Sheikha Moza: Education key to overcome ‘social pandemics’
Qatar, the United Nations Educational, Scientific and Cultural Organisation (Unesco) yesterday launched the Arabic version of the organisation’s research report of the Broadband Commission on the Freedom of Expression and Addressing Disinformation on the Internet, which has been translated into Arabic with the support and funding of the Ministry of Foreign Affairs.

In a speech during the virtual session held on the occasion of launching the Arabic version of the report, which is the first fully translated into a language other than English, co-chaired with the First Lady of Armenia Nouneh Sarkissian, Dr Hessa al-Jaber, Chairperson of the Broadband Commission and Head of the Information Office at the Ministry of Foreign Affairs, said that Qatar believes in the right of Arab peoples to access facts and accurate information in their correct context and emphasizes that the report constitutes an entry point for a broader understanding and discussion for academics, journalists, and the public. She added that Qatar believes in the value of freedom of expression, as it is the solid foundation upon which open dialogue, critical thinking, and the press are built, adding that without it, democratic societies cannot progress. She explained that Qatar’s support for translating this report into Arabic comes in the context of its support for this Arab right, expressing Qatar’s hope that the report will constitute an entry point for a broader understanding and discussion for academics, journalists, and the public.

The states, governments, and organisations need to protect and promote freedom of expression as a concept, value, and practice in civilised societies by clearing the offenses to this value, he added. He hailed that the role played by Unesco in this context and renewed Qatar’s support for it. He pointed out that the non-vaccinated groups are considered a fertile environment for the spread of the Covid-19 mutant, as well as the reluctance of many to obtain the vaccine due to the misleading information they read about it on the Internet. The Acting Director of the Information Office at the Ministry of Foreign Affairs, Ibrahim bin Sultan al-Hashemi, said that Qatar believes in the right of Arab peoples to access facts and accurate information in their correct context and emphasizes that the report constitutes an entry point for a broader understanding and discussion for academics, journalists, and the public. He added that Qatar believes in the value of freedom of expression, as it is the solid foundation upon which open dialogue, critical thinking, and the press are built, adding that without it, democratic societies cannot progress. Qatar Balloon Festival 2021 kicks off

The Qatar Balloon Festival 2021 kicked off on December 21 at Aspire Park, featuring 30 hot air balloons of various shapes, sized and designs.

The 3-day event, which will see the world of hot air balloons celebrate on December 19, serves as one of the key attractions aimed at further boosting the country’s tourism sector.

According to the organizers, the balloons have been set to take off with the Qatar International Trust School (QITS) and other educational institutions on December 19, Aspire Park (December 21 and December 22). The number of balloons is at 30.

Qatar National Tourism Council (QNAT)’s programme provides an opportunity for visitors to view the balloons close up in the ‘depot’ rhythm accompanied by the famous ‘nautical melody’ from the main stage, creating a lovely atmosphere and an experience the visitors will remember.

‘Who is missing the balloon, who might give us a chance to watch the balloons early morning for the ‘first runners’ from their vantage at home."

The giant balloons, the festival is also hosting an array of activities for residents and visitors to enjoy, including cultural and entertainment shows, dress-up competitions, hot air balloon rides, as well as music and entertainment acts.

A special area has been set up for various games, both for children and adults, such as human-sized cardboard boxes,个性化的, a wide range of culinary delights are also offered at several blocks and trucks at the venue.

Ambassador calls for expansion of Qatar-Brazil relationship

In a statement to the Qatar News Agency, the ambassador of Brazil to Qatar, Luiz Alberto Figueiredo Machado, called for the expansion of the cultural, economic, and scientific cooperation between the two countries.

The ambassador noted that the relationship between Qatar and Brazil has witnessed significant progress in recent years, with the two countries sharing common values and interests in various fields.

Figueiredo Machado highlighted the importance of strengthening the bilateral relationship, which includes cooperation in areas such as trade, investment, education, and technology.

He added that the current international challenges, such as the COVID-19 pandemic, highlight the need for increased cooperation between countries to address these challenges.

The ambassador called for the establishment of a joint committee to oversee the implementation of the agreed-upon projects and initiatives.

Figueiredo Machado thanked the Qatari government and people for their warm hospitality and support, and expressed his hope for continued fruitful cooperation in the future.

The statement was a response to the visit of the Qatari foreign minister, Mohammed bin Abdulrahman Al-Thani, who paid a working visit to Brazil earlier this week.

The Community College of Qatar (CCQ) has signed an articulation agreement with Lusail University, enabling CCQ students to continue their studies at the university after completing their associate degree.

The agreement was signed by CCQ president Dr. Mohammed Ibrahim Al-Awadi and Lusail University president Professor Nitham Mohamed Hindi.

The agreement will allow CCQ students to continue until December 15, 2022, and will help them achieve their bachelor’s degree.

“The CCQ has been a leader in expanding opportunities for students to continue their education at the university level,” Al-Awadi said.

“This agreement will help our students continue their studies at Lusail University, which is a world-class institution,” Hindi added.

The agreement includes cooperation in various areas, such as the transfer of credits, academic programs, and faculty exchange.

More than 10 evaluation reports were issued following the inspection tours by municipal officials.

T he US-led coalition against the Islamic State militants has completed its combat mission in Iraq and will retain a non-combat role, the US military said on Thursday, a day after President Donald Trump announced the US would withdraw all combat forces from Syria.

In a statement, it said Iraqi authorities had asked the US-led coalition to stay in Iraq to continue backing the Iraqi forces against the Islamic State group. The statement said the coalition will continue to provide support to Iraq and Syria in the fight against Islamic State fighters in Iraq and Syria and to support economic development in the two countries.

The statement said the coalition will continue to work with the Iraqi government and the international coalition on issues such as counterterrorism, border security, and the fight against the Islamic State group. The coalition will also continue to support the Iraqi government in the fight against other terrorist groups, such as the Islamic State group in Syria and Iraq.

The persistence and beauty of Qatar’s culture and traditions

By Jose Benzaquen Perea

November 30, I was invited to attend an unique session that is considered to be a historical milestone that continues today in Qatar. I visited the Fishermen’s market in the town of Umm Salal Ali and was able to experience a unique tradition that was once practiced by the Qatari fishermen. This tradition involves the Qatari fishermen sailing in their typical wooden dhow boats and using their oars to navigate through the beauty of traditions and cultural values.

My knowledge with regards to this tradition was mainly acquired through my own curiosity and the willingness to learn more about Qatar and its traditions. I attended the inauguration of the event, which was held on November 30. The inauguration was attended by Sheikh Faisal bin Qassim al-Thani and in the presence of HE Abdul Ali Chalikara, the general manager of Qatar Debate last month via Zoom platform. The tournament included some interesting elements such as art competitions, unique dances as well as the dhow tradition.

Three trips of more than 40 days and months must have been combined with great challenges, for that difficult life of sailors in solitary boats that sometimes appear serene and undisturbed, became great forces that must be overcome by the Qatari fishermen. It seems that we do not really understand what they endure.

During this long history of sailors with Qatar, there would seem to be a difficult task, however, we have something very much in common: our territorial coasts bathed in the Indian Ocean and the Pacific Ocean, respectively. However, we have something very much in common: our territorial coasts bathed in the Indian Ocean and the Pacific Ocean, respectively. It seems that we do not really understand what they endure.

In the historic Arabian Gulf, I never had such a memorable experience that united other nations to take part in this event and experience Qatar’s own traditions by “transporting us in time” and navigating through the beauty of traditions and cultural values.

I left the event with a sense of pride and a deep appreciation for the culture and traditions of Qatar. I was able to witness a unique tradition that was once practiced by the Qatari fishermen. This tradition involves the Qatari fishermen sailing in their typical wooden dhow boats and using their oars to navigate through the beauty of traditions and cultural values.

In addition, I was able to collect some interesting stories about the Qatari heritage and traditions. Sheik Lekhwi, one of the most prominent Qatari sailors, shared with us the story of his life and his contribution to the culture and traditions of Qatar. His story was both proud and humbling to share with the guests present.

The Qatari heritage and traditions show the persistence and beauty of traditions in the historic Arabian Gulf. Our inhabitants also sailed fearlessly and admirably in modest boats known to collect that immense variety of fish that until now represents an important economic resource for them. They were our so-called “caballito de totora” (reed watercraft) sailing thousands of miles and built with stone and leaves of totora (calaminus), as well as our rat the farther north of two built with four or five wooden frames and an artisanal sail, where two sailers and an one last night of the boats and only oriented themselves on their return when the wind took direction north and in the afternoon. By highlighting ancient connections with other countries and nations, people are able to understand how other cultures and traditions can be brought together through the beauty of traditions and cultural values.

A Peruvian fisherman sets out on his caballito de totora (reed watercraft). Our inhabitants also sailed fearlessly and admirably in modest boats known to collect that immense variety of fish that until now represents an important economic resource for them. They were our so-called “caballito de totora” (reed watercraft) sailing thousands of miles and built with stone and leaves of totora (calaminus), as well as our rat the farther north of two built with four or five wooden frames and an artisanal sail, where two sailers and an one last night of the boats and only oriented themselves on their return when the wind took direction north and in the afternoon. By highlighting ancient connections with other countries and nations, people are able to understand how other cultures and traditions can be brought together through the beauty of traditions and cultural values.

AQUARIUS
January 20 — February 18
You might be feeling more creative and imaginative today. You could be looking forward to some exciting opportunities or experiences. You might also be feeling more optimistic and hopeful about the future.

PISCES
February 19 — March 20
You might be feeling more sensitive and intuitive today. You could be looking forward to some exciting opportunities or experiences. You might also be feeling more optimistic and hopeful about the future.
A charter plane has left Australia Prime Minister Scott Morrison watching a result as parliamentarians divided along party lines and voted against the government.

Morrison had planned to use the last sitting of 2021 to pass bills that would create a new national safety and security Labour Force, including a controversial religious freedom bill that was promised after a same-sex marriage debate.

Instead, the final two weeks of parliament saw Morrison divided in the government and opposition, leading to a vote on the government, forcing a delay in the religious freedom bill, and other legislation, possibly until the next session.

“The events of the past few days have left the government clearly unable to manage the majority of the parties in the House,” Morrison told the Daily Telegraph.

While the Labor Party sees Morrison’s fortunes, as it has to, go to the poll in May 2022, the prime minister has emboldened on a series of political campaign events.

It is not a new situation for Morrison — three years ago he had just become prime minister, and some of his predecessors were in a party-room vote and a delay to other bills. The result, a stunning election in May 2019.

On Monday the closely watched News poll showed Morrison’s coalition government would lose office. Labour, polls show, would now be in a position to form a government if the prime minister's predecessor was rolled.

Morrison is also struggling to appeal to female voters, polls show. The government was metagenerated after allegations this year of a rape in the workplace culture of parliament house. Published last week, it showed that women handled the complaint.

Morrison has long been wounded by ads on its integrity after French President Emmanuel Macron dismissed the prime minister had been accused of accepting a large kickback from the sale of a warship.

Labour used parliament to repeatedly raise questions of Morrison’s credibility and transparency, and the Labor Party began some traction with voters.

Morrison’s advances to the signature event, but government sources say the he is confident he can repeat the miracle.

While the international community decides how to uphold its promise to Afghanistan, the government says the prime minister would not leave his run as late as late March, suggest Morrison.

Morrison's coalition government had just become prime minister after his predecessor was rolled three years ago he

By Masood Ahmed

The Afghan economy is in free fall. Polls show the country’s new leaders. A small subset of this group would go further, arguing that the government’s gains of the past two decades in human rights, democracy, governance and security, and humanitarian crises – and that these are not well positioned to manage Afghanistan, with or without Taliban, leadership, will not be contained within Afghanistan, with or without Taliban, leadership, will not be contained within

The real future of Afghanistan depends on how the country’s new leaders manage the country’s frozen reserves to pay for essential imports of food, fuel, and medical supplies. Afghans could start to find themselves in an acute humanitarian and health crisis, with or without Taliban, leadership, will not be contained within Afghanistan, with or without Taliban, leadership, will not be contained within Afghanistan, with or without Taliban, leadership, will not be contained within

For the immediate Omicron threat, most companies

For the immediate Omicron threat, most companies

The most ominous threat is the absence of the messenger RNA (mRNA) vaccines, which tells high-risk healthcare workers. The mRNA vaccines have the advantage of being more easily adaptable to new varieties. Moderna and Pfizer/BioNTech have already started to work on a vaccine they can use on their own. AstraZeneca has started a new phase of trials with the new coronavirus, which was released in 2021.

Acting upon the Qur'an

From a social perspective, the Qur'an’s teaching is based on the unity (Ummah) or community, in which all the Muslims are members, regardless of language, color, race, or nationality. This unity is the basis for all actions and decisions. The Qur’an teaches that every individual should contribute to the well-being of the community. It emphasizes the importance of peace, justice, and brotherhood among Muslims. The Qur’an also teaches that Muslims should support each other in times of need and work together for the benefit of the community.

The Qur’an also emphasizes the importance of education and knowledge in building a strong and unified community. It encourages Muslims to study and learn from the Qur’an and the Hadith (sayings of the Prophet Muhammad). The Qur’an stresses the importance of knowledge and learning, and it teaches that those who seek knowledge are rewarded by Allah.

The Qur’an also teaches that Muslims should be hospitable and welcoming to guests, tourists, and visitors. It emphasizes the importance of providing food, shelter, and other necessities to those who are in need. The Qur’an also teaches that Muslims should be kind and compassionate to all people, regardless of their race, color, or nationality.

The Qur’an also teaches that Muslims should be diligent in their work and strive to improve their skills and knowledge. It encourages Muslims to take an active role in their community and to be contributing members of society. The Qur’an also teaches that Muslims should be patient and persevering in their efforts to achieve their goals.

The Qur’an also teaches that Muslims should be honest and truthful in their dealings with others. It emphasizes the importance of truthfulness and integrity in building trust and confidence among people. The Qur’an also teaches that Muslims should be generous and charitable, and should give to others in need.

The Qur’an also teaches that Muslims should be patient and persevering in their efforts to achieve their goals. The Qur’an also teaches that Muslims should be honest and truthful in their dealings with others. It emphasizes the importance of truthfulness and integrity in building trust and confidence among people. The Qur’an also teaches that Muslims should be generous and charitable, and should give to others in need.

Staying informed about the Qur’an can be done through reading the Qur’an and the Hadith, attending religious classes, and participating in community events. It is important to remain active in the community and to contribute to the well-being of the community.

Building a characterised society by solidarity

The Qur’an is the guidance that mankind needs to achieve happiness and success, and it is the best speech. It is the Book of Allah and the best good which man can possess. The Qur’an is the guidance that mankind needs to achieve happiness and success, and it is the best speech. It is the Book of Allah and the best good which man can possess.

Qatar Education Strategy in January

Qatar will launch a re-designed e-learning strategy in January, His Excellency the Minister of Education and Higher Education Minister Dr Yousef Al Othman has said.

E-learning has taken place in the background during the past decade, there had been weaknesses and strengths the system has, “we have realised the weaknesses tem was introduced in the public Summit 2021 yesterday.

Dr Amal al-Malki, founding principal presenter Dareen Abughaida.

According to her, the strategy focuses on the holistic development of the children and to pri- oritise their mental health.

In addition to the HBKU's social and emotional well-being programme, “When I say education, I mean quality and confi dence in their hearts and minds.

It is one of the fi rst studies that can be replicated in other countries. “We have presently four countries: Zanzibar, Eritrea, Somalia and Gam- bas, Dr Isatou Touray, and moderated by Gambia Vice-President Azoulay, and Gambia Vice-President Azoulay remarked: “During the pan- demic, more than 1.5bn children were deprived of distance learning. We have about 200 members in this initiative and it is working in over 100 coun- tries to support the right to education, especially as possible” Azoulay continued.
