Amir meets Sultan of Oman today

His Highness the Amir Sheikh Tamim bin Hamad al-Thani will meet with Sultan Haitham bin Tariq of the Sultanate of Oman, who will arrive in the country today on a two-day state visit. The Amir and the Sultan of Oman will discuss at the Amiri Diwan means of supporting and strengthening the well-established brotherly relations between the two countries and the prospects for their development to achieve the interests and aspirations of the two peoples, in addition to discussing the latest regional and international developments.

Hamilton wins Ooredoo Qatar F1 Grand Prix

His Highness the Amir Sheikh Tamim bin Hamad al-Thani today attended yesterday evening the closing ceremony of Formula One’s Ooredoo Qatar Grand Prix, the 20th round of the 2021 world championship, organised by Qatar Motor & Motorcycle Federation from November 19-21 at Losail International Circuit.

The race was also attended by His Highness the Father Amir Sheikh Hamad bin Khalifa al-Thani, His Highness Sheikh Mohamed bin Khalifa al-Thani, His Highness Sheikh Mohammed bin Hamad al-Thani, and a number of Sheikhs and ministers. President and Chief Executive Officer of Formula One Motorsport, President of the International Automobile Federation (FIA) John Todt, President of FIFA Gianni Infantino, a number of heads of federation, members of diplomatic missions accredited to the country and guests of the championship, also attended.

The race was won for the first time by British Lewis Hamilton, the Mercedes team driver, who started from the first pole, completed the race distance of 57 laps and a distance of 306.66km, with a time of 1.24.28.471 hours. Max Verstappen recovered well from a grid penalty to finish second with a time of 1.24.54.214 hours, but saw his Formula One championship lead cut to eight points by Hamilton.

Seven-time world champion and title holder, Hamilton, who started from the first pole, completed the race distance of 57 laps and a distance of 306.66km, with a time of 1.24.28.471 hours. Max Verstappen recovered well from a grid penalty to finish second with a time of 1.24.54.214 hours, but saw his Formula One championship lead cut to eight points by Hamilton.

His Highness the Amir Sheikh Tamim bin Hamad al-Thani today awarded Staff Minister General Mohamed Ali Qamar bin Alameed and Staff Minister General Pilot Mubarak Mohamed Al-Kumait al-Khayarin the Military Sword of Tamim bin Hamad Al-Thani in appreciation of their distinguished role and efforts throughout their work period, when His Highness met them at the Amir’s Diwan Office yesterday. Staff Minister General Alameed and Staff Minister General Al-Khayarin expressed their thanks and gratitude to His Highness the Amir for the honour.

The First Arab UDL Conference concludes

The First Arab Universal Design for Learning (UDL) Conference—Scientific Forums for the future of inclusive Education in Arab Countries, organized by Qatar University (QU) via Webex, has concluded.

First Arab UDL Conference concludes

The conference, organized from 28 to 30 October, featured a number of distinguished lecturers from Arab and international institutions, universities, and experts in the field. The conference brought together 54 presentations, including 38 presentations from Arab countries and 16 presentations from foreign countries. It included 15 scientific forums and 14 scientific papers, with the participation of 140 researchers and researchers from various Arab countries, as well as researchers from other countries in the world. A total of 45 scientific papers were presented by academics, researchers and experts from institutions of education and higher education in the Arab countries, which participated in the conference and were discussed by experts in the field.

At the conclusion of the conference, a number of recommendations were agreed upon and recommendations were made to the Ministry of Higher Education, Scientific Research and Innovation and the Ministry of Education and Knowledge to develop the field of teaching and learning from the framework of inclusive design, as it aimed to introduce the principles of inclusive design to educational institutions and universities in the Arab world, to provide students with disabilities with the same opportunities as other students in educational institutions.

Ministry organises fish stock assessment training course

The “Fish Stock Assessment and Fisheries Management” training course, organized by the Ministry of Municipality and Environment, begun yesterday. The five-day course addresses a number of key themes, including the process of fish stock assessment, uses and methods of analysis of the results on which the assessment is based and the role of independent auditors and the role of fisheries management in the field of fisheries management. The training course is aimed at improving the skills of experts in this field, as well as improving the quality of the field of fishery conservation and sustainability of fish species.
Qatar Airways’ fly-by-sees Wonlder’s Trophy soar above all World Cup Qatar 2022 stadiums

Qatar Airways, the Official Airline of FIFA, delivered a special fly-away event for the FIFA World Cup Qatar 2022, to the much-anticipated World Cup Trophy, to Qatar Airways Holidays’ VIP guests. The special Boeing 777 air-freight flight, featuring a specially decorated Qatar Airways Boeing 777 aircraft, was presented in a grand ceremony held at the Hamad International Airport in Doha, Qatar. On December 16, Qatar Airways Holidays launched its official travel packages, which include match tickets, return flights and accommodation options. Fans can now guarantee their match tickets to support their favorite teams during the World Cup Qatar 2022. Visit www.qatarairways.com/aviation-tours or call +974 4134 1392 4063, Passcode: 121100.

Qatar Airways is the Official Airline of the FIFA World Cup in addition to its extensive global sports partnership portfolio that includes football governing bodies such as FIFA, CONCACAF and CONMEBOL. As FIFA’s Official Partner, Qatar Airways has sponsored major football events including the FIFA World Cup and the FIFA Arab Cup Qatar 2021. Qatar Airways has also sponsored the FIFA World Cup Qatar 2022.”

Polish president’s visit to boost ties with Qatar

By Joseph Varghese

The upcoming state visit of the Polish president to Qatar will further bolster the bilateral relationship between the two countries. President Andrzej Sebastian Duda will visit Qatar as part of his visit to the region. He will be accompanied by a business delegation of senior officials including Józef Krzysztof Kubasik, Minister of State, Chancelor of the Parliament, Poland.

The official noted that Poland is also much advanced in the use of ICT and noting it in many fields of economy. "Poland is very advanced in digitalising in a very big way. We are being considered one of the most digitalised countries, a senior official said yesterday. In this context, we are looking at and other topics are food exchange, food production, storage and processing." Other than Jablonski, a Polish delegation comprising of senior officials including Jolob Krzysztof, Minister of State, Chancelor of the Parliament, Poland who will visit Qatar, Jablonski said that during his visit, he will meet with HE Sheikh Faisal bin Qassim al-Thani, Foreign Minister of Qatar, and discussed business co-operation and opportunities with their counterparts in Qatar.

"We have 20 companies from Poland who have accompanied us to discuss business opportunities with their counterparts in Qatar. They had very fruitful discussions and hopefully they will be translated into business opportunities in the near future. We also held a meeting with the representative of the Qatari delegation, the deputy foreign minister for economic diplomacy, said.

"President Anhurz Sebastian Duda will visit Qatar as early (Swedish) Prime Minister Stefan Lundberg, Poland’s deputy foreign minister for economic diplomacy, said. "We are hopeful that the visit will further develop the bilateral relations between Qatar and Poland. We are also looking forward to the visit. We have accompanied us to discuss business opportunities with their counterparts in Qatar. They had very fruitful discussions and hopefully they will be translated into business opportunities in the near future. We also held a meeting with the representative of the Qatari delegation, the deputy foreign minister for economic diplomacy, said."

Qatar, Poland hold political consultations

The foreign ministries of Qatar and Poland held a round of political consultations in Doha, chaired by the Undersecretary of State of Poland’s Foreign Ministry Paweł Jablonski and his Qatari counterpart, HE the Secretary-General of the Ministry of Foreign Affairs Dr Ahmed bin Hassan al-Hammadi and his Qatari counterpart.

The two sides exchanged views on bilateral relations and ways to support and enhance them. (QNA)
Qatar Museums unveils ‘Jeff Koons: Lost in America’

Qatar Museums (QM) has launched an exhibition titled ‘Jeff Koons: Lost in America’ at the Museum of Islamic Art in Doha, which is part of Qatar-USA 2021 Year of Culture.

The exhibition, which is a highlight of Qatar-USA 2021 Year of Culture, is part of #QatarCreates 2021, a campaign for students of Arab and foreign community schools.

It aims to raise awareness and educate students for the need to protect human rights, and it is an extension of previous campaigns of this kind in schools to develop the students’ understanding of human rights and how to communicate with NHRC and inform them of its role and contacts.

The exhibition features more than 50 artworks that are an often-played-out story of Koons’ four-decade-long career as one of the best-known contemporary artists, whose work and message is about self-transformation and becoming the statement noted.

Qatar Museums delighted the exhibition’s visitors when it introduced the artist’s recent works that reflect the viewer and call attention to narratives of his dreams of transforming and becoming the statement noted.

On the occasion of the opening, ‘Jeff Koons: Lost in America’ is made accessible beyond the four walls of QM Al Riwaq through a collaboration between Qatar Museums and Ooredoo and Katara Hospitality.

A selection of artworks will be offered to the public through augmented reality at Al Riwaq, with products inspired by ‘Jeff Koons: Lost in America’ on sale at the Qatar Museums’ IN-Q gift shop at Al Riwaq and Al Mansoura.

The Qatar-USA 2021 Year of Culture is part of #QatarCreates 2021, a campaign for students of Arab and foreign community schools.

Some of Koons’ best-known works are represented from extensive regions such as ‘The New’ (1980-2008), alongside more recent works such as ‘Antiquity’ (2002-2013) and ‘Popeye’ (1996), ‘Balloon Dog (Orange)’ (1994-2004) and ‘Play Doh’ (1994-2004), everyday objects and industrial materials are transformed into engaging artworks that pose questions about desire, hope, the self and transformation, even more exciting when seen in the light of this exhibition.

Throughout his career, Koons has radically transformed the world of art, forging new relationships between the ancient and mass culture, while developing new paradigms for the role of the artist in the age of globalisation, and he shares a preoccupation with American popular culture with many of his predecessors, who include artists such as Roy Lichtenstein and Andy Warhol.

the previous financial year with the world. which the US has introduced to cover America is the best way to elections and attractive promo-promise, which is available to product lines are being featured and food products through its organising the festival, LuLu aims customers. LuLu hypermarkets hosting the festival for the past organic, gluten-free, lactose-free, chilled and dairy products, fresh herbs, fruits and vegetables, grocery lines, beauty lines, ready, deli and cold, and LuLu's long-standing business relations with organisations. LuLu Hypermarket will fill the void with specialty for food products, including signa- American farmers inspired by Chinese culinary roots, Discover America is the best way to experience the variety of food products which the US has introduced to the-world. Despite challenging circum- stances, LuLu's role with the US has touched new heights in the previous financial year with the addition of new lines. Most importantly, LuLu has added the highest range of over five thousand products to its catalogue, such as organic, gluten-free, lactose-free, ready, deli and cold, and many other healthy options that were previously unavailable. This move not only met the demands for food products but also provided an opportunity to explore the variety of products that the US has introduced to the-world.

Besides its existing distribution centres, LuLu has set up over 20 new distribution centres across Asia, including Qatar. This expansion has increased the reach of LuLu Hypermarket to more than 20 countries, with over 90 locations. The expansion has also enabled LuLu Hypermarket to reach more consumers in the Middle Eastern region, with over 11 locations in Qatar. This expansion has not only increased the number of products and services available to customers but also provided a platform for local businesses to sell their products in the market. The expansion has also created new employment opportunities for local residents, contributing to the economic development of the region.

The expansion of LuLu Hypermarket's distribution network has not only enhanced its reach but also contributed to the local economy. By providing a platform for local businesses to sell their products, the expansion has helped to create new jobs and promote the growth of the local economy. The expansion has also enabled LuLu Hypermarket to offer a wider variety of products, including local and imported goods, which has increased the range of options available to customers. The expansion has also helped to boost the local economy by increasing sales and providing a platform for local businesses to sell their products in the market. The expansion has also contributed to the development of the local economy by creating new employment opportunities for local residents, contributing to the economic development of the region.

Qatari volunteers take part in Qatar Charity winter aid distribution

VOLUNTEERS, media figures, social media influencers and social actors expressed happiness for being able to take part in Qatar Charity (QC)'s delegation members, in the distribution of aid to Syrian refugees near the Turkish-Syrian border. The initiative was part of Qatar Charity’s ‘Warmth and Peace’ campaign.

They emphasised the importance of getting involved in humanitarian work as the proof to contribute to alleviating the suffering of the vulnerable, assess their needs directly and give the best service to those on their heartfelt cases. “We, through conveying what we live on the ground, aim to acquire the people with the ones of those going through a very challenging situation with the help of QC’s voluntary teams, and others about the vulnerabilities who are unable to meet their simplest needs,” said Hamed al-Jaafri, representative of the benevolent initiative.

He added that this visit had a positive impact on him. “I encourage people to get involved in humanitarian work and partake in such events.”

Participating in the aid convoy of QC on the ground in Turkey, Alaa al-Hammadi, a QC media figure, urged people to contribute to alleviating the suffering of those in need. “I also appealed to people to contribute to the largest possible number of Syrian refugees and displaced persons. She also thanked Qatar Charity for allowing her to be closer to the vulnerable to assess their pressing delight at distributing aid to the refugees through the convoy of Qatar Charity’s ‘Warmth and Peace’ campaign,” said Mohamed al-Mohammad, a diplomat designated by his country.

Humanitarian diplomacy delivers people without conditions

New Covid cases fall below 100 for first time in 2 weeks

Agriculture awareness campaign for school students

The Ministry of Public Health (MoPH) yesterday reported 19 new confirmed cases of Covid-19 in the country — 97 among the expatriate community and 10 among the locals. The last time there were fewer than 100 community cases was on 9 July when 99 cases were reported.

The MoPH yesterday also recorded 120 recoveries from the virus during the past 24 hours, bringing the total number of recovered cases in Qatar to 137,040.

As part of the National Covid-19 Vaccination Program, 2,044,918 doses have been administered since the start of the vaccination campaign, and 1,419,411 doses have been administered in the past two weeks. 119,617 of the total population are now fully vaccinated with two doses.

Humanitarian diplomacy serves people without conditions: QC chief

H e Secretary-General of Qatar Red Crescent Society (QRCS), ambassador and chairman of IGA, said that “humanitarian diplomacy” aims to serve the cause of humanitarianism, and seek to persuade states concerned to mobilise support for victims of conflicts and disaster, based on international humanitarian law and relevant international charters, along with traditional diplomacy.

The lecture shed light on the “Movement has a treasured heritage with a multi-faceted contribution to ending poverty in all its forms as well as achieving the Sustainable Development Goals (SDGs).”

The lecture also highlighted that the United Nations (UN) could see the aid of Qatar’s benefactors as a “positive force” to help those who are most vulnerable people affected by conflicts and crisis.

“On the other hand, humanitarian diplomacy seeks to serve humanity without conditions by persuading others to take actions to protect the victims of natural and man-made disasters, and redress and provide support to those in need through the ultimate goal of helping vulnerable people.”

“Traditional political and humanitarian diplomacy are two lines, intertwined principles,” said Al-Hammadi.

Traditional diplomacy is concerned with reaching the highest of all states’ interests, and humanitarian diplomacy is concerned with the highest of all humanitarian needs.

“Traditional diplomacy is concerned with reaching the highest of all states’ interests, and humanitarian diplomacy is concerned with the highest of all humanitarian needs. This dichotomy is not a contradiction, but rather a complement.”

He said that this visit had a positive impact on him. “I encourage people to get involved in humanitarian work and partake in such events.”

Participating in the aid convoy of QC on the ground in Turkey, Alaa al-Hammadi, a QC media figure, urged people to contribute to alleviating the suffering of those in need. “I also appealed to people to contribute to the largest possible number of Syrian refugees and displaced persons. Using an LCD monitor with a remote eye tracker, children are shown visual stimuli to evaluate their tool. The stimuli are then used to assess the tool’s effectiveness, recognizing the role of every tool in the core component of collaborative learning. The tool’s success rate in identifying any visual treatment is over 85%. The researchers believe that this study is an important step in the early diagnosis of ASD.

In 2017, QBRI and Cleveland Clinic Children’s Hospital (CCCH) partnered on a project to bring together the researchers to study the tool’s capability of detecting ASD, using the culture-appropriate visual stimuli. The researchers attended the event in Qatar.

The research paper highlighted the findings of extensive eye-tracking assessments on over 150 individuals with ASD. In addition to its participants, we have a cross-cultural exchange that allows us to enhance the need for ASD research.

QU holds ‘Interprofessional Education Activity on Diabetes’

The Qatar University (QU)’s Health Interprofessional Education Department (HIED) has initiated the first ever IPE activity called ‘Interprofessional Education Activity on Diabetes,’ virtually on Microsoft Teams.

Some 110 students and 12 faculty members participated in this activity, which was attended by healthcare team members and healthcare students/ professionals involved in this activity, human nutrition, medicine, dental medicine, and pharmacy.

The interprofessional education activity aimed to introduce the healthcare team members and healthcare students/professionals to the interprofessional education concept and shared decision-making. It was meant to assist colleagues from various health professions to provide optimal care and to enhance healthcare team members’ knowledge.

The interprofessional education activity was designed to foster cooperation between healthcare students and healthcare professionals and support world-leading training environments by making healthcare students proficient in clinical communication and culturally sensitive.

Tamouq professor elected Fellow of the Royal Society of Chemistry

Edward Broders, professor at TAMUQ, was elected a Fellow of the Royal Society of Chemistry (RSC). This is the highest honour a chemist can receive. The RSC recognition reflects the quality of the research and developments that happen in Qatar, according to Dean Olavo Marques.

Edward received his PhD from The Pennsylvania State University in 2004 and became a professor at TAMUQ in 2016 and also the License Program Coordinator at TAMUQ.

Edward’s research interests cover computational methods for understanding reaction mechanism and catalytic processes in chemistry. In the study of chemistry, TAMUQ’s scientific community has had a strong tradition of excellence. TAMUQ’s Department of Chemistry focuses on studying the current trends in research.

Edward’s research work focuses on improving the processes available to the community and educating the students in computational chemistry.

Edward said, “Being considered for election as a Fellow is a great honour, and participation in this scientific community is a true highlight.”

Some 110 students and 12 faculty members participated in this activity, which was attended by healthcare team members and healthcare students/professionals involved in this activity, human nutrition, medicine, dental medicine, and pharmacy.

The interprofessional education activity aimed to introduce the healthcare team members and healthcare students/professionals to the interprofessional education concept and shared decision-making. It was meant to assist colleagues from various health professions to provide optimal care and to enhance healthcare team members’ knowledge.

The interprofessional education activity was designed to foster cooperation between healthcare students and healthcare professionals and support world-leading training environments by making healthcare students proficient in clinical communication and culturally sensitive.

Edward received his PhD from The Pennsylvania State University in 2004 and became a professor at TAMUQ in 2016 and also the License Program Coordinator at TAMUQ.

Edward’s research interests cover computational methods for understanding reaction mechanism and catalytic processes in chemistry. In the study of chemistry, TAMUQ’s scientific community has had a strong tradition of excellence. TAMUQ’s Department of Chemistry focuses on studying the current trends in research.

Edward’s research work focuses on improving the processes available to the community and educating the students in computational chemistry.

Edward said, “Being considered for election as a Fellow is a great honour, and participation in this scientific community is a true highlight.”

The Qatar University (QU)’s Health Interprofessional Education Department (HIED) has initiated the first ever IPE activity called ‘Interprofessional Education Activity on Diabetes,’ virtually on Microsoft Teams.

China tennis star says she is safe in video call with Olympic official

Bach, Peng had thanked the IOC in a video call with IOC President Thomas Bach, said the manager, Zhou.

The concern over Peng came as global rights groups and others have called for a boycott of the Winter Olympics in Beijing in February over China’s human rights abuses.

On November 2, Peng posted on social media that she had sexually assaulted her coach. Neither Zhang nor the Chinese Tennis Association commented on her allegation.

S everal protesters shouted, “Hamdok has sold the revolution to the military,” and “The coup triggered mass protests.”

The coup triggered mass protests.

India’s Defence Minister Rajnath Singh arrives to attend an event in Kolkata, India, February 11, 2022. Singh on Monday pledged to ramp up the defence budget and said it would hike by 10% this year, the highest annual increase in six years. He said the government had also approved a new warship for India.

Drinking tea and coffee linked to lower stroke, dementia risk: study

A majority of individuals across the world drink either coffee or tea or both. Going by the results of a newly published study, coffee/tea drinkers may have some reason to live up. At a time when stroke and dementia have become an increasing global health concern and bring a heavy burden both socially and financially, the finding that drinking coffee and tea separately or in combination was associated with lower risk of stroke and dementia has made a cup of coffee alone or in combination with tea was associated with lower risk of stroke and dementia. Intake with lower risk of post-stroke dementia.

According to a paper published in Plos Medicine journal, researchers from Massachusetts General Hospital in USA studied 360,000 people who drank daily either two-to-three cups of coffee or one to six cups of a combination of both. The results found these people had the lowest risk for diseases such as stroke and dementia. Though previous studies have revealed the involvement of coffee and tea in the development of stroke and dementia, little is known about the association between the combination of coffee and tea and the risk of stroke, dementia, and post-stroke dementia. Therefore, this study aimed to investigate the associations of coffee and tea separately and in combination with the risk of developing stroke and dementia.

Drinking coffee or tea exclusively had a lower risk for both stroke and dementia, but those who drank a combination of several cups of both faced less risk. This group of people had a 28% lower risk of dementia and 32% lower risk of stroke when compared to those who drank neither beverage.

According to the study, the information on the consumption of coffee and tea came from the UK Biobank, a national health study in the UK between 2006 and 2020. The study looked at participants between the ages of 37 and 73 who kept a diary of their consumption of coffee and tea.

In conclusion, the study found that coffee and tea, either alone or in combination, were associated with lower risk of stroke and dementia. This finding highlights a potential beneficial relationship between coffee and tea consumption and the risk of stroke, dementia, and post-stroke dementia, although causality cannot be inferred. Health information from around 600,000 volunteers in the UK between 2006 and 2020. The study looked at participants between the ages of 37 and 73 who kept a diary of their consumption of coffee and tea.

Bulgaria votes in presidential runoff as anti-graft test

AFP

Bulgarian voters take part in vote for first time since 2017

AFP

With opposition paralysed afteritory election,” said one seasoned politician, “we are voting for a first time since 2017, and that’s only a few months away. It’s a crucial test for the future of democracy in Bulgaria. The opposition is in a strong position, and the government has to show that it can deliver.”

Venezuela opposition takes part in vote for first time since 2017

The opposition was paralysed after the 2018 election, and has been unable to form a government since then. But now, with the advent of digital technologies, it has been able to organise a nationwide vote for the first time since 2017. This could be a turning point for democracy in Venezuela, and a warning to other governments that they too can be overthrown if they fail to meet the demands of the people.

Venezuela opposition leader Juan Guaidó has been detained by the authorities several times in recent months, but has been able to continue his campaign through social media and other digital platforms. His supporters have also used these tools to organise protests and rallies, which have grown in size and scope.

The government has responded by using its own digital tools to try to stop the opposition from gaining the upper hand. As a result, the election has been marked by a steep rise in the use of digital communication, and a corresponding fall in the use of traditional media.

The outcome of the election is likely to have a significant impact on the future of democracy in Venezuela. If the opposition is able to win, it will be a major victory for the people, and a clear indication that they are ready to fight for their rights.

If the government is able to hold on to power, it will be a disaster for democracy in Venezuela. The country will be plunged into a deep political crisis, and the people will be left with no hope of ever changing the system.

In any case, the election has already had a profound impact on the country. The people have shown that they are ready to fight for their rights, and the government has been forced to take notice. This is a turning point for democracy in Venezuela, and a warning to other governments that they too can be overthrown if they fail to meet the demands of the people.
Qatar’s amazing eight: stadiums that will host next year’s FIFA World Cup

Every tournament venue – including Lusail Stadium – has been completed as the country marks a year to go until the big kick-off.

Al Janoub Stadium
Located in Al Wakrah, Al Janoub Stadium was the first Qatari 2022 venue to host a significant international event. The stadium was designed in line with local traditions and culture to transcend to Al Wakrah’s everyday landscape. Built with an innovative cooling system and retractable roof, the venue can seat up to 40,000 people.

Ahmad Bin Ali Stadium
Major matches hosted: All eight matches during the 2020 AFC CHAMPIONS LEAGUE, including the semi-finals and finals. The stadium will host six matches up to the quarter-finals stage. Qatar vs. Japan on February 20, 2021.

Education City Stadium
Located in Education City, the home of Qatar University, the Education City Stadium provides a unique design that reflects the changing climate and temperatura. The stadium’s architecture also incorporates elements of traditional woven cap worn by Qatari women, symbolising the traditional clothing of the country.

Lusail Stadium
Located in Lusail, the stadium will host five matches during the FIFA Club World Cup Qatar 2020. Qatar vs. South Korea on February 20, 2021.

Al Janoub Stadium
Located in Al Wakrah, Al Janoub Stadium was inaugurated on May 16, 2019, when it hosted the 47th HH the Amir Cup final.

Stadium 974
Opened in June 2020 through a spectacular digital programming launch as a tribute to frontline health workers during the COVID-19 pandemic.

Ahmad Bin Ali Stadium
Main matches hosted: All eight matches during the 2020 AFC CHAMPIONS LEAGUE, including the semi-finals and finals. The stadium will host six matches up to the quarter-finals stage. Qatar vs. Japan on February 20, 2021.

FIFA Arab Cup Qatar 2021: The stadium will host six matches up to the quarter-finals stage. Qatar vs. Arab Cup 2021 on February 20, 2021.
