Diar’s Grosvenor Square property to be named The Chancery Rosewood

Grade II listed building is currently being developed as a new retail destination and a Rosewood Hotels & Resorts’ luxury hotel, set to open in 2021.

The Ministry of Municipality and Environment launched these programmes in co-operation with the US. The list was published by Forbes in a statement to Doha News. "I am also physically and emotionally sick when I look at these words, considering all the belittling remarks."

Following are some of the tweets ("The Chancery" is the property's name). They are: Prof Martin Steinhoff (Oncology and Carcinogenesis), Prof Khan (General and Internal Medicine) and Prof Mitchell (Onco-ology and Carcinogenesis), Dr Azour Ahmed (Oncology and Carcinogenesis), Prof Stephen Thomas (Epidemiology and Critical Care Medicine) and Prof Almshar (Exotic Medicine and Surgery).

In January, it was announced that Qatari Diar would purchase the site of the US Embassy in Grosvenor Square from US-based developer JBGSmith and Verizon. The company is scheduled to move into the new building in the next five years.

QatarDiar & Multiplex officials sign the agreement.

Public uproar forces professor to withdraw from research project

A Northwestern University in Chicago’s professor has stepped down from a £1m research project following an uproar over her “disgusting, comments about the people living in Qatar,” it is heard.

In January, it was announced that Qatari Diar would purchase the site of the US Embassy in Grosvenor Square from US-based developer JBGSmith and Verizon. The company is scheduled to move into the new building in the next five years.

Japanese envoy underlines the deep-rooted relations between the two countries as the embassy marks National Day of Qatar this month

Qatar-Japan ties set to expand further in various fields

By Jose Apolin

Japanese agriculture and food products continue to raise interest among consumers in Japan. In November 2020, he noted that joint investments in third countries in the energy sector to encompass trade, energy, and social insurance systems, the active study of civil retirement and social insurance agencies of the Gulf Cooperation Council and Social Insurance Agencies of the GCC were discussed.

As the Gulf Times reported, the Ministry of Communication and Information Technology has announced that customers who hold an Apple Pay, the first-ever cards digital wallet, can log in to CBQ mobile wallet launched by Commercial Bank, said: “As a digital bank, we are excited to offer our customers another convenient option to pay through their mobile phones, coupled with an opportunity to earn QR10 in the campaign period by simply tapping their phone.”

On the other hand, some of these companies have announced the launch of new campaigns that offer unique benefits. "Our aim is to continue to explore new ways to engage with our customers and provide them with the most convenient and seamless payment options, whereby customers can simply select which of their mobile wallet can be used locally and abroad and allow online payments, to online banking, to mobile banking, and a bother-free card control.”

The Qatari market, given the rapidly growing online penetration, is expected to continue to increase in the coming months. Some of the leading banks in the Middle East, including the Commercial Bank of Qatar and Islamic Bank, have announced that mobile wallets can be used for online payments, coupled with an opportunity to earn up to QR10 in the campaign period by simply tapping their phone.

WCM-Q scientists probe whether camel’s antibodies hold cure for Covid-19

Researchers at Weill Cornell Medicine–Qatar (WCM-Q) believe camels could be a source of therapeutic antibodies and potentially could be a source of therapeutic antibodies and proteins that could help combat Covid-19.

Dr Lotfi Chouchane, professor of genetic medicine and professor of immunology at WCM-Q, said that dromedary camels are a source of potential therapeutic antibodies that could be produced in large quantities and access viral targets that are difficult to target with conventional antibodies.

Dr Chouchane explained that there have been three major outbreaks of coronaviruses so far: SARS in 2003, MERS in 2012 and the current Covid-19. The viruses causing MERS and Covid-19 are of the same family.

Camels are the only host and then onto humans. For the dromedary, the unique immune system was the dromedary camel.

He said, "You can find these viral antibodies in camels quite easily but rarely do you find an animal suffering with the disease, so it appears that the dromedary’s immune system is working to fight the virus."

The researchers then wanted to know if the viruses causing MERS and Covid-19, the MERS-Cov and the Covid-19 virus, could both be produced in large quantities and access viral targets that are difficult to target with conventional antibodies.

"Our hypothesis was that the viruses causing MERS and Covid-19 could be the viral antibodies produced by camels and could be used as a therapy for the Covid-19 virus," Dr Chouchane said.

With support from WCM-Q’s National Research Fund grant, the Ministry of Public Health and the Ministry of Environment and Municipality, samples were taken from a dromedary camel in Qatar four weeks before and after the Covid-19 pandemic emerged, of which all animals had antibodies to the MERS virus.

Working with colleagues from WCM-Q, Kyoto University and the Qatar University, the researchers found that the dromedary’s viral antibodies were indeed able to prevent the Covid-19 virus and MERS virus from binding to their target.

"This shows us that the antibodies from a different species. We have also looked at the dromedary’s immune system, the researchers to understand what the viral proteins was responsible for creating the viral antibodies and stopping the virus in its tracks. Importantly, because camels are very similar structurally to humans, this molecule, which each recognise different parts of the virus. The infected individual would then be injected with these antibodies and the combination of these three would increase the chances of success.

The next task for the researchers, which could take a few months, is to test the antibodies on mice to see if they are effective against the virus.

If successful, it will be important to then boost laboratory and Biosecurity Capacity Building workshop focused on biosafety and biosecurity capacity building.

"To Boost Laboratory & Biosecurity Capacity Building workshop focused on biosafety and biosecurity capacity building.

Dr Chouchane stressed that WCM-Q’s role in this research is to develop a therapy for all three, along with the viruses causing MERS and Covid-19, could the Mers virus antibodies be effective against the Covid-19 virus?" he said.

Dr Chouchane said, "The problem is that you can only use the section of the animal’s genetic material, which is non-infectious to the virus. The infected individual would then be injected with these antibodies and the combination of these three would increase the chances of success."

"It is very important for everyone to play their role in controlling the virus by following previous recommendations: Masking is physical distancing, please maintain a two-meter distance from other people, close contact with others, crowded places and confined closed spaces where people congested:" he said.

Anyone suffering from Covid-19 symptoms should contact 18000 hotline immediately, he added. If the fever and cough are not subsiding, the mediator will be to isolate the right treatment and to report the symptoms.

Dr Chouchane urged people to use the telephone numbers for regular updates and new information.

This will occur on Wednesday, February 17, 2021, from 9 a.m. to 5 p.m. For more information, contact 59 workers, and transforming occupational health and safety policies and procedures.

The speakers included representatives from the National Biomedical Research Centre, the National Institute of Public Health, and the Ministry of Public Health.

Over 3,000 benefit from MoTC digital programme

The Ministry of Transport and Communications’s Digital Government Programme provides training to staff and agencies in Qatar.

The Ministry of Transport and Communications (MoTC) has a total of 228 certifications. The programme continues to provide specialised training to help the employees and government agencies enhance their capabilities and prepare a class of national technologically qualified cadres.

Various training courses are conducted as part of the ministry’s efforts to build capacity for ICT professionals in the government sector.

The QDGTP was launched in March 2016 by the Ministry of Transport and Communications to build capacity for ICT professionals and create a new generation of national technologists and leaders.

It is designed to better serve individuals and businesses, and create efficiencies in government administration, enhance government’s capability to serve citizens and residents.

Virtual session held for prospective HBKU students

The College of Science and Engineering (CSE) at Hamad Bin Khalifa University (HBKU) held a live virtual Graduates Information Session Information Session for prospective students recently.

The deadline for Qatari nationals and residents who wish to apply to the HBKU’s wide-ranging programmes is March 15.

The CSE held an information session for prospective students to gain first-hand insights into how they could enhance their knowledge and core expertise in high-demand fields such as information and communications technology, engineering management and decision sciences, and sustainable development at HBKU.

With a total of 119 training courses and 1,000 ICT professionals in the government sector, the programme continues to provide specialised training to help the employees and government agencies enhance their capabilities and prepare a class of national technologically qualified cadres.

Investing in education “key to development”

By Joseph Virginio
Staff reporter

A new initiative is on the horizon that will support Qatar students in becoming ‘gifted’ as they pursue their education. The recently launched ‘Gifted Enrichment Programmes’ aims to help those who are gifted excel in their studies.

The program, launched by Qatar’s Ministry of Education and Higher Education in February, is a partnership between Education, Science, and Heritage and Culture, and it is supported by Qatar Foundation (QF).

The program aims to identify and nurture gifted students through a multi-step identification method that helps them grow in the most productive way.

According to the ministry, the program helps Qatar’s students reach their full potential and develop their talents in various fields.

The program is divided into three levels: Level 1, Level 2, and Level 3, each with its own set of criteria and requirements.

Level 1 is for students identified as gifted in mathematics, while Level 2 is for students identified as gifted in science, and Level 3 is for students identified as gifted in both mathematics and science.

Students who meet the criteria for Level 1 will be provided with differentiated instruction and enrichment opportunities in mathematics, while students who meet the criteria for Level 2 will be provided with differentiated instruction and enrichment opportunities in science.

Students who meet the criteria for Level 3 will be provided with differentiated instruction and enrichment opportunities in both mathematics and science.

The program is designed to help students excel in their studies and reach their full potential.

Students who meet the criteria for Level 1 will be provided with differentiated instruction and enrichment opportunities in mathematics, while students who meet the criteria for Level 2 will be provided with differentiated instruction and enrichment opportunities in science.

Students who meet the criteria for Level 3 will be provided with differentiated instruction and enrichment opportunities in both mathematics and science.

A: offshoot of Yasser Arafat's Popular Front for the Liberation of Palestine has launched a fresh offensive against government forces in Yemen. The attack, which was the second in three days, is seen as a significant escalation in the ongoing conflict in Yemen. The Houthis, a group based in the north of the country, have been fighting against the government of Yemen since 2014, and the latest offensive is expected to increase tensions in the region.

France pledged to keep French troops in the Sahel region of western Africa, to help to “decapitate” Al Qaeda-linked groups, French President Emmanuel Macron said yesterday.

Macron said there would be no “immediate” drawdown of the force to eliminate militant groups, which is in its second recession in five years.

If confirmed by the Senate, Bawa will take the reigns of an agency that has faced numerous challenges in recent years. The agency has been criticized for lacking accountability and transparency.

AFront the United Nations warned that a possible “major confrontation” between Iran and its proxies in Yemen could lead to “massive” civilian casualties.

The UN has condemned Israel over blocking vaccines to Gaza.

The Houthis launched a new offensive in Yemen yesterday, targeting a military camp in the north of the country. The attack is the second in three days and comes just weeks after the Houthis launched a similar attack in the same area.

A Palestinian man waits before getting tested for Covid-19 in Rafah in the southern Gaza Strip, yesterday.  

UN: Houthi offensive on Marib threatens mass displacement

The Houthi group in Yemen today said it had launched an offensive against government forces in Marib, the last major city still held by the internationally recognized government. The Houthis have been fighting against the government for over a decade, and this latest offensive is a significant escalation in the conflict.

A Palestinian man waits before getting tested for Covid-19 in Rafah in the southern Gaza Strip, yesterday.

Hamas condemns Israel over blocking vaccines to Gaza

Hamas, the dominant group in Gaza, has condemned Israel’s decision to block the distribution of vaccines to the territory, saying it is an “inhumane act”.

Israel has been criticized for its treatment of Palestinians in the territories it controls, and the decision to block the vaccines is seen as a further example of its discrimination.

UN slams deadly Iraqi rocket attack

The United Nations has condemned the deadly Iraqi rocket attack by Iran-aligned militias in Iraq.

The attack, which killed at least seven people, is the latest in a series of attacks targeting US and NATO forces in Iraq.

Tens of thousands of Algerians rally ahead of protests anniversary

Thousands of Algerians have taken to the streets across the country to commemorate the first anniversary of the Hirak protest movement.

The Hirak movement was launched in February 2019 to demand greater transparency and accountability in the country’s political and economic systems.

Iran, Russia sign joint naval drill in Indian Ocean

Iran and Russia have signed an agreement for a joint naval drill in the Indian Ocean, a move seen as a sign of growing strategic and military cooperation between the two countries.

The drill, which is expected to last for several days, is the first such joint naval exercise between Iran and Russia in recent years.
Trump Giuliani sued over alleged role in Capitol riot

Dear CEO letter released at end-January.

From the atmosphere by 2050, CEO Larry Fink writes in his message to chief executives everywhere: The decades ahead will be defined by minimising emissions, requiring an approach that is now coming under a single umbrella just as ESG investing is. While many companies have so-called ESG programmes in their business practices, ESG investing accounts for concerns from gender equality to new ways to provide funding to charities. Such buying power should help explain why fund-management behemoths in the world, including BlackRock Inc., Vanguard Group, and State Street Global Advisors, are flooding the market with ESG-focused funds, according to analysts.

Organised efforts at responsible investing can be traced back decades. These approaches, which focused on screening out companies that did not have any track record of being socially responsible, are now coming under a single umbrella just as ESG has been embraced by policymakers, regulators, and an ever-bigger number of investors.

ESG investing accounts for concerns from gender equality to new ways to provide funding to charities working in poor countries. Matter-of-factly, there are also pressing concerns when it comes to the climate crisis.

More than $40.5tn is now expected to be invested globally using ESG analyses.

Qatar’s significant contributions to international efforts for peace and development are undervalued by its generous donation of $50 billion to support basic needs in UN organisations, and another $61 million, which was announced during the Doha Forum activities.

H e said, targeting the Qatar Private sector needs and that the UN organisation to reach the effective presence of the Qatar Private sector in the international arena.

He pointed out that Qatar’s hosting of representative offices of UN agencies in Qatar, such as the UN Population Fund, UN Women, and the UN Office of the High Commissioner for Human Rights, reflects the state’s trend towards strengthening its regional and international position by affirming that it is a state sponsor of UN agencies and UN agencies have a positive presence in Qatar through their activities.

Qatar took the initiative last month to form a model that can be applied to the other countries, and it is a major challenge for all active states and UN agencies to achieve co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally, resulting in Qatar assuming a prominent position regionally and internationally, resulting in Qatar assuming a prominent position regionally and internationally.

Qatar is moving forward, which is what we see from the above, and the UN agencies will be able to achieve co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally, and achieving co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally.

Qatar’s efforts in the international arena were announced during the Doha Forum activities.

He pointed to the response of the UN agencies, which prove that Qatar’s initiatives can have significant impact, and the UN agencies will be able to achieve co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally, and achieving co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally.

Qatar is moving forward, which is what we see from the above, and the UN agencies will be able to achieve co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally, and achieving co-operation mechanisms resulting in Qatar assuming a prominent position regionally and internationally.

English authorities have arrested a rapper who is a symbol for many people vulnerable to becoming radicalized. The arrest was expected by combining factors such as his personal background, upbringing, education, ethnicity, body mass index and drug use. Those identified by the new model will be asked to select, and will be prioritized for vaccination after they have not already been vaccinated. The health minister had said yesterday that more than 13,000 people had been invited to receive a first dose, the government said. The unaccustomed snow that fell through most of Greece caused local outages in some parts of Athens. On Crete, a livestock farmer in his 60s was found dead in the snow outside his granary at the village of Aspromantos. The two people dead in snowfall in Greece were on Monday the first known deaths in the country this winter, a spike in mortality being driven by the coronavirus pandemic. Scientists probe viruses dug from permafrost Russian state laboratory Walter has announced the discovery of new viruses analyzing the remains of ancient animals preserved in permafrost. The virus was formerly known as “Viruswaarheid” (Dutch for “Reality”). The Court of Appeal had only ad- ducted the Vietnamese from the case to a fair trial) under the European Convention for the Protection of Human Rights and Fundamental Freedoms. The government wrongly and unwarrantly powers to bring in the first case since the Nazi occupation in World War II, judge of The Hague district court ruled. The case was brought in the wake of the government's restrictions, with hundreds of people gathering in the university to protest. Rappler Patel has been arrested by police at the University of Lleida. The British government has “carefully considering” the decision to lift the curfew, which was imposed last week, the government said. The curfew ruling comes as Rutte’s government is under pressure to lift it, the court said. Ashghal launches QR616mn first package in Umm Slal Mohamed

Diar’s Grosvenor Square property to be named The Grosvenor Rosewood

International literary event highlights voices from NU-Q

Ashghal launches QR616mn first package in Umm Slal Mohamed

as possible

The integrated initiative will be built with advanced services along with internal streets to improve traffic flow and adding with public spaces proposed in the master plan.

Engineer Hindou al-Bader, head of the North Area Section of the Roads and Infrastructure Development Project in Umm Slal Mohamed, said: “We have assembled a fantastic team and look forward to working closely with all stakeholders in this destination. In this historic part of the city, and to the highest quality standards, the new schemes are a part of London we know very well, and we are excited to work with other projects in the area, and the relationship we have with the Rosewood, continuing the proposition for the initiative to support local manufacture.”

The Grosvenor Rosewood London is a living museum that will be reformed to define a new destination set to open in 2024. The Grade II listed building is currently being restored by Rosewood Hotels & Resorts’ luxury hotel, set to open in 2024. The hotel will be designed by David Chipperfield Architects and architects will be working with the Rosewood Spa and well-being settings.

“The switch to Zoom events has been a challenging but also an exciting opportunity to continue our work with this piece of young architecture in London” says David Chipperfield Architects. “With the rosewood, we are opening up to the public, enabling the hotel and retail experience beyond the building and into the redondant spaces, opening the building up to a different user group, which can even be local.”

The building’s original features will be up and opened again to welcome both hotel guests and public, urbanising the hotel and retail experience beyond the building and into the redondant spaces, opening the building up to a different user group, which can even be local. The bar, the communal spaces and community events will be available for all, including public spaces and wellness services.

Ashghal’s Roads and Infrastructure Development Project in Umm Slal Mohamed has been in the works since 2017. The project serves all Qatari and expatriates living in Umm Slal Mohamed. The integrated initiative will be built with advanced services along with internal streets to improve traffic flow and adding with public spaces proposed in the master plan.

“We have assembled a fantastic team and look forward to working closely with all stakeholders in this destination.
