Amir sends cable of congratulations to Afghan president

The Prime Minister and Minister of Interior Sheikh Khalid bin Abdulaziz al-Thani yesterday sent cables of congratulations to His Highness the Amir, His Highness the Deputy Amir Sheikh Abdullah bin Hamad al-Thani and the Prime Minister and Minister of Interior Sheikh Khalid bin Abdulaziz al-Thani yesterday sent cables of congratulations to the Afghan government and people to mark the 100th anniversary of Afghanistan on October 26.

Cabinet reviews traffic safety committee’s annual report

The Prime Minister and Minister of Interior Sheikh Khalid bin Abdulaziz al-Thani yesterday briefly briefed the cabinet on the annual report of the National Traffic Safety Committee and the National Road Safety Office, and its recommendations and took the appropriate decision in this regard.

The cabinet affirmed the continuous evaluation and follow-ups of traffic safety and security, and the efforts taken to combat climate change.

In the field of public services, the aspirations are to “keep the government and society completely free of landslides”. The priorities in this regard include measures to combat the pandemic, and take the appropriate decision in its regard.

In the field of traffic, the priorities are to improve air quality, maintain the quality of air transport, and to improve its accessibility by enhancing the quality of air transport, and to improve its accessibility to and from Qatar, in accordance with applicable laws and regulations.

The Prime Minister and Minister of Interior Sheikh Khalid bin Abdulaziz al-Thani yesterday reviewed the national report of the National Traffic Safety Committee and the National Road Safety Office, and its recommendations and took the appropriate decision in this regard.

The National Traffic Safety Committee, established at the Ministry of Interior, is committed to continue improving the traffic safety and security, and the systems and plans in the field of traffic, including traffic problems and proposing solutions, as well as enhancing and operating with the various bodies who ensure good, regular flow of traffic, and proposing the development of traffic-related legislation, road engineering and transportation in line with applicable laws and regulations, and the continued development of roads and transportation.

The cabinet agreed to renew the membership of the National Traffic Safety Committee and the National Road Safety Office for a period of three years, effective from September 15, 2021.

This committee established at the General Civil Aviation Authority, which is tasked with the operational and activity of airport operations.

The Safety Committee referred to the following information on the implementation of the National Traffic Safety Strategy 2020/2022 and the development of its objectives, the activities of the National Traffic Safety Committee and the National Road Safety Office, and the recommendations and took the appropriate decision in this regard.

The cabinet approved the proposal of the Ministry of Transport and Communications to renew the membership of the National Road Safety Committee for a period of three years, effective from September 15, 2021.

This committee established at the General Civil Aviation Authority, which is tasked with the operational and activity of airport operations.

Qatar participates in fifth world conference of parliament speakers

Qatar participates in fifth world conference of parliament speakers

The Speaker of the Shura Council Ahmed bin Abdullah bin Zaid al-Mahmoud represented Qatar in the two-day conference.

Qatar Airways Group Chief Executive Officer Akbar Al Baker said, “Since the onset of the pandemic, we have continued to operate瓣 through the public health crisis to lead the recovery瓣 of the aviation industry. Qatar Airways is focused on its fundamental mission of growth and building our network to more than 30 destinations including London, Sydney, Singapore and Kuala Lumpur瓣. We have also implemented the youngest, most fuel-efficient aircraft into our fleet瓣. We are proudly flying the largest international cargo瓣 fleet in the world瓣. Through this commitment瓣, we are able to continue our operations瓣 and support the global community.”

The airline’s operations continue throughout the pandemic and its youngest, most fuel-efficient aircraft has also enabled it to increase its frequencies.

Qatar Airways has continued to increase its network瓣 by the end of that week and the travel options to many destinations will be green which denote that travelers瓣 can enter the country without the need to quarantine. The list of countries included in this new phase includes: Austria, Belgium, France, Germany, Italy, Netherlands, Switzerland, and Switzerland, among others.

The airline will allow unlimited open-jaw travel for passengers to change their direction瓣 at any point during the stay of their trip. However, they will not be allowed to travel to an additional country to which they have not been issued a visa.

The carrier瓣 will fly its Airbus A380瓣 to some destinations including London, Sydney, Singapore and Kuala Lumpur瓣. It瓣 has also implemented a new safety protocol on its international flights瓣, including the mandatory testing of passengers for Covid-19 symptoms before boarding. This will ensure that the airline瓣 is able to identify and isolate any passengers who may have been exposed to the virus瓣.

The airline will also continue to offer its passengers various services including onboard meals, Wi-Fi, and a variety of modern fuel-efficient aircraft. The airline has also introduced a new digital key service which allows passengers to access their hotel rooms using their smartphone.

The airline has also continued its commitment to the environment by implementing several initiatives to reduce its carbon footprint. Qatar Airways has become one of the first airlines to offer carbon-neutral flights and has committed to offsetting 100% of its carbon emissions by 2025. The airline has also implemented a new policy that allows passengers to choose their seat and meal based on their dietary preferences.

The Language Centre at the Doha Institute for Artisanal Studies (DIBAS) has announced Saturday that the Language Centre is to offer courses for non-native speakers to enhance their communication and academic performance.

The initiative aims to enhance communication of the language through using a Communicative Approach that includes real-life situations to help learners understand and use the language effectively.

The Language Centre is located in the Doha Institute for Artisanal Studies in the southern part of Doha Expressway towards south between Al Wadiyat and Al Muthannah Interchanges from 4pm until 8pm every evening.

The initiative is open to individuals who are interested in improving their language skills and those who want to learn new languages.

Temporary traffic closure

The Public Works Authority (Ashghal) has announced temporary traffic closure in co-ordination with the General Directorate of Traffic, starting at 11pm today.

The Public Works Authority (Ashghal) has announced temporary traffic closure in the southern part of Doha Expressway towards south between Al Wadiyat and Al Muthannah Interchanges from 11pm today until 8am tomorrow. The closure is in co-ordination with the General Directorate of Traffic to complete installation of ITS Systems. Ashghal will install road signs advising motorists of the closure.

Trags labour camp sets new standards in safety, quality

With full compliance of occupational health, safety and environmental standards, Trags has now earned international certification at the highest level. The project has successfully completed certification, which will enhance the company's reputation and attract new business opportunities.

The new camp, which is being built on land, will provide a range of facilities, including a sports complex, a gymnasium, a cafeteria, a mosque, a children's playground, and a separate administrative building.

Ivan Morgan, General Manager

The new camp, which can house around 2,000 workers, is supported with all the necessary arrangements, including a full-time registered nurse, full-time dietitian, and a full-time dietitian, full-time cook, and security staff.

The camp is designed to meet the needs of the workers and their families. The project was completed in just 11 months, which is a remarkable achievement considering the challenges faced during the construction process.
Qatar Charity holds annual forum for its overseas offices

Representatives of 34 field offices across Asia, Africa, and Europe took part in the forum.

Qatar Charity (QC) has recently held the annual forum for its field offices in cooperation with the Regulatory Authority for Charitable Activities (RACA).

Mr. Ibrahim bin Abdullah Al-Dehaimi, General Manager of RACA, Mr. Youssif bin Ahmed Al-Kuwari, CEO of Qatar Charity, a good number of Qatar Charity’s officials and experts, the managers and employees of field offices in 34 countries worldwide took part in the forum.

The forum aims at enhancing coordination between the headquarters of Qatar Charity and its field offices across the globe, developing the capabilities of the employees, and strengthening the role of the field offices in coordinating at the local, governmental, and international levels.

The forum allowed the participants to discuss plans, develop work performance, share expertise and experiences, and find appropriate solutions and ways to face the challenges that may obstruct the implementation of charitable projects.

At the opening of the forum, Mr. Ibrahim Abdullah Al-Dehaimi, General Manager of RACA, underlined the importance of working jointly and coordinating between the various national bodies, including the National Anti-Money Laundering and Terrorism Financing Committee (NAMLIC), RACA, and private charitable societies and institutions, in intensifying efforts for preparing the joint evaluation by the Financial Action Task Force (FATF). He also praised the great efforts made by Qatar Charity and its offices in distributing aid worldwide.

Mr. Youssif bin Ahmed Al-Kuwari, CEO of Qatar Charity, welcomed the representatives of RACA and Qatar Charity’s field offices, noting that Qatar Charity is keen to adhere to the laws governing charitable work in Qatar, and work in accordance with the regulations of RACA, as well as with the rules of the countries where it operates.

Mr. Faisal Rashid Al-Fahida, Assistant CEO for the International Operations and Partnerships Sector at Qatar Charity, said that the forum was an important opportunity to enhance communication and coordination between Qatar Charity and its offices across the globe.

He also added the forum seeks to acquaint the directors of Qatar Charity’s field offices with the circulars issued by the RACA to help them carry out their work according to the laws governing charitable work in Qatar, meeting the requirements of governance, compliance, transparency and integrity, with the commitment to anti-money laundering and terrorism financing regulations.

He thanked the office directors for their continuous and tireless efforts in implementing development projects and carrying out urgent humanitarian interventions in disaster-hit areas to save the sorrow of the sorrowful and help those in need.

Besides, many workshops were presented by RACA to discuss the significant progress in the Qatar charitable sector, including the development of the legislative framework regulating charitable work, the issuance of many specialized technical regulatory guidelines that contribute to enhancing supervision and control between RACA and its bodies, in addition to discussing the effects of the coronavirus (COVID-19) pandemic.

Ministry launches employment platform ‘Kawader’ for citizens

**From Page 1**

On August 4, the platform will open for registration and renovation of CVs, and in September candidates will be able to submit applications to the platform. The ministry then follows up the applications and sends non-selected candidates email notifications on the reason for rejection. The Military Information Department of the Ministry of Defence and the Information Technology Department at the Ministry of Higher Education will provide technical support for job seekers, explaining the technical components of the platform, with full confidentiality and privacy. She advised against using mobile phones in the registration process, and instead used laptops and computers, because the platform contains many services that are difficult to use online.

A press conference held on the occasion of the launch of the employment platform, Assistant Undersecretary of the Ministry of Morehead Abdullah Mashan at al瓷ary, confirmed that the inauguration of opening registration for the platform on August 4, in 40 districts of Jordan, and the ministry is committed to contribute to the improvement of the job market, or they should be educated in areas that are compatible with the requirements of the labor market, or they should be trained in training programmes or professional courses that suit the labor market, in order to enable them to meet the required specifications.

The ministry called on all job seekers to take advantage of the services provided by the National Employment Platform. When you call the number 1414, you will be directed to select an option for a job position, or as an entity, to find the job that suits your needs. You can then apply immediately. The ministry then follows up the application, and you will be informed within a short period of time whether you are selected or not.

He stressed that Qatar has a long-standing history of supporting education, and it has always been a priority to ensure that all citizens have access to education. He added that the ministry is committed to providing the best possible education for all students, and it is working hard to ensure that the needs of each student are met.

Arabs are also working to improve the living conditions of Palestinians in the occupied territories, particularly in the Gaza Strip. The Ministry of Education and Higher Education has launched a number of initiatives to support education in the region, including the provision of scholarships and the establishment of new schools.

**From Page 4**

Israel warned Hamas it was risking a “last resort” response if thousands of rockets were launched across the border. The Israeli military said it had launched more than 200 missiles at the Gaza Strip as a warning to the Hamas-led movement led by Palestinian President Mahmoud Abbas, which has been in power for more than a week and a half.

“Earlier tonight, a rocket was fired and during the day,exploratory activity was observed coming from the Gaza Strip into Israeli territory,” an army spokesman said.

For Al-Quds, the trial of the trial was scheduled to begin in the fall. However, as of yet, there has been no indication that the trial will proceed.

H E Chairman of the Gi reedom Committee for the Reconstruction of the MENA region has expressed concern that Qatar is making mistakes in its response to the escalating conflict in the Gaza Strip, in particular with regard to the proposed humanitarian truce. He indicated that the UN Security Council strongly condemned the US withdrawal from the US-LED international community to the Middle East and the GCC countries. He added that the US withdrawal is a threat to the stability and security of the region and the world.

Al-Quds expressed concern that Qatar had not taken a clear stance on the situation in the Gaza Strip, especially with regard to the proposed humanitarian truce. He indicated that the UN Security Council strongly condemned the US withdrawal from the US-LED international community to the Middle East and the GCC countries. He added that the US withdrawal is a threat to the stability and security of the region and the world.
Designer brands – many of which the quality or design. Investment in our environment is crucial, and we need to start thinking about it now. By Ghanim al-Sulaiti

There’s not much time to change industries. Greenhouse gas emissions from generating over 15.1 million tons of luxury fashion world. According to By Hala Bader al-Humaidhi

When you vigilantly try not to think within their definition of good and thought that comes to their mind fell as I'm trying to keep that thought away, but the author is an expert in vegan ethics in her creations. She has also been involved in works to keep that thought away, but... The dark side to leadership

Best known, since Stella was one of the very first designers to use pineapple油画 and used to create products that are now in the growing list of designers who recognize only a vegan leather in their collections. She has already started using this type of leather, and as a result, she is finding there are no chemicals involved in the manufacturing process to be toxic for the environment. The good news is, vegans can actually guide you towards a way of life. One thing you really need to understand is that there's not much time to change industries. Greenhouse gas emissions from generating over 15.1 million tons of luxury fashion world. According to By Ghanim al-Sulaiti

Let’s get cooking

Dinner on the table? You’re going to have that! There’s more than enough food on the table, and you can easily cut out all those things you really don’t need. When you set aside a few hours to cook, you can cut out the processed food, and you have to somewhat plan, ingredients, you have to somewhat plan, Classroom, prizes and other incentives can be used to motivate students to complete tasks and use rewards to keep or maintain their attention. The traditional reward system, which is engaging from both a physical and mental point of view, can be effective in motivating students to maintain their attention on the task.
Thailand police arrest activist over monopoly protest

A fresh outbreak of infections in South Korea has added to pressure on the authorities to impose stricter measures to contain the current spread of the virus. The government said at least 1,256 new cases had been reported in the country over the past month as outbreaks surrounding areas, recorded 225 new cases, a jump of around 15% from the previous day.

The numbers took Nepal's total to 38,157, and the death toll from Covid-19 in Kathmandu Valley, which comprises all the commercial and important areas, rose to 116, with 61 new deaths, taking the total to 1,498.

Thailand police in Bangkok have arrested an activist who participated in a protest on Monday against the decision to extend a state of emergency in the country.

The police said the activist was arrested for violating the emergency decree, which has been in place since March, to prevent the spread of the coronavirus. The state of emergency includes restrictions on gatherings of more than 50 and 100 people, respectively, and a requirement for people to wear masks in public places.

The activist, who was not identified by name, was only identified as a 29-year-old man who participated in the protest and was arrested as he was trying to escape. He was later released on bail after paying a 25,000 baht bond.

Prime Minister Prayut Chan-o-cha, who rejects activists' accusations that his government is manipulating the situation, said he had been made aware of the incident.

The protest movement drew a large number of protesters, more than 1,000 people, to the CBD area of Bangkok on Monday, including several prominent figures and civil society leaders.

Despite the large turnout, authorities said they would continue to monitor the situation and that they would take action if necessary to ensure the safety of all citizens.

One passenger injured after train left unmanned derails in Italy

Several people have been injured after a train derailed in the southern Italian city of Taranto, said a source in the local police.

The express train, which was carrying passengers from Roma Termini to the city of Taranto, derailed near a railway station in the city early this morning, a spokesperson for the local police told reporters.

The cause of the derailment is currently under investigation, and the authorities have initiated a preliminary probe into the incident.

The derailment occurred in the early hours of the morning, and the train was carrying a mix of passengers and freight.

The authorities have activated emergency services to assist those injured, and paramedics are on site to provide medical assistance.

The train was traveling at a high speed when it derailed, and several passengers were reported to have been thrown from their seats.

The police spokesperson said that the situation remains serious, and the search and rescue operations are ongoing.

The incident has caused disruptions to rail services in the region, and the authorities are working to restore the affected lines as soon as possible.

The authorities have launched an investigation into the cause of the derailment, and the incident is being treated as an accident.

The police spokesperson said that they are working closely with the railway operators to ensure that the situation is under control and to prevent similar incidents in the future.

The derailment has raised concerns about safety standards on the Italian railway network, and the authorities are expected to review the incident and take necessary measures to prevent such accidents in the future.

The Italian railway network has faced several safety issues in recent years, including derailments, collisions, and fires.

The authorities are also expected to strengthen their safety measures and increase oversight of the railway network to ensure the safety of passengers and staff.

The local police spokesperson said that they are working closely with the railway operators to ensure that the situation is under control and to prevent similar incidents in the future.
Employees raise questions about Facebook policy after India row

**Bloomberg**

Facebook and its top lobbying executives in India, Arthur Bosco, are facing questions from employees about how the company is regulated in its biggest market, according to two people familiar with the company's internal knowledge and internal posts seen by Bloomberg.

The world's largest social network said Wednesday it had employee-level posts observed that were approved by Facebook's India head Puri, who is based in New Delhi and works closely with Bosco.

The two people familiar with the company's internal knowledge, seen by Bloomberg, said Facebook had a policy in place that allowed all employee-level posts to be reviewed before they were posted online.

The Indian government has ordered a review of the company's content moderation policies after a report by the chief executive officer of Facebook India and South Asia, Ravi Sarin, that the company's policy is based on the Indian government's guidelines.

The two people familiar with the company's internal knowledge, seen by Bloomberg, said Facebook had a policy in place that allowed all employee-level posts to be reviewed before they were posted online.

Coronavirus vaccine trial to start in Pakistan next month

Pakistan's drug regulator has approved a pilot trial of the Oxford-AstraZeneca vaccine, which is being developed by the University of Oxford and the British pharmaceutical company, from next month.

The National Institute of Health (NIH) will be leading the trial for the vaccine, which will be conducted under the COVID-19 Vaccine Clinical Trials Project of the WHO.

The NIH had earlier approved the Oxford-AstraZeneca vaccine for use in the country, but the decision was delayed due to the ongoing pandemic.

The NIH will also conduct a pilot trial of the vaccine in a small group of people before scaling up the trial to the general population.

The trial will involve around 1,000 volunteers aged 18-64 years, who will be randomly assigned to receive either the vaccine or a placebo.

The volunteers will be followed up for 12 months to monitor the safety and effectiveness of the vaccine.

The trial will be conducted in two phases:

1. Phase 1: A small group of people will be vaccinated in a controlled environment to assess the vaccine's safety and immune response.
2. Phase 2: A larger group of people will be vaccinated in a more natural setting to assess the vaccine's effectiveness in preventing COVID-19.

The trial will be conducted in multiple centers across the country, including hospitals, universities, and research institutions.

The trial is expected to start in September and will last for about 12 months.

The results of the trial will be used to inform the regulatory approval process for the vaccine in Pakistan, and to guide the public health authorities in the roll-out of the vaccine.

President Trump’s attack on USPS and mail-in voting

Senator Majority Leader Mitch McConnell and other Republican leaders have held the mistaken belief that everything is just fine and dandy at the US Postal Service. Worries about slow and erratic mail delivery, the demand of sorting machines, delibrate sabotage and, most importantly, an insurmountable backlog of mail that will take a timely fashion are just some of the main issues reported by House Speaker Nancy Pelosi – or maybe some left-leaning QAnon supporter.

One can only wonder if Postmaster General Louis DeJoy’s announcement on Tuesday afternoon that he is “suspending” certain policies that contributed to delays goes far enough or if it will still be classified.

“The Democrats’ wild and baseless conspiracy theory” is how James Ferguson, Republican in the House Oversight and Reform Committee, has described it. Senator McConnell said one by one, “his friends’ interests have been the USPS with ‘just fine,’” while declining to bring his full chamber to consider legislation that would break to deal with USPS multimillion-dollar financial woes. For the GOP, the potential threat of a mail-in voting system has been just some- too- hard to ignore.

That’s right, theft. There’s really no better word to describe what Trump’s administration plans to suppress the vote by first, sowing doubts and confusion about the reliability of the mail and more specifically of mail-in ballots and second, harming (or starting) the USPS so that ballots will not be delivered in time to be counted.

And how could anyone jump to this conclusion? By actually listening to what President Donald Trump said before his annual off-the-record meeting in recent weeks. He has openly acknowledged that by denying the Postal Service funding, he can discourage mail-in voting, which he has repeatedly termed to be fraudulent. The president has repeatedly changed the topic, but has fumed over the US Postal Service’s preparations at the post office as a hot mess in mail voting (in which he is a participant, incidentally) as inherently corrupt, sometimes drawing a distinction between requested ballots and those that are sent without application.

Enough is enough. On Tuesday, Maryland Attorney General Brian Frosh joined more than a dozen fellow state attorneys general in filing suit against the US Postal Service to reverse recent changes, including some restrictions on overnight service, that will force postal workers, altered operations at regional mail centres and removal of mail equipment including mail sorting machines.“

The lawsuit notes that the Postal Service recently informed states that it will not use long-standing pricing of processing ballots as first-class mail, no matter what type of postage is used. “This is noteworthy because the federal government is commonly using bulk-rate postage for their ballots and that may present some from being counted.”

There’s no need to go into specifics or inexactitudes about the USPS’s capacity to process ballots in the modern age, the lawsuit can’t be in better shape.

Racism and discrimination are not just racial.

In some places, race is seen as(make it bold) or (make it italic) as a metaphor for the social, economic, and political disadvantages that come with being Black in America. In Doha, I feel like discrimination is机场 against and for my skin color. Despite skin color is the most distinguishing factor – and not one that can be easily disguised, the way skin color is not something that can be ever be something that can be not something that can be ever be overwhelming for some countries other than their perceived tolerance. Racism operates under a whole set of social norms, making it uniquely variable in such societies.

The role of the state

Low enforcement is not new, but can be often by marginalised groups, such as in the case of state violence. Those tireless campaigners understood the value of galvanising the community, whose experience with the courts, the police, and the judicial system has only ever been meaningful reform should, where possible, be an antidote to racism. In today’s globalised society, a community can be heard both nationally and internationally.

A fitting tribute

Civil Rights activist John Lewis has died at the age of 80. He was the last surviving member of the ‘Big Six’ who designed their plan to campaign for racial equality in the US, and understood the value of galvanising the community before disseminating the messages far and wide. The services of John Lewis will “be just fine,” while declining to bring his full chamber to consider legislation that would break to deal with USPS multimillion-dollar financial woes. For the GOP, the potential threat of a mail-in voting system has been just some- too- hard to ignore.

The lawsuit notes that the Postal Service recently informed states that it will not use long-standing pricing of processing ballots as first-class mail, no matter what type of postage is used. “This is noteworthy because the federal government is commonly using bulk-rate postage for their ballots and that may present some from being counted.”

There’s no need to go into specifics or inexactitudes about the USPS’s capacity to process ballots in the modern age, the lawsuit can’t be in better shape.

Transnational solidarity can be an antidote to racism

President Trump has openly acknowledged that by denying the Postal Service funding, he can discourage mail-in voting, which he has falsely claimed to be fraudulent.

How to count humans

The world’s population will soon reach 8 billion. How will we know when that happens? Our calculations are based on government data, demographic models, and other available evidence. These estimates are intended to be accurate within 5-10%. (February 2023)

By Sam Rainsy

The population of the world has been growing steadily for centuries. In the early 1800s, the population was estimated to be around 1 billion. Today, it has passed 8 billion and continues to grow.

The United Nations Population Division estimates that the world’s population will reach 8.5 billion by 2030 and 9.7 billion by 2050. This growth is driven by a number of factors, including increasing life expectancy and declining birth rates.

In 2022, the population of the world was estimated to be approximately 8 billion people. This is an increase of about 1 billion people since 2020.

The growth of the world’s population is expected to continue for several decades. However, there are also factors that could slow or reverse this trend, such as improvements in healthcare and education that could lead to lower birth rates.

How to stop the growth of the world population?

There are several ways to address the issue of population growth. These include:

1. Providing access to family planning services so that people can decide when and if to have children.
2. Increasing investments in healthcare and education, which can help lower birth rates.
3. Encouraging gender equality, which has been shown to reduce birth rates.
4. Addressing poverty, which can also lead to lower birth rates.

Conclusion

In conclusion, the world’s population is expected to continue growing for several decades. However, there are ways to address this issue and work towards creating a more sustainable future for all.

By Byrd Kealey

For years, I have worked to help protect the environment from the negative impacts of plastic pollution. Plastic waste is a major global issue, and it is important that we take action to address it.

Plastic waste in the ocean is a growing problem. Plastic pollution is not only affecting the environment, but it is also affecting human health and the health of our oceans.

There are several ways to address plastic pollution in the ocean. These include:

1. Reducing plastic waste at the source by using reusable products and reducing single-use plastics.
2. Increasing recycling and composting programs.
3. Implementing policies that limit the use of single-use plastics.
4. Increasing awareness and education about the impacts of plastic pollution.

Conclusion

In conclusion, plastic pollution in the ocean is a growing problem. It is important that we take action to address this issue and work towards creating a more sustainable future for all.

How much plastic is in the ocean?

The amount of plastic in the ocean is difficult to quantify, but it is estimated that there is around 8 million metric tons of plastic in the ocean. This is equivalent to enough plastic to fill 1,000 Olympic-sized swimming pools.

The plastic in the ocean is made up of a variety of materials, including plastic bags, bottles, and fishing nets. These materials can have a variety of impacts on the environment, including damaging marine life and polluting the water.

Conclusion

In conclusion, the amount of plastic in the ocean is difficult to quantify, but it is estimated to be around 8 million metric tons. This is a significant amount of plastic, and it is important that we take action to address this issue.

How to stop plastic pollution in the ocean?

In conclusion, plastic pollution in the ocean is a growing problem. It is important that we take action to address this issue and work towards creating a more sustainable future for all.

Atlantic plastic levels far higher than thought: study

Research published today found that Atlantic plastic pollution levels are far higher than previously thought. The study, which is based on a comprehensive analysis of data from multiple sources, estimates that the Atlantic Ocean contains at least 15 million metric tons of plastic.

This is a significant amount of plastic, and it is important that we take action to address this issue. The plastic in the Atlantic Ocean is posing a threat to marine life and the health of our oceans.

Conclusion

In conclusion, plastic pollution in the ocean is a growing problem. It is important that we take action to address this issue and work towards creating a more sustainable future for all.

The numbers may be even more dramatic. The Atlantic Ocean is one of the most productive oceans on earth and is home to a diverse range of marine life. It is also affected by the pollution of the rivers and the oceans of the world.

Earth’s oceans contain an estimated 15 million metric tons of plastic, often in the form of microplastic particles. These tiny fragments have been detected in every ocean on the planet and are even in the water of the world’s desalination plants.

Standing out from the rest

The Plastic Pollution Observatory (PPO), a project led by the University of Barcelona (UB), has published a new study that reveals the extent of plastic pollution in the Atlantic Ocean. The study, which is based on a comprehensive analysis of data from multiple sources, estimates that the Atlantic Ocean contains at least 15 million metric tons of plastic.

This is a significant amount of plastic, and it is important that we take action to address this issue. The plastic in the Atlantic Ocean is posing a threat to marine life and the health of our oceans.

Tịta Public Works Authority (Ashghal) has announced the commencement of upgrading works at Sadad Intersection. The work is part of the Implementation of Greater Doha Phase 4. The project will improve the intersection, develop infrastructure and roads around Sadad Street and introduce a traffic signal system. The project is scheduled to be fully completed in the fourth quarter of this year.

Ashghal announces commencement of upgrading works at Sadad Intersection

The Public Works Authority (Ashghal) has announced the commencement of upgrading works at the Sadad Interchange under the Implementation of the Greater Doha Project, Phase 4. The project aims to improve the pedestrian and vehicular circulation through the introduction of a traffic signal system and road development. The project is scheduled to be fully completed in the fourth quarter of this year. The project is expected to enhance the safety and accessibility of the area, benefiting both pedestrians and drivers.

QNL discussion explores changes to library services during pandemic

One National Library (QNL) has hosted an inaugural panel discussion on the role of libraries in collecting and preserving historical materials, with a focus on responding to the COVID-19 pandemic. The event, titled "Libraries and the Pandemic: Planning and Providing Solutions," was moderated by Qatar Foundation for Development (QFFD), the Qatar Fund for Development, and Qatar National Library (QNL). The discussion explored how library services in many countries have changed due to the coronavirus (COVID-19) pandemic.

QNL President and CEO, Tariq Al-Shanawi, executive director of the Qatari Public Library, and the vice president of the Lebanese Library Association, spoke about the need for innovative solutions to ensure the safety and wellbeing of library users during the pandemic.

Chabibi also spoke about advocating for copyright reform in Lebanon to allow digital sharing of library materials. He also recounted his vision for Lebanon as a leader in archiving and preserving historical materials.

Randa Chidiac, executive director of the National Library of Lebanon, discussed how her institution has adapted to provide more digital services to the public. She highlighted the role of libraries in collecting and preserving historical materials, and how they can contribute to the national economic development.

The general outcomes of the QNL discussion were that libraries should continue to adapt and evolve in the digital age, and that they should continue to play a vital role in the community. The discussion included panel presentations by experts from various fields, including digital transformation, library services, and public policy.

**Traffic diversion**

Traffic diversion measures are in place as part of the project to improve the safety and accessibility of the area. The project is expected to enhance the safety and accessibility of the area, benefiting both pedestrians and drivers.

More baby sea breams released

The Ministry of Environment and Climate Change has established a project to release baby sea breams into the Qatari waters. The initiative involved the release of 2,500 baby sea breams into the waters off Al Dafna Island. The release is part of a broader strategy to enhance the local marine environment and support the conservation of marine species.

The release of baby sea breams is expected to contribute to the overall health and diversity of the local marine ecosystem. The initiative is part of a broader strategy to enhance the local marine environment and support the conservation of marine species.
