Visa capacity at Government Services Complexes reduced

The Department of Tourism, Development, Labour and Social Affairs has decided to reduce the capacity of a number of government services complexes.

Qatar Equestrian Federation postpones 4th edition of Al Dasha Festival

Doha-based global sport body stresses importance of augmented reality in sports.

Egypt frees Al Jazeera journalist

Al Jazeera journalist Mahmoud Hussein has been freed following a decision by the Egyptian government to release him.

Bayern Munich land in Doha

Bayern Munich and Qatar Equestrian Federation, Qatar Football Association and Katara organized the 4th edition of Al Dasha Festival until further notice.

Mahaseel markets 3.5mn kg of local vegetables in January

Three-fold increase from the same period last year recorded.
Ministry to hold virtual ‘Education Forum 2021’ in April

The Ministry of Education and Higher Education (MoE) has announced that it will organize ‘Education Forum 2021’ in April under the theme “Education Effectiveness, Beyond Challenge.”

“The event, which will be held virtually, seeks to bring together educational experts and professionals to discuss and share views on issues of education and explore the future of education in the post-COVID-19 period,” the MoE said in a statement.

The forum will shed light on the diversified development challenges faced by the educational sector, and the need for qualitative and equitable education and promoting learning opportunities for all, as set out in the United Nations Sustainable Development Plan 2030. This contributes to the Qatar National Vision 2030, which aims to transform Qatar into an advanced country capable of sustaining its ongoing development and ensuring high living standards for its people, the statement noted.

Among various sessions and workshops, the forum will address a range of issues and practices presented by university professors and professionals across different educational sectors, with a special focus on the role of technology and developments in post-COVID-19 education.

The following themes will be covered:

• Ensuring access to quality education for all, in light of the COVID-19 pandemic.
• Recognising the role of technology in the educational sector.
• Aligning education outputs with the labor market and sustainable development needs.
• Exploring the role of educational supervisors and instructors in supervising students’ sustainable development and improving learning outcomes.

The ministry has invited all participants to register from within and outside Qatar. The registration process is ongoing and interested parties can log in and follow these links:

https://survey.encyclopedia.qa/ED2OF2021/2021 (Arabic)
https://encyclopedia.qa/ED2OF2021/Eng

Registration is available from today and will continue up to April 1. The forum will begin next month and will be available in both Arabic and English.

Leading physician honoured with inaugural Bilal Medal

Prominent physician Dr Thomas P. Daniel has been honoured with the inaugural Bilal Medal.

Bilal Medal was instituted in March 2021 in India, this year. It is an annual award for services rendered in the field of oral and maxillofacial surgery, and in the area of dental health policies.

The citation said, “Dr Tho-
mas P. Daniel, a retired Con-
tinent of India for medical research in the field of dental and oral surgery, presented the award at a cer-
manship on the occasion of the First Oral and Maxillofacial Surgery Day. As a doer, community lead-
er, an exemplary legacy programme, theushi and philanthropic activities, the lega-
dent of excellence throughout the field of dental and oral surgery, has been awarded the Bilal Medal. He is a role model for many oral and maxillofacial surgeons who have taken inspiration from his work.”

GU-Q to discuss opportunities between 2022 and 2026 FIFA World Cups

Top sport scholars will discuss free trade, social and political conditions before and after hosting the FIFA World Cup at a public workshop organised by Qatar Academy. Qatar 2022 to the Americas 2026 FIFA World Cup: Opportunities and Challenges between FIFA World Cups, which is supported by the US National Science Foundation, will bring together experts from Qatar, the US and the UK to discuss the social, political and economic conditions before and after hosting the FIFA World Cup. The event will be held on 2 June 2021, at the Qatar Academy in Education City, Doha.

The event, which is open to all, will explore the opportunities and challenges faced by countries before and after hosting the FIFA World Cup, and discuss the impact of the World Cup on the economy, society and culture of host countries. The event will also include a panel discussion on the social, political and economic conditions before and after hosting the FIFA World Cup, and discuss the impact of the World Cup on the economy, society and culture of host countries. The event will also include a panel discussion on the social, political and economic conditions before and after hosting the FIFA World Cup, and discuss the impact of the World Cup on the economy, society and culture of host countries.

CMU-Q game development contest fosters learning in community

CMU-Q students to develop video games to promote public awareness of liver diseases

CMU-Q students will develop video games to promote public awareness of liver diseases as part of the university’s Game Development Competition, which is being held in partnership with the Qatar Liver Foundation (QLF). The competition, which is open to all students at CMU-Q, aims to raise awareness of liver diseases and their impact on society.

The competition is open to all students at CMU-Q, and participants will be judged on the quality of their game design, creativity, and the ability to convey a message about liver health. The competition is part of the CMU-Q Student Life Program, which aims to promote student engagement and community involvement.

The competition will be held on 28 February, and participants will present their games during a virtual event on 1 March. The winners will be announced on 4 March, and the games will be displayed on the CMU-Q website.

Vodafone backs Qatar Cancer Society

Vodafone Qatar has joined hands with the Qatar Cancer Society (QCS) to support the charity’s efforts to treat cancer patients and those impacted by the disease in Qatar.

In addition to helping the QCS fund cancer treatment for those patients who otherwise cannot afford it, Vodafone Qatar will also kick off a significant follow-up awareness campaign with a mini-documentary that highlights the importance of early detection. The telecommunication company has said in a statement. Vodafone Qatar will also continue to run its yearly cancer awareness sessions for its employees to participate in and promote the programme.

The statement said, “The private sector also plays a responsibility in the community's development. It is the duty for all in our society to work together and point out....”

Alfardan Premier Motors, said: “Vehicles owner-ship is not merely a financial matter, it is also a lifestyle. But many of our customers still worry about the cost of maintaining their vehicle.”

The extended warranty is applicable on vehicles that are currently three and a half years old or less. For more information about the extended warranty and your vehicle’s eligibility, one can contact Alfardan Premier Motors.

The initiative forms part of Alfardan Premier Motors’ efforts to minimise any concerns typically associated with owning an older vehicle. While the vehicle’s service history and maintenance are the key factors that determine its condition, it is also important to have a warranty in place to protect the customer from any unforeseen expenses.

Participants of the symposium and community leaders at the event were keen to praise the programme, applauding the efforts of the QRCS and its partners.

Al-Balushi said the “Future’s Writers” programme brings the latest stories and facts to students and fosters a spirit of competition among them to develop children’s skills. He also expressed happiness to participate in this programme and his thankfulness to contributing to discovering young talents.

For more information on the Qatar Cancer Society’s work and the awareness campaign, visit www.qcs.qa or call 4447777.

Alfardan Premier Motors offers warranty extension

Alfardan Premier Motors Co, the official retailer of Jaguar Land Rover in Qatar, has announced a new option to extend warranty coverage for its vehicles. The extended warranty extension to ensure peace of mind as customers safeguard their vehicles longer.

The QRCS rehabilitated a bakery in Jarabulus.

The program covers mechanical and electrical components according to the extended warranty terms and conditions. In June, the programme launched with a press conference, saying: “With our continued support, all Alfardan Premier Motors are undertaking our commitment to our customers by ensuring they are well-protected and cared for should they choose to keep their vehicle longer.”

The QRCS has said in a

QRCS supports IDPs in northern Syria

The Qatar Red Crescent Society (QRCS) has said that it continues to provide assistance and support to the internal displaced persons (IDPs) in the northern governorates. QRCS represented in the most affected camps to assess the needs of people and provide necessary support.

In emergency response to the damage in five camps of internally displaced persons (IDPs) due to heavy rains, the QRCS launched an immediate rescue operation and provided shelter, food and drinking water, as well as medical assistance. It has also distributed mattresses and blankets to the affected camps to ensure awareness activities and services. Those included 14,000 mattresses and 14,000 blankets and 14,000 winter kits, which were provided to the families affected by the disaster that occurred in cornation. QRCS is continuing to provide necessary support to the affected camps.

Community awareness sessions were held on the need of low temperature levels, how to deal with them, ways of protection, the importance of insulation, and elements about electricity and fire. The purpose of the project to extend warranty coverage for vehicles produced in Qatar, the QRCS has said in a

The College of Islamic Studies (CIS) at Hamad Bin Khalifa University (HBKU) has signed a two-year memorandum of understanding (MoU) with the Al Sharq Forum, which is expected to play an integral part in the College’s further development. Under the agreement, CIS will be one of the strategic academic partners to ASF, creating new exchange and joint research opportunities for both parties and their respective partners.

At the official launch, CIS faculty will explore several ongoing projects with Al Sharq Forum. In this regard, Al Sharq Forum aims to engage their networks of experts and practitioners in their internship programme. The College also aims to launch summer schools, seminars and masterclasses.

In October, bearing research director and managing director of Al Sharq Forum, Dr Mohamed Affan, acting research director and managing director of Al Sharq said that the MoU is on the lines of case studies that are currently facing the region, long-term, to hope to advance its studies and pursue higher levels of education.

Through its engagement at HBKU, added: “At a time when the Arab region is facing a major crisis, with people in need of forming a new path to combine traditional and modern knowledge, the college of Islamic Studies is a major partner in our arrangements.”

AlSharq aims to deepen understanding of energy challenges that are facing the region and to engage in the region’s development goals that positively impact the region and the world.

He added that the MoU is another positive step in the College’s strategy to engage with several universities, which helps to improve and develop the College and its mission.

Dukhan Bank launches D-Pay contactless payment platform

In a first for the market, Dukhan Bank has launched its D-Pay platform, a contactless mobile payment service supported by NFC technology.

The new mobile payment service is currently available in three colours: orange, blue, and green. It can be used in the Middle East and Asia, and is available in the contactless payment standard, EMV. This technology allows transactions to be completed in a shorter time compared to traditional contact-based payments.

D-Pay’s launch comes as part of the bank’s efforts to further integrate its customers into the digital transformation of the financial sector. Since the COVID-19 outbreak, contactless payment technology has been increased to provide customers with a safer and more convenient way to conduct transactions. Customers can now make payments without touching surfaces, which reduces the risk of spreading the virus.

The new mobile payment service is available on the Dukhan Bank mobile application and allows customers to make payments by simply scanning the contactless symbol. The service is supported by NFC technology and is available in three different colors to make it more user-friendly.

Additionally, the bank has introduced a D-Pay mobile app that allows customers to log in to their accounts and make payments using their mobile devices. The app is available on both Android and iOS devices and can be downloaded from the Google Play Store and the App Store respectively.

More information on D-Pay is available on the Dukhan Bank website.

For more information visit dukhanbank.com or contact our call center on 9888-8805

The competitions of the Qatar International Open Parachuting Championships, which was inaugurated on Friday by HE the Deputy Prime Minister and Minister of State for Defence Affairs Dr Hamad bin Abdullah al-Fetais al-Marri, was in full swing yesterday. The Qatar Parachuting Federation has officially kicked off yesterday.

Minister and Minister of State for Defence Affairs Dr Hamad bin Abdullah al-Fetais al-Marri delivered his speech yesterday. The tournament is held in two phases: the first phase comprises of the paragliding competitions and the second comprises of the Skydiving competitions. The last day for these competitions is on Sunday. The results of the competitions and awards will be announced during the closing ceremony.

The tournament has been held since 2006 and has been organized by the Qatar Parachuting Federation. The tournament is held in collaboration with the World Air Sports Federation (FIA) and the International Olympic Committee. The tournament is open to participants from all over the world.

The competition is divided into two categories: men and women. The male category is divided into three divisions: senior, junior, and master. The female category is divided into two divisions: senior and junior. The competitions are held in two phases: the first phase comprises of the paragliding competitions and the second comprises of the Skydiving competitions. The last day for these competitions is on Sunday. The results of the competitions and awards will be announced during the closing ceremony.

By Shafeeq Alingal

The Parachuting Federation is scheduled to complete the first phase of competitions this year, according to the Public Works Authority (Ashghal). The project area covers several Doha Metro stations and the works will facilitate transportation between a number of vital destinations in the centre of Doha and other places in the city and beyond. The project, which was inaugurated on Friday, includes the construction of two pedestrian bridges on Al Waab Road, B-Ring Road and Al Khaile road, with a total length of about 3,000 metres. The project is divided into two sections, each of which will be carried out on an individual basis, which will be carried out to improve pedestrian safety in the area.

The cases handled by the section include those with other syndromes except autism spectrum, Down syndrome, and two separate rooms for groups. The section provides training sessions, such as the International Anti-doping Academy (IACA) to ensure the highest level of integrity at the pre-school stage. Iran's top diplomat urges Biden to return to N-deal

The United States needs to return to the nuclear deal, President Joe Biden's predecessor, to protect the American people and the world, said an Iranian diplomat.

"The American people are the ones who have suffered under the policies of the Trump administration," said Majid Takht Ravanchi, Iran's permanent representative to the United Nations.

The Biden administration has said it will look at the nuclear agreement with Iran, formally known as the Joint Comprehensive Plan of Action (JCPOA), as it attempts to address issues related to Iran's nuclear program and regional stability.

"We believe that the United States needs to return to the nuclear deal with Iran," Takht Ravanchi said.

He said that Iran was ready to work with the United States to address its concerns, including Iran's nuclear program and regional issues.

"We are ready to work together to address these issues and find a solution that is acceptable to all parties," Takht Ravanchi said.

The Biden administration has said it is willing to return to the nuclear deal, but has indicated that it will only do so if Iran returns to its commitments under the deal.

"We believe that the United States needs to return to the nuclear deal with Iran," Takht Ravanchi said.

Trump shouldn’t get intelligence briefings: Biden

Washington

U.S. President Joe Biden does not believe his predecessor Donald Trump should have access to intelligence briefings because of his erratic behavior and his recruitment of Russia as an ally, a senior Chinese official said on Sunday.

The senior Chinese official, Yang Guang, a longtime friend and manager of Chinese Foreign Ministry spokesman Zhao Lijian, said the United States would hold a major cabinet reshuffle if Trump, a Republican, should return to power.

Yang also condemned Trump’s approach to China, saying long briefings during his presidency had not been connected to the country’s most important and sensitive core issues in China-US relations.

“Mr. Trump is not doing his homework and is a foreigner to the country,” Yang said.

The tough tone comes after Biden’s administration has moved to distance itself from the Trump administration in the region.

The White House has said it will strictly abide by the one-China principle under the Taiwan Strait, and its unification of the ruling-party international system.

Biden said he would end “repressive policies” in Xinjiang, Tibet and other parts of the country.

“The United States has a long history of repressive policies in Xinjiang, Tibet and other parts of the country,” said Biden.

Biden also said he would continue the challenge of massive election fraud made by Trump’s supporters of former president Donald Trump.

Biden added that the political action committee would continue to consider other options in the future.

China approves Sinovac vaccine for general public use

**New Delhi**

China has approved Sinovac Biotech’s Covid-19 vaccine for use in the general population, the country’s state-run Xinhua news agency reported on Sunday.

The news came as the World Health Organization (WHO) was due to begin its emergency use listing procedure for the Brazil-developed vaccine developed by Sinovac, the latter company said.

The approval by China’s National Medical Products Administration (NMPA) is based on data from two trials involving more than 20,000 people. An emergency use listing evaluation by the WHO’s independent Covaxin task force is expected soon.

Approval of the two-dose regimen in China’s National Medical Products Administration (NMPA) is based on data from two trials involving more than 20,000 people. An emergency use listing evaluation by the WHO’s independent Covaxin task force is expected soon.

AstraZeneca, which has partnered with China’s Sinopharm, is currently awaiting an emergency use listing by the WHO.

**Estonia**

Estonia on Sunday approved the use of the AstraZeneca COVID-19 vaccine for people aged 30 or over in the country.

The decision was taken after a meeting of the Advisory Board of the Health Board.

The package insert of the vaccine contains the recommendation that people aged 30 or over, without any contraindications, can be vaccinated with the vaccine.

By the end of Sunday, more than 20,000 people had been vaccinated against COVID-19 in Estonia.

**Indonesia**

Police in Pekalongan, Central Java, on Saturday arrested a man suspected of setting fire to a rubber factory, causing a fire that spread to nearby cloth factories, in Pekalongan, Central Java.

The fire was reported at around 10 a.m. to local police and firefighters. More than 60 firefighters and emergency services personnel were sent to the scene to extinguish the flames.

The cause of the fire is still under investigation.

**Singapore**

Singapore has approved the use of the AstraZeneca COVID-19 vaccine for people aged 30 or over in the country.

The decision was taken after a meeting of the Advisory Board of the Health Board.

The package insert of the vaccine contains the recommendation that people aged 30 or over, without any contraindications, can be vaccinated with the vaccine.

By the end of Sunday, more than 20,000 people had been vaccinated against COVID-19 in Singapore.

**New Zealand**

New Zealand’s health authorities have approved the country’s first home-grown Covid-19 vaccine for use on a national scale.

The vaccine, which is manufactured by Cadila, a subsidiary of the Indian drugmaker Serum Institute of India, was approved by the health ministry on Friday.

The vaccine, which uses a similar technology to that used in Pfizer’s vaccine, is expected to be available for use in late March or early April.

The vaccine has been tested on more than 500 people and is expected to be used in around 50,000 people.

**Colombo**

Sri Lanka has approved the use of the AstraZeneca COVID-19 vaccine for people aged 30 or over in the country.

The decision was taken after a meeting of the Advisory Board of the Health Board.

The package insert of the vaccine contains the recommendation that people aged 30 or over, without any contraindications, can be vaccinated with the vaccine.

By the end of Sunday, more than 20,000 people had been vaccinated against COVID-19 in Colombo.

**Oxford**

Oxford University and AstraZeneca said on Friday that their experimental Covid-19 vaccine had been shown to be safe and effective in three large trials.

The University of Oxford and AstraZeneca are hoping to see the vaccine approved for use by the end of the year.

**Cape Town**

The Western Cape Health Department has approved the use of the AstraZeneca COVID-19 vaccine for people aged 30 or over in the country.

The decision was taken after a meeting of the Advisory Board of the Health Board.

The package insert of the vaccine contains the recommendation that people aged 30 or over, without any contraindications, can be vaccinated with the vaccine.

By the end of Sunday, more than 20,000 people had been vaccinated against COVID-19 in Cape Town.

Tens of thousands protest Myanmar coup

Despite Internet ban

**Rangoon**

A critically endangered Sumatran tiger was shot dead yesterday while rounding the zoo. A cage with animal prey inside has been prepared in the hope the escaped tiger will return to the zoo at her feeding time.

The tiger escaped from the Rangoon zoo yesterday to denounce this week’s military coup and file a formal protest to the U.S. government.

The zoo has asked the U.S. government to take action against Myanmar’s military junta.

**New Delhi**

A small, blood-red river gushed out of a cloth factory, flooding a nearby factory yesterday, causing a frenzy on social media.

At least 10 people were injured in the accident and around three-degrees sugar, a partition officer in protection, some of them held up NLD flags or pictures of Suu Kyi and dancing.

“Sometimes there are purple flames, sometimes there are bloody rain etc.”

The protests were due to the dye-waste from cloth factories, in Pekalongan, Central Java.

Farmers take part in a three-hour “chakka jam” or road blockade, as thousands of protesters block roads and converge onto Delhi’s city center in a show of resistance against the India’s government policy for Asia-Pacifi c emerging countries, Rafael Franko, the Norwegian mobile network operator, said.

It extended a social media blackout on the Inter- net to the key farm law protests in the capital of Uttar Pradesh, the state with the country’s biggest farming population.

Farmers were deployed across the country in the key farm law protests, where farmers and their supporters have been blocking roads and paralyzing cities for months in protest against the government’s policies.

Thousands of farmers have been camping on the outskirts of the city in Central Java being fi lled with the dye from cloth factories, in Pekalongan, Central Java.

More than 10,000 protesters gathered in the streets of the city in Central Java being fi lled with the dye from cloth factories, in Pekalongan, Central Java.

A fourth candidate from Western Australia detected its first coronavirus infection in the state’s southwest yesterday, with the infected man having travelled back home from New Zealand over the weekend will help douse the flames, state authorities said yesterday.

Three of thousands of people are expected to attend the protest march in New Delhi.

A 75-year-old leader had been released on bail.

The protest was due to Facebook, Instagram after seeking to silence 800 city chiefs in 1840.

Farmers, who are determined to continue their protest, have asked for more support from the government.

The protest was due to Facebook, Instagram after seeking to silence protesters in Myanmar.
Don’t ever let our guard down on Covid-19

Qatar has done well by maintaining one of the lowest Covid-19 infection rates in the world, with the number of new daily cases and hospital admissions declining in the number of new daily cases and hospital admissions. However, last month had seen a gradual increase in the number of new daily infections in the country. Recently, the Cabinet decided to re-impose some restrictions to curb the spread of Covid-19 in Qatar and avoid any possible spread of the new strains of the virus. According to Dr Abdulaziz Al-Khalaf, chair of the National Health Strategic Group on Covid-19 and head of Infection Devices at the Medical Corporation, Covid-19 is constantly mutating and it is possible that the two variants reported in the UK and South Africa may have reached Qatar.

The new variants are believed to cause more than 70-90% of the new infections in the countries where they already reached. Hence, it is more important than ever to observe the preventive and precautionary measures against Covid-19, which spread mainly from person to person through respiratory droplets. Respiratory droplets travel into the air when an infected person coughs, speaks, shouts, or sings. These droplets can then land in the mouths or noses of people who are near a person or they may breathe these droplets in.

Mask wearing is the best barrier to help prevent one’s respiratory droplets from reaching others. Studies show that masks reduce the number of droplets that drop from the nose and mouth of a person infected with the coronavirus.

For this reason, one should wear a mask, even if one does not feel sick.

This is because several studies have found that people with Covid-19 who never develop symptoms (asymptomatic) and those who are not yet showing symptoms (pre-symptomatic) can still spread the virus to other people.

The pandemic has presented a unique set of challenges for all of us. We are all learning more about how to protect ourselves against the virus every day, and public health experts continue to work hard to ensure that we don’t actually have to be sedentary to spread the new coronavirus.

A person infected with the virus can be contagious as early as three days before he or she begins showing symptoms. In addition, some people never develop symptoms, but are still able to spread the virus.

The Covid-19 pandemic has placed a new level of personal accountability on each one of us. To slow the spread of coronavirus and protect the health and vitality of our people, we must remain committed to the extra precautions our public health officials are recommending.

At the core of these precautionary measures is the need for continued social distancing and to take all of the precautions seriously—even if one is healthy.

By Ricardo Maasman

Poor countries are cheap. In 2010, a dollar could buy more than twice as much as it could in Argentina, Morocco, South Africa, and Thailand. But it could not buy as much as it could in three times as much as Vietnam. The price of coffee is relatively cheaper in richer countries, but it is more expensive in poorer countries, which could explain why it is cheaper in some countries.

The price of internationally tradable goods, like coffee and coffee, tend to be similar across countries. If you need to buy a lot of coffee, you might want to support the production of coffee in a country where it is cheap.

In principle, codified knowledge can be transferred from brain to brain. It is much easier to send information internationally relative to those that do not exist at all. But how can we explain why poor countries are cheap?

The standard economic explanation is that poor countries are cheap. In fact, many cheap countries are falling behind. If a country is cheap, it can expect to be able to catch up with richer economies.

In fact, many cheap countries are falling behind. If a country is cheap, it can expect to be able to catch up with richer economies. For example, a dollar buys more in a poor country than in a rich one. However, this does not necessarily mean that these countries are catching up with richer countries.

For this reason, one should wear a mask, even if one does not feel sick.

This is because several studies have found that people with Covid-19 who never develop symptoms (asymptomatic) and those who are not yet showing symptoms (pre-symptomatic) can still spread the virus to other people.

BRITISH PM ‘PLANNING NHS ENGLAND OVERTHROW’

By Molly Blackall

The British prime minister, Boris Johnson, is planning to relinquish his control of health services. The plans would put an end to the health secretary’s control of NHS England and local authorities, instead allowing a new policy to be introduced that would have greater power over the NHS. The leak of the document by Cameron’s administration is currently being investigated. Johnson’s administration would be forced to act in response to public demand.

The leaked document, published by The Times in 2012, states that the government planned to keep the NHS as a state-owned monopoly. The document says: “The Lansley changes were limited. There’s a proper accountability mechanism, similar to that in the civil service. Older people have much more influence. It’s a big task, and if government is not going to be held to account, there’s a risk of government becoming a monopoly.”

Johnson’s administration would also take control of clinical commissioning groups, which have control over local healthcare provision, and build a greater role for the private sector in healthcare. The Katara International Arabian Horse Festival came to a dazzling end yesterday after regaling audiences and equine enthusiasts over the past few days at the Katara Esplanade.

Held under the patronage of His Highness the Amir Sheikh Tamim bin Hamad al-Thani, the festival was organised by Katara – the Cultural Village Foundation in co-operation with the Qatar Equestrian Federation, the Qatar Racing & Equestrian Club, and Qatar Foundation.

Besides the Title Show, the event also featured accompanying activities such as artistic presentations.

The festival’s concluding ceremony included the announcement of the winners in different categories of the Title Show. It also featured a presentation by members of the Amiri Guard cavalry, while a dazzling fireworks and drone show provided a fitting, and satisfying, end to the event.
