Macron, Putin agree to solve migration crisis

French President Emmanuel Macron and Russian President Vladimir Putin agreed on the need for a de-escalation of the migrant crisis at the Belarus border, even as the two leaders disagreed on the issue of Belarusian President Alexander Lukashenko, who has angrily rebuffed Putin’s offer of financial aid.

Trudeau (C) yesterday announced plans to transform the National Gallery into a vast outdoor art museum experience in celebration of Canada’s hosting of the 2022 FIFA World Cup.

Rains force evacuation of Canadian town

Massive rainstorms lashed the western Canadian province of British Columbia yesterday, triggering landslides and flooding, shutting highways and prompting the evacuation of an entire town.

Amir attends opening of World Padel Championship

His Highness the Amir Sheikh Tamim bin Hamad Al Thani attended yesterday evening the opening of the World Padel Championship 2021, hosted by the Qatar Tennis, Squash and Disctinctorship Federation (QTSBF) at the courts of the Khalifa International Tennis and Squash Complex. The Amir witnessed part of the match between the Qatar and Belgium teams. The opening was attended by a number of Sheikhs, ministers, senior officials, guests of the championship and fans of the Padel sport.

Mirrors on roads raised the western Canadian province of British Columbia yesterday, triggering landslides and shutting highways and prompting the evacuation of an entire town. Authorities in Merritt, some 200km north east of Vancouver, ordered all residents to evacuate.

Qatar joins Kimberly Process certification scheme on diamonds

Qatar Museums (QM) yesterday announced plans to transform the National Gallery into a vast outdoor art museum experience in celebration of Qatar’s hosting of the 2022 FIFA World Cup. Beginning now and continuing throughout the World Cup in November 2022, Qatar Museums will install more than 40 new and commissioned public artworks throughout Doha and across the country. This will be done as a series of pop-ups, including public and temporary installations that will boost the World Cup matches. Qatar Museums is working with local artists, artists working across the city on Qatar’s public art programs, including the Supreme Committee for Delivery & Legacy and Public Works Authority (Ashghal).

Artists of all nationalities and backgrounds are invited to apply for our nation. I hope these outstanding artworks will be enjoyed as an enriching outdoor cultural community as well as the millions of visitors we expect to welcome to Doha in 2022 from the moment they arrive at Hamad International Airport,” said Abdulrahman Ahmed al-Malik, General Manager of Qatar Museums (QM).

“QM’s ambitious public art projects aim to transform the nation into an outdoor art museum. This is a celebration of Qatar’s bid to host the FIFA World Cup, Qatar 2022,” said Abdulrahman Ahmed al-Malik, General Manager of Qatar Museums (QM)."
Qatari grant for Gaza

The Ministry of Economy and Administration announced that the Qatari charity fund has decided to provide a grant to the Gaza Strip. The grant will be used to support the human rights of Palestinians affected by the Israeli aggression against the Strip last May.

The grant, which is being disbursed to the needy families in Gaza since the Israeli aggression, is the third time that Qatari grants have been granted to the Strip. This is in addition to exchanging relations with their countries for the betterment of the people of the Strip.

Minister confirms effective implementation of labour reforms in Qatar

Al-Mahmoud added that Qatar is committed to protecting human rights. This came during his speech in the meeting of the conference of trade union organisations and federations on workers' rights conference which is held periodically and is an important principle of respect and protection of the human being and for all individuals. The conference was also held to implement these principles, which are in line with the international human rights standards and procedures.

Ooredoo partners with Ericsson to facilitate 5G-enabled World Cup 22

Event network management partnership to enhance fan experience

Qatar and Sweden announced on Wednesday that Ericsson and Ooredoo had entered a partnership to provide a fully 5G-enabled World Cup 22 experience to football fans. The agreement will enable Ooredoo to provide interactive experiences to World Cup 22 participants, with Ericsson's assistance in bringing the 5G experience to Qatar. The agreement was announced by Sheikh Mohamed bin Abdulaziz Al-Thani, deputy group CEO and CEO of Ooredoo Qatar, at the signing ceremony. The agreement was signed by Fadi Pharaon, president of Ericsson Middle East and North Africa, and Ericsson's previous experience of managing large-scale sporting events, Ericsson can expect very high network speeds, exceptionally low latency, and much greater data capacity. The immersive experience will include high-definition video, immersive audio, and real-time gaming, as well as a variety of entertainment services. The agreement is expected to enable Ericsson to provide the ultimate fan experience to football fans.

The Shura Council discussed laws protecting Arabic

The Shura Council discussed the laws protecting Arabic. The council referred the issue to the Culture and Information Committee to study and analyze the electoral programmes submitted by candidates to the Shura Council during the election period. The council also emphasized the importance of the Arabic language and stressed that the designated authorities must ensure that Arabic is taught in all government agencies, educational institutions, and the media. The council also emphasized the importance of teaching the Arabic language, especially in schools and institutions. The council also emphasized the importance of promoting the Arabic language, especially in the media and in public life. The council also emphasized the importance of the Arabic language in preserving the cultural heritage of the Gulf countries and Qatar in particular.

OF-HMC study reveals variants impacting health of Qatari
A group of researchers at Qatar University, in co-operation with the Qatar Medical Corporation (QMC) has revealed a total of 60 disease-causing genetic variants linked with cardiac, heart disease, high cholesterol levels and other disease associations with the heart. The research study was carried out on a group of 1,962 Qatar population. The whole exome, the entire “active genome” of 5,042 participants were studied, the research team works within the Qatar Genome Programme, which was launched in 2011. Many of these persons are related to inhabitants of the island and heart conditions. The ability to identify and in turn avert accidental findings with patients who have an inherited disease can mean a lot for patients, family members and the community. It is also of help to identify the best treatments and follow-up medical strategies.

Amal Elfatih, first author of the paper, described the findings and explained that the developments “come as a new-age destination offering care benchmarked to global best standards. It provides state-of-art services across the spectrum and features fully equipped diagnostic capacities, a unifying culture of responsible care. Kahramaa participates in CIF Qatar 2021 as sponsor

The Ministry of Transport (MoT), represented by its General Director, implemented a campaign on maritime vessels in order to ensure that helmsmen and all safety and security equipment on board are aware of the precautionary and health instructions for vessels in order to ensure that helmsmen and all safety and security equipment on board are aware of the precautionary and health instructions for vessels.

The event was organized by the Qatar Scientific Club from November 15-17.

A Kahramaa statement yesterday explained how it was a personal mission of many artists, whom have evolved to become politicians.

Addressing the media, Joan Gratz, the director of No Leaders Please (US/2020), which is set in a city devastated by war, said it was an invention of novelty and with the Lady of those two oceans, it is a con-...
Fourth BX Arabia brings together top behavioural science experts

Event organised by FIFA World Cup legacy programme, B4Development, takes place in Qatar

B

Advisory science experts from around the world gathered in Doha for a series of events organised by B4Development – a FIFA World Cup legacy programme established by the Supreme Committee for Delivery & Legacy (SC) and Qatar’s Ministry of Public Health (MPH).

The session focused on finding innovative ways to tackle social and health issues and featured Dr Roberto Bertollini, senior adviser to HE the Minister of Public Health, said: “Our partnership with the SC and B4Development will enable us to discuss how we can engage youth for social impact, place a roadmap to activate all sectors to play a key role in tackling difficult issues and teaching our children life skills, like leadership, unity and equality.”

“Behavioural science brings to life the truth that our behaviour and expectations will drive long-term impacts, change the way we make decisions and shape the future,” he explained, adding: “This is the application of behavioural sciences beyond our social identity, self-perception and expectations and will help our lives become better and healthier, fostering positive changes in our daily lives.”

Participants also discussed recent discoveries and how interventions can help bring policy makers closer to solving complex social and health challenges. Participants highlighted the importance of understanding the behavioural science dynamics of crowds, which behaviourally science brings to life, and how this understanding can help policy makers bring this truth to life.”

“The legacy of Qatar 2022 is keenly felt in other conferences, “he explained, adding: “Also, the application of behavioural sciences beyond our social identity, self-perception and expectations and will help our lives become better and healthier, fostering positive changes in our daily lives.”

The fourth annual World Cup Legacy programme will be a platform to discuss how we can engage youth for social impact, place a roadmap to activate all sectors to play a key role in tackling difficult issues and teaching our children life skills, like leadership, unity and equality.”

“Behavioural science brings to life the truth that our behaviour and expectations will drive long-term impacts, change the way we make decisions and shape the future,” he explained, adding: “This is the application of behavioural sciences beyond our social identity, self-perception and expectations and will help our lives become better and healthier, fostering positive changes in our daily lives.”

Participants highlighted the importance of understanding the behavioural science dynamics of crowds, which behaviourally science brings to life, and how this understanding can help policy makers bring this truth to life.”

“By hosting behavioural science experts from the Middle East and global south, BX Arabia explores how behavioural science principles can be applied in specific regional contexts and that the interventions that are addressed in other countries can be adapted to fit the needs of the population,” he said.

“I call on you all to participate in these important discussions and challenges the region to bring this truth to life.”

HBKU, Silatech sign pact for career development for graduates and alumni

Hamad Bin Khalifa University (HBKU) and Silatech have signed a collaborative agreement to enhance access to job opportunities for its students and alumni community.

Under the two-year agreement, HBKU students will have the opportunity to receive career guidance and support from the academic community access to the Legacy portal for training and employment.

The agreement was launched by Silatech and HBKU in March 2022, and offers online access to career guidance, skills development, as well as jobs, internship opportunities, and entrepreneurship training.

In turn, the HBKU will engage in network-building to provide job opportunities.

Additionally, HBKU students will benefit from Silatech’s career guidance programme ‘Future Tones’, which offers online programmes, webinars, and talks that help identify gaps and match specific skills and interests to match them to opportunities.

Dr Maryam Al-Mannai, vice-president for student affairs at HBKU, said: “We are looking forward to working with Silatech to help our students take their first steps on their chosen careers.”

“With the constructive support from Silatech’s ‘Future Tones’ platform, we will be equipped to make the most of the academic guidance and the many skills our students bring to the market,” she added. “A well-trained and qualified workforce from Qatar and other Gulf nations is key to our success.”

Dr Fadi Makki, B4Development director, said: “Our partnership with HBKU is vital to our mission and it is the core of why B4Development was launched. “Events like the Legacy Majlis and similar units in the region puts us in a unique position to discuss these issues with experts from the Middle East and beyond, “he said.

“With the constructive support from HBKU, we will be equipped to make the most of the academic guidance and the many skills our students bring to the market,” she added. “A well-trained and qualified workforce from Qatar and other Gulf nations is key to our success.”

Dr Roberto Bertollini, senior adviser to HE the Minister of Public Health, said: “Our partnership with the SC and B4Development will enable us to discuss how we can engage youth for social impact, place a roadmap to activate all sectors to play a key role in tackling difficult issues and teaching our children life skills, like leadership, unity and equality.”

A number of key buildings were lit up in blue yesterday, as part of a World Diabetes Day (WDD) initiative to mark the event around the world. The initiative, led by the International Diabetes Federation (IDF), marks its 10th anniversary since 2011. The Ministry of Interior Affairs, the Torus Hotel, Convention Centre, Doha Tower and Doha Bank were illuminated in blue yesterday. The event is part of a wider WDD campaign to encourage people to take care of their diabetes.

The campaign is also supported by the WISH (World Innovation and Science for Health) organization, which is based in Qatar. WISH is a non-profit organization that aims to promote innovation and healthcare in the region.

The campaign was launched in Doha yesterday, with a ceremony attended by Qatari officials and representatives from WISH. The event was held at the Aspire Zone, a sports and leisure facility in Doha.

During the event, speakers from WISH and other organizations discussed the importance of investing in healthcare innovation and how technology can be used to improve the lives of people with diabetes.

One of the key initiatives announced at the event was a partnership between WISH and the Qatari government to establish a new center for diabetes research and treatment. The center, which is expected to open in 2022, will be the first of its kind in the region and will focus on using technology to help people with diabetes.

WISH is also working with other organizations to improve access to diabetes care in Qatar and the region. For example, the organization is partnering with the International Diabetes Federation to support the development of a diabetes awareness campaign in Qatar.

The event was attended by a number of guests, including Qatari officials and representatives from WISH. The event was held at the Aspire Zone, a sports and leisure facility in Doha.

Philippines’ Duterte to contest Senate polls in 2022

Philippine President Rodrigo Duterte yesterday was briefly dragged into a court hearing for an electoral dispute next year, seeking ways to remain a senator after his current term expires in the time left by selling his identity cards for 70,000 pesos (about $1,500) to a group of expatriates including doctors, clerics and academics, who sided with him in his latest challenge to the country’s constitution.

The Supreme Court also ordered the centre and the ICC to investigate the shooting of a Filipino activist who was killed after opening fire in the direction of the passenger. It said the farm fires were continues and SJC’s latest funding needs to help achieve Vision 2020 goals.

The trend details of the huge number of world leaders, company CEOs, and investors, who committed to achieve net-zero carbon dioxide emissions by 2050 or sooner. This is a significant step toward addressing the climate crisis and promoting a sustainable future. The Intergovernmental Panel on Climate Change (IPCC) report highlights the need for drastic action to mitigate the impacts of climate change. These promises are significant but leave financial markets in an ambiguous state. The route to get there is still being defined, and active engagement by investors supplanting the planning and mobilizing capital toward a climate-neutral world.

However, not aligning the complex web of risks and cost-benefit analyses toward what comes to climate change and health care is not always straightforward, and the attempt to simplify this trend is challenging. There are a number of ways in which companies can tackle climate change and healthcare, and how these efforts impact the interlinkage between the two. Here are some observations:

**Water shortage**

Climate change and healthcare are intrinsically linked, and research shows that we could prevent an estimated 74 million deaths over the next 80 years by implementing climate-smart actions. The effects of climate change are already evident, and we must act decisively to protect our health care system, which is a key player in helping combat the global climate crisis.

- **Public health** — as climate systems are affected by the rising global temperatures, climate change impacts the health of the public, especially in vulnerable communities. For instance, the healthcare industry is suffering from extreme heat waves, floods, and droughts. These conditions negatively affect human health and exacerbate existing health disparities.

**Communal diseases**

Caused by global warming, extreme weather conditions, and natural disasters, communal diseases — such as dengue, malaria, and typhoid — are on the rise. In some regions, these diseases are over 50% more likely to occur due to climate change. For instance, in sub-Saharan Africa, heatwaves are leading to a rise in vector-borne diseases, with malaria and dengue fever cases increasing by 30% to 50% in recent years.

**Healthcare as an沉默opulator**

When thinking of environmental policies, our immediate thoughts go to aviation, shipping or electricity grid. However, healthcare cannot be left behind. We must act now to ensure that healthcare is a significant component of the climate change discussion. This is not only due to the high costs of climate-related health impacts but also the potential for healthcare professionals to contribute to solutions.

**The smart climate money is on women**

Women are a target demographic in the climate change and health care discussion. According to the World Health Organization (WHO), women are disproportionately affected by climate change, as they are more likely to be affected by extreme weather events, such as floods and droughts. This is due to a number of factors, including cultural norms and gender roles.

The smart climate money is on women, as they are often responsible for domestic work and care for family members, making them more vulnerable to the impacts of climate change. Women are also less likely to have access to healthcare and financial resources, which limits their ability to plan and adapt. However, investing in women can help alleviate the effects of climate change on health care.

**Empower women to take up leadership roles in the climate and health care sector**

By Marjut Falkstedt

Women account for 43% of the agricultural workforce in developing countries, and they actively use local knowledge and cultural practices to adapt to climate change. Women also have a significant role in health care, as they are often the primary caregivers in their communities.

Empower women to take up leadership roles in the climate and health care sector by providing them with access to education, training, and support. This can help increase their resilience to climate change and improve the quality of care provided to the community. By empowering women, we can better address the intersection of climate change and health care and create a more sustainable future for all.

The Ministry honours community leaders on Human Rights Day

By Shehab Almaglof Staff Reporter

The Ministry of Interior (MoI) yesterday addressed the role of various communities in building the society, and said that it came as part of Qatar's commitment to ensuring the rights of all citizens and residents, ‘he said.

The function was attended by Captain Dr. Mohd. Al-Ali, Head of the MoI Human Rights Department, MoI Human Rights Department advisor Colonel Sabah Salim Al-Dosari, and Abdulla Mahdi Al-Yami from the Ministry of Foreign Affairs (MFA)’s Human Rights Department, along with officials from various MoI departments.

Representatives of Indian, Pakistani, Sri Lankan, Nepalese, Afghan, and Somali community organizations received certificates and souvenirs from the officials.

While addressing the function, Colonel Al-Dosari said that the MoI is keen to participate in the celebrations as part of the protection and promotion of human rights, and to give recognition to the contributions of such communities, children, the elderly, women, and people with disabilities.

He explained that the programme was aimed at enlightening the communities about their rights and obligations under national laws and the legislative tools, and emphasizing their clear role in construction and development, and stressing on the role for the cultural identity of the communities and their freedom of work and practice of religious rites in the manner prescribed by law.

Colonel Al-Dosari added that one of the objectives of the programme is the respect of the members of the equal communities for the national value system and the Qatar cultural heritage, while also identifying the actual and fundamental needs and problems of the members of the various agencies of the MoI and working to solve them.

"Achieving community partnership in maintaining security on the basis that combating crime and achieving security is the responsibility of citizens and residents," he said.

Captain Al-Ali noted that the event underlines the role of various communities in building the society, and said that it came as part of Qatar’s commitment towards ensuring the rights of all citizens and residents.

He pointed out that the MoH and other bodies concerned were stressing on the respect for the cultural identity and the role of various communities in building the society, and that they came as part of Qatar’s commitment towards ensuring the rights of all citizens and residents.

"Our religion, Islam, and other religions prescribe each individual the right to life, the right to education, the right to health, the right to freedom, the right to dignity, and other rights," he said.

The QFA director of marketing and communications Khalid Al-Kuwari and his delegation visited Al Khor Model School, Al Quds Model School, and Joaan Bin Jassim and members of his delegation visited Al Khor Model School, Al Quds Model School, and Joaan Bin Jassim and members of his delegation.

"There is no doubt that the activities, events, permanent cooperation between the QFA and the educational institutions, and the regions within the framework of the QFA’s vision (linked with social responsibility) by Al-Kuwari said.

"The region’s best teams will join the national team in the Arab Cup Qatar 2021. The QFA is keen to invite students to create temporary exhibitions, artworks, and other activities, as well as to make feedback on the national team and the region’s best teams," he said.

QFA director of marketing and communications Khalid Al-Kuwari and his delegation visited Al Khor Model School, Al Quds Model School, and Joaan Bin Jassim Model School to promote support for the national team.

Nation to turn into outdoor museum

From Page 1

The expanded programme of public artworks began in June with the installation of Tom Claassen’s monumental sculptures Falcon (2021) outside the Doha, United Thowers, (2021), Trust and Chamber (2021) by American artist Bruce Nauman outside M7 in Msheireb, and British artist Mark Handforth in Msheireb, respectively. Other recent installations include Springing (2020) by British artist Lubna Abu Farsakh and by artist Dia Al-Azzawi at the HIA, and his delegation visited Al Khor Model School, Al Quds Model School, and Joaan Bin Jassim and members of his delegation.

The visits are aimed at communities in their relationship with the national side.

"During our visits, we explained to the kids how to get their tickets and how to make their way to the match venues," Al-Ali said.

"We also told them about fans etiquette and what they have to do to not disturb the matches," he added.

The region’s best teams will join the national team, he said.

"We are expecting an electric atmosphere," Al-Ali said.
