Cabinet nod for 100% non-Qatari ownership of capital of 4 banks

New authority to develop real estate sector to be established

Cabinet also approved a draft Cabinet resolution amending some provisions of resolution No. 11 of 2009 reorganising the Permanent Population Committee.

The draft resolution was prepared within the framework of the development of the administrative re-structuring of some authorities in the country.

After listening to a presentation by HE the Ministry of Municipality and Environment yesterday approved a draft Cabinet resolution amending some provisions of resolution No. 11 of 2009 reorganising the Permanent Population Committee.

Global airlines prepare for Omicron volatility

Global airlines are bracing for more volatility due to the Omicron coronavirus variant that could force them to juggle schedules and forecasts. Fitch Ratings has lowered its global passenger traffic forecasts for 2021 and 2022, saying the emergence of new variants like Omicron highlight the importance for airlines to move on domestic markets where they have more control and less volatility than international trips.

Many travellers have already booked trips for the Christmas period, a peak season for airlines, but once news of the variant last week, these bookings are now in doubt. The new variant of the coronavirus variant is rapidly becoming dominant in South Africa, less than four weeks after being detected there, prompting a handful of countries to tighten their borders against the new threat.

Baby Elephant Organic Wear unveils winter collection

By Shafeeq Alingal

Baby Elephant Organic Wear yesterday launched its winter collection at Studio 7 at M7 Building of Msheireb Downtown Doha in the presence of Spanish ambassador Belen Alfaro, Gulf Times Editor-in-Chief Faisal Abdulhameed al-Mudahka and other dignitaries.

The winter collection has a wide selection of organic super soft clothes for newborns and older kids. These include hoodies, pants, tees, shorts, jackets and kids’ sets.

While addressing the launching ceremony, Baby Elephant Organic Wear founder and designer Aysha al-Mudahka said she was proud to launch a new brand of clothes that convey the messages of sustainability and environmental preservation. “The brand is organic, cool and Arabic inspired. Our inspiration is kids. And we strongly believe in our idea of sustainability, “ al-Mudahka said, adding that the initiative is helping a large number of farmers who follow conventional farming methods while importing cotton from the villages.

HMC Internal Medicine Residency programme gets exceptional score

The Internal Medicine Board of Accreditation (IMRB) has accredited the programme within the context of the 18th cycle on the basis of its excellent performance. The certification was achieved after the programme submitted results that satisfied the criteria established by the IMRB, which has been working to establish standards to ensure quality in medical education programmes.

The AGCME’s assessors commented on the programme’s achievements, pointing out the well-structured curriculum and the quality of the teaching and learning methods. They also noted the programme’s ability to adapt to the changing needs of the medical community.

The IMRB’s evaluation team visited the programme to assess its compliance with the accreditation standards. The programme was awarded a score of 97.5 out of 100, highlighting its strengths in several areas, including curriculum design, faculty development, and student assessment.

The IMRB’s decision follows a rigorous process that includes site visits, document reviews, and interactions with faculty, staff, and students. The programme is now eligible to receive the IMRB’s seal of approval, which signifies its commitment to excellence in medical education.

The IMRB’s accreditation is a significant milestone for the programme, providing assurance to students, faculty, and the healthcare community that the programme is of high quality and meets rigorous standards. It also opens the door for the programme to participate in international iterations of the programme, enhancing its recognition and reputation.

The programme’s success is attributed to the dedication and hard work of its faculty, staff, and students, who are committed to delivering a top-quality education that prepares graduates for successful careers in medicine.

This year, the IMRB’s accreditation process involved a comprehensive evaluation of the programme’s compliance with the accreditation standards. The programme was assessed on several key areas, including curriculum design, faculty development, and student assessment.

The programme’s success is attributed to the dedication and hard work of its faculty, staff, and students, who are committed to delivering a top-quality education that prepares graduates for successful careers in medicine.

**Type 2 diabetes may have twice the risk of developing dementia: HMC**

Medical experts at Hamad Medical Corporation (HMC) recommend lifestyle changes in patients and younger people to delay or prevent type 2 diabetes, as both can increase the risk of developing Alzheimer’s disease later in life.

Dementia is considered a risk factor for all types of dementia, research has shown that diabetes regularly delays the development of dementia and can increase the risk of developing Alzheimer’s disease later in life.

Dementia is a term collectively used for a number of brain diseases that affect the functions of brain activity, thinking ability, memory and planning, among the group of Alzheimer’s disease, Parkinson’s disease, and Huntington’s disease.

Dr. Dr. Ali Almamed, National Health Strategy Lead of Healthy Aging and medical director at Qatar Rehabilitation Institute and Ramathat Hospital says: “Too often people think about their health in later years when they start to experience health problems and many of these problems start developing in their earlier years.”

Based on the data from the National Institute of Diabetes and Digestive and Kidney Disease (NIDDK), in the last 10 years, diabetes has been the most common cause of kidney disease.

Dr Biju Bhaskaran, consultant of Internal Medicine and Geriatrics at the Qatar Rehabilitation Institute (QRI), said that research has shown that people with type 2 diabetes have a higher risk of developing dementia compared to their counterparts without diabetes, with this risk increasing with the duration and severity of diabetes.

“Diabetes in not well controlled or if diagnosed very late, people with diabetes have a changing number of complications that can affect their nervous system, heart disease, stroke and dementia.”

“Although some people who have type 2 diabetes have a certain number of complications that may increase the risk for other diabetes, which is indicative of their lifestyle. It is most important for adults to control their blood sugar as they know what they can do to maintain or improve their health.”

**Umm Salal Modern now an integrated marketing platform: Hassad Food**

Hassad Food has fully developed the fish market inside the Umm Salal Modern Center, according to the latest international standards.

The market currently covers over 1,500 m² and includes 25 shops, an anchor yard for 70 boats, and a dedicated area for the sale of live fish with fresh water coming from local and Al Khai farms, as well as an area completely dedicated to selling fish products.

To support the fish farmers, Hassad Food has dedicated a suitable space within the market, to hold all the shops, for owners of fish farms and products.

Moreover, the central market includes a private slaughterhouse with a production capacity of up to 1,500 heads per head for the management of Hassad Fish, in addition to the refrigeration and fish cleaning sections.

On the legal fields between the Ministry of Justice (Ministry of Justice and Attorney General) and Hassad Food, a draft air services agreement signed regarding the participation of Hassad Food in the operation for the tasks of the Ministry of Justice and Attorney General.

This co-operation is a model for successful competition that meets the needs of the Ministry of Justice and Attorney General, which symbolises solidarity and embodies Qatar’s pride in hosting this tournament.

The Cabinet also approved a draft memorandum of understanding (MoU) was signed regarding the understanding (MoU) was signed.

The cabinet took the necessary measures to ensure the participation of all parties, in addition to the technical arrangement with regard to the participation of all parties and the organization of the event. The Cabinet expressed its appreciation for the efforts made by the Italian delegation to co-operate with the Qatari side, in particular the Italian Embassy, in co-operation with the MoFAIC, and the Ministry of Defence, in the tournament. South African tourism was just getting back on its feet when local scientists’ discovery of the new Omicron coronavirus variant triggered a fresh wave of travel curbs that threatens to bring more pandemic gloom to the country’s fragile economy.

At least one billion rand (S$14.5 billion) in bookings have been cancelled in recent days as various countries reimposed travel restrictions including flight bans, and tourism industry leaders said they feared a new wave of job losses.

“South Africa is being punished for its brilliant work in the field of science,” Tshifhiwa Tshivhengwa, head of the Tourism Business Council of South Africa (TBCSA), said in emailed comments. “We were just about getting started again and this travel ban just knocked it back.”

In the tourism industry, foreign visitor numbers dropped by 71% in the first half of 2021 compared to the same period in 2019. By October this year, South Africa had lost 470,000 tourism sector jobs out of 1.5 million, according to government statistics.

He said that the countrys’ success in containing Covid-19 during the first half of 2021, and expected to see the rate of infection peak at 2-3%.

Regarding the role of the government, Dr al-Nabit stressed that the PSA, in cooperation with the semi-governmental agencies, as a main authority, is currently following up the implementation of initiatives to confront the Covid-19 crisis and its restrictions, driven by the repercussions of the crises and shocks and will be more resilient with a strong, cohesive and able government structure.

He said that the results of the census showed a remarkable development in many aspects of the country, the most prominent of which was the significant increase in the number of women in the workforce, the increase of educational and scientific achievements, and increase in the number of people without “delay”, he said. — Themoson Reuters Foundation

The exhibition, organised by
Katara, in co-operation with the
embassy of Ghana, will run until
December 12 at Building 47 and in-
cludes: ‘The Golden Cave’, ‘The Vi-
sion’, ‘Mother’s Pride’, ‘Final Price’,
‘Survival of the Fittest’, ‘The Silent
Listener’, and ‘Nostalgia for the Un-
seen Ear’.
Prof al-Sulaiti stressed that Ka-
tara opens its doors to creators in
various cultural and artistic fields.
As it constitutes a cultural edifice
and a beacon of creativity and art, he
said “Katara welcomes all cultures.”
He also expressed his admiration for
the exhibition and the “high artistic
and human values” it holds. “This ex-
hibition offers an opportunity to learn
about Ghana’s cultural, artistic,
and intellectual richness, as these exhibi-
tions open windows for cultural com-
munication between cultures, consid-
ering culture and arts are the best means
of rapprochement,” he said. In a speech,
Dr Enos lauded the efforts of Katara to
make the event “a tangible reality.”
He said: “The Republic of Ghana has
a great history that will allow art lovers,
experts, intellectuals, and historians to
discover the rich historical and cultural
heritage of Ghana.”
He stressed that the exhibition will
build strong bonds between Qatari
and Ghanaian cultures, as well as with
international cultures, which would
enhance mutual interests and diplo-
matic, economic, and cultural rela-
tions.

The ‘Harmonic Diversity in Art and Culture’ exhibition was opened in the presence of Ghanaian ambassador Dr Emmanuel Enos and several other diplomats.

Some 21 distinctive paintings on show at Katara.
