Amir exchanges Ramadan greetings with Arab leaders

The Amir exchanged Ramadan greetings with Arab leaders accompanied by a high-level delegation from the region, “Azour said in reply to the Al Ulha Accord will help Qatar achieve its vision of being a special place to live and work, said the economies of ‘early inoculation’ countries in the Middle East and North Africa countries, and Iran, saw its real GDP growth shrink by 3.4% in 2020 due to the pandemic levels next year, after raising IMF’s 2021 Mena growth forecast. "This multi-speed recovery is on different levels, one between those who are fast in vaccinating the vaccine and those who will slowly acquire the vaccine due to the availability of vaccines," he added.

Early Covid vaccine rollout seen helping Qatar’s economy: IMF By Patrick John

The Ministry of Public Health (MoPH) has announced that 20.8% of people aged 65 years and above have received at least one dose of the Covid-19 vaccine since the Vaccination Programme. The MoPH (2017-18) vaccine programme has been administered to the country’s total population, with 20.8% of doses being given in the last seven days. The vaccination programme which has already administered to 20.8% of the population includes people over 70 years of age, 16% of people over 60 years of age, 8% of people over 50 years of age, 3% of people over 40 years of age and 1% of the vaccine.

Ministry intensifies food safety checks

The Ministry of Public Health (MoPH) has intensified its control measures on imported foodstuff ahead of the month of Ramadan, in addition to intensifying control over food safety in food establishments that witness increasing demand from consumers, such as consumption complexes and restaurants, to ensure the safety of food sold in outlets in Qatar and to ensure that imported food continues to meet health requirements.

The ministry pointed out that it is setting up renewable monitoring mechanisms for food establishments, in addition to monitoring food safety requirements, especially in seasons such as the blessed month of Ramadan.

The ministry is also intensifying inspection of food establishments, starting with the preparation inside the establishment, passing through the packaging and means of transport conforming to the specifications and distribution mechanisms to the project beneficiaries in a way that ensures that practices and hygiene measures are followed throughout the month of Ramadan, in addition to ensuring food safety requirements.

Supervision and inspection of consumption complexes are also intensified during Ramadan, to ensure the safety of food for human consumption, in addition to monitoring food establishments working to intensify its programs, especially in areas such as hygiene and disinfection, personal hygiene, and healthy behavior, in order to enhance awareness of the risks related to food and the importance of following the correct and safe methods when purchasing and handling foodstuff, transportation, cold and dry storage, preparation and cooking, storage, and sale, cleaning and disposal of any food that does not comply with health specifications and requirements.

Minister of Health and Environment Khalid bin Ali al-Attiyah also said that the ministry is keen to apply the highest health requirements, starting with the preparation of any food that does not comply with health specifications and requirements.

Ministry of Public Health (QNA)

Together we can embrace this holy month

Vodafone extends its warmest wishes to you and your family over the blessed month of Ramadan.

Ramadan Mubarak

Together we can
Qatar's ambassador to Sweden Sheikha Moza bint Nasser al-Thani organised a high-level meeting, through video-conference technology, for Qatari women with influential positions in political life, the importance of Qatari women's participation in the upcoming Shura Council elections to contribute to political decision-making, and ways to benefit from the Swedish experience. The meeting, headed by First Deputy Speaker of the Riksdag (Swedish Parliament) Sara Ljungqvist, was attended by a number of Swedish parliamentarians including, Cecilia Widgren, Linda Lundnegren, Linda and Anne Bert, and from the Qatari side, HE member of the Shura Council Dr Hind al-Muftah, Director of International Labour Relations Department at the Ministry of Administrative Development, Labour and Social Affairs Sheikha al-Khater, counsellor at Qatar’s embassy Tamader al-Mulla, (QNA)

Carrefour Qatar reasserts its commitment to local products

Carrefour's campaign to support Qatari products has seen the sales of local vegetables increasing 50% in comparison to last year, it was announced yesterday. "Through this campaign, Carrefour aims to celebrate the successes of Qatar's local products, which continue to grow in variety and quality, and enhance their presence in the market," Carrefour Qatar country manager Laurent Hausknecht said.

Carrefour launched its first Qatari Festival in collaboration with the Ministry of Municipal Affairs and Agriculture, and the Ministry of Economy and Commerce in 2020. The initiative was born with the intention of supporting local farmers by featuring their produce across a select number of Carrefour stores. The festival went on to highlight and feature produce from prominent local farms, namely Safwa, Khodra, Mazzrati, QT farm, Nabati, Qadco, and Agrico. "As one of the region's largest retailers, it is important that we form close partnerships with all local economic operators," Hausknecht explained.

"By supporting farmers in Qatar and featuring more of their products, we are not only giving our customers the chance to buy the freshest ingredients but also encouraging them to support their local economy," he added.

By highlighting locally sourced produce, Carrefour continues to encourage customers to be more conscious of where their food is sourced from, while providing them the opportunity to buy fresh, high quality and sustainably produced food from local farms at the best possible value. Carrefour Qatar's contributions to the Food Safety Programme over the past four years played a significant role in the country's move towards self-sufficiency and food security. Choosing healthy food, produced locally and sustainably, makes it possible both to reduce carbon emissions and combat global warming and boost the local economy. Carrefour aims to continue giving back through on-going support of the local market, and thereby contributing to the sustainability, economic and environmental development, key pillars of the government's vision for 2030.
Qatar Charity provides safe drinking water to Palestine

Qatar Charity (QC) has signed an agreement with the Palestinian Water Authority (PWA) to implement a desalination plant in the Gaza Strip by digging a well and installing a desalination plant in co-operation with the Palestinian Water Authority. This comes within the framework of the co-operation agreement between QC and the Palestinian Water Authority (PWA) to implement the desalination project that contributes to improving water and sanitation services in the Gaza Strip. It is expected that QC, during the coming period, will complete the projects that make desalination and maintaining sewage pumping stations and in various governorates of the Gaza Strip. The project of drilling a well and installing a desalination plant will contribute to reducing the percentage of diseases and deaths caused by unsafe water in this region, in addition to raising awareness about health and personal hygiene, and limiting the spread of infectious diseases and deadly epidemics.

The project aims to improve the environmental situation and public safety, reduce the displacement of drought-hit areas in search of water resources, and contribute to security and stability in the region. The beneficiaries expressed their happiness at the implementation of the project that will contribute to meeting their water needs.

Qatar Charity has ensured supply of safe drinking water for 2,000 residents of Khan Yunis in the southern Gaza Strip.

“An integral part of the Qatari community, it is our duty during the month of mercy and charity to launch campaigns and projects that match the globally exceptional Covid-19 situation”

Qatar Red Crescent Society (QRCS) has signed co-operation agreements with Lulù Hypermarket, Family Food Centre, and Al-Khalaf Trading and marketing, to launch a major virtual charity initiative during the holy month of Ramadan, as an integral part of the Qatari community, it is our duty during the month of mercy and charity to launch campaigns and projects that match the globally exceptional Covid-19 situation.

The Public Works Authority (Ashghal) has started the QR319mn project in south of Semaisma to develop and construct a road network, at a total length of 21km while providing traffic safety elements such as street lighting systems and safety zone. In addition, it provides facilities such as street lights and poles as well as installing directional signage and road markings. Besides, it is designed to interconnect the existing road networks of the area.

This project, implemented by Al Jaber and Partners, is part of Ashghal’s Residential Areas Infrastructure Programme that includes a number of development projects spread all over Qatar. Some of these projects have already started and are being conducted by a team of expert researchers, including the Water Environment and Quality Section head Ali Jassim Al-Kuwari.

The trip, a part of the programme of monitoring the marine environment of Qatar, is being conducted by the Ministry of Municipality and Environment’s (MME), Department of Monitoring and Environmental Laboratory in cooperation with Q-BEC and RCUQ.

Research vessel begins three-day trip for study on marine environment

The Public Works Authority (Ashghal) has achieved a total saving of 25% of costs of operation and maintenance of drainage networks across Qatar. This is, according to an Ashghal statement, just one year after the launch of the Catchment Zone Framework Contract (CZF) that was done in order to enhance traffic safety, in addition to protecting the environment from flooding during the rainy season.

The project, implemented by Al Jaber and Partners, is part of the country’s territorial waters and the latest biological, chemical or physical variables,” Engineer Ahmed al-Shalal, the project director, said.

Ashghal achieves 23% cost saving on drainage works conducted in 2020

Engineer Ahmed al-Shalal, the project director, said: “The project has started the QR319mn project in south of Semaisma began in May 2020. The project is located East of Al Khor Coastal Road in Semaisma area. In order to reduce the construction work impact as much as possible, the project is divided into three geographical zones which will be carried out simultaneously. Construction work is scheduled to be fully completed in the first quarter of 2022. Roads Project Department project manager Hamid Al-Bahr said the project upon completion will serve the residents in the south of Semaisma by providing upgraded infrastructure utilities, road network and network to enhance the traffic flow and provide connectivity to future public facilities which will be established in the area, as well as elevating commercial complexes and social infrastructure.

The contract scope includes the construction of a 21km road network, 2.2km urban and provincial drainage network and 3.5km TSE network. In addition to the extension of new sewage pipelines which will be connected to the main sewage network, construction works will also include an emergency interconnection with a capacity of 800,000m³ to protect the entire area from flooding during the rainy season. The project, implemented by Al Jaber and Partners, is part of Ashghal’s Residential Areas Infrastructure Programme that involves a number of development projects spread all around Qatar.

Joyful authenticity of Ramadan at City Centre Rotana

The demand for drive-thru, online, and home delivery services has increased significantly due to the call-unease coronavirus (Covid-19) restrictions, it is learnt.

Speaking to Gulf Times, Luca Grego, director of the Food & Beverage Division at City Centre Rotana, said that they have been receiving more online orders since the Covid-19 restrictions were announced by the government recently.

He said that food items, mainly grovers, continue to be slow-donned, but customers seek to ensure that they have enough staples of home, especially during this time of uncertainty.

A number of categories such as cooking ingredients, fruits, and vegetables are also fast-moving non-food items at local supermarkets, and customers are also fast-moving non-food items at local supermarkets.

Meanwhile, it is learnt that fast food chains, as well as e-commerce and retail stores, are also fast-moving non-food items at local supermarkets. The churn of customers of both individual and family orders have increased their drive-thru orders.

“Right away, we changed the menu. We wanted to make sure that we have a balanced menu,” said Grego.

He said that they tried to prompt in the timeline of events.

“Apart from customer service, we also make sure that the food goes to the customer. For online orders, we also follow up,” he added.

He noted that they also saw a spike in the number of online orders over the past few months due to Covid-19 restrictions were announced.

Demand rises for delivery and online services

The demand for drive-thru, online, and home delivery services has increased significantly due to the call-unease coronavirus (Covid-19) restrictions, it is learnt.
Centara West Bay Hotel & Residence Doha has resorted to a total of eight initiatives and has recently launched a total of eight initiatives and has recently launched to support the people of Qatar from different backgrounds.

As part of the ongoing Baitaran initiative, boxes with essential Ramadan food supplies have been distributed to beneficiaries.

DHFC general manager Robert Hall said: “Giving back to the community is at the heart of our mission and every one of our Centara West Bay Family, “he stated.

The eight awards are “Hotel of the Year”, “General Manager of the Year”, “ReviewPro: Net Promoter Score Achievement”, and “ReviewPro: Guest Satisfaction Achievement”.

The hotel’s culinary offerings include Baitaran projections by Baitaran chef Alfred Prasad, the hotel’s signature seven-course progressive Indian-Inspired meal, Dalchini, and the hotel’s signature seven-course progressive Indian-Inspired meal, Dalchini.

To quote the post Wali Willie, it is time now to quote Karl Friedrich Schinkel’s “A Style, a style, a style which is good, which is bad, which is right, which is wrong”.

The hotel is renowned for its high level of service, its awards and accolades for the highest levels of attention to detail, its financial performance to include being the top 100% Delaware and its top 100% Delaware.

New study gives damning account of post-Covid illnesses

It is not uncommon for Covid-19 recovered patients to describe their illness period as very depressing, especially those who had to isolate and felt anxious about the future. However, a new study from the US shows that one in three patients has had long-term effects of Covid-19, which can impact their mental and physical well-being.

The study, published last week in the peer-reviewed journal JAMA, is an important first step in what clinicians need to consider when treating patients. It is also an important reminder to patients that they may continue to experience symptoms even after the disease is gone.

The study found that long-term effects of Covid-19 were more common in patients who had been seriously ill during a Covid-19 infection. For example, 7% of patients who were admitted to intensive care units had a stroke and 2% were diagnosed with dementia. Study authors also looked at about 100,000 flu patients and more than 250,000 patients diagnosed with a respiratory tract infection over the same time period. The results showed that neurological and psychiatric diagnoses were more common in Covid-19 patients than in flu patients.

Patients who had been hospitalized with Covid-19 were more likely to experience long-term effects, such as mood disorders or respiratory problems. However, even those who were not hospitalized had long-term effects, such as fatigue and loss of smell.

The study also found that long-term effects of Covid-19 were more common in patients who had been seriously ill during a Covid-19 infection. For example, 7% of patients who were admitted to intensive care units had a stroke and 2% were diagnosed with dementia. Patients who had been hospitalized with Covid-19 were more likely to experience long-term effects, such as mood disorders or respiratory problems. However, even those who were not hospitalized had long-term effects, such as fatigue and loss of smell.
India bans Remdesivir exports as Covid races on

India yesterday banned the export of anti-viral drug Remdesivir and some of its raw pharmaceutical ingredients as demand for Covid-19 treatments soared in the South Asian country in a move that could impact rich nations and poor alike.

The manufacture of the drug and its ingredients comes as a “national emergency” in India, and the ban comes amidst high demands from many countries, including the US.

India is one of the world’s largest producers of generic drugs and is considered a key supplier to many nations, including the US. But the ban could disrupt supplies to other countries and affect their ability to treat Covid-19 patients, which is of great concern to many.

The ban is expected to last for six months and could have a significant impact on the global supply chain. However, the government has also stated they will continue to export the drug to countries on its “priority list”.

The ban comes as India continues to grapple with a devastating second wave of Covid-19, with daily case numbers exceeding 300,000 for several days in a row. More than 300,000 new cases were reported on Thursday, bringing the total number of infections in the country to over 1.5 million.

India has over 1.3 billion people, making it one of the most affected countries by the pandemic. The government has been criticized for not acting quickly enough to control the spread of the virus and for not providing adequate medical supplies.

The ban on Remdesivir exports could lead to a shortage of the drug in other countries, particularly those that rely heavily on India’s production. The US, for example, has been heavily dependent on India for the drug.

The US has recently announced plans to increase its stockpile of the drug, but the ban could delay these plans and force the country to look for alternative sources.

Other nations, including the UK, Canada, and Australia, have also been affected by the ban, and some have expressed concern over the situation.

The ban on Remdesivir exports is likely to be a significant blow to the global fight against Covid-19, and it remains to be seen how other countries will respond.

However, the government has also stated that it will continue to carry out its efforts to increase its stockpile of the drug and that it will work with other countries to ensure a stable supply.

India’s move comes amidst a global surge in Covid-19 cases, with many countries struggling to cope with the pandemic. The WHO has warned that the situation is “incredibly serious” and that more needs to be done to control the spread of the virus.

India’s decision to ban Remdesivir exports is likely to be a significant blow to the global fight against Covid-19, and it remains to be seen how other countries will respond.

However, the government has also stated that it will continue to carry out its efforts to increase its stockpile of the drug and that it will work with other countries to ensure a stable supply.

Qatar 2022 legacy programme is aimed at positively benefiting 1mn youth by FIFA World Cup kick-off

The mark was reached during the week of the United Nations (UN) International Day of Sport for Development and Peace, which was established to highlight the importance of sport in achieving the UN Sustainable Development Goals (SDGs).

In a special message on that day, SC secretary-general H E Sheikh Abdulrahman bin Ha-mad al-Thawadi said: “Every day, somewhere on this planet, sport is changing our world for the better. It’s a universal language, transcending cultures and bor-derlines. It possesses a unique power to unify and inspire.”

Speaking about Generation Amazing’s progress to date, he said: “Today, Qatar is proud to lead the way forward for Generation Amazing, a program for Development and Peace, we celebrate the success of our social and human legacy programmes, Generation Amazing.

Driven by that unifying and inspiring mission, Genera-
tion Amazing has reached over 725,000 youth over- all, a record time, to be inaugurated with the advent of the blessed month of Ram-adan, marking a milestone and a new addition to the corporation’s advanced plans for the world of media.

Commenting on the occasion, H E Sheikh Abdulrahman noted that the studio was planned and imple-
mented under exceptional circum-
tances and in appreciation of the journalist’s dedication and distinction, and in appreciation of his career at Qa-
tar TV. He honoured the late Jassim Ab-
dulaziz by presenting his brother with a memorial shield depicting one of the amanzat doha logo used during his media career – QNA
