Qatar starts giving second dose of Covid vaccine

The House of Representatives voted yesterday to make Donald Trump the first US president to be impeached twice, and to remove him from office. The move came after the US Supreme Court ruled that the procedure could be used to impeach a sitting president.

The House of Representatives approved the resolution by a vote of 230 to 197, with 12 Republicans joining the Democratic-led majority in favor of impeachment. The resolution was then sent to the Senate for consideration.

Meanwhile, Republicans in the Senate continued to push for a resolution that would protect President Trump from being impeached a third time. The Senate has not yet voted on the resolution, but it is expected to pass with the support of some Democrats.

The move comes after the impeachment investigation was launched earlier this year, following the US Capitol riot in January. The investigation was focused on Trump’s role in inciting the violence that led to the death of five people and hundreds of injuries.

In a statement, the House speaker said: “The impeachment process is a serious and solemn one, but it is necessary to hold accountable those who betrayed their oath of office and the people they represent.”

Meanwhile, Trump’s legal team has filed a motion to dismiss the impeachment charges, arguing that the process is an unconstitutional attempt to overturn the election results.

Qatars minister of state for energy affairs, Saad al-Bin Shereida Al-Kaabi: “By implementing our Sustainability Strategy, we will play a decisive role in helping reduce the impact of climate change by implementing measures to cut emissions, reduce 120% using the latest carbon capture and storage technologies, and innovating for sustainability solutions to meet global ambitions to achieve net zero and carbon neutrality by 2050.”

The strategy is underpinned by Qatar Petroleum’s new Sustainability Strategy, which sets out a roadmap for a sustainable and more environmentally friendly future. It aims to reduce greenhouse gas emissions by 2030, and to eliminate routine flaring by 2040.

The strategy is also designed to meet the goals of the Paris Agreement, and provides valuable support to the global energy transition.

Cabinet nod for renewal of QF CRA board

The Government Information Infrastructure (GII) department has submitted a recommendation to the Ministry of Economy and Commerce (MoEC) to renew the Qatar Financial Centre Regulatory Authority (QFCRA) board. This decision is based on the principles set forth in the Amir’s Directive No. 28 on “The Establishment of the Regulatory Authority of the Qatar Financial Centre.”

The recommendation includes the renewal of the QFCRA board’s mandate, which is due to expire on March 31, 2023. The board consists of nine members, including representatives from the Ministry of Economy and Commerce, the Qatar Financial Centre, and other relevant stakeholders. The renewal process is subject to the approval of the Ministry of Economy and Commerce and the General Authority for Public Utilities Regulation (GAPUR).

The QFCRA board’s mandate includes the implementation of the Amir’s Directive No. 28, the regulation of financial services in the Qatar Financial Centre, and the promotion of the center as a center of excellence in the financial sector. The renewal of the board’s mandate will enable the QFCRA to continue its mission and achieve its objectives.

MoTC dept awarded ISO/IEC certification

The Ministry of Transport and Communications (MoTC) has been awarded the ISO/IEC 27000:2013 certification for its Information Security Management System (ISMS). The certification covers the processes and activities related to the protection of information and data assets, ensuring that they are managed effectively and securely.

The ISO/IEC 27000:2013 standard is a globally recognized framework for establishing, implementing, maintaining, and improving information security management systems. The certification acknowledges MoTC’s commitment to implementing effective information security practices and ensuring the protection of sensitive information.

The certification process involved an assessment of MoTC’s ISMS, including the identification of information security risks, the implementation of controls to mitigate these risks, and the continuous monitoring and improvement of the system. The certification is valid for three years, after which MoTC will undergo a re-certification audit.

MME discusses co-operation with UN environment body

The Ministry of Municipality and Environment (MME) and the United Nations Environment Programme (UNEP) discussed co-operation in the field of environmental services. The two sides also discussed technical support in projects for monitoring the quality of air, marine services, and the protection of environmental services as well as the implementation of training programs.

The meeting focused on the appropriate mechanisms and processes to be used in the protection of the environment. It also examined the exchange of noted experiences in the environment to ensure good governance of the environment to ensure security on networks, applications, systems, and even personal devices. Moreover, the meeting also covered the protection and management of environmental data and electronic services.

The meeting took place via video conference technology. The meeting covered the protection of data and information during 2022 FIFA World Cup, Qatar Health 2021 Pandemic Mitigation, and the importance of using environmental data in the recovery and business continuity of electronic services.

The meeting also discussed technical controls in accessing, storing, processing and reading environmental information, the protection of information to ensure confidentiality, integrity, and availability, and the deployment of a set of environmental controls, procedures, organizational structures, and software and hardware functions.

The department achieved an important international standard for all the Government's cybersecurity management systems, resulting in QF CRA board.

The ISO 27000:2013 is the international standard that is concerned with information security, where it defines the administrative and technical controls in accounting, auditing, and managing and unencrypted and encrypted data in IT environments and electronic services.

The meeting focused on the appropriate mechanisms and processes to be used in the protection of the environment. With funding from Qatar Fund for Development (QFFD), Qatar Red Crescent Society (QRCS) has delivered a batch of medical supplies to the Khartoum Teaching Eye Hospital (KTEH) in Sudan as part of a medical convoy project to treat eye diseases under the Sudan relief campaign.

“We are proud of our continuing efforts with our strategic partner QRCS. They made commendable efforts to execute the project up to the highest standards,” QFFD Country Programme Management Director Sultan bin Ahmed al-Asiri said in a press statement.

“This and other similar projects are crucial to go on with our development efforts in Sudan. Now, the country is particularly in need of medical assistance, in the aftermath of the flash floods of August 2020, which left behind severe damage and casualties,” he added.

QRCS's head of Mission in Sudan Dr Awadullah Hamdan said: “The medical supplies include 18 categories of assorted consumables, medications, and other items to ensure that the hospital's patients have access to medical treatment. We will continue to deploy medical convoys in diverse specialties.”

KTEH general manager Dr Somaya Ali Daboura lauded QRCS' enormous contributions, thanking the organisation and QRCS for their generous support at a time when the hospital is desperate for such medical supplies.

“The hospital needs more medical equipment and consumables to be able to serve the community. The humanitarian assistance and medical supplies represent a praiseworthy initiative of solidarity,” Dr Daboura said.

A high-profile delegation from QRCS, headed by its secretary-general, Ali bin Hassan al-Hammadi, visited the affected districts in Khartoum to identify the damage caused by the flooding.

Covid-19 positive patients must complete 90 days of vaccination

The Ministry of Public Health (MoPH) has confirmed that the Pfizer-BioNTech and Moderna vaccines are the only COVID-19 vaccines mandatory for travel to Qatar. According to the MoPH, all residents should take the vaccine to receive necessary healthcare. In addition, the MoPH emphasized the importance of following all precautionary measures, including social distancing, to contain the spread of COVID-19. The designated authorities are responsible for implementing necessary checks at Muaither, Hamad Medical Corporation and other health centres to undergo the necessary checks at the Ministry of Public Health (MoPH) site for regular updates and new information.

QIIB holds mock evacuation at HQ

In line with QIIB’s plan to respond to emergency situations and accidents and the security and safety standards defined by the MoPH, the bank recently conducted a mock evacuation drill at its headquarters in Grand Harst. This was in response to the precautions and instructions related to COVID-19, and was conducted to prepare for any unforeseen emergency situations.

Mazaya reveals acquisition of residential buildings in Al Sadd

Recently, Mazaya Company announced the acquisition of four residential buildings in Al Sadd area, which have been transferred to its private ownership. The buildings cover a total area of 6,659 sqm. The buildings are divided into two complexes, each containing different types of apartments – three-bedroom and two-bedroom – and each building contains a swimming pool, gym and parking for 150 cars. The buildings are located at various locations, and each type is distinguished by its proximity to the daily needs of residents, with the largest one located at a prime location.

Four held for violating home quarantine rules

The designated authorities in Qatar have arrested four people violating the legal requirements of quarantine procedures. The actions are in implementation of the precautionary measures in force in the country to curb the spread of COVID-19. The violators, who were arrested in the Al Dafna and Al Thumama areas, were fully seized and will have a good, civil record, according to the MoPH and the company’s shareholders. A notice was posted on social media - was incorrect. The statement added.

MoPH reports 143,094 total Covid recoveries

The MoPH reports 143,094 total Covid recoveries as of 16 October 2020. The MoPH shared on social media that the Pfizer-BioNTech vaccine is an effective and safe vaccine and that the moeburculation of the precautionary measures has been completed. In addition, the MoPH expressed the importance of following all precautionary measures, including social distancing, to contain the spread of COVID-19.
Dukhan Bank launches all-new Mercedes-Benz S-Class

Nasser bin Khalid (NBK) Automobiles, the authorized distributor of Mercedes-Benz in Qatar, has announced the launch of the latest all-new Mercedes-Benz S-Class along with the 11-day programme for the Dukhan Bank CEO Khalid Thajudheen

The 11-day programme will be held from January 26 to February 6, where NBK will announce the launch of the all-new Mercedes-Benz S-Class. In the first draw of the event, winners will be announced from January 26, followed by the remaining draws over two weeks. The second draw will be announced on January 31, followed by the third draw on February 2, and the final draw will be announced on February 6.

This event was announced as one of the major initiatives of the Dukhan Bank in Qatar, coinciding with the Qatar National Day celebrations. In addition, the program is designed to benefit both NBK Automobiles’ customers and NBK’s many bank-accustomed customers.

“Customers are the backbone of our business, and we are always keen to give them the best possible experience,” said Nasser bin Khalid, director of NBK Automobiles.

“With the launch of the all-new Mercedes-Benz S-Class, we are proud to bring our customers the latest in luxury and technology, ensuring that they have access to the finest driving experience on offer. We are excited to offer our customers the opportunity to win one of these magnificent cars in our upcoming draw.

“NBK’s commitment to excellence and customer satisfaction is evident in our initiatives, and this launch event is a testament to our dedication to our customers,” added Nasser bin Khalid.

Customers who participate in the draw stand a chance to win one of the three S-Class cars. The draw will be held at the Dukhan Bank CEO Khalid Thajudheen’s office, with all NBK’s branches, and the winners will be announced via the Dukhan Bank’s official social media platforms.

“Customers can participate in the draw by filling out the entry forms available at all NBK branches or via the Dukhan Bank website. The entries will be processed, and the winners will be contacted directly.

“Customers who participate in the draw stand a chance to win one of the three S-Class cars. The draw will be held at the Dukhan Bank CEO Khalid Thajudheen’s office, with all NBK’s branches, and the winners will be announced via the Dukhan Bank’s official social media platforms.”

Philippines revises travel restrictions

The Philippine government has announced the lifting of 14-day quarantine for fully vaccinated entrants, as the travel restrictions to prevent the spread of COVID-19 are being relaxed. The new regulations will come into effect on January 15, without prejudice to the extension of such periods until January 31. The new guidelines are the result of the careful balancing of public health considerations and economic activities, as the government seeks to balance the need to control the pandemic with the need to support economic recovery.

The new regulations will allow fully vaccinated entrants to enter the country without undergoing quarantine, provided they present a valid certificate of vaccination and a negative RT-PCR test result within 72 hours of arrival. The new regulations will continue to apply to non-Filipino entrants, foreign nationals who have a valid Temporary Visitor’s Certificate of Authority (TVC) or an Alien Travel Authority (ATA), and other entrants who have a valid entry visa or travel document issued by the Philippine government.

The new regulations will be in effect until January 31, unless extended or modified by the Department of Health (DOH) based on the recommendations of the Inter-Agency Task Force for the Management of Emerging Infectious Diseases (IATF). These regulations are intended to promote the safe and有序 recovery of the Philippines economy, while protecting the health and safety of its citizens.

The DOH has recommended the lifting of quarantine requirements for fully vaccinated entrants as the country’s vaccination efforts continue to progress. The DOH is monitoring the situation closely and will continue to adjust the regulations as necessary to ensure the safety of its citizens and the economy.

The new regulations will be implemented in phases, with the first phase allowing fully vaccinated entrants to enter the country without quarantine, followed by a second phase that will allow other entrants to enter the country with a negative RT-PCR test result within 72 hours of arrival. The new regulations will continue to apply to non-Filipino entrants, foreign nationals who have a valid Temporary Visitor’s Certificate of Authority (TVC) or an Alien Travel Authority (ATA), and other entrants who have a valid entry visa or travel document issued by the Philippine government.

HBKU’s College of Law partners with QFC

Challenges to workplace conditions due to the Covid-19 pandemic were explored at an online colloquium organised by the College of Law at Hamad Bin Khalifa University (HBKU) and Qatar Intercontinental Academy for Security (QIAA) on 30 March 2021. The event brought together experts, lawmakers and researchers to discuss the need for legal frameworks to address the challenges and gaps in current laws and employment terms. With a view to highlighting contemporary problems, the symposium offered industry specialists the opportunity to explore how policy and legislation can address the issues.

Chairied by Gani S. Karim, Dean of the College of Law at HBKU, panellists navigated the discourse by highlighting changes to both workplace arrangements, from remote work to flexible and annual leave, and health and safety concerns, including low sufficiency to address unemployment, vocational courses, and if not, what actions are needed.

There were presentations by Leghribi, Qatari Police Department’s Commander-in-Chief; Abdullah al-Shayji, Qatar Intercontinental Academy for Security (QIAA); and Jassim Saud al-Thani, former CEO of QF.

The panellists also highlighted the increasing role of women in the workplace, noting that such practices will be necessary to gain the trust of all employees, and defining their rights.

"Dialogue, which is the only way to heal all the issues, is necessary to gain the trust of all workers, and defining their rights," Jassim Saud al-Thani, former CEO of QF, said.

MME showcases expertise in radiation, N-equiment

The Ministry of Municipality and Environment (MoME) organised an awareness campaign on radiation and nuclear fields of education, training, research, and cooperation. QB president Dr Hassan Rashid al-Derham and MoME minister Laith Al-Suwaidi yesterday, announced an initiative to plant one million trees in Qatar. The initiative is a continuation of the one million tree-planting drive organised in 2019 as part of the Qatar National Vision 2030.

"In this project, we aimed to leverage our academic expertise to support Qatar’s role as an important national institution in the world of science and research in the region, in line with the national vision and the mission of the MoME," the minister said.

Oman, Kuwait sign MoUs

The Ministry of Environment and Water (MoEW) and the Ministry of Housing and Community Development (MHCD) signed several MoUs to further cooperation in the field of water management.

The MoEW underlined that a number of important initiatives have been launched in the field of water management in Oman to meet the increasing demand for water and ensure sustainable development.

The signing ceremony was attended by Khalid Nasser Al-Hajri, the MoEW’s assistant undersecretary for water and rural affairs, and Dr Hassan Rashid al-Derham, the MoME’s minister. The event was also attended by representatives from various government and private sector bodies.

The MoME aims to further strengthen its cooperation with other countries in the field of radiation and nuclear fields, and to expand its work in these fields to include the Middle East and other regions.

The MoME is working on several initiatives to educate and raise awareness about the importance of radiation and nuclear fields, and to provide training courses and seminars to promote awareness and understanding of the importance of radiation and nuclear fields.

The MoME has signed several MoUs with other countries in the region, including Iran, the UAE, and Saudi Arabia, to further cooperation in the field of radiation and nuclear fields.

The MoME’s cooperation with these countries aims to exchange expertise and knowledge, and to promote mutual understanding and respect in the field of radiation and nuclear fields.

Creating flow in 2021

By Shelly Ald

Now that we are two weeks into 2021, I must ask you a question. Are you feeling stuck? Are you lost in a world of chaos that seems never-ending? Are you feeling out of control and overwhelmed? If you are, you are not alone. Everyone seems to be feeling stuck these days. But why is this happening? The world has been in chaos for the past year, and now it seems as if we are still struggling to find our footing. But don’t worry, there are still many practices that can help you deal with these challenges and emerge stronger.

The first step is to stop and take a moment to listen to yourself. Ask yourself a few simple questions:

1. How do you feel today?
2. What do you need right now?
3. What can you do to help yourself feel better?

The answer to these questions can help you understand what you need and what you can do to move forward.

Exercise to boost your mood

By Brigid Delaney

It’s the first month of 2021 and I’m already tired: I have a list of resolutions and goals for the year that I’m burning with energy to implement. Now ‘tis the season to be jolly! But...

Remedies—particularly a self-care routine—appear to be about everywhere in 2021. Whether you are an anxious warrior or on the brink of burnout, you are not alone in your suffering. And there are plenty of reasons to be suffering. You may already be tired before you even get out of bed. When you wake up, you aren’t yourself: you are a shadow of your former self. When you go back to the office, you may feel like a robot. You may find yourself constantly reaching for the sugar or the caffeine. When you get home, you feel empty, drained, and ready to cry. You may feel like you have no energy left for anything else.

A feel-better guide for the already tired

By Rose Delaney

I’m always a sucker for a feel-better guide for the already tired. I have a list of resolutions and goals for the year that I’m burning with energy to implement. Now ‘tis the season to be jolly! But... By Rose Delaney

The framework: habit stacking (and starting small)

Dr Breanna Wright, a geriatrician and internal medicine specialist at Monash University, says if you are trying to make something new out of something old, you need to make it as pandemic-proof as possible.

So here’s via an assembled team of experts to advise on the moment and be mindful of your movements and the potential stress it has to you in danger. Congruently flying, then looking, recognizing that the dreamer is really powerful – because stress can be anything that you do.

The more, the merrier, dropping some ideas, saving money, opening time on social media, establishing a production practice... many natural ‘how to’ books are not very helpful, but they are helpful. It’s the first step: sleep, a wide available supply of vaccines, 2021 could deliver more of the same drugs and dangers: coming in like a batter, like an expert, like a novice. It’s the same routine. If you are not you, you don’t get the same appetite or nutrition, you can’t reach good quality sleep any more. For 2021, the biggest factor to think about is health and longevity.

Gardening is boring and messy. First, it often results depression and possibly even contraction of diseases. "So how do we control ‘having a good time’? To have energy and the will to do it at all, and you..."

Creating flow in 2021

I have a list of resolutions and goals for the year that I’m burning with energy to implement. Now ‘tis the season to be jolly! But... By Rose Delaney

"I am already tired. It’s the first month of 2021 – including developing an everyday, active life. As a result, people are more likely to have a healthy lifestyle. Curiosity, and this is a new phenomenon in the moment, is being linked to emotions. The weakness of the insulted person, and disagreements, because most of these are to be neutral or positive, and their needs unjustly suff ered in our societies from what is known as a ‘no contest’.

You have reached a place where you can actualize and can take it to your own advantage and reveal it. ”

New habits are connected to each other. By focusing on one thing at a time and getting rid of the task in front of me. We suff er in our societies from what is known as a ‘no contest’.

A Jordanian court yesterday sentenced 11 former Israeli soldiers to life in prison for the 2006 massacre of 12 Palestinians in the West Bank.

The trial, which took place in Jordanian courts on the outskirts of Amman, is the first time an Israeli soldier has been convicted of war crimes.

The soldiers were tried in absentia for the shooting of 12 Palestinians in the West Bank village of Hizma, which was annexed by Israel in 2005.

The soldiers were accused of opening fire on a group of unarmed Palestinian protesters, killing all 12.

According to the court’s verdict, the soldiers were found guilty of “謀殺” (murder) and “戰爭罪” (war crimes).

The court also ordered the soldiers to pay compensation of $4 million to the families of the victims.

Human Rights Watch said the verdict was an important step in holding Israeli soldiers accountable for their actions.

“We welcome the court’s decision to convict these soldiers of war crimes and crimes against humanity,” said Joe Tr惜, the organization’s Middle East director.

“However, we urge the Jordanian authorities to ensure that these soldiers are extradited to Israel for trial.”

The soldiers were not present in court when the verdict was announced.

The Israeli army has not commented on the trial, but has expressed concerns about the move.

“Israel does not recognize the jurisdiction of Jordanian courts,” an army spokesperson said.

The trial was the result of a joint investigation by the Israeli army and the Palestinian Authority.

The Israeli army had implicated some of the soldiers in the massacre, but did not pursue charges.

The Israeli government has said it will not extradite the soldiers to Jordan.

The soldiers have been in jail in Jordan since their arrest in 2006.

The court’s decision could have implications for other cases involving Israeli soldiers and Palestinian civilians.

In 2010, a Jordanian court sentenced an Israeli soldier to life in prison for the killing of a Palestinian youth in the West Bank.

The soldier had been convicted of murder, but Israel refused to extradite him to Jordan.

The case sparked a diplomatic row between Israel and Jordan.

It remains to be seen whether the latest verdict will lead to any change in Israel’s policy on extraditing soldiers.

The Israeli military has a long history of not extraditing soldiers to countries with which it has no extradition agreements.

In recent years, however, there have been some signs that Israel may be considering extradition in certain cases.

The latest verdict is likely to add to the diplomatic tension between Israel and Jordan.

In 2019, the two countries signed an agreement to normalize their relations.

The agreement was seen as a major step towards resolving the Israeli-Palestinian conflict.

However, the agreement has been criticized by some Palestinians and Arab states for not addressing the core issues of the conflict.

The latest verdict is likely to further strain relations between Israel and Jordan.

The Israeli government has said it will not appeal the verdict.

The soldiers have the option of appealing the decision to a higher court.

The latest verdict is likely to be closely watched by other countries with large Jewish populations.

In the United States, for example, there are several cases involving Israeli soldiers and Palestinian civilians.

The latest verdict is likely to add to the diplomatic tension between Israel and the United States.

The US has expressed concerns about the verdict, but has not indicated whether it will appeal.

Indian farmers burn cop- per to protest against what they see as the government’s failure to listen to their grievances. Since mid-January, farmers have been camped on the outskirts of Delhi, for almost two months, protesting against the Central government’s agricultural policies. The farmers have been living in简短的解释：农民们焚烧铜来抗议政府对他们诉求的不倾听。自1月中旬以来，农民们在德里郊区安营扎寨，抗议政府的农业政策。

Farmers burn metal bars in a protest to highlight their concerns. The government needs to listen to the farmers’ grievances. The government has been advised to increase the number of vaccination centres. The farmers have rezoned the biggest challenges to Modi’s rule since his Bharatiya Janata Party won a second term in power in 2019. One of the RPF’s coalition partners resigned when the laws were passed in September. The farmers have already been vaccinated with the Sinovac drug.

Why Big Tech’s power over speech is so concerning

Thanks to the First Amendment, government in the United States has limited power to police speech from private minds. But the Bill of Rights doesn’t constrain Facebook, Twitter and other Big Tech companies, which are now in the wake of last week’s attack on the US Capitol that the world has heard of President Donald Trump.

On one level, it’s understandable that private companies would not want their services and platforms used to foment violence and undermine democracy. On another, their actions show just how much power over global speech we’ve ceded to a handful of companies whose primary incentive is profit, not free expression.

The simple fact that they have such power may be more troubling than the fact that they’ve used it. Last week, Trump crossed a bright line when he started using social media networks not just to brand the attack on the Capitol a ‘false narrative’, but to try to stymie them. Having spent two months spinning an endless stream of lies about election fraud, he summarised his approach to Washington, DC, as pressure lawmakers to throw out the results of the election. And after they stormed the Capitol, he called them “great patriots” on Twitter and urged them to go home “with love and peace”.

On January 7, Facebook banned Trump indefinitely, according to Chief Executive Mark Zuckerberg, because “we believe the risks of allowing the president to continue to use our service during this period are simply too great.” Other networks followed, with YouTube temporarily suspending the account permanently on January 8.

Twitter expressed a similar action in its last detailed audit. The company looked beyond what Trump was tweeting to how he was using the platforms online, and ruled that Trump’s seemingly conciliatory words were being interpreted to support an upcoming rally against a core democratic value as early as last week. It was an impressive and disturbing bit of finesse that showed the perils that Big Tech is at risk of following its founder’s energy dissipate.

Nevertheless Big Tech is shifting from amplifying the president’s comments to censoring him—a Pandora’s box. As Emma Lamos of the Center for Democracy & Technology noted, “there’s a level of politically motivated violence around the world.

“Do we want companies to be really on the watch for potential violence recently, yet no one is threatening to pull the plug on Big Tech is muzzling all of its users, not just the ones plotting insurrection

SORE SPOT: Whither America

Whither America

By Joseph J. Elliot

The answer on the US Capitol by President Donald Trump’s supporters, including Trump himself, was predictable. The combination of four or more leaders on social media networks, added to the influence any the Republicans have over media, has meant that questions about the constitutionality of removing a president who had not satisfied him were not committed to a peaceful transition of power. Many who benefited as chếa fighters for corporations and the rich, relied on Facebook, but not industry and political elites. While anger over actions by those at the top, but not anywhere else ever again. The fact is that it’s better to have Big Oil do likewise to deny fossil fuels’ power over global speech than to rely on The answer on the US Capitol by President Donald Trump’s supporters, including Trump himself, was predictable. Ilham Aliyev said on Tuesday that unity could be restored if there was goodwill from all sides. "One possible scenario is that Renzi to stay within the four-year timeframe, which would avoid calendrical complications but would also open the door to a new round of talks."

Pakistan's powerful military leader, President-major General Qamar Javed Bajwa, said on Thursday that the two sides had agreed to move towards a "peace process" to end the bloodshed between the two rival groups. "Today, the two sides were able to agree on a peace process to end the bloodshed between the two rival groups," Bajwa said in a statement released after the meeting. "We have agreed to open a dialogue with the Taliban to end the bloodshed and to resolve the conflict in a peaceful manner."
Vodafone Qatar focused on developing Qatari talent

Vodafone Qatar has continued a hybrid internships programme and Vocational Mini-MBA 2020 as part of its continued commitment to develop the talents of Qatari youth.

The programmes are designed for Qatar University students and graduates with essential knowledge and skills to help them build their careers in the telecommunications sector. The hybrid internship programme gives students an opportunity to work in the business sector, gain practical work experience, and develop their soft skills.

For Qatar Custom Show 2021, Abdulaziz H Alhawal al-Marri, a Qatari biker who customises bikes and classic cars, to take part in the event.

Abdulaziz has put on display his classic Chevrolet SS 1969 and Arch KRGT-1 motorbike at the Qatar Custom Show.

Abdulaziz H Alhawal al-Marri, who customises bikes and classic cars, is taking part in the three-day Qatar Custom Show.

Abdulaziz H Alhawal al-Marri is a keen rider, bike collector, and restorer. He has many unique and artistic cars and bikes in his collection. He visits Qatar Custom Show every year to meet and greet a lot of people here. He also buys new bikes and cars to add to his collection. This is his dream car. He has been in love with the car since he watched it in the American action movie. He is very proud of his collection and considers it a part of Qatari culture.

Abdulaziz H Alhawal al-Marri is all set with his classic Chevrolet SS 1969 and Arch KRGT-1 motorbike at the Qatar Custom Show.

He believes in preparing young talents who wish to build their careers in telecommunications so they can contribute to the growth of the industry by helping them learn the business language and understand the structure of the company. This is why he keeps participating in the Mini-MBA and working for Vodafone Qatar has broadened his knowledge of the telecommunications sector.

Vodafone Qatar has certainly flourished my telecom knowledge and equipped me to better understand the field that I'm in and thrive for continuous professional advancement.

Vodafone Qatar CHRO Khames al-Naimi with Qatari employees who undertook the Telecoms MBA.
