QF, Al-Attiyah Foundation partner to fight climate change

HE Abdullah bin Hamad Al-Attiyah, chairman of the Al-Attiyah Foundation (QF) has entered into a partnership with The Al-Attiyah Foundation to combat knowledge about climate change in Qatar and raise awareness about the need for action to tackle one of the planet’s most urgent challenges.

The two organisations will try to amplify their contributions to shaping the discussion about climate change and the role of the people, through a collaboration that spans education, research, and training, to fight climate change. 

The Al-Attiyah Foundation aims to host a joint climate change conference in Qatar later this year.

Amir attends final of Qatar ExxonMobil Open

His Highness the Amir Sheikh Tamim bin Hamad Al-Thani attended yesterday the final of the 29th Qatar ExxonMobil Open 2021 for men's tennis held at the Khalifa International Tennis and Squash Complex. The Amir watched the final match won by Georgian player Nikoloz Basilashvili against Spanish player Roberto Bautista Agut in which the Georgian player emerged victorious with a 7-6, 6-2 win.

Milipol 2021 set to open tomorrow

Milipol Qatar 2021 set to open tomorrow amidst precautionary measures to limit the spread of Covid-19. The expo, which represents a link between global manufacturers, users and security and safety experts, will showcase the latest products and innovations dedicated to homeland security and public safety.

71 companies from 17 countries and 72 local firms to attend

Milipol Qatar chairman Major-General Nasser bin Fahd Al-Thani told the press conference that all arrangements have been completed for the expo, which will be held under the patronage of His Highness the Amir Sheikh Tamim bin Hamad Al-Thani, to announce the details of the exhibition.

The expo will be held at the Officier’s Club Hall, General Directorate of Civil Defense, to enhance the details of the exhibition.

Milipol Qatar signs agreements with Barzan and Al Hazm

Milipol Qatar 2021 begins to- morrow at Doha Exhibition and Convention Centre and continues until March 17.

Major-General Nasser bin Thalib al-Thani, Chairman of the Milipol Qatar Exhibition Committee yesterday signed an agreement with Barzan Holdings, a Strategic Sponsor of the exhibition, while another agreement was signed with Al Hazm as a Strategic Sponsor of the event.

The two agreements were inked at the Officers Club of the General Directorate of Civil Defence yesterday on the sidelines of the Milipol Qatar 2021 seminar. The agreements will be led by officials from the Ministry of Interior.

Al-Emadi expressed happiness at signing the partnership agreement with Al Hazm. He said Al Hazm believes that supporting such an important event will contribute to the success of the exhibition and affirm Al Hazm’s capabilities and acquiring knowledge that enhances Qatar’s sovereign capabilities. He said Al Hazm will co-operate to achieve these goals and build a prosperous future for our country.

Thajudheen: We join hands and co-operate to achieve the vision of His Highness the Amir for 2030, developing infrastructure, building capabilities and acquiring knowledge that enhances Qatar’s sovereign capabilities. We join hands and co-operate to achieve these goals and build a prosperous future for our country.

The seminar will run from tomorrow until March 17 at the Doha Exhibition and Convention Centre. Qatar launched its first ever dedicated to homeland security in the Middle East under the Milipol Qatar 2021 banner.

Milipol Qatar 2021 will host a number of seminars that will address the main challenges in the region, opportunities and strategies to overcome them, and the participation of thought leaders, the organisation has announced.

On March 16, a session on cybersecurity and other threats will discuss the topic and the measures taken by Qatar to ensure national security and protection against cyber threats. The session will start at 11am and be attended by Khalid bin Abdullah al-Assadi, assistant under-secretary, Cyber Security Department, and Noon Al Thani, chief executive of Qatar National Cyber Defence, and other experts from various fields.

The seminars will cover various topics in the areas of anti-hijack and anti-terrorism, chemical, biological, radiological and nuclear (CBRN) defence, civil defence, data protection, information and communication systems, economy and industrial intelligence, fight against cyber threats and cybercrime, drug control, environmental, oil and gas sector, port and airport security, border control, price policy, private security, protection of industrial secrets, risk analysis and management, suitability of public places, urban security, systems integration and transport security. Also, experts from the exhibition entities will address the seminars.

Milipol Qatar 2021 begins to- morrow at Doha Exhibition and Convention Centre and continues until March 17.
MoTC, Doha Institute sign MoU to develop national digital skills

The Ministry of Transport and Communications (MoTC) and Doha Institute for Graduate Studies (DI) have signed a memorandum of understanding (MoU) to boost lines of constructive cooperation, exchange information and expertise and develop joint activities in the field of developing digital skills in Qatar.

The MoU, according to an official MoTC press statement yesterday, was signed by Reem Mohamed al-Mansoori, Assistant Undersecretary of Digital Society Development at the MoTC, and Prof Hamid Ali, Associate Professor, Dean of the School of Public Administration and Development Economics at DI.

“Under the MoU, the two parties will be cooperating in the fields of conducting research and studies of common interest and exchanging academic resources experienced in the field. They will be also cooperating in organizing workshops and symposia on topics of developing the professional and executive skills and leadership of Qatari nationals to contribute to the digital transformation plans in Qatar,” the statement said.

Al-Mansoori said the Qatar Digital Government Training Programme (QDGTP) of the MoTC will continue to collaborate with partners and host technology service providers to provide the opportunity of acquiring international certificates in the field of ICT personnel working in the government sector.

“This is important in order to achieve the objectives of the Qatar Digital Government Strategy and Digital Transformation plans in Qatar. We are pleased to sign this MoU with the Institute for Graduate Studies and broaden the scope of cooperation and scientific exchange and research in the field of research projects and scientific and knowledge production. We are confident this cooperation will serve the digital transformation plans in the country,” al-Mansoori added.

Prof Ali said DI is a leading institution for research on social and economic trends affecting the needs of digital skills in Qatar, fully prepared to share and offer its academic experience and conduct training courses, as well as to provide academic staff who have regional and global experience.

“Of the assets and achievements at DI is the Excellence Centre for Training and Consulting. Further, the signing of the MoU will allow the exchange of scientific, technical, expertise and experts, especially in scientific research and training,” he added.

Under the MoU, DI students will be able to participate in the professional training and programs that DI provides.
The Tobacco Control Centre at Hamad Medical Corporation (HMC) and a virtual session held by the World Health Organization (WHO) on tobacco cessation services in Qatar to increase the notification of the effects of smoking, especially the cost considerations and treatments.

The session is part of the activities prepared by QNA to celebrate the International Day for Tobacco Control, which is observed on May 30.

The session discussed the primary role of smoking cessation services in Qatar in controlling the number of people admitted to hospital with COVID-19 and the negative impact of smoking on the population. It highlighted the importance of reducing smoking in Qatar and the need to provide training and treatment programs to help smokers quit.

The rise in recruiting maids from outside the country has led to a rise in the number of reported cases of domestic violence, local Al-Arabiya daily reported.

The recruitment fee for the turnover of a maid could be as high as QR20,000 due to the expiring pandemic situation and the growing demand for domestic help to run the home to the holy month of Ramadan, the report states.

The Covid-19 situation has made for a labor market that show a huge number of workers some, impose new restrictions on the movement of workers from abroad are going on now they have started increasing this up to $15,000.

The recruitment for a maid could go up to QR20,000 due to the ongoing pandemic situation and the growing demand for domestic help in the run-up to the holy month of Ramadan.

Meanwhile, the employers complained about the rise in the cost of hiring skilled maids and cooks.

Mohamed Al-Bakr, an employer, said that due to the fees imposed by recruiters in addition to the delays involved in finding an adequate hotel quarantine booking, the recruitment of workers from abroad is going up.

Mohaed Al-Attal, an employer, said that due to the rise in the recruitment cost, he is only relying on domestic help in the run-up to the holy month of Ramadan.

HBKU professor reflects on Covid impact after a year of lockdowns

Dr Marc Owen Jones

The pandemic has caused a massive increase in demand for vaccines. It has also been a huge success story, with millions of people around the world getting vaccinated against the virus, including in Qatar. The HBKU professor has also discussed the challenges facing the medical profession in Qatar, including the ongoing pandemic and the need for vaccination programs to continue.

Dr. Jones said that Qatar has been successful in vaccinating a large number of people, with more than 90% of the population having received at least one dose of the vaccine. He also noted that the vaccine distribution has been effective, with more than 80% of the population having received at least two doses.

Even after a decade of the Syrian crisis, it remains a terrifying humanitarian tragedy and the largest displacement crisis globally. The humanitarian situation is more problematic than ever. The crisis has left behind widespread destruction and massive damage to infrastructure, and affected the economy badly. Many sectors, especially health and educational facilities, went out of service.

Over 5.6 million people have fled Syria since 2011, seeking safety in Lebanon, Turkey, Jordan and beyond, and another 6.6 million people remain displaced inside the country. Millions of Syrians need humanitarian assistance.

According to the UN Refugee Agency, there are over 12.2 million IDPs and refugees (6.6 IDPs and 5.6 refugees). Two million Syrians live in extreme poverty, according to United Nations estimates. A record 12.4 million people in Syria are struggling to find enough food to eat. Approximately 13.4 million people need humanitarian aid, according to the United Nations. Inside Syria, there are over 2.4 million children out of school. 2.6 million children were displaced by the end of 2019. In Jordan, over 435,000 Syrian refugees are currently trapped in exile, approximately 60 per cent of these live outside camps, while more than 159,000 have found sanctuary at the camps of Zaatari and Azraq. An estimated 91 percent of the refugees live below the poverty line.

Pioneering genetic exam developed to identify falcons

Al Gannas Qatari Society vice-chairman Ali bin Kraven al-Mahmoud: "The Qatar Falcon Genome Project has a dream for many years to consolidate the role of Qatar in the global heritage registered of falconry, which is considered a global human heritage registered by UNESCO, and the hobby of falconry on scientific grounds.

The project also achieved many important results, especially in the context of efforts to preserve falcons, their health and fitness. This achievement will inspire younger generations.

Vice-principal Mou Bera welcomed the students and teachers, stating that the project will encourage the children's lifelong passion for falconry. Muhammad bin Abdullah, Assistant Director of the centre, also congratulated the project.

The project measured the genome of several species of falcons belonging to different breeds. Every species has a different genetic fingerprint.

It was part of the national bio-information repository, which has helped access falcon-based populations and differences in the wild and has opened the possibility for researchers to enter the armed forces.

The project also achieved many important results, especially in the context of efforts to preserve falcons, their health and fitness. This achievement will inspire younger generations.

Qatar Falcon Genome Project director Farouk al-Ejli said that the project will inspire younger generations.

Finally, the students were told that the project will also help identify falcons that have been bred in captivity and compare them with those that have been bred in the wild.

The project was launched by the Society in January 2016, as it was proud of this scientific attainments. The project was also launched by the Society in January 2016, as it was proud of this scientific achievement.

He also talked about the importance of the project, which has allowed access to the latest scientific technologies and has enabled the development of a highly accurate genetic examination, which has allowed access to the latest scientific technologies.

New Delhi

India's Covid-19 death toll has crossed 500,000, according to the Ministry of Health and Family Welfare, as the country continues to grapple with an ongoing surge in coronavirus cases.

The official tally showed that the death toll had risen to 503,455, surpassing the milestone of 500,000 deaths.

The country has reported 10,139 new deaths in the last 24 hours, bringing the total number of deaths to 503,455.

The daily新增 cases also rose to 276,135, with the total number of cases reaching 36,214,649.

India's healthcare system has been under immense pressure as the country battles a third wave of the pandemic, with hospitals struggling to cope with a surge in patients.

The government has imposed a series of restrictions, including night curfews and weekend lockdowns, in an effort to control the spread of the virus.

India is currently the second worst-hit country in the world, with the United States being the worst-hit with over 3.5 million deaths.

The situation in India is especially concerning as the country is facing a shortage of oxygen and medical oxygen, with many hospitals reporting that they are running out of supplies.

The government has been working to increase oxygen supplies and has also appealed to the international community for assistance.

However, the situation remains grim, with experts warning that India could see even higher numbers of deaths in the coming weeks if the surge in cases continues.
Uncoordinated approach to vaccine distribution risks global GDP losses

It is certainly good news that there are already several effective COVID-19 vaccines in the market, but this won’t necessarily mean that global economic activity will improve. The reason for this is that the uncoordinated approach to vaccine distribution has caused more unequal between high-income and low-income countries.

Global leaders from the United Nations Secretary-General, António Guterres, to WHO Director-General Dr Tedros Adhanom Ghebreyesus have repeatedly sounded the alarm about the danger of inequity in vaccine distribution. But a recent study by O’Brien et al. has found that, while comprising only 10% of the world’s population, have already purchased 60% of available vaccine supplies.

Painting a grim picture, O’Brien said that “vaccine nationalisation is in fact more a cause than a cure, and its effects on public health will be dire.”

The call for a global solidarity for equitable vaccine distribution is frequently heard on moral grounds, but now it is also looked at the economic national and public health ramifications of a vaccine distribution crisis. Low-income communities are not able to get vaccinated at the same time as those who can afford it.

“The world is not as safe as it should be until we have all been vaccinated. If low-income communities are not able to get vaccinated at the same time as those who can afford it, it makes the world less safe for everyone,” O’Brien concluded.

Vaccine candidates have to meet rigorous safety requirements to receive WHO’s final stamp of approval, vouching for their efficacy, safety, and quality.

Many vaccine candidates are currently undergoing rigorous clinical trials to determine their safety and efficacy. However, some candidates have not yet met the stringent criteria established by WHO. This is because vaccine candidates must undergo extensive testing to ensure they are safe and effective before being approved for use.

Economists have never been afraid to talk about the big picture. They ask whether their solutions to social problems are cost-effective. However, the economist’s approach to social problems is often misunderstood, this method can be the forward-induction approach, they often present their research as if the partial answer in the most comprehensive way, and recent vacillation in their disciplines.

For example, they might document patterns, the correlation between the two must be found to one way of concluding the observation. Well-done research in this style can be a beautiful thing to behold. It is a significant accomplishment, it reduces a causal question as possible and it is a beautiful thing to behold.

“World leaders have to get behind the science,” said Adhanom Ghebreyesus. “I urge countries to vaccinate their citizens and all of their countries.”

The way for economists and non-economists to get along

Understanding the advantages and limitations of economists’ methods underscores how economists’ approach can complement but never replace alternative, often qualitative methods used in other scholarly disciplines.

Mexican ruling party ratifies candidate accused of rape

The Institutional Revolutionary Party (PRI) has ratified the candidacy of an opposition candidate who has been accused of rape. The party’s executive committee voted unanimously to support the candidate, who has denied the allegations. The incident has sparked outrage in Mexico, and some politicians are calling for a boycott of the upcoming elections.

Pakistan Day rehearsal

Police and paramilitary forces are preparing for the Pakistan Day parade that takes place on 23 March every year. This year's parade is scheduled to take place in Islamabad. The military parade is a display of the country's military strength and serves as a symbol of national pride.

J-Lo, A-Rod 'working through things' after report split

A Jennifer Lopez and Alex Rodriguez break up report has caused a stir on social media. The couple, who have been together for nearly 10 years, have been the subject of numerous breakup rumors over the years. The couple has not commented on the report, but sources close to the couple say they are working through things.

Police protest in Pakistan

A police officer and four civilians were killed in a gun attack on a police station in Karachi. The attack took place at around 2 a.m. The police officer was shot in the head, and the other three civilians were killed with bullets in the back. The attack is the latest in a series of violence in the city.

Students expelled by Pakistani university after public proposal

A Pakistani university has expelled two students after they were caught in a video incident on social media. The video, which shows the students kissing and laughing, was recorded in a restaurant. The university said that the students violated the university's dress code and rules. The students are planning to appeal the decision.
New stores opening at Mall of Qatar

Mall of Qatar recently announced the opening of new stores, adding to the region’s attractions and retail options. The first Bianca Nera department store in the region, New stores opening significantly value to our customers from international and regional brands, said Mall of Qatar general manager Emile Sarkis. "We would like to welcome the new joiners from international and regional brands to the family of Mall of Qatar, which will add significant value to our customers’ experience and give them easy access to new and trendy brands at their favourite destination.

The new stores feature different categories that appeal to customers with different preferences and we will continue to seek new brands in retail outlets and respond to Qatar’s growing market demands,” he added.

With the existing and new stores opening, customers can try new flavours at Mala Lounge, serving the best confectioneries, chocolates and Turkish delights with outdoor seating; Mediterra Restaurant, offering premium authentic-French cuisine during the Qatari stage; and Talabiet Al Safir, featuring international seafood dishes from the chefs of a world-class Asian cuisine restaurant.

Mall of Qatar customers can also enjoy a range of new options that will be opening soon. Including: WonderAll, offering a wide range of toys for babies; kids&co, a store selling everything for baby and children’s fashion; the Middle East, which offers products such as Arabic and French breads, soft toys, and baby питания; Deyr Qoom, one of the world’s favourite quick-service restaurant; and La Colina, the specialty café where people can work, laugh or bond in a place to call home. Fashion enthusiasts can now enjoy the introduction of new fashion stores, including: Mia, featuring an extensive range of international brands for women; Micha Beauty Centre, the unique concept store for women; and Denierrez, a Luxury multi-brand store displaying a selection of premium fashion, accessories and fine jewelry.

The Qumra 2021 programme continues to grow, offering filmmakers the chance to work with the likes of David Fincher, Claire Denis, BAFTA and Academy award-winning film director Paul Thomas Anderson, and Lions Gate Entertainment, among others. The sessions are presented in both live and virtual formats, allowing film lovers from across the globe to participate in the sessions as they take place.

In addition, Edinburgh International Film Festival’s Artistic Director Alexander Armstrong, who will share his "invaluable insights" with participants during the Qumra 2021 programme, said he hopes to be inspired by Qumra this year. He has been working on his film in the past months, and had been impatiently waiting for this edition. Presenting new perspectives and exciting new filmmakers, the festival continues its support for the cinematic voice, new Qatari talent.

Qumra goes live to support film talent

Qumra supports the script-to-screen journey and beyond, and with the inclusion of video-on-demand (VoD) and online platforms, allowing filmmakers to connect via the virtual opening of Qumra 2021. Modern and illuminating masterclasses, without whose contribution Qumra would not be possible, continue to attract the world’s finest filmmakers and collaborators. Qumra continues to serve a central role in supporting film talent, understanding across cultures and building stronger bridges in a place to call home.

Qumra would not be possible, our focus has been to ensure that our support to promising cinematic voices remains consistent in identifying and nurturing cinematic talent. After an incredibly challenging past year not only for the film industry, but for all of humanity, our focus has been to ensure that our support to promising cinematic voices remains consistent in identifying and nurturing cinematic talent.

"The new range of unique categories that appeal to customers with different preferences and we will continue to seek new brands in retail outlets and respond to Qatar’s growing market demands,” he added.

With the existing and new stores opening, customers can try new flavours at Mala Lounge, serving the best confectioneries, chocolates and Turkish delights with outdoor seating; Mediterra Restaurant, offering premium authentic-French cuisine during the Qatari stage; and Talabiet Al Safir, featuring international seafood dishes from the chefs of a world-class Asian cuisine restaurant.

Mall of Qatar customers can also enjoy a range of new options that will be opening soon. Including: WonderAll, offering a wide range of toys for babies; kids&co, a store selling everything for baby and children’s fashion; the Middle East, which offers products such as Arabic and French breads, soft toys, and baby питания; Deyr Qoom, one of the world’s favourite quick-service restaurant; and La Colina, the specialty café where people can work, laugh or bond in a place to call home. Fashion enthusiasts can now enjoy the introduction of new fashion stores, including: Mia, featuring an extensive range of international brands for women; Micha Beauty Centre, the unique concept store for women; and Denierrez, a Luxury multi-brand store displaying a selection of premium fashion, accessories and fine jewelry.

The Qumra 2021 programme continues to grow, offering filmmakers the chance to work with the likes of David Fincher, Claire Denis, BAFTA and Academy award-winning film director Paul Thomas Anderson, and Lions Gate Entertainment, among others. The sessions are presented in both live and virtual formats, allowing film lovers from across the globe to participate in the sessions as they take place.

In addition, Edinburgh International Film Festival’s Artistic Director Alexander Armstrong, who will share his "invaluable insights" with participants during the Qumra 2021 programme, said he hopes to be inspired by Qumra this year. He has been working on his film in the past months, and had been impatiently waiting for this edition. Presenting new perspectives and exciting new filmmakers, the festival continues its support for the cinematic voice, new Qatari talent.

Qumra supports the script-to-screen journey and beyond, and with the inclusion of video-on-demand (VoD) and online platforms, allowing filmmakers to connect via the virtual opening of Qumra 2021. Modern and illuminating masterclasses, without whose contribution Qumra would not be possible, continue to attract the world’s finest filmmakers and collaborators. Qumra continues to serve a central role in supporting film talent, understanding across cultures and building stronger bridges in a place to call home.
