of the virus.

Low rates likely to stay as global economy faces huge challenges

Europe sets sights on dud antibody tests amid Covid-19 free-for-all

By Francesco Guarascio

TWO weeks in, governments are rushing to roll out coronavirus antibody tests in a bid to speed the process of lifting lockdown restrictions.

Antibody tests can determine whether someone has had coronavirus, and thus is likely to be immune to it, and pass on that information to national authorities.

The tests are seen as a potential tool to help countries reach herd immunity.

But many say they are nowhere near ready for widespread use, with many false negative results expected and concerns that some companies are producing substandard kits.

In Europe, where the virus's second wave is gathering pace, the region's regulators are taking action to ensure kit quality.

The European Commission announced plans last week to reinforce EU rules on the production of viral disease tests, including antibody kits.

But many academics warn that it would be a mistake to rush widespread antibody testing as a quick fix to the crisis.

Two weeks into the crisis, antibody tests are nowhere near ready for widespread use in Europe.

Orlando Figueroa, an infectious disease expert at the University of Alabama, said it was a mistake to rush antibody testing.

"Antibody tests are not the answer," he said.

"At this point, they are simply not ready for widespread use.

"However, the European Commission's action is welcome, as it recognizes the need for robust testing and quality assurance.

"The commission's move is important, as it recognizes the need for robust testing and quality assurance.

"But it is still too early to see the results of these actions.

"It is too soon to tell whether the commission's actions will have any impact on the quality of antibody tests in Europe.

"As we continue to see a rise in the number of cases in Europe, it is crucial that we have accurate and reliable testing to guide our decision-making.

"Hasty actions could lead to dangerous decisions and undermine the fight against the virus.

"We need to be patient and work together to ensure the quality and reliability of our tests.

"Our health and safety depend on it.

"The European Commission's action is a step in the right direction, but we must continue to work towards a more comprehensive and effective response to the pandemic.

"Let's work together to ensure that we have the tools we need to fight this crisis.

"Together, we can overcome this challenge and emerge stronger on the other side.

"Thank you.

"Figueroa"

"The world's largest disease epidemic has spread to over 190 countries, and is now killing more than 200,000 people worldwide.

"The disease has a high mortality rate, especially in older individuals and those with underlying health conditions.

"However, there are signs of hope.

"Recent studies have shown that antibodies against the coronavirus can provide some level of protection against reinfection.

"This has raised hopes of developing a vaccine or a treatment for the disease.

"But many experts agree that it is too early to make any definitive conclusions.

"We need more research and data to fully understand the role of antibodies in preventing or treating the disease.

"Meanwhile, governments and organizations are working to develop and distribute vaccines and other treatments.

"The United Nations has launched a global vaccine initiative to ensure equitable access to these treatments.

"Many countries have signed up to the initiative, and are working with pharmaceutical companies to develop and manufacture vaccines.

"But there are challenges.

"Some countries have difficulty in obtaining the necessary funding and resources for these efforts.

"The world's response to the pandemic is crucial.

"We need to act quickly and decisively to stop the spread of the virus and protect the lives of millions.

"Together, we can overcome this crisis.

"Thank you.

"Many countries have signed up to the initiative, and are working with pharmaceutical companies to develop and manufacture vaccines.

"But there are challenges.

"Some countries have difficulty in obtaining the necessary funding and resources for these efforts.

"The world's response to the pandemic is crucial.

"We need to act quickly and decisively to stop the spread of the virus and protect the lives of millions.

"Together, we can overcome this crisis.

"Thank you.

"The UN"

"The world's largest disease epidemic has spread to over 190 countries, and is now killing more than 200,000 people worldwide.

"The disease has a high mortality rate, especially in older individuals and those with underlying health conditions.

"However, there are signs of hope.

"Recent studies have shown that antibodies against the coronavirus can provide some level of protection against reinfection.

"This has raised hopes of developing a vaccine or a treatment for the disease.

"But many experts agree that it is too early to make any definitive conclusions.

"We need more research and data to fully understand the role of antibodies in preventing or treating the disease.

"Meanwhile, governments and organizations are working to develop and distribute vaccines and other treatments.

"The United Nations has launched a global vaccine initiative to ensure equitable access to these treatments.

"Many countries have signed up to the initiative, and are working with pharmaceutical companies to develop and manufacture vaccines.

"But there are challenges.

"Some countries have difficulty in obtaining the necessary funding and resources for these efforts.

"The world's response to the pandemic is crucial.

"We need to act quickly and decisively to stop the spread of the virus and protect the lives of millions.

"Together, we can overcome this crisis.

"Thank you.

Qatar Rail welcomes its new batch of Doha Metro trains

Additional trains will increase Metro capacity and serve future expansions

Qatar Rail has announced the arrival of 16 new trains that will boost the capacity of Qatar Rail’s Doha Metro network, with the goal of serving future expansions of the network. The new trains will be used on the Qatar Rail depot in Al Wakra for assembly and testing purposes, to be integrated later into the existing rail system.

The new trains are being produced by the Qatar Rail Depot Al Wakra Rail Depot and GTM Ltd, under the terms of the Qatar Rail depot agreement signed earlier with GTM Ltd.

The trains are part of a batch of 35 trains that Qatar Rail received in 2021, and they are designed to be compliant with the Qatar Rail standards and meet the requirements of the Qatar Rail network. The trains are equipped with advanced technology and are designed to provide a comfortable and safe riding experience for passengers.

The new trains will be used on the Qatar Rail network to increase the capacity and improve the quality of service for passengers. The trains are expected to play a crucial role in supporting future expansions of the Doha Metro network, including the planned connections to the new airport in the west of Qatar and the planned connection to the new Doha airport in the east of Qatar.

The arrival of the new trains marks a significant milestone in the development of Qatar Rail’s Doha Metro network, and it reflects the commitment of Qatar Rail to provide a world-class transportation system for its residents and visitors.

These new trains will help meet the demand for increased capacity and improved service quality on the Qatar Rail network, and they will contribute to the continued growth and development of the Doha Metro network.
