His Highness the Amir Sheikh Tamim bin Hamad Al-Thani and the other dignitaries who participated in the Middle East Green Initiative Summit met at the Ritz Carlton Hotel in Riyadh yesterday.

- Amir holds talks with Saudi Crown Prince
- Amir also meets Crown Prince of Kuwait

**QatarEnergy and H2Korea sign hydrogen energy co-operation agreement**

QatarEnergy and Republic of Korea’s Hyundai Motor Group’s Hydrogen Convergence Alliance (H2Korea) signed an agreement for co-operation in the field of hydrogen energy. The agreement provides a framework for co-operation in the development of the hydrogen industry for both countries, while also contributing to the growth of the hydrogen industry and the achievement of the global decarbonisation dream. The agreement aims to secure a hydrogen manufacturing chain, in addition to supporting efforts on the entire value chain in producing, transporting and storing hydrogen for hydrogen-related and hydrogen electrification-related technologies and applications. H2Korea is led by the Ministry of Science and Technology and the Ministry of Trade, Industry and Energy of the Republic of Korea.

**Qatar calls on Sudan parties to get political process back on track**

Qatari Foreign Minister Sheikh Mohamed bin Abdulrahman Al-Thani announced that the current political developments in Sudan are not unusual and must not escalate. He urged all Sudanese parties to respect the current situation, allow for the return of peace and stability, and ensure that all Sudanese people achieve stability, justice and prosperity. He added that the Ministry of Foreign Affairs and the Sudanese authorities have decided to begin the political processes back on track, in order to achieve the aspirations of the Sudanese people.

**18th Heya exhibition from Dec 12-17**

Qatar Tourism announced that the 18th edition of the Heya Arabian Horse Festival Exhibition will take place from Dec 12 to 17 at Doha Exhibition and Convention Centre. Organised by the Arabian Horse Corporation, the event is intended for the audience to get a significant participation from both national and international sources of Arabian horses. Qatar’s Heya Horses are known for their beauty and powerful nature.

**US State Department to set up cyber bureau**

The US State Department is planning to establish a bureau of cybersecurity and cyberspace issues, which will aim at the prevention and management of growing threats to national security. The creation of such a bureau is considered a step towards addressing the rapid pace of cyber threats globally.

**Russian Covid cases hit record high**

Russia reported a record high number of daily Covid cases, reaching 30,816, with the country seeing a significant increase in cases. The new restriction measures announced by the government aim to curb the spread of the virus.

**Tesla joins club of trillion-dollar firms**

Tesla Inc surpassed $1 trillion in market value yesterday, making it the 15th company in the world to reach this milestone. The electric car maker’s stock surged as much as 16%, adding $17 billion to its market value, making it the first electric vehicle maker to join the trillion-dollar club. The rise in Tesla’s stock price was driven by a number of factors, including the company’s strong financial performance, its innovative product offerings, and the growing interest in electric vehicles as a way to combat climate change.
Amir attends Middle East Green Initiative Summit in Riyadh

President of Nigeria Muhammadu Buhari received His Highness the Amir Sheikh Tamim bin Hamad Al-Thani at the Abuja International Airport on Monday. This is His Highness the Amir’s fourth official trip to Nigeria, his first visit since his exile in 2013, and his second visit to Africa in 2018. Alistair George/Presidential Press

Nigeria president receives Qatari envoy's credentials

The Minister of Labour Dr Ali bin Hamad Al-Mahmoud briefly met with the Pakistani Human Rights Minister Mr. Dr. Rana Tanveer in a bilateral meeting on the sidelines of the 95th session of the Arab League's General Assembly in Tunis. The meeting was opened by the Secretary-General of the Foreign Affairs Dr Ahmed bin Ahmed Al-Musawi, who welcomed Qatar’s delegation at the Assembly. The meeting discussed the role of the Arab League in protecting the rights and duties of the child, as well as cooperation between the two sides and means of transferring and developing programs in this context. The minister also met separately with Egypt’s Minister of Manpower Moustafa El-Shawandy and Dr. Hassen Khalil Al-Khodery, who participated in the same session in Tunis.

The minister also met separately with Egypt’s Minister of Manpower Moustafa Al-Shawandy and Dr. Haussan Khalil Al-Khodary, who participated in the same session in Tunis.

Qatar participates in GCC meeting

Msheireb Green Programme unveiled at ‘Talk Green’ event

Msheireb Properties launched the ‘Msheireb Green Programme’ dedicated to cafes and restaurants at Msheireb Downtown Doha, and held three awareness events in celebration of sustainability. The programme was launched in line with the company’s mission and vision.

The programme was announced during the first session of ‘Talk Green’ event, organized by Msheireb Properties as part of Qatar National Sustainability Week activities in collaboration with Qatar Green Building Council (QGBC). The first edition of ‘Talk Green’ was held at Al-Baith for cafes, restaurants at Msheireb Downtown Doha. The events aimed at educating the attendees about the needs of sustainable living and how to act in emergency situations.

The events included virtual activations at a number of schools in Doha to highlight the condition and its associated disorders, including how to establish the right diet and physical activity, as well as educating children about the needs of cucurbita and how to act in emergency situations including the death of the disorder. The programme was launched to raise awareness about the condition and its associated disorders, including how to establish the right diet and physical activity, as well as educating children about the needs of cucurbita and how to act in emergency situations including the death of the disorder. Ooredoo shares insight in whitepaper

Ooredoo has announced today its latest industry whitepaper, ‘The Role of Telecom Services Providers in the Media and Broadcasting Industry’. This whitepaper offers a comprehensive overview of the changing landscape of the industry, with a focus on how digitalisation of the industry is resulting in disruption across the value chain, and new opportunities being explored, including the opportunity for telecom service providers with unparalleled network capabilities to be the perfect partner for companies within the industry.

Mr. Al-Malki, executive director, Business, said: “We are delighted to announce the publication of our latest whitepaper. In releasing such whitepapers, we aim to share industry knowledge and expertise to the wider market, in line with the development of telecom services providers. We hope to see the telecom operators continue to service a range of different industries and markets. Events have changed the landscape in many industries, not least of all that of media and broadcasting, and it is exciting to explore and evaluate such factors in relation to our business operations can only be beneficial to all.”

Business solutions can leverage these findings, enabling Ooredoo’s ‘Best for Business’ portfolio of products and services, making Ooredoo a ‘Best for Business’ provider. Thanks to its breadth and depth of talent, best fixed and mobile networks, broad portfolio of ICT services and solutions, and trusted partner for 85% of global organisations.

Qatar Airways to operate services to Odesa in December

Qatar Airways has announced it will operate flights to Odesa, Ukraine, from December 8, 2021, becoming the second destination in MENA to operate flights to Odesa after Azerbaijan.

“By Tawfik Lamari

Qatar Airways will fly three times a week to Odesa, Ukraine.

This move follows the announcement by Qatar Airways of its new route from Doha to Odesa, marking a significant milestone in the airline’s commitment to expanding its network and providing greater travel options for passengers.

The national carrier of Qatar has increased its international connectivity, offering passengers seamless travel opportunities to destinations across the globe. Qatar Airways’ expansion to Odesa demonstrates the airline’s commitment to connecting more cities and providing increased flight frequencies to popular destinations.

Qatar Airways continues to play a vital role in promoting regional integration and facilitating cross-border travel. The airline has played a crucial role in connecting Qatar with various countries, fostering economic and cultural ties.

The move to Odesa is part of Qatar Airways’ ongoing strategy to enhance its global network and provide a broad range of destinations for passengers. The airline’s connectivity to Odesa is expected to attract more passengers looking for convenient and reliable travel options to and from Qatar.

Consequently, Qatar Airways will strengthen its position as a leading airline in the Middle East, offering passengers excellent connectivity to Odesa, a key destination in Eastern Europe. The airline’s expansion to Odesa will also provide opportunities for passengers to explore the rich cultural and historical heritage of Ukraine, allowing them to experience the local culture and gain valuable insights into the region.

The decision to operate flights to Odesa is a testament to Qatar Airways’ commitment to excellence, offering passengers unparalleled travel experiences.

Qatar Airways’ commitment to providing outstanding customer service and high-quality flights is evident in its rich history of excellence. The airline’s ongoing efforts to expand its network and offer increased flight frequencies reflect its dedication to meeting the needs of passengers and enhancing the travel experience.

As Qatar Airways continues to strengthen its presence in the region, it is expected to bring significant benefits to the aviation industry, fostering growth and development across the globe.

This move signifies Qatar Airways’ ongoing commitment to connecting more destinations, enabling passengers to explore new horizons and gain valuable travel experiences.
Minister stresses importance of Qatari preachers’ role

Minister stresses importance of Qatari preachers’ role

The Minister of Endowments and Islamic Affairs (Awqaf) Sheikh Dr. Mohammed bin Ali Al-Subaie, highlighted the importance of Qatari preachers and imams in the community.

Al-Subaie stated that Qatari preachers are trusted with the role of reaching all segments of society, including those who are unable to work, through the pulpits and social media platforms, as well as various social activities, to enhance religious discourse, increase scientific and cultural knowledge, and alter the mentality of society.

The minister said that the Ministry of Endowments and Islamic Affairs (Awqaf) is working to attract and encourage Qatari preachers and imams to develop their knowledge and practical capabilities.

Qatar Fund for Development (QFFD) Director-General Jassim al-Kuwari affirmed that the 2030 Agenda for Sustainable Development and the UN Development Programme (UNDP) are implementing the Sustainable Development Goals (SDGs) at the global level.

The Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet from degradation, and ensure that all people enjoy peace and prosperity. The goals include eradicating poverty, ensuring access to education, promoting gender equality, and clean water and sanitation.

The QFFD chief stressed that Qatar is one of the first countries to provide support to the establishment of a group of laboratories to accelerate the development impact over 21st century. The group is involved in various sectors and raising safety awareness among workers to avoid accidents at work.

The minister further emphasized the importance of ensuring the protection of the performance of the government programmes, guaranteeing their fundamental rights — and supporting them with the necessary equipment and adopting an adequate compensation when they are unable to work.

The third edition of ‘Qatar Achievements on Vocational Safety’ opens in Doha

Qatar, Doha: ‘Qatar Achievements on Vocational Safety’ initiative opens yesterday under the patronage of the Minister of Municipality and Environment.

The event was attended by Ministry of Labour experts, representatives of various companies and organisations, as well as dignitaries and officials from different sectors and industries.

The event included a forum, which was attended by the Minister of Municipality and Environment, to discuss the latest developments in the field of vocational safety, and the role of companies in implementing the directives of the wise leadership, to ascend the level of science and technology, and achieve modernity.

The event was organized by Qatar National Paper Company (QNAP) and the Ministry of Municipality and Environment.

The QFFD director-general Jassim al-Kuwari affirmed that the 2030 Agenda for Sustainable Development and the UN Development Programme (UNDP) are implementing the Sustainable Development Goals (SDGs) at the global level.

The Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet from degradation, and ensure that all people enjoy peace and prosperity. Tourist arrivals to Qatar soaring, says top hotelier

By Joey Aguilar

Doha has been attracting an increasing number of foreign visitors as several major events have taken place in the country, offering a recovery from the COVID-19 pandemic, he told a recent media explained.

"In many countries, we see that tourist arrivals to Qatar is back to 2019 levels and Doha is getting traction in international markets, and we can see that based on tourism statistics," he added.

"We are seeing an increase in the number of tourists coming to Qatar, especially from countries in the Middle East," he said.

He explained that "we are getting traction in international markets," and noted that "there is a lot of interest in Doha as a destination for business and leisure travel."

"We are also seeing an increase in the number of visitors from countries outside the Middle East," he added.

"We are seeing a lot of interest in Doha as a destination for business and leisure travel. The city is becoming more attractive for visitors from around the world," he said.

"Meanwhile, the number of visitors from the Middle East has also increased, reflecting the growing appeal of Doha as a destination for tourists."

"The increase in tourist arrivals is due to a combination of factors, including the promotion of Doha as a tourist destination, the improving safety and security situation, and the growing number of attractions," he added.

"These factors have contributed to a significant increase in tourist arrivals to Qatar, demonstrating the country's potential as a destination for international tourism," he said.

"We are also seeing an increase in the number of visitors from countries outside the Middle East," he added.

Sudan military seizes power, dissolves Sovereign Council

S udan's military seized control on Tuesday, ousting the government led by President Abdel Fattah al-Burhan, the military council's chief, and dissolving the Sovereign Council — the body that took over power from a transitional civilian-military government in March 2019.

The leader of the takeover, General Abdel Fattah al-Burhan, dissolved the military-civilian Sovereign Council that had been set up to guide the country during the transition following 2018-2019 protests. Burhan announced a new council of generals would govern Sudan for the next two years.

First president and then took over as acting head of state following the death of the previous transitional president from a heart attack, Omar al-Bashir, in May 2021, Burhan’s term was due to expire in March 2023.

The coup came less than a week after Sudanese protesters demanded Burhan’s resignation, calling him “dictator” and “traitor” on social media.

The Sudanese armed forces have been in a stand-off with protesters since October, trying to enforce a ban on protests.

Burhan told the military council that it was time for the country to return to civilian rule for the first time since the 1969 military coup.

The coup has sparked international condemnation, with several Western governments warning that the military’s seizure of power was a “serious setback for Sudanese efforts to consolidate civilian rule.”

The International Monetary Fund called for a “swift and inclusive return to civilian governance,” while the United Nations said it was “deeply disturbed” by the events.

The European Union said it was “seriously concerned” by the military coup and called for a civilian government to be restored.

The United Nations Security Council was expected to hold an emergency meeting on Wednesday to discuss the situation in Sudan.

The coup has also sparked a diplomatic crisis in the region, with Gulf Arab countries and Egypt expressing support for the military, while Turkey and Iran have condemned it.

Top Lebanon politician summoned to Judiciary Platform to implement the Middle East Green Initiative

L ebanese President Michel Aoun has summoned his senior minister, Legal Affairs and Human Rights Minister Alain Kheddie, to the Judiciary Platform to implement the Middle East Green Initiative.

The platform was launched by Saudi Crown Prince Mohammed bin Salman in March 2019 to address regional environmental challenges.

The platform aims to establish a regional centre for sustainable environments, a regional cloud seeding and a regional centre for sustainable economies.

Saudi Green Initiative seeks to protect the environment, the Kingdom of Saudi Arabia, the Secretary-General of the Arab League, the United Nations Economic and Social Commission for Western Asia (UNESCAP), and the Secretary-General of the Arab Organisation for Agricultural Development.

The platform’s objectives include protecting the environment, reducing carbon emissions, conserving natural resources, promoting sustainable development, and enhancing regional cooperation.

New family unification approvals bring hope to Palestinians

P alestinians have expressed hope following the announcement of a new family reunification program in the West Bank.

The Palestinian Authority has announced a new family reunification program, which allows Palestinians from the West Bank to reunite with their family members in East Jerusalem.

The program is expected to benefit thousands of Palestinians who have been separated from their family members due to Israel’s occupation of East Jerusalem.

P look to UN appeals for fresh injection of funds for famine-threatened Yemen

T he United Nations is appealing for a fresh injection of funds to support famine-threatened Yemen, following a shortfall in aid since the beginning of the year.

The UN has warned that up to 6 million people in Yemen could run out of food within six months.

The appeal comes amid a brutal conflict in Yemen, which entered its seventh year in March 2021, with more than 100,000 people killed and millions displaced.

The UN is calling for an immediate end to the Yemeni war and the resumption of peace talks.

Maliki expels West African passport holders

M aliki has expelled West African passport holders from Iraq, following a series of attacks in the country.

Iraqi authorities have been cracking down on West African passport holders, accusing them of being involved in criminal activities.

Maliki’s government has been under pressure to take action against the West African passport holders, who are seen as being involved in drug trafficking and human smuggling.

India’s president, Ram Nath Kovind, has signed into law a bill that eases quarantine requirements for foreign travellers arriving in India from countries already covered under other measures, such as the requirement to undergo pre-departure testing.
The key issue is the need for supporting fiscal and regulatory policy, in addition to carbon pricing

The costs to reach net zero by 2050

Setting the global average price of carbon per tonne significantly higher than $100 or more is necessary right away to incentivize net-zero emissions as soon as possible. This underlines the need for carbon pricing as a tool to combat climate change.

Carbon pricing has come to the forefront as a policy measure seen essential to reducing emissions and aligning with the Paris Agreement. However, the effectiveness of carbon pricing policies varies across different countries and regions.

A higher price for carbon is essential to fund the transition to renewable energy sources, according to climate economists. The International Energy Agency (IEA) has highlighted the importance of carbon pricing in its recent reports, emphasizing that a robust carbon pricing system is necessary to achieve the Paris Agreement targets.

The EU Emissions Trading System (EU ETS) is the largest carbon market in the world, with 11 billion tons of greenhouse gas emissions covered. The EU has set a target of reaching net-zero emissions by 2050, and carbon pricing is a key component of this strategy.

In contrast, many developing countries and regions, such as India and China, have implemented carbon pricing systems, but their coverage and effectiveness vary significantly. Developing countries are under pressure to reduce their emissions, and carbon pricing remains a critical tool in this regard.

Carbon pricing systems vary in design and implementation, and their effectiveness is influenced by various factors, including the level of carbon pricing, the coverage of sectors and emitters, and the enforcement mechanisms. Despite these challenges, carbon pricing is considered a crucial tool in the fight against climate change, and it is gaining increasing support globally.

The costs to reach net-zero emissions by 2050 are substantial, requiring significant investments in renewable energy technologies, energy efficiency improvements, and other climate mitigation measures. To achieve these goals, robust carbon pricing systems are essential to ensure that the necessary investments are made, and they are aligned with the Paris Agreement.

In conclusion, carbon pricing is a critical tool in the fight against climate change, and its effectiveness can be enhanced by designing and implementing robust carbon pricing systems. These systems should be supported by regulatory and fiscal policies that complement carbon pricing and ensure that they are effective in reducing emissions and aligning with the Paris Agreement targets.

Russia's Communist comeback

A little over a year ago, while on a sabbatical from the American University, where I teach law, I moved to Moscow. I didn’t exactly arrive in a situation of free speech, but it was a place where some freedom still remained. Opponent leader Alexei Navalny toured around the country, attempting to garner support in the upcoming local elections for the Communist Party. An opposition leader, the Communist Party was widely viewed as a relic of the past. It was a party that was not fully implemented, and the greatest movement it had been for around 15 years. The anti-corruption foundation has been allowed to continue to exist, and members are under investigation or in exile. Virtually every major journalist, media outlet, human-rights advocate, or independent organization — from the Pskov, Russia, and the Kommunist Press — can be considered by local authorities an “undesirable” organization. Russia’s detention centers outnumbered over the last year was steep, but not for long. For example, the law under which Navalny was arrested is a bill that’s been in the books for years and was passed in 2015, with the aim of protecting citizens from being victimized by fake news, the 45-year-old Ukrainian law. Under the law’s provisions, Navalny was imprisoned, and the greatest movement he had been able to continue for around 15 years. His anti-corruption foundation has been allowed to continue to exist, and members are under investigation or in exile. Virtually every major journalist, media outlet, human-rights advocate, or independent organization — from the Pskov, Russia, and the Kommunist Press — can be considered by local authorities an “undesirable” organization.

Greenhouse gas levels reach new record high

Greenhouse gas concentrations in the atmosphere reached new record levels last year, according to research published yesterday. The findings, published in the journal Nature Geoscience, showed that the concentration of carbon dioxide (CO₂) in the atmosphere continued to rise. The UN's Intergovernmental Panel on Climate Change (IPCC) is set to release its 6th Assessment Report (AR6) in late 2023, which will assess the impacts of rising greenhouse gas levels and climate change. The report said that 2021 was the second-warmest year on record, with temperatures rising at an average of 1.2°C above pre-industrial levels. The report also highlighted the urgent need for global action to limit warming to 1.5°C or 2°C above pre-industrial levels, as a failure to do so would result in irreversible consequences for the planet.

Facebook papers leak could be similar in scale to the SolarWinds attack

Facebook has faced a huge backlash over allegations that its algorithm discriminates against certain groups. The story, first reported by The Wall Street Journal, is similar in scale to the SolarWinds attack, which targeted the US government and other critical infrastructure. The leak comes amid increased scrutiny of Facebook's practices, following allegations that the company has been aware of and failed to act on significant issues such as hate speech and misinformation. The leak also highlights the growing concern about the impact of social media algorithms on society and the potential for them to be used for nefarious purposes.

US warns over 40% of Afghans face acute food crisis

The United States has warned that 40% of Afghans could face an acute food crisis this year, with the situation worsening due to the country’s ongoing conflict and political instability. The US Agency for International Development (USAID) said that the situation was “extremely grim” and that more aid was needed to prevent a humanitarian catastrophe. The US has called on other countries to provide more funding and support to address the crisis, which could affect millions of people in Afghanistan and beyond.

Moderna reports positive results for Covid vaccine in children under 6

Moderna said yesterday that its Covid vaccine was safe and produced a strong immune response in children aged 6 months to 2 years. The results, which were based on data from a phase 2 trial, will be presented at a upcoming conference. The company is looking to expand its vaccine program to include younger children, as many countries have stated a desire to vaccinate children to prevent the spread of the virus.

Baldwin ‘rehearsing aiming gun at lens when he fired fatal shot’

Actor Alec Baldwin was recently charged with murder, manslaughter, and reckless endangerment for his role in a fatal accident on the set of the movie “Rust.” The incident occurred in October 2021, when 42-year-old cinematographer Halyna Hutchins was killed on set. Baldwin, who was holding a prop gun, has been charged with murder, manslaughter, and reckless endangerment. The actor has since pled not guilty to the charges.

Thousands stranded as Afghan-Pakistani border crossing stays closed

The Afghan-Pakistani border crossing has remained closed for the past week, with thousands of people stranded on both sides. The closure follows a border closure on the Afghan side, which was imposed due to security concerns. The Afghan government has not yet announced when the border will reopen.

Landslide 2nd term for Uzbek president

Shavkat Mirziyoyev has been re-elected for a second term as president of Uzbekistan. The result was announced yesterday, following a tightly contested election. Mirziyoyev, who has been in power since 2016, won a landslide victory with 80% of the vote. He has promised to continue his reforms and to improve the country’s economy.

German 15-bite gets 10-year prison term

A 15-year-old German boy has been sentenced to 10 years in prison for his involvement in a mass shooting at a school in Ratingen. The boy, who shot a teacher and several other people, was found guilty of attempted murder and other charges. The trial, which lasted for several months, has been widely condemned.

A French court has sentenced a 45-year-old woman to 5 years in prison for her role in the 2015Charlie Hebdo Charlie film sting operation. The woman, who was a journalist, was found guilty of fraud and falsifying documents. She was also ordered to pay damages to the newspaper.
