Under the patronage and in the presence of His Highness the Amir Sheikh Tamim bin Hamad Al-Thani, Qatar University (QU) celebrated the launch of its 44th batch yesterday at the Sport and Events Complex. The 2021-2022 academic year started with the admission of 2,200 students who were honored by the Amir yesterday. The distinguished female graduates will be honored today at a ceremony patronized by His Highness Sheikh Tamim bin Abdulrahman Al-Thani, the minister of the Emir of the Amir of the State of Qatar. The graduation ceremony was attended by the QU President and Minister of State for Education and Culture Dr. Hassan bin Rashid Al-Derham, members of the 35 Board of Trustees, QU’s senior management, and representatives from various governmental and non-governmental organizations.

Speaking at the ceremony yesterday, QU president Dr. Hassan bin Rashid Al-Derham said: “As we celebrate the 44th class of Qatar University graduates, our due respect to every comprehensive and distinguished university. Qatar University has the honor of contributing to the realization of this remarkable and impressive event. It is an event enjoyed by those who contribute to building a true and a modern university. “As we witness the success of our state and our eternal progress in dealing with the tasks of parliament, Qatar University has also succeeded in continuing to carry out its mission through an integrated teaching system, which was effective without violating the mandatory requirements to ensure the success of its projects and its scientific and administrative and cultural mission.

“This is in addition to the continuity of the university’s research programs and solutions, as well as local and international partners. There is no doubt that the QU, as an academic partner of the University of the Emir of the Amir of the State of Qatar, is a cornerstone in the foundation of the University. The QU is a symbol of the success of the University of the State of Qatar, a symbol of the success of the University of the Emir of the Amir of the State of Qatar. This is a success achieved by the QU, which is a symbol of the success of the University of the State of Qatar, a symbol of the success of the University of the Emir of the Amir of the State of Qatar.

“Let us remember the success of our state and our eternal progress in dealing with the tasks of parliament. Qatar University has also succeeded in continuing to carry out its mission through an integrated teaching system, which was effective without violating the mandatory requirements to ensure the success of its projects and its scientific and administrative and cultural mission.”

Graduates speak about their aspirations and efficiencies express their joy of fullfilment Pages 6 & 7

Discussing QU’s achievements in the health field, (Q)Dvisor said: “We have seen the fruits of these efforts through our success in preparing and providing high-quality and distinguished health personnel who qualified for the medical programs at Hamad Medical Corporation, which has become an important aspect of our success. To achieve this success, we would like to emphasize that the University adopted plans and policies that enabled it to respond to the challenges of the pandemic and its effects, through flexibility and effective strategies.”

Addressing His Excellency the Amir, Dr. Al-Derham added: “When we talk about such success, it is a result of the tasks assigned to you by His Highness the Amir. His Highness, with his vision for the future. To ensure that the university achieves its vision in the future, the Amir has developed the university’s strategies throughout the past years, in line with the national development agenda. The Amir has also developed the university’s strategies throughout the past years, in line with the national development agenda.

Qatar Petroleum is now QatarEnergy

QN gets new logo, brand identity

Making a major turning point in the biz — banking history, Qatar Petroleum has changed its name to QatarEnergy. With a new logo and brand identity, “QatarEnergy” will reflect the company’s future vision of energy that the world needs and way to play a role in the energy sector. Qatar Petroleum has a mission to become a customer-driven, energy provider that respects the environment, and to play its role as an active member of the global business community.

Graduates speak about their aspirations and efficiencies express their joy of fullfilment Pages 6 & 7

Following its internationalization strategy, fully supported by (Q)Dvisor’s Board of Directors and the board of directors of the Organization of Petroleum Exporting Countries, (Q)Dvisor has seen a growth in investments in new international business units within its portfolio among the states of the Gulf Cooperation Council and the states of the United Arab Emirates and Saudi Arabia. (Q)Dvisor has, in addition, a mission to be a regional leader in the energy sector, with a focus on exploration and production in the Gulf, as well as a mandate to play an active role in the development of renewable energy sources. (Q)Dvisor has also extended its operations to the United Arab Emirates and Saudi Arabia, as well as a mandate to play an active role in the development of renewable energy sources. Elegance stand bags 'Best overall design' accolade at Project Qatar 2021

Elegance Group showcased its 31 inspirational projects at Project Qatar 2021, while its stand was recognised as having the 'best overall design' among all the exhibitions. The group specialises in the design and construction of residential and commercial buildings from simple to luxurious, as well as the design and construction of exhibitions for trade shows. Group representatives were present to discuss the group’s work and answer any questions. "When it comes to design, if you can imagine it, we can build it," said a member of the group. Elegance Group's stand was visited by many visitors due to the group's unique and innovative designs and high-quality workmanship. Group representatives also gave interviews to media representatives who came to record the group's participation in the event. The group aims to continue its successful participation in the following events and to improve the quality of its services.

Birla Public School gets new principal

The Ministry of Public Health (MoPH) announced the appointment of Dr. Ibrahim Mohamad Al-Hamad as the new principal of Birla Public School. The principal will replace the outgoing principal, Mr. Saeed Rashid al-Behaih, who has been the principal of the school for the past six years. In his new role, Dr. Al-Hamad will be responsible for overseeing the academic and administrative aspects of the school. The MoPH has congratulated Dr. Al-Hamad on his appointment and wished him well in his new role. The school community has expressed its anticipation for the new principal and looks forward to the positive changes expected under his leadership. The school's governance body has also expressed its appreciation for the outgoing principal and his contributions to the school's development.

QAajaran: “QM’s Fall Internship Programme enhances career prospects”

The Qatari group of companies QM has launched a new internship programme for university students, fresh graduates and members of the community who are looking for work experience and professional development. The programme, aimed at supporting university students, fresh graduates and members of the community who are looking for work experience and professional development, will provide interns with a unique opportunity to apply the skills and knowledge they have acquired during their studies in a real-world setting. The programme will last for six months and interns will be required to work full-time. The programme is open to students across Qatar and will run from August to December. The QM programme director, Ms. Fatma Al-Khawary, said: “We are confident that this programme will provide our participants with a valuable learning experience and help them to develop their skills and knowledge.” The programme will cover all aspects of the company’s business, including sales, marketing, finance, and IT. The programme will be conducted in collaboration with the National Vocation Qualification Programme (NVQ) and the Qatar Chamber of Commerce.

Total Covid-19 recoveries increase to 235,925, MoPH reports

The Ministry of Public Health (MoPH) announced that there were 85 new recoveries from the virus in the past 24 hours, bringing the total number of recoveries in Qatar to 235,925. MoPH reported that the number of new recoveries is expected to continue to rise in the coming days as the number of new infections is expected to decrease. MoPH also reported that the number of new infections in Qatar has decreased in recent days, indicating a gradual recovery from the virus. MoPH also reported that the number of new recoveries in Qatar is expected to increase in the coming days as the number of new infections is expected to decrease.

Katara extends deadline for ‘Language in Holy Qur’an’ contest

Two prominent scientific bodies, the Qatar Biomedical Research Institute (QBRI) and Qatar University (QU), have extended the deadline for this year’s ‘Language in Holy Qur’an’ contest.

Under the theme “Protein Glycation in Food, Health, Disease”, the contest is being organized by the Qatar Biomedical Research Institute (QBRI) and Qatar University (QU). The competition aims to support the movement of authors and students to compete in the publication of books on the aesthetics of language in the Holy Qur’an to enhance the status of Qur’anic studies in the reality of contemporary Islamic culture and society.

The competition welcomes any person who has achieved a degree of Master’s or Ph.D., or postgraduate diploma, in Islamic religio-historical sciences or Islamic socio-political sciences, and is affiliated with a higher education institution.

The competition includes the following categories:

- Social sciences, the aesthetics of language and Islamic culture
- Medical sciences, the aesthetics of language in the Islamic tradition, and that the submitted work should not have previously been published, or include published chapters, and that the work submitted should not be scientific theses (PhD or Mphil) with the need to adhere to the scientific methodology in writing scientific research.

The contest aims to adhere to the methodology of scientific standards, trovare in order to enhance the status of Qur’anic studies in the reality of contemporary Islamic culture and society.

Deadline extension:

The contest’s deadline has been extended to November 15, 2021.

For more information, visit the official website of the contest at https://www.qbri.org.qa or contact the contest’s secretariat at 33521060.

Gout de/Good France to celebrate French cuisine

Three chefs in Doha will take part in the 16th edition of Good France from October 14-22, putting a spotlight on the richness of France’s culinary traditions.

A press conference yesterday at Katara, the Doha Cultural Village, confirmed the participation of the three world-renowned chefs, named ‘Chef of the Year 2021’ by the Gastronomy and Tourism Ministry, Joël Robuchon, and the Lações de Paris, Alinea special Gastronomic Week.

He added that the event this year, titled ‘The region of honor this year as France and Foreign Affairs and Alain Ducasse, also underlines “the French gastronomy and its values in the world”.

“France’s culture is of course more than food, it’s a way of life. We hope to show the people of Qatar and the region what French cuisine is about. We will be proposing special set menus at our restaurants when it mingles with other cultures, and include new ideas and recipes.”

The event will have a regional and thematic focus, putting a spotlight on the richness of food, health, and disease.

This year’s ambassador. He was recently named ‘Chef of the Year 2021’ by the Gastronomy and Tourism Ministry, Joël Robuchon, and the Lações de Paris, Alinea special Gastronomic Week.

In July, Katara launched a research competition on protein, health, and disease studies in the reality of contemporary Islamic culture and society.

The contest aimed to support the movement of authors and students to compete in the publication of books on the aesthetics of language in the Holy Qur’an to enhance the status of Qur’anic studies in the reality of contemporary Islamic culture and society.

The submission deadline for this year’s contest is September 20-24, with the support of Qatar University (QU). The competition will be open to students from Qatar and around the world who have achieved a degree of Master’s or Ph.D., or postgraduate diploma, in Islamic religio-historical sciences or Islamic socio-political sciences, and is affiliated with a higher education institution.

The competition includes the following categories:

- Social sciences, the aesthetics of language and Islamic culture
- Medical sciences, the aesthetics of language in the Islamic tradition

Deadline extension:

The contest’s deadline has been extended to November 15, 2021.

For more information, visit the official website of the contest at https://www.qbri.org.qa or contact the contest’s secretariat at 33521060.

Congratulations, QU graduates!

A number of Qatar University (QU) graduates from the Class of 2021 have expressed joy on this occasion of celebrating this milestone in their academic journey. Here are some highlights from their speeches:

**Ahmed Tareq Makki – Accounting**

I will strive to develop my skills and continue learning. I am thankful to my family for all they have done and are still doing for me. My biggest goal is to earn my master's degree. I hope to obtain a master's degree. I will take my first steps towards my goal, knowing that I need to plan and account. My biggest goal is that I will meet my goal. When I was a high school, my biggest goal is to become a lecturer. I will be a teacher, in this my major because I love teaching. I hope to obtain a master's degree. I will take my first steps towards my goal. I will take my first steps towards my goal.

**Ibrahim Khalid al-Samhari – Economics**

I also hope to carry the skills of public relations I have learned and cultivated in my mind. A student is learning in a high academic performance and being a distinguished student is what I am. My family have played an important role in my journey as a student, and this is the first time in my university journey. I was able to complete my studies at the beginning of this pandemic. I chose this major because it complements my other major.

**AbdulRahman al-Ahmad – Physics**

I chose this major because it complements my other major. In the end, this is what led me to graduate with such high honors. I chose this major because it complements my other major. My family are my biggest support. They allowed me to choose my major, which is what I wanted.

**Ismail Nabeel al-Ismail – Accounting**

I was able to complete my studies at the beginning of this pandemic. I chose this major because it complements my other major. In the end, this is what led me to graduate with such high honors. I chose this major because it complements my other major. My family are my biggest support. They allowed me to choose my major, which is what I wanted.

**Ahmad Almardhi – Nursing**

**QU vice-president and deans congratulate Class of 2021 graduates**

**Dean of the College of Arts and Sciences, Pradeep Agarwal:**

It is with great pride and joy that we congratulate the Class of 2021 graduates, who have endured a challenging academic year and have made it through with distinction.

**Dean of the College of Business and Economics, Pradeep Agarwal:**

Graduation is a significant milestone in a student's life, and it marks the end of one chapter and the beginning of another. It is a time to reflect on the journey so far and look forward to the challenges that lie ahead.

**Dean of the College of Health and Medicine, B.S. Leong:**

We are proud of our graduates for their dedication and commitment to achieving their goals.

**Dean of the College of Education, B. S. Leong:**

The College of Education is committed to preparing future educators who will inspire and guide students in their academic and professional journeys.

**Dean of the College of Arts and Sciences, Pradeep Agarwal:**

We congratulate all the graduates who have demonstrated excellence and dedication throughout their academic careers.

**Dean of the College of Arts and Sciences, Pradeep Agarwal:**

We are proud of our graduates for their dedication and commitment to achieving their goals.

QTerminals marks new milestones in march ahead

PHC stresses need to maintain a healthy heart

Qatar takes part in the opening of the High-Level Commemorative Meeting to mark the 60th anniversary of the First Conference of Non-Aligned Countries in Belgrade yesterday. Qatargas was represented by HE the Minister of State for Foreign Affairs Sultan bin Saad al-Muraikhi. On the sidelines of the meeting, al-Muraikhi met separately with Indonesian Foreign Minister Retno Marsudi, Israeli Minister of Industry and Trade Khalid Albahar, State Secretary at Slovenia’s Ministry of Foreign Affairs Bojan Kosec, Lebanese Minister of Foreign Affairs and Emirati Affairs Abdallah bin Rashid Al Mahdi, and Luxembourg Foreign Minister Christine Buchholz and Sir Lakanal de Magres (Belgium) at the opening of the conference in Belgrade.

The meeting reviewed the bilateral relations and issues of mutual concern (QNA).
Sadri wins Iraq vote, Maliki close behind

Sadri al-Halbusi's bloc won a majority in Iraq's parliamentary elections on Sunday, with the results giving the Shi'ite cleric a lead of just a few seats over his ousted rival Nouri al-Maliki, whose bloc finished second, according to the merits of five seats in the final tally released by the Independent High Electoral Commission.

Maliki, who has led Iraq since the fall of Saddam Hussein's regime in 2003, had been considered a favourite to win the election, but al-Halbusi's bloc, which is aligned with Iran, emerged as the biggest winner in an Iraq where the number of seats held by each bloc is crucial in determining who will lead the country.

The results, which were confirmed by the electoral commission, show a divided political landscape in a country that has been wracked by conflict and political instability since the fall of Saddam Hussein.

Silent sit-in protest

Congress workers and editors hold placards during a silent protest at the Amritsar railway station in Amritsar, India, on Sunday. The protest was called by the Joint Forum of the Press of Punjab and the Punjab State Journalists Association against the arrest of journalist Gauri Lankesh.

Manila defends press freedom after critic wins Nobel Prize

A top aide to Philippine President Rodrigo Duterte yesterday said the government would appeal any appeal of a cyber libel conviction, after Rappler journalist Maria Ressa had won the Nobel Peace Prize on Friday.

"The government will appeal any appeal of the conviction," Aduanie Neri, the spokesman of Duterte's office, told the Reuters news agency.

Ressa, a journalist who has been critical of the Duterte administration's policies, was sentenced to six years in prison in 2019 for cyber libel.

India, China blame each other for test-fired missile 'dispute'

India and China blame each other for the test-firing of a ballistic missile that has raised tensions along their disputed border in the Himalayas, the foreign ministers of the two countries said on Saturday.

India's foreign minister Subrahmanyam Jaishankar said the test-firing on Saturday was "an aberration by China" that violated a 1993 agreement to stop test-firing in the area.

China's foreign minister Wang Yi said the test-firing was "completely within China's rights" and that India was "the one provoking tension in the region".

Lebanon firefighters quell huge fuel tank blaze

Lebanon’s civil defence service said on Saturday that it had extinguished a huge fire at a fuel storage tank in the northern city of Tripoli.

The fire broke out around 2.30am on Friday when a truck carrying fuel collided with another vehicle.

UK ‘undermining’ efforts for deal to resolve N Ireland issue, says Dublin

Dublin has accused the UK of undermining its efforts to resolve the ongoing northern Ireland issue, saying that the UK’s “undermining” efforts are hindered by its lack of understanding of the complexity of the situation.

Dublin has long been a vocal critic of the UK’s approach to the issue, with the two countries having had a tense relationship since the UK’s exit from the European Union in 2020.

The “Pandora Papers,” a new investigation led by the International Consortium of Investigative Journalists, has traumatised our world’s borders. The personal, business, academic, and cultural contexts we have been acting in the act of hiding their wealth and assets have been revealed as never before. Business leaders, politicians, and accountants who helped them acquire this wealth may now be held accountable for their actions.

In fact, the practice of the ICIJ’s investigation revealed true, the sheer scale, capability, and legal power deployed by the rich to hide their wealth could be said to be a direct challenge to the law as we may know it. But the sheer shocking revelation is that it is this legal framework from around the world that exposes these practices, often raising their own safety and professional futures. The lack of transparency of that task at hand to how well people, countries and entities are hiding their wealth.

To hide their wealth, today’s rich and powerful have adroitly evaded formal tax rules, exploited legal changes, and found new ways to hide wealth, fraud and corruption. It is not just the advanced countries like the United States of America or the United Kingdom that have been involved in this process, but also the countries that do not have “right” law, another one might. As long as the place of business registers and mirrors a foreign law, the legal and accounting paperwork can be classified as the benefit of the fraudulent tax reductions, and the deed is done.

Functionally, a trust alters the rights and obligations to an asset without observing the formal rules of property law. It creates a shadow property right. Establishing a trust requires an asset — such as land, shares, or property — and three personas: an owner (settlor), a manager (trustee), and a beneficiary. The owner transfers legal title (though not necessarily actual possession) over the asset to the manager, and the manager, according to the owner’s instructions.

Henry VIII of England cracked down on a legal device known as “the stapled equivalent,” which was used to hide property relations and served as a tax avoidance vehicle. Today, however, the use of trusts is considered a legitimate and effective way of hiding wealth.

The trust became a fixture of modern law in the mid-19th century, as the drafting of statutes removed previous restrictions. The trust is often used to avoid tax liabilities, and it is considered a tool for wealth preservation.

Ahmed EgSahr
Assistant Researcher at the Qatar Botanic Garden (QBG), a member of Qatar Foundation (QF), highlights QBG’s contribution to ozone preservation and environmental protection.

In 1994, to commemorate the 25th signing of the Montreal Protocol on Substances that Deplete the Ozone Layer (Montreal Protocol), the International Day for the Preservation of the Ozone Layer (OD) was designated in September as the International Day for the Preservation of the Ozone Layer (OD). It has become a global vehicle for environmental preservation, reminding us of the indispensability of preserving the ozone layer, which is vital for our planet.

The theme of this year’s World Ozone Day was “The Montreal Protocol – Keeping Our Food and Vaccines Cool.” A crucial topic considering the ozone’s role in protecting the Earth from harmful ultraviolet radiation and its importance in protecting energy from the sun’s rays.

Ozone Day was the “Montreal Protocol” – Keeping Our Food and Vaccines Cool – the Montreal Protocol, which is a worldwide effort to protect the ozone layer by phasing out ozone-depleting substances. Ozone Day is the official day to mark the success of this global effort.

Today, the Montreal Protocol is a test case for global cooperation and sustainable development.

Ahmed EgSahr

The ozone layer is vital as it shields the Earth from the harmful ultraviolet (UV) rays from the sun, and one of the main causes of climate change. The ozone layer is responsible for protecting us from harmful UV rays, which can cause skin cancer and other health problems.

The development of more efficient, cost-effective and eco-friendly alternatives to ozone-depleting substances is an ongoing process. One of the solutions is the use of ozone-depleting substances (ODS) as refrigerants and coolants.

The Montreal Protocol has led to the phasing out of ozone-depleting substances, and today, the use of these substances is greatly reduced.

Today, the Montreal Protocol is a test case for global cooperation and sustainable development.

As part of its ecosystem restoration efforts to combat desertification and create a greener Qatar, QBG has planted more than 1,000 trees in 2021 alone and is planning to plant 3,000 trees in 2022.

As a responsible major oil and gas company, Qatar Petroleum (QP) has committed to reduce its carbon footprint by 2040 through the implementation of relevant national, regional, and international legislation. In the leadup to the FIFA World Cup Qatar 2022, the campaign is well on track with close to 1,000 trees planned and planted to encourage more members of the community, including farmers, to support nation building.

In the Forefront: As part of its ecosystem restoration efforts to combat desertification and create a greener Qatar, QBG has planted 1,443 native trees in 2021 alone and is planning to plant 453 trees in the desert. The campaign is well on track with close to 1,000 trees planned and planted to encourage more members of the community, including farmers, to support nation building.
Economics Nobel honours ‘natural exponent’

Reuters

Economist David Card, who has been awarded the Nobel prize, says the 2021 Nobel economics prize was for his research into "natural experiments" to show how real-world economic changes can influence the results that economists find. Card was one of three economists to win the prize, along with France’s Jacques-Denis Teitler and the UK’s Peter Diamond, for their work on how to use real-world events as experiments in economics research.

WORLD
Valedictorian of the 44th graduating class, His Highness the Amir Sheikh Tamim bin Hamad al-Thani attended the QU graduation ceremony yesterday.

Speaking to the graduates, Dr al-Obaidi said: “Do not forget that graduating is the beginning of your community and your country as well.” He congratulated the graduates.

“Thankful for the efforts made in the university’s progresses in the last of the world’s best 500 universities,” Dr Abu-Hijleh said that the first batch of QU CMED students were not able to practice the usual field training in hospitals during the first few months, as the pandemic has given them the opportunity to expand their knowledge in the field of infectious diseases, as well as identify viruses and conduct extensive research on them.

He also pointed out another achievement its partnerships with the Ministry of Defense, represented by the Joaan Bin Jassim Joint College, and the Community Services and Continuing Education Centre at the Ministry of Education, noting example of its partnerships with various state institutions, noting its partnerships with Qatar and Islamic Studies. During the event a video was screened highlighting the achievements and objectives of the university.

From Page 1

The ceremony was anchored by Dr Turki al-Marri, professor in the College of Shariah and Islamic Studies. His Highness the Amir Sheikh Tamim bin Hamad al-Thani, presenting a diploma to a distinguished student.

A view of the graduates.

QU celebrates graduation of 44th batch

The College of Medicine of Qatar University (CMED) celebrated the graduation of its first batch of 46 graduates, 15% of whom are females, at the graduation ceremony of the university’s 44th batch that was held yesterday.

A group of 42 of the college’s graduates has been selected to join Hamad Medical Corporation (HMC) to complete their postgraduate medical residency training programs, which includes 11 different specialties and is internationally accredited.

Vice Dean of the College of Medicine Dr Marwan Abu-Hijleh said that the first batch of postgraduate medical residency training programs, which includes 11 different specialties and is internationally accredited, was awarded diplomas to a distinguished student.

He added that this achievement also enhances Qatar’s reputation as a global center for medical excellence. He also noted that 115 students have been accepted this year, and that there has been an increase in the number of college applications since the college was established.
