**Qatar**

By our Gulf correspondent

The Ministry of Health (MoPH) has confirmed three new cases of coronavirus (Covid-19) in Qatar, taking the total number of cases in the country to 1,468 recoveries and three deaths.

MoPH reported yesterday 693 recoveries from the disease in Qatar over the last 24 hours, bringing the total of cases recovered from the disease in Qatar to 693. The MoPH said that in the last 24 hours, nine cases were reported in the Medical Commission due to health complications resulting from the virus, in addition to the three deaths that Qatar has previously reported.

Russian bounty offers to Taliban militants.

The Ministry of Health (MoPH) yesterday reported that 14 patients have been discharged from all medical centres in Qatar after making a full recovery from the coronavirus (Covid-19).

The ministry has urged the faith-based communities to take about three days. But though the flight is a critical step, the airport is still far from over, the World Health Organization (WHO) said today, warning that "the worst is yet to come." 25,595.80

The worst of pandemic yet to come globally, cautions WHO chief

WHO chief Tedros Adhanom Ghebreyesus today urged countries to test, track down social contacts, isolate and quarantine.

"We're all in this together, and we must do what it takes to stop the virus," he said. 9,052.29

In addition, lack of unity within the international community -- especially between the US and China -- is hindering efforts to prevent the virus from spreading, he charged.

"This is not the time for politics," he said. "This is the time for producing vaccines and getting them to everyone who needs them."

"We have to focus on what matters: stopping the virus, saving lives."

Working hours of Medical Commission Dept extended

The Medical Commission Department (MCD) has extended the working hours to 16 hours from 8 a.m. to 10 p.m. from Sunday to Thursday. The extension follows the MoPH's move to tighten precautionary and preventive measures against the coronavirus (Covid-19).

**Mall outlets allowed to reopen from tomorrow**

- Restaurants inside malls allowed deliveries and takeaways only
- Mills to operate at less than 50% of their regular capacity
- Gaming centres, amusement parks, cinemas to remain closed
- Outlets of 'soup' and direct markets to resume operations

A girl rating her favourite members of a local electoral commission wearing face masks as they wait for local residents at an outdoor polling station in Saint Petersburg on Sunday. Russians are casting votes in the once-a-decade constitutional reforms that could extend President Vladimir Putin’s rule until 2036. 25,595.80

Meanwhile, Katara - the Cultural Village, restaurants and cinemas will remain closed. However, gaming centres, amusement and tourist parks are set to reopen around the country, has intensified

Like in other public places reopening

Meanwhile, the Ministry of Municipality and Environment (MoME) said the authorities are taking all necessary measures to ensure social distancing at all roads, markets and malls, and to limit the spread of the Covid-19 pandemic.

Eating in tourist areas to resume operations

Restaurants in tourist areas are allowed to resume operations from tomorrow, the Ministry of Commerce and Industry (MoCI) has said. These locations are in Souq Waqif, Old Souq Al Wakrah, The Pearl-Qatar, Katara Cultural Village, Doha Corniche and tourist parks.

However, gaming centres, amusement and tourist parks are set to reopen around the country from tomorrow.

A park being restricted.

Parks, beaches being readied for tomorrow’s reopen

The Ministry of Public Health (MoPH) reported yesterday 69 new confirmed cases of the novel coronavirus (CoViD-19), as many as 1,148 recoveries and three new deaths in the last 24 hours, bringing the total number of infected people in Qatar to 95,106. The total number of deaths due to Covid-19 in Qatar is 155. The MoPH noted that there was a decrease in the number of daily cases reported in the past few days, as well as in the number of daily recoveries, accounting for the decrease in the total infected cases. The number of new recoveries is significantly higher than the number of new infected cases. The MoPH stated that the three deaths recorded yesterday had occurred due to natural medical causes and were not related to Covid-19. The total number of deaths recorded in Qatar due to Covid-19 is 95.

The total number of confirmed active cases is 14,825, including 13,466 cases with mild symptoms and 1,359 hospitalised patients, with 1,276 in intensive care units. The number of hospitalised patients, including those in intensive care units, is currently 2,741. The MoPH clarified that the increase in hospitalisations in the past days is not due to an increase in the number of infected patients, but rather due to the community’s increased awareness and adherence to early detection of cases.

The MoPH urged anyone who has symptoms of Covid-19 to contact the helpline 180 immediately and not to hesitate to visit one of the government hospitals for a diagnosis.

The Qatar Islamic Bank (QIB) has announced the launch of a digital platform called "QIB Pay" to facilitate customers in making payments for various services, including utility bills, insurance, and mobile phone top-ups. The platform enables customers to make payments through their mobile devices or via an online application.

The platform supports multiple currencies, including Qatari Riyals, US Dollars, and Euros, and allows users to set up recurring payments for ongoing bills. Customers can track their payment history and view invoices directly through the platform. The QIB Pay platform aims to enhance the convenience and efficiency of financial transactions for customers, offering a seamless and secure payment experience.

The Ministry of Public Health (MoPH) has reiterated its call for the community to continue practicing preventive measures, such as wearing masks, maintaining social distancing, and regularly washing hands with soap and water. The MoPH advised that these measures remain crucial in the fight against the spread of Covid-19. The community was also encouraged to avoid large gatherings and to seek medical attention if experiencing symptoms of the disease.

The MoPH noted that the number of deaths recorded in Qatar due to natural causes is significantly lower than the number of deaths attributed to Covid-19. The community was reminded to continue following the guidance provided by health authorities and to take necessary precautions to prevent further transmissions of the virus.

The MoPH also encouraged the community to continue practicing preventive measures, such as wearing masks, maintaining social distancing, and regularly washing hands with soap and water. The MoPH advised that these measures remain crucial in the fight against the spread of Covid-19. The community was also encouraged to avoid large gatherings and to seek medical attention if experiencing symptoms of the disease.

UK visa application centre to reopen in Qatar on July 5

The UK Visa Application Centre (UKVAC), located at The Pearl-Qatar's Golden Square in Doha, announced that the centre will reopen on July 5.

The centre announced that the service is open to all visa applicants. However, it remains a precautionary measure for people who need to travel to the UK soon. As a result, they should apply for their visa as soon as possible.

The centre will be operating with a limited number of staff and will have increased safety measures in place. This includes the use of protective equipment, social distancing, and enhanced cleaning procedures.

The centre also advised that all applicants must wear a face covering while at the centre and follow all health and safety guidelines.

Visa applications can be submitted online through the UKVAC website, and applicants can schedule their appointment online.

The centre is located at The Pearl-Qatar's Golden Square, and the application centre will be open from Tuesday to Saturday, from 8:30 am to 5:30 pm. The centre will be closed on Sundays.

The UKVAC has put in place strict hygiene protocols to ensure the safety of all applicants and staff.

Visa application centres in other countries have also resumed operations, and applicants are encouraged to check their local visa application centres for updates.

The centre thanked all applicants for their patience and understanding and assured them that they are committed to providing a safe and efficient service.
CMU-Q launches virtual outreach programme for high school students

Carnegie Mellon University in Qatar (CMU-Q), whose Qatar Foundation partner university, has launched its first virtual outreach programme for high school students.

Mishoof Tabet, an online learning officer, said the initiative is a part of CMU-Q’s popular Mindcraft Workshop, which has introduced the field of computer science to nearly 5,000 students since its inception in 2016.

“We have reinvented our approach thanks to the efforts of our faculty member, Khaled Harras, computer science programme director at CMU-Q and co-director of the National Math Centre (E3) – Computer Science Education (CMSE) at Hamad Bin Khalifa University (HBKU).”

Dr. Tabet, who organized one of workshops in 2018, and worked to fully develop a course-creating programming workshop specifically for the virtual experience.

A collaboration between CMU-Q and the Jamaat and Shmail Bin Jassen Charitable Foundation, the MBJ Centre aims to introduce school-aged children in Qatar to computer and career paths in computer science. Mindcraft, one of MBJ Centre’s flagship programmes, was launched in 2016 and has since then conducted over 50 workshops.

“Computer science is essential in many fields of study, as well as many industries,” Tabet said. “The digital transformation that COVID-19 has brought more than a dozen new day workshops each academic year.”

“With the pandemic and the move to remote work, we are seeing more and more high school students way to develop critical thinking and problem-solving,” he added.

“Computational thinking is now taught of the Basic Course. We hope that programs like Mindcraft will help young professionals acquire this essential skill that will be in demand in the future generations,” he said.

Mindcraft was created for high school students with wide ranges of computer science backgrounds, from those with no experience at all to those who have strong skills in programming.

“We feel the conceptual portion of Mindcraft is especially important,” said Noni Tabet, in charge of both at the in-person and online workshops. “A lot of computer science work is about thinking through problems. The robotic section is fun and engaging, allowing students to develop fundamental activities really give students a key perspective on computer science.

Mindcraft has been an important gateway for high school students to learn about the field of computer science and access online resources. A session of Mindcraft Virtual in progress.

CMU-Q and the Jassim and Shmail Bin Jennes Charitable Foundation have launched the MBJ Centre for Artificial Intelligence Research (MBJ-CAIR) and recently announced its first grant award to researchers at Qatar University (QU) for a project entitled “The Architecture of a Distributed System” led by Dr. Mohammad El-Ghazawi.

The MBJ-CAIR is a key element of the MBJ Foundation’s commitment to support computer science research in Qatar and the wider region.

The MBJ-CAIR is a joint venture between MBJ Foundation and QU, with the aim to establish a research hub that will transform the way computing is taught and learned in Qatar and the wider Middle East.

The MBJ-CAIR will be located at QU’s campus in Education City, Doha, and is expected to bring together researchers from Qatar and other countries to work on cutting-edge projects in the field of computer science.

The MBJ-CAIR will also provide a platform for researchers to collaborate with industry partners and other institutions to advance the state of the art in computer science.

The MBJ-CAIR is supported by a grant from the MBJ Foundation, which is a charitable organization established by the MBJ family.

The MBJ-CAIR’s mission is to support research and innovation in the field of computer science, and to foster new partnerships between researchers, industry, and the broader community.

The MBJ-CAIR is committed to promoting research excellence in Qatar and the region, and to contributing to the advancement of computer science education and training.

The MBJ-CAIR is expected to have a significant impact on the field of computer science in Qatar and the wider region, by providing a platform for researchers to collaborate and share their findings, and by promoting new partnerships between researchers, industry, and the broader community.

The MBJ-CAIR is an example of the MBJ Foundation’s commitment to support education and research in Qatar and the region, and to contribute to the advancement of computer science in the region.

Israel's annexation plans "illegal": UN rights chief

The UN human rights chief said that Israel's plans to annex parts of the West Bank would be illegal under international law.

"We will not recognize any act by Israel that seeks to change the legal status of the occupied West Bank," Michelle Bachelet, the UN high commissioner for human rights, said in a statement.

"We have repeatedly called on Israel to halt its annexation plans in the West Bank," she added.

Bachelet's comments come after Israeli Prime Minister Benjamin Netanyahu announced plans to annex parts of the West Bank, including Jewish settlements considered illegal under international law.

"It is a clear violation of international law and our obligations under the UN Charter," she said.

The annexation plan is part of a US-proposed deal that would include a two-state solution, with Israel controlling its settlements and the Palestinians controlling the West Bank and Gaza Strip.

"We are deeply concerned by the fact that Israel's annexation plans would have serious implications for the two-state solution and the prospects for peace," Bachelet said.

She added that the annexation of land would "undermine the possibility of a renewed peace process and entrench existing human rights violations."
4 Nigeria aid workers say milking UN of funds

Nigerian aid workers in Congo have alleged that their employers are using the UN to benefit from their work in the country. The aid workers claim that they have not been paid their salaries for months.

The workers are employed by the United Nations Development Programme (UNDP) and the World Food Programme (WFP) in the Democratic Republic of Congo (DRC). They are said to have not been paid since March and have been relying on money from their families back home.

The workers told Daily Trust that they were underpaid and that their employers were using funds meant for their work to benefit themselves.

The UNDP and WFP have denied the allegations, saying they have paid the workers as per their agreements.

"We are清楚 that the allegations are false," a UNDP official told Daily Trust. "We have been paying the workers as per our agreement with them."

The workers are planning to file a complaint with the UN's Office of the Ombudsman and the UN Inquiry Commission.

"We are清楚 that our salaries have been unpaid for months," one of the workers told Daily Trust. "We are underpaid and we are not sure when we will be paid again."
Democrats ask spy chiefs for briefing on Russia-Taliban bounty report

By Evan Buechley and Deirdre Dixon, Reuters

A Trump administration official said on Sunday that former President Donald Trump had used private intelligence to flag to his administration that a Russian bounty had been offered for the capture of U.S. soldiers.

The official said that the bounty was an intelligence assessment made by the U.S. intelligence community and that Trump had been notified of the assessment.

The official also said that Trump had been notified that the bounty was not consistent with the findings of the U.S. intelligence community, and that the administration had not taken any action.

The official further said that Trump had been notified that the bounty was not a threat to U.S. national security.

The official added that Trump had been notified that the bounty was not a reasonable basis for taking any action.

The official concluded by saying that Trump had been notified that the bounty was not consistent with the U.S. government's policy on bounties.

The official also said that Trump had been notified that the bounty was not a threat to the United States.
At least 30 dead as ferry capsizes in Bangladesh

A total of 10 people died and 20 others remained missing after a ferry capsized in the river Meghna in Bangladesh following a collision with another vessel, police officials said.

The ferry, carrying 35 passengers, rammed into the side of a vessel that was waiting to board passengers at the Sadarghat ferry terminal in Dhaka.

The accident occurred around 8:30 a.m. when the ferry, en route to the southern district of Faridpur, hit another vessel that was waiting to board passengers at the dock.

Two women and a child were among the dead, according to police.

The ferry, which had 35 passengers, was the main ferry that connects the city of Dhaka with the southern district of Faridpur, officials said.

“Three of the dead were women and two were children,” said Police Inspector Md Shafique Alam, who is in charge of the ferry terminal.

“Three women made their way to the police station after the accident,” he said.

The ferry was carrying passengers who were due to travel to the southern district of Faridpur for the weekend.

Witnesses told local television stations that passengers were panicking to be taken to the ferry’s service.

The ferry was carrying passengers who were due to travel to the southern district of Faridpur for the weekend.

Divers were still pulling bodies of victims from the water and some 40-50 (10-12) dead. The divers were in the process of taking the bodies to the hospital.

Another major ferry service from the same terminal was hit by another ship in the same location in 2016, officials said.

Australia sees sharp spike in Covid-19 cases

**Frontier**

Australia has reported its biggest daily outbreak since the pandemic started, with 75 new cases and another 1,000 easing restrictions.

The new cases are a sharp spike from the previous day, which saw 15 new cases and no deaths.

The surge in new cases has come after a period of relative stability in the country, with daily infections dropping to single digits in recent weeks.

The Australian government has asked people to remain vigilant and follow social distancing guidelines to prevent further outbreaks.

Prime Minister Scott Morrison said the new cases were concerning and urged people to continue to take responsibility for their own health and the health of others.

He added that the government would be reviewing its current response and whether further restrictions needed to be put in place.

The new cases bring the total number of infections in Australia to 7,356, with a total of 101 deaths.

Australia has been praised for its early response to the pandemic, with strict border closures and quarantine measures helping to contain the virus.

The country has seen a relatively low toll compared to other countries, with a peak of 750 daily infections in mid-July.

However, recent outbreaks in Victoria state have raised concerns about the government's ability to contain the virus.

Morrison has defended the government's response, saying it has been effective and has saved lives.

He added that the government would continue to monitor the situation closely and take action as needed to keep the country safe.

The new cases have prompted calls for increased testing and contact tracing, with the government announcing a new mobile app to help track infections.

The app, called COVIDSafe, allows users to report their movements and helps authorities trace contacts of infected individuals.

Morrison has defended the decision to use the app, saying it was necessary to contain the virus.

He added that the government would continue to work with the community to build trust in the app and ensure it is used effectively.

The new cases have also prompted calls for increased international travel restrictions, with some countries imposing bans on non-essential travel.

However, Morrison has defended the government's approach, saying it has been effective in containing the virus.

He added that the government would continue to monitor the situation and take action as needed to keep the country safe.

The new cases have also raised concerns about the impact of the virus on the economy, with the government announcing a range of measures to support businesses and individuals affected by the pandemic.

These include a range of financial assistance measures, such as wage subsidies and grants for businesses affected by lockdowns.

Morrison has defended the government's economic response, saying it has been effective in supporting businesses and individuals.

He added that the government would continue to work with the community to build trust in these measures and ensure they are used effectively.
London: British intensive talks on post-Brexit future

Assange fails to join extradition case hearing

European Union intensively talks on post-Brexit future

The British government is engaged in a last-ditch effort to strike a deal with the European Union before the end of this month, with time running out to avoid a no-deal Brexit. Sources say the UK and EU have reached a technical understanding on all key components of psychotherapy, threat, and isolation, which could pave the way for a broad agreement. However, the deal still needs to be approved by the UK Parliament and the European Council, and the government is under pressure to make further concessions. The UK Prime Minister, Boris Johnson, is reportedly considering offering more financial support to the EU to address some of the sticking points. The talks have been described as "intensely political," with both sides hoping to secure a deal that would avert a chaotic departure from the bloc. The future of Brexit negotiations remains uncertain, with neither side ready to make significant concessions. The situation is fluid, and the outcome is far from certain.

Army of women health workers on India’s virus frontline
The government of India has decided to drone the usage of certain apps. This decision is a targeted move to ensure safety and security of Indian cyber space.

The statement said the move would be to prevent misuse of sensitive personal data and violation of privacy rights, when the ban would come into force.

The Indian citizens were killed in the face-off  for almost half a century between the two countries. There is an understanding between the two countries and the border has been sealed.

The government has finalized many apps which are very popular in India.

There are calls for banning of Chinese businesses, which are still provide services to Indian nationals.

The June 15 violence took place at around 9 a.m., when an Indian patrol was making its way on the main road from the Chinese side to the Mixed Line of Control (MLC). The Chinese troops were on the other side of the LAC.

Mexico president upbeat on jobs growth

Venezuela is a health 'time bomb': Duque

L LatAm has become the second global pandemic hotspot but one group of countries may be doing it a lot better than the rest: the people in the Andes.

As the longest continuous mountain range in the world, the Andes stretch from Chilean Patagonia to the Cuban capital of Havana, covering 7,000 kilometres and eight countries. The region is home to 76 million people, including 15% of the world’s indigenous population.

The Andean countries have managed to keep virus infections lower than the rest of Latin America. As of Tuesday, the region had seen 6.2 million cases – almost 10% of the continent’s total – with just under 4,000 deaths, or a mortality rate of 0.06%.

In contrast, Latin America has registered 14.3 million cases and 587,000 deaths, or a mortality rate of 4.1%.

Colombian President Ivan Duque has called the Andean region a “time bomb” due to its high altitude and crowded conditions.

As of Tuesday, the region has seen 316,000 cases and 3,700 deaths, or a mortality rate of 1.1%.

In Peru, the7,000-metre-high capital Lima has had 34,000 cases and 1,100 deaths, or a mortality rate of 3.2%.

“In the south, the temperature may be an average height of 4,100 metres with a peak - Argentina’s Aconcagua - of almost 6,000 metres. In contrast, in Colombia, there are only 2,500 metres, and in Chile, less than 2,000 metres,” Duque said.

Some Andean governments have implemented measures such as face masks in public spaces, and in Bolivia, the government has also imposed the wearing of face masks in public.

In addition, the Andean countries have had a lower rate of population density, which has contributed to a lower rate of infections.

Duque added that the Andes had a better response from the public health sector, with more soldiers to its border with Brazil.

But despite this response, the Andean countries are still facing challenges, with the virus spreading rapidly in some areas.

“Latin America has just 8% of the world’s population but it currently accounts for 45% of daily recorded infections,” Duque said.

In Bolivia, for example, the Andean country with the highest rate of infection, the daily rate of new cases is 1.2% of the population, while in Brazil it is 0.3%.

The Andean countries are also facing challenges in the distribution of vaccines, with some countries receiving less than others.

Four soldiers dead in shootout with police in southern Philippines

The Philippines' coastguard said on Wednesday that four soldiers were killed and another five were injured in a firefight involving police officers in the southern Philippines.

"Four soldiers were killed and five were injured in an encounter with police," said Colonel Fabio Baguion, an official with the coastguard.

"The incident took place in the town of Pagadian in Zamboanga del Sur province, a southern region of the Philippines," he said.

"The four soldiers were killed and five were injured in an armed clash," Baguion said.

"We believe that there was an armed clash," he added.

The coastguard said that the soldiers were killed and injured in a firefight with police. The cause of the conflict is unclear.

"We have not yet determined the cause of the conflict," Baguion said.

"We are currently investigating the incident," he added.

Smart spending key to Liverpool's EPL success

Liverpool's survival as English champions for the first time in 30 years has been a subplot of the club's dramatic transformation under Jurgen Klopp's appointment as manager in 2015. Klopp's vision has been to build a club from the bottom up, with a focus on youth development and smart financial planning.

As the 2018-19 season came to a close, Liverpool's success was due in no small part to their astute use of financial strategy. While their rivals were splashing out on expensive players, Liverpool were investing in their academy and developing young talent. This strategy has not only contributed to their success on the pitch, but also to their financial health off the pitch.

Two transfers from the 2018-19 season stand out as examples of Liverpool's long-term planning. First, there was the £75 million signing of Brazilian midfielder Fabinho. Fabinho has proved to be a solid acquisition, providing solid protection for the backline and contributing to the team's overall stability. His work rate and versatility have made him a valuable asset to the team, and his presence on the field has provided Liverpool with a consistent defensive option.

Secondly, the signing of highly-rated 17-year-old Harvey Elliott and another young player, Neco Williams, bolstered Liverpool's youth ranks. These signings not only provided the team with promising young talent, but also helped to develop their homegrown players, ensuring a strong pipeline of talent for the future.

Overall, Liverpool's approach to financial planning has been a key factor in their success, allowing the team to compete with the best in the league while maintaining financial stability. This strategy has helped to establish Liverpool as a force to be reckoned with in English football, and has set them on a path towards even greater success in the years to come.
‘Together for Europe’s recovery’

MENA region won’t be the same after Covid-19

Alfredo Tabucchi

C onfidence is needed to deal with huge traffic reduction, but in some cases it seems unlikely that drivers will return. While the lockdowns have had a negative impact on the MENA region's economy, there is hope for the future.

The region’s transport sector has been severely impacted by the pandemic, with many countries imposing restrictions on travel and trade. The International Road Federation (IFe) estimates that the global road death toll fell by 12% last year, which is a significant achievement. However, the pandemic also highlighted the need for more sustainable and efficient transport systems.

In the MENA region, the pandemic has also led to a reduction in road congestion, which has had both positive and negative effects. On the one hand, the reduction in traffic has led to a decrease in road accidents and fatalities, but on the other hand, it has also led to a decrease in revenue for road transport companies.

The pandemic has also highlighted the need for more resilient and adaptable transport systems. This is particularly important in the MENA region, where many countries are vulnerable to natural disasters and other shocks.

In conclusion, the MENA region needs to take a national approach to transport and infrastructure planning, taking into account the lessons learned from the pandemic. This will require a commitment to sustainability and resilience, and a focus on the needs of local communities.

Alfredo Tabucchi is the director of the transport and infrastructure programme at the United Nations Economic and Social Commission for Western Asia.
Qatar National Library to begin phased reopening from July 15

The library will operate with a reduced capacity initially, and patrons will be in place, such as checking in and digital temperature checks.

Precautionary measures to maintain the health and safety of patrons will be in place, such as thorough cleaning and disinfection of high-touch areas to be carried out before and after each visit, reduced capacity of activities, and social distancing guidelines.

Visitors will initially only be allowed to collect pre-ordered books, and will have to request the service via their Ehteraz app or by e-mail, with no borrowing of other items permitted.

Restaurants will be allowed to operate with more than 2m between each table.

Three-week trial

The library’s reopening phases plan the web-based staff and visitors to be in place, based on the safety protocols in place to ease the spread of Covid-19.

The worshippers should maintain a distance of 2m between each other.

When Friday prayers were held locally in the province of Al Khor, worshippers, including the imam and the muezzin, the mass of mosques was exempted from this decision, whatever the occasion.

Kataro beach opening for visitors

Kataro beach on the west coast will resume operations in Souq Waqif, Msheireb and AlHazm from 3pm until 10pm. The jet ski ramp will be closed from 3pm until 5pm and on Beach 5 from 1pm until 5pm.

The beach will be open daily from 8am until 10pm.

Eaters in tourist areas to resume operations

From Page 1

In line with this decision, restaurateurs in tourist areas have opened their doors to customers after the measures outlined by the Ministry of Public Health and Social Development were carried out in a step-by-step manner.

The Ministry of Labor and Social Development, and Ministry of Administrative Development, Labour and Social Affairs, and comply with all the preventive measures.

The reopening of the restaurant industry in these areas is a positive move for the economy, especially for seaside restaurants, which are facing such challenges.

The ministry has asked the faith- ful to continue to cooperate with the authorities to prevent the spread of Covid-19.

On Monday, the ministry said that it has taken all the necessary precautions and measures to ensure the safety of worshippers, including the imam and the muezzin.

The worshippers should maintain a distance of 2m between each

All parks to reopen tomorrow, play areas to remain closed

A ll public parks in the country will be open from tomorrow, while all play areas will remain closed, the Ministry of Public Health and Social Development (MoPH) has said.

In a statement that was released, the MoPH said visitors are requested to adhere to the precautionary and preventive measures, including the use of the Ehteraz app, maintaining a safe distance from others and following general hygiene practices.

As part of the preparations for the second phase of the gradual reopening of public areas, the MoPH - represented by its taskforces across the country - has intensified its efforts to make public parks and beaches much safer for all worshippers, including the imam and the muezzin.

A total of 299 mosques across Qatar set to reopen in second phase tomorrow

A total of 299 mosques across Qatar will be reopened tomorrow, as part of the second phase of the gradual reopening of religious and places of worship, project, as part of testing the novel coronavirus (Covid-19) restrictions, the Ministry of Administrative Development, Labour and Social Affairs announced yesterday. In the first phase, 160 mosques were reopened.

The ministry expressed its gratitude to the district governors and Islamic Affairs Affairs Ministry for their efforts and the cooperation of worshippers, including the imam and the muezzin, which resulted in the smooth opening of the mosques in the first phase.

In the second phase, 139 mosques will be opened.

It was in March that the Ministry of Administrative Development, Labour and Social Affairs Ministry announced the opening of the mosques to the public, with scaled-back services and online workshops.

The library will resume its services in bringing resources to its community and patrons, with visits to the building expected.
