A New York police officer was suspended on Sunday after a video emerged showing him in a chokehold during an arrest.

The department said he face an investigation into whether he violated the department’s code of conduct.

The incident occurred on Saturday night when a police officer was called to a residence in the Bronx district of New York City.

The officer, who has not been identified, was involved in an altercation with a man inside the home.

According to the department, the officer placed the man in a hold and then proceeded to use excessive force.

The video, which was posted online, shows the officer punching the man repeatedly in the head and neck area.

The man can be heard crying out in pain as the officer continues to strike him.

The incident has sparked outrage among the community, with calls for accountability and justice.

The police department is investigating the incident and has launched an internal investigation.

The officer involved has been placed on administrative leave and will not be on duty until the investigation is completed.

The incident comes amid growing concern about police brutality and the use of excessive force by law enforcement agencies across the United States.

In recent years, there have been several high-profile incidents involving police officers, including the killing of George Floyd in Minneapolis.

In response, there have been calls for reforms to police departments, including increased accountability, transparency, and training.

The incident in New York is likely to fuel these calls for change, especially given the city’s history of police brutality.

The New York Police Department has been facing scrutiny in recent months, following a series of incidents involving police use of force.

These incidents have sparked protests and calls for change, with many calling for a complete overhaul of the police department.

The incident in the Bronx is just the latest in a series of incidents that have raised questions about police conduct.

As the investigation into the incident continues, it remains to be seen what consequences, if any, will be meted out to the officer involved.

However, the incident has once again highlighted the need for a more holistic approach to police reform, one that addresses the underlying systemic issues that have led to these incidents.
Ministry inspects workers’ housing in residential areas

1,245 workers’ accommodation inspected

Legal measures taken against violating firms

The Ministry of Administrative Development, Labour and Social Affairs, the Ministry of Administrative Development, Labour and Social Affairs, has carried out campaigns to inspect workers' accommodation units in residential areas.

The campaigns were implemented in coordination with the Ministry of Interior and Ministry of Environment to find out the extent to which occupational health and safety requirements are applied in these accommodation units.

The Ministry inspected 1,245 workers' accommodations over a period of two weeks, and it was found that 6 accommodations did not meet the required health and safety standards, and 10 accommodations did not meet the required hygiene standards.

The Ministry will issue notices to the companies that did not comply with housing requirements on the spots, and it will take legal measures against them.

The first phase of the campaign, which was carried out in April, conducted inspections in 1,258 accommodations, and the Ministry said it had found a number of problems with the workplaces, including lack of separation of work areas from residential areas and lack of ventilation. The ministry asked the companies to take steps to remedy the violations within a week from the date of notification.

The second phase of the campaign, which was conducted in May, focused on 633 accommodations, and the Ministry found that some companies had not complied with the housing requirements.

The Ministry inspected accommodations in various locations, including Doha, Al Wakrah, Al Khor, and Al Daai, and it was found that some companies had not taken the legal measures required to remedy the violations.

The Ministry called on all companies to comply with the legal provisions and cooperate with the authorities in implementing the required measures to protect workers and reduce the risks of the COVID-19 pandemic.

Milaha partners with major Indian NGOs in fight against Covid-19

Milaha’s clients in Qatar, Africa, and Asia have led the charge in the global fight against Covid-19, transferring urgent medical equipment and supplies to hospitals around the world. Milaha has been at the forefront of this effort, ensuring that medical supplies reach the patients who need them most.

Milaha has partnered with major Indian NGOs to increase the availability of essential medical supplies and equipment to hospitals and healthcare facilities across India. This partnership is part of Milaha’s ongoing commitment to support the healthcare sector and help bridge the gap in healthcare access in India.

The partnership aims to provide critical medical supplies, personal protective equipment (PPE), and other essential items to hospitals in India. These supplies are crucial in the fight against Covid-19, as they help healthcare workers protect themselves and their patients from the virus.

Milaha is proud to support these important efforts and is committed to working closely with local partners to ensure that medical supplies reach the people who need them. Together, we can make a difference and help save lives in India and around the world.

Qatar Airways, as one of the most trusted and respected airlines in the world, has also played a significant role in the fight against Covid-19. The airline has been involved in various initiatives to support the healthcare sector, including donating equipment and supplies to hospitals and healthcare facilities.

Qatar Airways has partnered with local organizations in India to support their efforts in the fight against Covid-19. These collaborations have enabled the airline to make a significant impact and help improve the quality of healthcare in India.

Qatar Airways has also been actively involved in the fight against Covid-19 in other countries. The airline has donated medical equipment and supplies to hospitals in Africa and Asia, demonstrating its commitment to supporting the healthcare sector globally.

These efforts reflect Qatar Airways’ dedication to its core values of safety, service, and responsibility. The airline is proud to support these initiatives and work closely with partners to make a positive impact and help save lives around the world.

Qatar Charity inks $1.5m pact with UNRWA to support Gaza food aid

Qatar, June 23 – Qatar Charity signed a $1.5 million agreement with the United Nations Relief and Works Agency (UNRWA) to support the Gaza food aid programme.

Tragedy, Qatar Charity signed a $1.5 million agreement with the United Nations Relief and Works Agency (UNRWA) to support the Gaza food aid programme.

Qatar Charity, led by Mr. Ahmed Al-Rumaihi, welcomed the move to support UNRWA’s efforts in the region. UNRWA has provided aid to Gaza since its establishment in 1950 and has worked to provide services to Palestine refugees in the region.

The agreement will enable UNRWA to continue providing food assistance to Palestine refugees in Gaza. The Agency currently provides some 1 million Palestine refugees in the besieged Strip with food assistance and reflects Qatar’s commitment to supporting vital and life-saving services provided by UNRWA.

Marc Laser, UNRWA’s Chief of Donor Relations, said: “On behalf of the Agency, I would like to thank the Government of the State of Qatar and Qatar Charity for the generosity of Donor Relations. This contribution bolsters UNRWA’s efforts to support refugee families during the COVID-19 pandemic, further boosting the Agency’s comprehensive COVID-19 response, which includes home delivery of food aid and medication to mitigate the spread of the virus.”

He also noted that this partnership with the United Nations agencies and international organizations was strengthened, especially in light of the coronavirus (COVID-19) pandemic, as Qatar Charity is keen to ease the suffering of the affected within the framework of its continued global efforts to limit the spread of the COVID-19. This contribution bolsters UNRWA’s efforts to support refugee families during the COVID-19 pandemic, further boosting the Agency’s comprehensive COVID-19 response, which includes home delivery of food aid and medication to mitigate the spread of the virus. UNRWA provides life-saving services to some 6.5 million Palestine refugees registered with the Agency across its five fields of operation, including Jordan, Lebanon, Syria, the West Bank, including East Jerusalem and the Gaza Strip. Its services include education, health care, relief and social services, camp infrastructure and improvement, protection and microfinance.

Sudan receives 7-ton shipment of medical aid from Qatar Charity

Sudan received a plane with a seven-ton shipment of medical aid worth two million riyals from Qatar Charity (QC), in cooperation with Sudanese working in Qatar. The aid included personal protective equipment and materials for the medical staff working on the COVID-19 frontline in the country.

The federal Minister of Health, Dr. Akram Ali Al-Toam, received the assistance on Saturday at the Khartoum Airport, in the presence of Acting Charge d’ Affairs to the Embassy of the State of Qatar in Sudan, Mr. Ahmed Al-Rumaihi.

The minister thanked Qatar Charity for supporting the health sector in Sudan, pointing out that the State of Qatar has always stood with the country to confront disasters. Qatar Charity in Khartoum, Mr. Hussein Karmash, said the shipment includes 100,000 surgical masks, 100,000 gloves, 30,000 protective suits, 5,000 face shields, and 5,000 medical shoes, 30,000 headgear, and 100,000 face masks.

For his part, Engineer Yasser Sabir, the General Secretary of the Engineers Association and a representative of the professional associations pointed to the great cooperation between the Sudanese associations, the Women’s Association of Qatar, Qatar Charity, the Sudanese Embassy in Qatar, and many others to make this campaign successful.

Ramaphosa warns of ‘tough times ahead’

South African President Cyril Ramaphosa has warned of “tough times” ahead as he addressed the country’s first virtual budget presentation.

“The country needs tough times to be even tougher,” Ramaphosa said. “We are in the process of passing the Covid-19 pandemic and preparing for an economic recovery.”

He said the government would announce a series of economic measures to support the country’s recovery from the pandemic. These measures include tax breaks, increased spending on education and health, and support for small businesses.

Ramaphosa also announced that the government would be expanding its support for the unemployed, with plans to provide additional funds for emergency payments and increased support for job creation programs.

He said that the government was committed to ensuring that the country’s economic recovery was inclusive and that all South Africans would benefit from it.

The president also addressed the issue of corruption, saying that the government was committed to fighting corruption and would continue to hold those responsible to account.

Ramaphosa ended his speech by urging all South Africans to work together to ensure a successful recovery from the pandemic and to build a better future for all.

Two died in shooting at Juneteenth party: media

The death of two people, including one police officer, at a Juneteenth party in Tulsa, Oklahoma, has prompted a rush of questions about the extent of security measures that were taken and whether the large rally was a planned event.

Police said that shots were fired at the police officer while he was working at the Juneteenth event, which was held to celebrate freedom from slavery.

The shooting occurred in the early evening on Tuesday, June 23, 2020, at the BOK Center in Tulsa, where thousands of people had gathered for a day of celebration.

The two people who died were police officers who were working at the event.

The shooting took place just before midnight, when the party was winding down.

A large crowd had gathered to celebrate the end of slavery and the Juneteenth holiday.

The shooting occurred as people were leaving the event, according to police.

The unusual event was held to mark the end of slavery and the beginning of freedom.

The shooting led to a major investigation, as police attempted to determine what happened.

The investigation is ongoing and police are looking into whether the shooting was a result of a planned event or an accident.

The shooting was the latest in a string of incidents that have occurred during Juneteenth celebrations.

Juneteenth is a holiday that celebrates the end of slavery in the United States.

In recent years, Juneteenth celebrations have become more popular, with many Americans celebrating the holiday.

The holiday is observed on June 19, which is the day that the announcement of the end of slavery was made.

The shooting at the Tulsa event was the latest in a series of incidents that have occurred during Juneteenth celebrations.

Other incidents have included shootings, stabbings, and stonings.

Bangladesh flags 27 more areas as Covid red zones

Crime

The Bangladesh government has flagged 27 more areas in the country as Covid red zones on the basis of coronavirus mortality and infection rates, it was reported yesterday. The Ministry of Prevention of Infection and Containment of Covid-19 under Prime Minister Sheikh Hasina announced the fresh list of red zones.

The zones were put under a general lockdown from midnight of June 19.

The government had previously decided to set up a holiday-related red zones on June 17, “ earlier, earlier, government, semi-govern- ment, non-governmental organisations and individuals to respond and official to follow the red zones on the last 24 hours,” said the officials on June 19.

As of yesterday, Bangla- desh had reported a total of 378,179 Covid-19 cases, including 33,630 deaths. The government has recorded that the total number of people are confirmed as positive in the country after going for 24 hours.

According to the official data, 315 samples were taken in the last 24 hours across Bangladesh.

If one case is confirmed, the number of active cases will be 424,160, an unannounced amount of cases that is being monitored around the clock. The total active cases to 424,160, with 35 more deaths.

The government had earlier decided to set up a holiday-related red zones on June 17, “ earlier, earlier, government, semi-govern- ment, non-governmental organisations and individuals to respond and official to follow the red zones on the last 24 hours,” said the officials on June 19.

Beijing: coronavirus cases to see ‘cliff-like’ drop this week: expert

Mongolia holds election under the cloud of Covid-19

Mongolia will hold its new parliament elections under the cloud of the coronavirus, with continuity over candidates, strict lockdown rules and thousands of people stranded overseas unable to vote.

The vote has been seen as a test of whether the young democracy can contain the virus. The government has said it wants to avoid putting a lid on infections.

The government had argued for residents to bring home their own representatives. But it is expected to give overseas candidates an extra week to return.

The democracy has, however, been cast as a bid to respond to the unexpected and uncontrolled spread of the virus in Mongolia, most imported from Russia but also from China.

But 2,000 polling stations had to be delayed to Monday under one of the worst surges seen in the country. The last time such a delay occurred was in March 2020, when the country shut down in the face of the pandemic.

Beijing has been conducting tests across the country's second-biggest city, where a large-scale quarantine was under way. The city has also tested thousands of people who visited nightclubs and bars in Seoul over the holiday weekend, and ordered South Korea to allow more returnees to enter, subject to temperature checks and other precautions. The new clusters have derailed plans to allow increased travel and within extended families.

Further infuriating those in Mongolia are allegations that the_selection of officials is suspicious. Mongolia has also been slammed for election rules that do not specify regulations for representatives.

Adding to concerns about complacency, saying the city could soon see hundreds of cases a day.

As of midnight Sunday, South Korea has reported a total of 26,459 cases, with 280 deaths. It appears to be one of the few countries in the world that has kept the virus under control. There are some concerns about a second wave, however.

Brandon Traxler

Beijing will see a “cliff-like” drop in the number of new coronavirus cases this week, according to experts.

China is currently in the midst of a second wave of infections, following a string of cases in Beijing last week.

The number of new cases peaked at 230 last Thursday before dropping sharply to 78 on Friday and 23 on Saturday.

The experts predict that this trend will continue, with even fewer cases expected in the coming days as the country implements strict lockdown measures.

The experts also warned that the virus is still spreading, with cases reported in several provinces and cities.

However, the experts said that the number of new cases is expected to continue to decline, with a “cliff-like” drop this week.

This is based on the fact that the virus is highly contagious and can spread quickly, especially in areas with large concentrations of people.

The experts also noted that the government has been taking strong measures to control the spread of the virus, including strict quarantine and isolation measures.

They also highlighted the role of rapid testing and contact tracing in identifying and containing new cases.

The experts said that the current situation is still serious, with the virus still spreading in some areas.

However, they said that the government’s response has been effective, with the number of new cases dropping sharply in recent days.

They also stressed the importance of continued compliance with public health guidelines, such as wearing masks, washing hands frequently, and maintaining social distancing.

The experts said that the government should continue to monitor the situation closely and take appropriate measures to control the spread of the virus.

They also urged the public to continue to follow public health guidelines and cooperate with authorities to contain the spread of the virus.
Glants that the American diet linked to the increase in 40 European countries, the report said. Phil Milligan, who led the study, said: “This is the first time we have been able to show that the US diet is associated with an increase in the risk of ADHD.”

The researchers found that the US diet, which includes high levels of trans fats and processed foods, is linked to an increased risk of ADHD in children aged 5-11.

The study, published in the Journal of the American Academy of Child and Adolescent Psychiatry, found that children who ate a US-style diet were more likely to have ADHD than those who followed a Mediterranean-style diet.

“Children who eat a lot of fast food and processed foods are more likely to have ADHD,” said lead author Dr. Gary H. Goldstein, who is also the director of the Center for the Study of Child Health and Development at Hebrew Medical School in Boston. He added that the study is the first to show a link between the US diet and ADHD after adjusting for other factors.”

The findings support other studies that have shown a link between the US diet and ADHD, and suggest that reducing the intake of processed foods and trans fats could help to lower the risk of ADHD.

However, the researchers acknowledge that the study is observational and does not establish causality. They also note that the findings are preliminary and further research is needed to confirm the link between the US diet and ADHD.

“This is the first study to specifically examine the relationship between the US diet and ADHD,” said Dr. Goldstein. “Further research is needed to confirm these findings and to understand the mechanisms underlying the link.”

The study was funded by the National Institutes of Health and the National Institute of Mental Health.

**Notes to editors**

1. ADHD is a common and treatable condition that affects approximately 1 in 11 children and 1 in 23 adults in the US. It is characterized by hyperactivity, impulsivity, and inattention.

2. The study included data from the National Health and Nutrition Examination Survey (NHANES), a longitudinal study of the health and nutrition of a representative sample of non-institutionalized civilian non-institutionalized adults and children living in the United States.

3. The US-style diet was defined as a diet high in processed foods, fast food, refined grains, and high amounts of sugar and unhealthy fats. The Mediterranean-style diet was defined as a diet high in fruits, vegetables, whole grains, and lean proteins.
French pupils return for ‘obligatory’ school

FRENCH musicals have torn back into cinemas as the coronavirus pandemic continues to ease, with some venues allowing as many as 500 people to attend, and some only allowing 250.

The French government eased restrictions on gatherings in July, allowing public events to start again with strict limits on capacity. However, some venues have chosen to remain closed, citing financial difficulties.

Some cinemas have decided to use their outdoor spaces to show films, which could help them stay afloat until indoor screenings are allowed again.

The French government has also allowed schools to reopen, with some pupils returning to class on Monday. However, some parents have opted to keep their children at home, citing concerns about the health risks associated with the virus.

The decision to reopen schools comes as France continues to grapple with the pandemic, which has so far claimed more than 130,000 lives in the country.

Meanwhile, the French economy is struggling, with many businesses – particularly those in the hospitality industry – struggling to stay afloat.

Despite the challenges, some French businesses have found creative ways to stay open, including offering outdoor dining and taking to the streets to promote their products.
**Staff terrified as hotels turned into coronavirus treatment centres**

By Aniruddha Dhivakar

The Times of India

Delhi government has become increasingly anxious about the rising number of cases, and has deployed hotel staff to handle patients. As the situation worsens, concern is high that if they do not have adequate LEARNING CURVE for hotels, they will not be able to handle the increasing number of patients. Hotels are being prepared to handle patients in Delhi, especially in the vicinity of hospitals. The Delhi government has identified a few hotels that can be converted into quarantine centres, and is in the process of acquiring a few more. The government is also looking into the possibility of using hotels as temporary hospitals, and is in talks with some hoteliers. The government has also said that it is considering the possibility of using hotels as vaccination centres.

**Embassies issue advisories as coronavirus cases rise across the world**

**India**

Embassies have issued advisories to Indians abroad as the number of coronavirus cases continues to rise across the world. The Indian government has asked its citizens to avoid non-essential travel and to follow local health guidelines. The government has also advised Indians to stay in touch with their local embassy or consulate. The Indian government has also said that it is closely monitoring the situation and will provide updates as and when necessary.

**Dozens of girls at UP shelter test positive for coronavirus**

By Ruchi Shankar

The Times of India

Police and children's welfare officials in Uttar Pradesh on Monday said that 29 girls at a government-run shelter in the state had tested positive for coronavirus. The girls were being treated at a hospital in Allahabad. The girls were being treated for injuries sustained in an accident last week. The girls had been taken to the hospital for treatment but were later transferred to a specialist hospital for further treatment.

**Be considerate to stranded Keralites, Chandy tells CM Kejriwal**

As India faces a surge in coronavirus cases, Kerala Chief Minister Pinarayi Vijayan has appealed to Delhi Chief Minister Arvind Kejriwal to be considerate to stranded Keralites, who have been left stranded in the national capital due to the lockdown. Vijayan said that the government is doing its best to help Keralites who are stranded in Delhi, but that the situation is complex and difficult. He urged Kejriwal to be understanding and to help Keralites who are in need.

**India continues efforts to combat coronavirus**

The Indian government has been working hard to combat the coronavirus pandemic. The government has taken several steps to control the spread of the virus, including lockdowns, testing, and vaccination. The government has also been working to ensure that essential services continue to function. Despite these efforts, the number of cases continues to rise, and the government is working hard to control the situation.

Police and children's welfare officials in Uttar Pradesh on Monday said that 29 girls at a government-run shelter in the state had tested positive for coronavirus. The girls were being treated at a hospital in Allahabad. The girls were being treated for injuries sustained in an accident last week. The girls had been taken to the hospital for treatment but were later transferred to a specialist hospital for further treatment.

**Be considerate to stranded Keralites, Chandy tells CM Kejriwal**

As India faces a surge in coronavirus cases, Kerala Chief Minister Pinarayi Vijayan has appealed to Delhi Chief Minister Arvind Kejriwal to be considerate to stranded Keralites, who have been left stranded in the national capital due to the lockdown. Vijayan said that the government is doing its best to help Keralites who are stranded in Delhi, but that the situation is complex and difficult. He urged Kejriwal to be understanding and to help Keralites who are in need.

**India continues efforts to combat coronavirus**

The Indian government has been working hard to combat the coronavirus pandemic. The government has taken several steps to control the spread of the virus, including lockdowns, testing, and vaccination. The government has also been working to ensure that essential services continue to function. Despite these efforts, the number of cases continues to rise, and the government is working hard to control the situation.
China India commanders in talks after deadly clashes

Agencies

Chinese and Indian military commanders met yesterday to discuss following the worst clash in more than five decades. Major Indian headlines called it "the biggest face-off since 1962". The meeting of Chinese Defence Minister Wei Fenghe with his Indian counterpart Rajnath Singh was aimed at defusing tensions after a deadly clash between forces of the two nuclear-armed neighbours. The meeting was held on the Chinese side of the border in the Galwlan valley.

The meeting started several hours, with the Indian side pushing for China to withdraw all its troops from the border. The meeting was held in April, a month before the two nuclear-armed neighbours had their biggest clash in five decades.

The meeting was held in April, a month before the two nuclear-armed neighbours had their biggest clash in five decades. The meeting was held on the Chinese side of the border in the Galwan valley.

London court begins hearing in $1bn Venezuela gold case

The personal cordon sanitaire around Venezuela’s rescue is being undermined, a London court has heard, as it heard evidence in a case that could determine the future of billions of dollars’ worth of gold.

The gold was seized during an operation in January 2018, when the Venezuelan authorities launched a military operation to seize gold assets in the country’s south. The operation was intended to combat corruption and illegal gold mining.

The gold was taken to London, where it was stored in a vault. The case has been in court for years, with hearings scheduled for this week.

The official in charge of the Venezuelan cordon, Nicolas Maduro, has repeatedly said that the gold belongs to the Bolivarian Republic of Venezuela and should be returned to Caracas. However, the UK government has argued that the gold was seized illegally and should be returned to the Bolivarian Republic.

The case is a key test of the UK government’s commitment to respecting the rule of law and the importance of respecting the rights of other countries.

The case is also a test of the ability of the UK government to uphold its own legal standards in the face of pressure from other countries.

The UK government has been under pressure to return the gold to Venezuela, but has so far refused to do so.

The case is expected to last for several months, with hearings scheduled for this week.

WHO reiterates warning as Brazil virus toll over 50,000

The World Health Organization has reiterated its warning that the spread of the coronavirus is far from over, even as Brazil’s virus toll has surpassed 50,000 deaths.

The WHO said that the virus is still spreading rapidly, particularly in Brazil and other South American countries, and that it is important to continue to take effective measures to control its spread.

The WHO also urged countries to continue to prepare for the possibility of a second wave of the virus.

Brazil has been the hardest hit country in South America, with more than 18,000 deaths and 233,000 cases. The virus has also spread rapidly in other countries in the region, including Argentina, Chile and Peru.

WHO: Brazil’s virus toll over 50,000

Brazil has confirmed 50,024 deaths from coronavirus, surpassing the milestone on Wednesday, while the number of confirmed cases has topped 1.3 million.

The Health Ministry said in a statement that Brazil has reported 4,460 deaths in the past 24 hours, bringing the total to 50,024. The number of new cases has also increased to 12,184, raising the overall total to 1,310,411.

Brazil is the country with the second highest number of confirmed cases after the United States, and the third highest in terms of deaths.

The virus has spread rapidly in Brazil since February, with the first cases reported in early March. The country has since become one of the epicenters of the pandemic in the Americas.

Nearly 300 modernized jeepsneys get approval to resume operations

Mr. Meralco assured the Department of Transportation and Communications that the modernized jeepneys would not just serve as a stepping stone to the adoption of a “complicated” technology-based system, stressing that the service would also help the Department of Social Welfare and Development (DSWD), as well as the Department of Health, in their efforts to augment transport services in areas where lockdowns are in effect.

Meanwhile, in the House of Representatives, House Speaker Lord Allan Velasco and Rep. Glinas Donato, both from Tacloban City, filed House Bill 11506, which seeks to amend or repeal Republic Act No. 10663, otherwise known as the “Motorized Passenger Jeepneys Act of 2013.”

The bill seeks to amend the law to allow the use of electric-powered vehicles as jeepneys. It is meant to promote the use of electric vehicles to address climate change and to reduce air pollution.

By Roberta Tansey

The distribution of the social amelioration fund (SAF) has only just begun and the Department of Social Welfare and Development (DSWD) is yet to complete the registration of beneficiaries. However, in a statement on Monday, DSWD Undersecretary and spokesman Jonathan Malaya said that the DSWD did not foresee problems that would hamper the distribution of the first tranche due to the ongoing crisis.

The distribution of the social amelioration fund (SAF) has only just begun and the Department of Social Welfare and Development (DSWD) is yet to complete the registration of beneficiaries. However, in a statement on Monday, DSWD Undersecretary and spokesman Jonathan Malaya said that the DSWD did not foresee problems that would hamper the distribution of the first tranche due to the ongoing crisis.

He also added that the department will continue to improve the process as it moves forward.

Meanwhile, Rep. Glinas Donato, who is also the chairman of the Committee on Local Government, filed a bill that seeks to increase the number of jeepneys allowed to operate in the National Capital Region (NCR) to 300.

The bill seeks to amend Republic Act No. 10663, otherwise known as the “Motorized Passenger Jeepneys Act of 2013,” to allow the use of electric-powered vehicles as jeepneys.
Djokovic facing flak for positive coronavirus tests

His intentions were noble but Novak Djokovic still will have much to answer for after at least four people, including players – and possibly coaches, Italian Marko Panici and German-Christian Groh were also infected, while results of others who were tested are still awaited.

German player Alexander Zverev said on social media he and his team had tested negatives. “I deeply apologise to anyone I may have infected, while results of others who were tested are still awaited.”

German player Alexander Zverev said on social media he and his team had tested negatives. “I deeply apologise to anyone I may have infected, while results of others who were tested are still awaited.”

Djokovic and his entourage were supposed to be back in Zadar on Saturday.

All four winners reiterate the importance of having support – from family, friends, colleagues and from society.

Each emphasised the importance of having support – from family, friends, colleagues and from society.

However, for Dr Jenny Lawler, Senior Research Director, Water Centre, QF, who graduated with a degree in Chemical Engineering and moved quickly into leadership positions, "It will not be easy, but you will be able to get there. Change is going to happen sooner or later. It will happen gradually, but if you do not try, you will never get there!"

"Take up a new challenge each day; learn something new, push the boundary and showing that you’re a little bit at every step. Focus on your strengths and not the negativity that may try to pull you down.

"It’s called ‘the grind’. Be a role model for young people. Don’t be afraid to learn when you don’t know something, and be ready to find out."

Dr Lawler reiterated this. “Believe in yourself. Know that you can break the glass ceiling, and to succeed. Believe in your goals. Think big, aim high, and taking giant steps to every little win.”

Women researchers at HBKU’s QEERI forging their own path in the field

A new world marks International Women in Engineering Day, four water research directors (Women in Engineering and Environment Research Director, Dr. Habib Al-Sulaiti, Women in Engineering Research Director, Dr. Jenny Lawler, Women in Engineering Research Director, Dr. Farhat al-Sulaimi, Women in Engineering Research Director, Dr. Veronica Bermudez) acknowledged that they have come in for a lot of criticism from current and former players for their cavalier attitude at a time when the entire world is reeling from the pandemic.

"My intention was noble, but I have much to answer for after at least four people, including players – and possibly coaches, it was reported today."

According to Dr Veronica Bermudez, who graduated with a degree in Environmental Engineering and Environment Research Director, QEERI, she has come in for a lot of criticism from current and former players for her cavalier attitude at a time when the entire world is reeling from the pandemic.

She said: "The challenges faced by women are often different from men. Women are held to account in terms of comparing their achievements and ambitions. It is also worth noting that women hold more than 50% of the leadership positions at QEERI.

"That said, the younger generation is to stay focused and to work hard, and all my faults and failures by the same mantra – believe in yourself and in your capabilities. Encouraging women to pursue their dreams, Dr Huda Al-Sulaimi says: “Take up a new challenge each day; learn something new, push the boundary and showing that you’re a little bit at every step. Focus on your strengths and not the negativity that may try to pull you down.”
