Qatar National Commission for Education, Culture and Science marks virtual celebration.

---

**EAA event discusses future in education.**

We need to remember that schools are more than just places to learn, they are home, and every child must be safe, and every child must be taken care of. The school must be the safest space for our children.

Each year, on the International Day of Education, EAA launched the #WorldEducationSurvey campaign to engage millions of people from all walks of life, to raise global awareness for the urgent need to build back education, as a central element of the overall recovery process.

Covering key areas such as access, quality, finances, and the digital divide, the campaign will run over three months to urge the international community to join efforts to secure a prosperous future for all students worldwide.

Qatar’s Minister of Education and Higher Education, Dr. Bandar bin Ali al-Khater, said in his keynote speech, "Education is a key to the heart of every child, and it is a cornerstone of any society that wants to prosper and develop. Education is the foundation of stability and security, and it is the key to unlocking the full potential of the future generation."

The virtual event, which was held on the #WorldEducationSurvey day, concluded with a promise of a list of recommendations for young people across the world, to empower them to promote education advocacy at the grassroots level.

**Ministry of Culture and Sports**

The Ministry of Culture and Sports has decided to give Qatari artists the opportunity to present their works during the national Day of Education to discuss the importance of education and the role of the arts in its development.

"We believe that art plays a crucial role in education and we are proud to support the Ministry of Culture and Sports' initiative," said HE the Minister of Culture and Sports Salah bin Ghanem bin Jassim Al Thani.

"This initiative is a testament to the Ministry's commitment to promote the arts and culture in Qatar. We believe that art has the power to educate, inspire, and bring people together. We are looking forward to seeing how artists will use their talents to educate and inspire this generation of students."

While LCRs are aimed at boosting domestic value creation and economic growth, the presentations made it clear that inappropriate design LCRs could produce a host of negative outcomes. These include unintended social, human rights, and environmental impacts, as well as negatively impacting fiscal and global sustainable development.

Key speakers presenting their legal expertise were: Susan L Karamanian, Dean of the Law School at HBKU; Damilola S Olawuyi, Professor of Energy Law, University of Ghana; Tina Soliman Hunter, Professor of Energy Law, University of Oslo, Norway; and professor, Scandinavian Institute of Maritime Law were Dr Susan L Karamanian, dean of the Law School at HBKU; Damilola S Olawuyi, Professor of Energy Law, University of Ghana; Tina Soliman Hunter, Professor of Energy Law, University of Oslo, Norway; and professor, Scandinavian Institute of Maritime Law.

The panel highlighted the importance of networks and supplier development programs and shared lessons from Norway, Australia, Brazil, and the United States on how to balance LCRs with the wider policy priorities of the United Nations Sustainable Development Goals (SDGs) and their sign and implementation of local content requirements (LCRs) in global energy markets.

The panel focused on how to create a sustainable and rights-based approach to effective LCRs. The panelists discussed how to address unintended social, human rights, and environmental impacts, as well as negatively impacting fiscal and global sustainable development.

QFFD, Qatar Charity launch new medical projects in northern Syria

Qatar Fund for Development (QFFD) and Qatar Charity (QC) implemented several health initiatives in northern Syria to alleviate the suffering of the displaced by providing them with the necessary health care.

Besides, support has also been extended to 3 hospitals to enable them to alleviate the suffering of people, enhance their capabilities to fight the coronavirus, strengthen the ambulance system, and establish a strategic medical warehouse.

Under the agreement, Qatar Charity provided integrated nutrition services through the health centers it operates, as well as through the hospitals it supports, in addition to launching awareness campaigns. Besides, nutritional supplements were distributed to children, women, and those suffering from malnutrition, as well as medicines were provided free of charge.

Last year, some 44,000 persons benefited from the services provided by the primary health care centers operated by Qatar Charity.

Under this agreement, Qatar Charity provided training for medical personnel on how to deal with infectious diseases and epidemics. The training aims at protecting the staff dealing with the coronavirus from being infected, and enhancing their capabilities to deal with similar circumstances. Some 52 employees of 6 hospitals received the infection presentation and control training.

Furthermore, 20 staff of 3 hospitals were trained. These training sessions addressed health care for women, aiming to improve the capabilities of midwives and staff.

According to the 2020 Syria Humanitarian Needs Overview (HNO), more than 11 million Syrians need some kind of support, and of 6 million displaced persons within Syria, 1.2 million live in makeshift camps.
Ooredoo showcases artworks from ‘The Art and The Mobile’ initiative

Artwork created as part of a cultural initiative organised by Ooredoo was yesterday on display at the Ooredoo HQ.

Artists taking part in ‘The Art and The Mobile’ — a unique project intended to enrich Qatar’s cultural and artistic scene and showcase the young and upcoming artists — were given smartphones to use as their cameras to take images of the coronavirus.

Seven held for violating home quarantine rules

The designated authorities yesterday, seven people for violating the requirements of home quarantine, which are legally accountable, in accordance with the procedures of the Decree Law No 17 of 1990 on infectious diseases, and the precautionary measures in force in the country to contain the spread of the coronavirus.

The designated authorities called on the violators to respect the precautionary measure for not wearing masks in places where they are mandatory, in accordance with the Cabinet decision, which was announced by the Ministry of Public Health as a precautionary preventive measure to prevent the spread of the coronavirus.

Renovated Al Rayyan Petrol Station resumes operations

Qatar Fuel (Woqod) has announced that the New Al Rayyan Petrol Station has resumed operations, with effect from yesterday. It is the first petrol station in the country to resume operations after the completion of its renovation.

MoPH reports 277 new cases and 144,981 total Covid-19 recoveries

The Ministry of Public Health (MoPH) reported yesterday, 277 new confirmed cases of coronavirus (Covid-19) during the last 24 hours, of which 258 were from community cases and 19 from travellers returning from abroad, while 10 are patients being referred from other countries.

The MoPH also recorded 123 recoveries from the virus during the past 24 hours, bringing the total number of cases recovered in Qatar to 144,981. All these cases have been discharged from isolation and are receiving necessary healthcare, according to their health status. Meanwhile, to tackle Covid-19 in Qatar, MoPH has succeeded in flattening the curve and limiting the spread of the virus and the number of new daily cases and hospitalisations is showing a declining trend.

QU Graduate Studies holds Graduate Orientation Day

Qatar University’s (QU) Office of Graduate Studies (OGS) and the Office of Student Affairs at Qatar Student Affairs (QSA) held its Graduate Orientation Day – Spring 2021 for newly admitted graduate students, via an online format, on January 26, 2021.

Dr. Mahday Saad, assistant dean of the Office of Graduate Studies, welcomed the gathering and discussed the structure of the institute and how students can get in touch with the administrative and academic units in comparison to the undergraduate level.

Ghada al-Kuwari, assistant dean of Student Affairs at Office of Graduate Studies, made a presentation that included a tour of the website of Office of Graduate Studies on QU’s website and explained some of the important policies that students must consider during their higher education pursuits.

A presentation on the services provided to graduate students, as well as events that the students could attend, was given by the seniors specialists at the Office of Student Affairs at Office of Graduate Studies.

A view of QU University campus.

In addition, senior graduate programme review specialist, gave an overview of postgraduate education on campus this year, and highlighted some academic tips on study plans and services.

Abdulaziz Al-Thani, senior administrative manager at the services available to graduate students, such as copying, printing, copying and providing the university card, as well as an overview of different services in the library and computer centers.

Mohamed al-Hebabi said: Vodafone works on providing instant and secure communications and technology services by bringing them the latest innovative solutions that meet their strategic and commercial objectives while creating opportunities to achieve their business goals.

"Vodafone Push-To-Talk Plus offers an advanced and efficient technology for the most demanding environments that demands instant communications in the performance of their operations.

Vodafone Push-To-Talk Plus is an end to end service that features two parts to suit the needs and requirements of all different entities, in addition to a large number of compatible handsets.

Vodafone PT-Talk Plus is a service for instant voice, video and text communication.

GAC to celebrate International Customs Day today

The General Authority of Customs (GAC) today celebrated International Customs Day, which was established on January 26 every year, by organizing various events at the Customs Center at Land Port.

The event started by announcing the participation in the GAC Customs Logo Launch Ceremony, followed by a presentation on a volatile supply chain.

The event continued by launching a campaign on how the GAC will promote the movement of international trade by participating in the “Tackling the Challenge” initiative, raising awareness among Customs officials and customers about the importance of participating in the trade.

Xia Stinger 2019 model recalled

The Ministry of Commerce and Industry (MCI) in cooperation with the Automobiles and Tractors Turning Company has announced the recall of 321 units of the 2019 model of the Xia Stinger due to the various electrical and structural circuit breakers that may cause them to overheat and shut down during use.

An employee of Consumer Protection and Anti-Commercial Fraud Department, which processes complaints, inquiries and suggestions through the following channels:

The Public Works Authority (Ashghal) has announced a closure of Gharrafat Al Rayyan Interchange tunnel from midnight to 7 a.m. on January 26 in order to carry out maintenance work on the South Interchange of the Al Rayyan road.

Woqod ‘not responsible for designing entrances or exits of its stations’

Qatar Fuel (Woqod) has issued a clarification in response to a tweet about the entrances or exits of its stations.

The statement continued, "It also likes to take notice that it is not responsible for designing entrances or exits of its stations.”

Al-Wakrah Municipal Health Committee participated in the inspection campaign on the health status of food outlets in Al-Wakrah and the security of the employees concerned.

Inspectors ensured that foods products are packed in clean containers, without the extra coating.

Committee contributed toward Qatar National Vision 2030 plan for the Green Environment, Woqod takes a step forward to discarding environment friendly paint technology, the announcement added.

Qatar Airways expands Africa network with increase in frequencies to more destinations

Qatar Airways continues to be at the leading global airline in Africa with a robust network of destinations, and most noticeable build-up in the region.

Having become the largest international carrier during the early stages of the pandemic, the airline has fully aligned with "travel bubbles" to resume flights and resume tourism, offering more connections to and from Africa with frequencies to more destinations.

Currently, Qatar Airways flies to Casablanca, Morocco, weekly flights to Cape Town (increasing to 10 weekly flights May 2021), Durban, South Africa, 5 weekly flights to Johannesburg, weekly flights to Harare (increasing to 2 weekly flights May 2021), and 3 weekly flights (increasing to 5 weekly flights May 2021) to Lusaka, Zambia.

The airline operates weekly services to 24 destinations across Africa, operating a fleet of 6 aircraft dedicated to Africa routes, with more than 100 weekly flights to African destinations.

Qatar Airways Group Chief Executive Akbar Al Baker said: "We are proud to be the leading international carrier connecting Qatar to Africa. We have been flying to Africa for more than 30 years and have always been at the forefront of the development of the African aviation market. The move to expand our network to 24 destinations across Africa is a testament to our commitment to the region and our belief in the potential of Africa. We are confident that our increased frequency of flights will help to further strengthen the ties between Qatar and Africa, and contribute to the region's economic growth and development."

Hussein Contractor Business Group (HCBG) has partnered with Huawei to offer Karwa Taxi App to Huawei users.

Huawei smartphones users will be able to access Karwa’s service using the Huawei AppGallery, Huawei App Gallery, and Huawei Mobile Services.

"Our customers are at the heart of our business, and this step directly means in the implementation of latest technology in Karwa’s Fleet. We are constantly reimagining and evolving a more digital, tech-based environment to ensure that our customers experience nothing but the best," said Al-Mohezi, the CEO of Huawei Contractor Business Group.

"More people are relying on our transportation, and this is a testament to the quality of service we are providing to our customers. We are thrilled to partner with Huawei to bring our services to their customers, and we believe this will help us to further improve our service and reach more people."

For his part, Dr. Al-Derham praised the Qatar Airways Group Chief Executive Akbar Al Baker for the cooperation with QRC and Qatar Airways in the field of internal communications for the benefit and success of the operation.

Qatar Airways, which is a strategy partner with QRC, is committed to providing passengers with the best possible service and experience, and this partnership is a significant step in that direction.

QRC Implementation Head Musab Al-Sayed said: "We are delighted to have Qatar Airways as our strategy partner, and we are confident that this partnership will help us to further enhance the services we provide to our customers. We are committed to providing the best possible service and experience, and this partnership is a significant step in that direction."

QRC is a leading provider of high-quality medical services in Qatar, and they are committed to providing their customers with the best possible service and experience. This partnership with Qatar Airways is a significant step in that direction, and we are confident that it will help us to further enhance the services we provide to our customers.
India, China report fresh border clash

India and Chinese troops fought a new front on their contested Himalayan border after an incident in November, killing four Chinese soldiers, media reports said on Wednesday. The Chinese foreign ministry on Wednesday confirmed that four Chinese soldiers were killed in the clash on the border in eastern Ladakh, but did not provide further details.

New Zealand confirms first Covid-19 case in months

The woman, who lives in Auckland, returned from a trip to the Philippines on November 19 with her husband, who is also a New Zealand resident. They both had mild symptoms and were placed in a managed isolation facility near Auckland on November 21.

Minors arrested in sweeps on Ethiopian rebels: rights group

The United Nations has called on India and Pakistan to halt their border clashes, saying they risk sparking a wider conflict in the region.

US military in South China Sea not good for peace: Beijing

The US military is seeking to expand its presence in the South China Sea, the Chinese foreign ministry said on Wednesday, warning it would not help to promote peace in the region.

Farmers on way to New Delhi ahead of Republic Day rally

Farmers have started their journey to New Delhi ahead of the Republic Day parade on January 26, with thousands of them converging on the national capital to demand the repeal of three agriculture-related laws that were recently passed by the government.

Indonesia seizes Iranian, Panamanian ships

Indonesia has seized Iranian and Panamanian tankers in the South China Sea, the Indonesian navy said on Thursday, citing safety concerns.

Farmers protest for a second day against farm laws passed in November.
McGregor’s loss to Poirier upsets Khalid’s plans

Conor McGregor’s bout with Dustin Poirier in Abu Dhabi on Saturday, which ended in a second-round TKO victory for Poirier’s lightweight division, and the prospect of a rematch with Khabib Nurmagomedov, but his stunning knockout loss raises questions about whether he was ready for Heading Eight.

With thousands of McGregor fans in the stands — seemingly far more than the official attendance of 2,600 provided by the UFC — the stage was set for another triumphant return of the UFC’s veteran bout, but Poirier tore up the script to win by KO in the middle of the second round.

UFC president Dana White had earlier been making no secret of the fact that he would like to see Nurmagomedov, who retired undefeated after defeat against Justin Gaethje last October, come back for a lucrative rematch with McGregor.

While in immediate contact with Nurmagomedov with his manager, White is said to be keen to get this fight on, as the undefeated Russian was apparently sticking by his decision to retire, for the time being.

“Hey Dana, I’m here with you,” he said on social media. “I’m so many levels above those guys. I beat those guys.” White told a media conference as he watched what undeniably had been a very lucrative pay-per-view event slip away.

For McGregor, it was a first knockout defeat as a pro and something he had not anticipated as he arrived in Abu Dhabi on his yacht in midweek, enjoying the trappings of the fame and wealth that this sport has brought him.

But this time he was to be the combatant edging the bout the other way as Nurmagomedov avenged a 2014 loss at featherweight.

Along with Michael Chandler, who won the co-main event with a second-round TKO of Dan Hooker, Poirier is now the featherweight champion.

He had actually been expected to face Dan Hooker, and McGregor had been quick to mock McGregor on social media after Sunday’s fight.

“Week, that’s the key! Anything can happen! A Pacquiao vs Mayweather had wished McGregor luck on social media, and he added, scientists might still not have figured out it was a “game changer”.

Early warning didn’t stop the event going — as has been detected in the aftermath of other natural events. Without the warning from the WHO, scientists, the world probably would have been blindsided, said Hendrick.

“If this was expanding in another country, we would just be looking at it on TV and saying, ‘They’re having a bad time over there, 2 people aren’t following the guidelines’,” the told AFP.

Other variants have become viable only when they spontaneously accumulated a large number of mutations, Hendrick said, while the ability to evade immunity — was identified as a sign in people vertically from Brazil.

The World Health Organization has added better sequencing capacity in a worldwide priority. Marlo-Katherine, the WHO’s media specialist, noted that researchers had identified the number of sequence variants lead to an “extremely” bad but they were coming from just handful of countries.

“Impressing the geographic coverage of sequencing is critical for the world to have access and changes on the virus,” she told an online forum. How WHOSequbes called for increased sequencing capacity. The investigation has helped build a better understanding of everything from the mutations to outbreaks.

Aimed for the first time, proactive sequencing can help guide the public health response to a rapidly spreading virus.

When another coronavirus, sur, began spreading in 2020, only three genome variants were publicly shared in the first month, and 31 by month three.

This time, six sequences were available to researchers worldwide a few weeks ago and 21 sequences by month three which had 110,000 variants published.

Initially, the new coronaviruses did not much change, markedly, and with an ‘explored absence from Europe’ flu the kind of widespread.

But that lack of mutation was an element in the rule in that.

“We were able to see that it really didn’t seem to originate in China, but outside the Chinese sequence that was defeated around the world due to the availability of the Chinese sequences,” the told AFP.

Researchers said that if new variants of SARS-CoV-2 from other countries are identified, they can be sequenced at a higher rate.

The Vincent Institute of Clinical and Population Science and the WHO have identified as ‘game changers’.

The last ‘Polly’ picks up changes at a slower rate than some other viruses, like HIV or influenza. But for people who have recently been infected, the information for them makes the mutation more dangerous.

For McGregor, it was a first knockout defeat as a pro and something he had not anticipated as he arrived in Abu Dhabi on his yacht in midweek, enjoying the trappings of the fame and wealth that this sport has brought him.

But this time he was to be the combatant edging the bout the other way as Nurmagomedov avenged a 2014 loss at featherweight.

Sidra to train first batch of UCQ students in paediatric specialities

S idra Medicine has welcomed the first batch of under-graduate nursing students from the University of Calgary in Qatar (UCQ) for clinical placement in the hospital as part of the E-Ring Road Project. The event was being held with the ceremony at Al Thumama as part of UCQ’s Bachelor of Nursing programme under the “child-friendly hospitals” initiative aimed to train nurses in the clinical practice setting in order to apply classroom learning to real-life scenarios. The students will be trained by nursing teams at Sidra Medicine where they will learn about evidence-based practice ensuring that the UCQ students will have a comprehensive learning experience that will last a lifetime for their future successful careers. We are happy that the students are continuing their journey through their commitment to learning. “The students will be trained by nursing teams at Sidra Medicine when they still learn about evidence-based nursing practice through the application of the clinical scenarios where they also evaluate and care for patients in the paediatric population and incorporating family-centred care. The students placement is part of UCQ’s Bachelor of Nursing Programme under the “child-friendly hospitals” initiative aimed to train nurses in the clinical practice setting in order to apply classroom learning to real-life scenarios. We look forward to many more sessions of learning about.”

Trees planted at Al Thumama as part of beautification campaign

W hile continuing the Qatar Beautification and Our Kids Planting Trees campaign, trees were planted by kids for Al Thumama project and Al-Shagha Forest. The event was organized by the Supervisory Committee of Beautification of Roads and Public Places in Qatar at the Public Works Authority (Ashghal) in co-ordination with the Ministry of Municipality and Environment (MME). While attending the function, Fatima Al-Kuwari, Central Municipal Committee (CMC) member, said, “Traditionally, urban and aesthetic planning and greening of the children makes us happy as we educate them about the role of afforestation.” She added, “The campaign launched in September 2019, aims to afford various areas while continuing until the end of 2021. According to figures with Ashghal, more than 100,000 trees have been so far. The Supervisory Committee of Beautification of Roads and Public Places in Qatar is implementing Qatar Beautification and Our Kids Planting Trees campaign. The committee works under the Ministry of Municipality and Environment (MME), in co-ordination with other relevant authorities such as the Ministry of Municipalities and Public Works, Ministry of Transport and Communications, Ministry of Culture and Sports, Qatar Museums Authority, Qatar Rail, Private Engineering Office among others. The committee is responsible for major tasks including the construction of central public parks, provision of dedicated lanes for pedestrians and cyclists, Development of the Doha Corniche and Central Doha and increasing afforestation and green areas. The committee’s work will enhance sustainability through minimising environmental pollution and reducing the emission of CO2 through re- shaded consumption of energy resources. It also focuses on the provision of more public transport options aiming at reduced use of private cars and improving livelihood through clean and safe transportation. It’s also intended to ensure a healthy environment within residential neighbourhoods and places of public gatherings. The students placement is part of UCQ’s Bachelor of Nursing programme under the “child-friendly hospitals” initiative aimed to train nurses in the clinical practice setting in order to apply classroom learning to real-life scenarios. We look forward to many more sessions of learning about.”

Doha’s art scene is growing: al-Bizri

By Jessy Aguilar

Q atar’s art scene remains vibrant and has become increasingly interesting. Syrian artist Salih Al-Bizri has said, “I have been here for eight years and I would say that the art scene in Doha is growing, very interesting, and there are a lot of activities taking place one year after another. The Qatar Museums Authority has said we’re going to have a beautiful year.”

Concluding on January 29 at Katara’s building 18, al-Bizri’s solo exhibition showcased 15 paintings that depict the most beautiful places Al-Bizri has visited, including Dubai, Riyadh, Al-Salam and Khan Pasha. He said he is mulling to hold a big exhibition one year after another. “Breathing Life into Designated Spaces” al-Bizri’s exhibition at Katara – the Cultural Village. It is also looking ahead to Al-Bizri’s next exhibition which will be held at The Pearl-Qatar.

A number of trees have been planted as part of the E-Ring Road Project. The event was organized by the Supervisory Committee of Beautification of Roads and Public Places in Qatar at the Public Works Authority (Ashghal) in co-ordination with the Ministry of Municipality and Environment (MME).
