Distance learning for all students from Sunday

- No in-person attendance at any school, college or university
- But all examinations will take place physically in schools

The Ministry of Education and Higher Education yesterday decided to adopt distance learning and online lessons as a precautionary measure to prevent the spread of the coronavirus in all schools, especially in light of the increase in the number of daily cases, the ministry said in a statement.

The decision, which was taken in close coordination with the Ministry of Health and Defence, comes as part of the preventive measures taken to protect the public health and ensure the health and safety of students, teachers, and administrative staff, the Ministry stressed.

The ministry also decided that administrative and educational staff must continue attending school. All exams will take place in schools according to the scheduled dates. More procedures to be taken in this regard will be announced later.

The MoEHE stressed that distance learning is an integral part of the educational and academic process, adding that attendance will be recorded in the distance learning model. Students who are unable to attend the online lessons for their own benefit, it said, should contact their parents to closely follow-up with the students’ online attendance.

The ministry also reiterated that yesterday’s decision provides more protection to students, teachers, and administrative staff, and that yesterday’s decision provides even more protection to students in the light of the rise in the number of students infected in recent days.

The ministry said that all precautionary measures being followed in schools are safe, effective and efficient, and that yesterday’s decision provides even more protection to students in the light of the rise in the number of infected students.

HMC designates Al Wakra Hospital as Covid facility

- Decision taken to meet surge in coronavirus cases
- Hospital will add 400 beds, ICU beds, if needed
- Emergency Department to close at midnight today

HMC announced that starting today, Al Wakra Hospital will be designated as a hospital for Covid-19 patients. The decision was made in light of the current requirements in the community in response to the increased number of Covid-19 cases.

Qatar, Britain expand defence partnership

Qatar and the United Kingdom yesterday signed a memorandum of understanding aimed at ensuring continued and current cooperation in the field of military and peacekeeping efforts.

The memorandum includes joint training between the Qatari Amiri Air Force and the British Royal Air Force on the Greek equipment, in addition to equipping the Thai aircraft with a new-arriving British aircraft with air-to-air refuelling for Qatar Trent aircraft.

Amir crowns winners of Arabian Camels Festival

His Highness the Amir Shiekh Tamim Bin Hamad Al Thani witnessed the final four rounds of the annual festival of the golden symbols for camels for the Sword of His Highness for the 2020-2021 season, which was held at Al Shamal Racecourse yesterday afternoon. The Amir crowned the winners in the four main final rounds for camels of Their Excellencies the Sheikhs, where “Maska” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mora” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness, “Al Mura” won the Sword of His Highness.

Amir meets US Congress delegation

His Highness the Amir Shiekh Tamim Bin Hamad Al Thani met at Al Shamal Bin Jassim Majid at the Amir’s residence in Doha yesterday with a delegation of members of the US Congress, which included Democratic Representative for California Sara Jacob, and Republican Representative for Michigan Lisa McClain, on the occasion of their visit to the country. They reviewed strategic co-operation relations between Qatar and the United States of America and the prospects for strengthening and developing them. They also exchanged views on regional and international developments of common concern.
HE the Minister of Public Health Dr Hanan Mohamed Al-Kuwari yesterday visited the National Health Command Centre (NHCC) and discussed the ongoing preparedness strategy against the Covid-19 pandemic. Dr Al-Kuwari inspected the progress of work at the centre, which is ready 24/7, and met with staff on duty from NHCC and Primary Health Care Corporation.

Dr Al-Kuwari reviewed with the Ministry of Public Health and other key agencies in Qatar the latest steps taken to tackle the Covid-19 pandemic and the response to the Covid-19 pandemic published in a press statement.

He commended the Covid-19 bad management and hospital capacity strategy. The Vaxx has ensured that the healthcare system has sufficient capacity to manage the number of patients with Covid-19, and to meet the needs of patients with Covid-19 who require medical care, the ministry said in a press statement.

As we enter the second quarter of the year, the National Health Command Centre is fulfilling an important role in the healthcare sector, as it monitors health trends and advises on appropriate strategy and response. Most of this essential and boosting work go behind the scene but is vital to the daily operation of our healthcare system, explained H.E. Dr Al-Kuwari.

“Covid-19 continues to challenge us on many fronts, but our healthcare workers across the country are working tirelessly to increase their time and energy to control this pandemic with overwhelming success.”

His highness also expressed his appreciation of the clinical and support staff in hospitals and medical centres are working to ensure that all Covid-19 and non-Covid patients are receiving the highest standard of care.

“Now is the time, hundreds of healthcare professionals are working hard to vaccinate up to 25,000 people a day to protect them from the virus.”

Thank you all healthcare workers and frontliners for your heroic work and dedication. I am proud of all the work being done across the healthcare sector for their brave and selfless duty and ensured that the health system is ready to meet this additional demand,” H.E. Dr Al-Kuwari said.

MoPH reports 840 new Covid cases, 423 recoveries

Doha

The Ministry of Public Health (MoPH) reported two deaths and 840 new Covid-19 cases, of which 706 were community cases and 134 imported, taking the confirmed cases to 135,559. MoPH also reported 423 recoveries from Covid-19, bringing the total number of cases recovered in Qatar to 124,344.

The ministry reported two new deaths, bringing the number of Covid-19 fatalities to 266. The two deaths were among subjects who were receiving the necessary medical treatment.

Vaccination Drive

842,000 Covid-19 vaccine doses have been administered to date, while 135,559 Covid-19 vaccine doses have been distributed in the past 24 hours.

Every day, hundreds of people are coming to the Covid-19 with many requiring attention in hospital to manage acute or critical illness. Considering the volume, the number of people with Covid-19 requiring hospitalisation in Qatar is 1,116, Qatari health authorities said.

Qatar’s strict quarantine policy for returning travelers is applied to the introduction of new variants into the country for several months, but we are now seeing positive Covid-19 cases with the new variants from the United Kingdom. This new variant is much more contagious and spreads much more quickly between people than the existing strain and may be associated with increased severity of disease. The good news is that the Pfizer-BioNTech and Moderna vaccines are being used in the vaccination program effective against the new variants.

The pass of the vaccination program means that there is finally hoped of a gradual return to normal for all in Qatar. The proportion of the population vaccinated with the second dose of the Pfizer-BioNTech or Moderna vaccine will not happen in the next few weeks or months. Covid-19 will continue to be a threat to our health for the majority of 2021 and until all eligible members of our population have been vaccinated, we must continue to follow the precautionary measures.

With the increased increase in the number of Covid-19 cases in Qatar, it is important for everyone to play their role in controlling the spread of the virus by following precautionary measures. Anyone suffering from Covid-19 symptoms should seek medical advice immediately.

Ooredoo expands 5G with Samsung phone

Qatar, UK widen defence partnership

Qatar, among UNA for equitable distribution of vaccines

Ooredoo has announced that Samsung’s latest 5G smartphone, the Samsung Galaxy A52, is now available for purchase. The device is priced at QR1,679. Sabah Rabiah al-Kuwari, Head of Consumer Devices and Experience Department at Qatar Charity, said: “We’re delighted to be able to offer our customers an advanced device like the Samsung Galaxy A52 in Qatar means we can enable Qatar’s 3.5mn subscribers to enjoy the full potential of this next-generation technology to enhance and develop our everyday lives.”

Alongside its commitment to serve its customers with the latest innovation, Ooredoo has previously offered the Samsung Galaxy A51 to its customers. Ooredoo has now gone a step further with the Samsung Galaxy A52 to ensure that its customers can continue with their daily habits and communicate with their loved ones while staying connected with their friends and families.

Samsung Galaxy A52 5G smartphone is 5G-enabled, offering access to Ooredoo’s ‘groundbreaking 5G network’ and augmented reality (AR) content and 360 panoramic view with its 32MP Dual Rear Camera and 5MP Front Camera. The device is available to purchase at Ooredoo’s stores, online via Ooredoo’s digital channels and at its retail shops for QR1,679. Sabah al-Kuwari said: “With the launch of the Samsung Galaxy A52, we are delighted to offer our customers access to cutting-edge technology at an affordable price, allowing them to stay connected with their loved ones while enjoying an enhanced mobile experience.”

On June 21, 2021, Qatar Charity launched the 2021 Ramadan of Hope campaign, focusing on the delivery of food and meals to vulnerable communities in Qatar.

The Ramadan of Hope campaign’s cost is expected to reach about QR40.7 mn, and the number of those targeted is estimated to be 2.2mn.

Ooredoo has announced the launch of the 5G smartphone, Samsung Galaxy A52, which will be available for purchase in Qatar. The campaign, which is launched in collaboration with Qatar Charity, aims to ensure that our customers are able to stay connected with their loved ones while enjoying an enhanced mobile experience.

The Ramadan of Hope campaign is focused on delivering food and meals to vulnerable communities in Qatar. The campaign is expected to benefit approximately 2.2mn people, including families affected by the Covid-19 pandemic, orphans, and children from low-income families.

The campaign is led by the Qatar Charity, which is responsible for the implementation of the campaign. Qatar Charity will deliver the food and meals individually to the recipients, ensuring that every family receives a personalized meal.

The campaign is part of Qatar Charity’s ongoing efforts to help vulnerable communities during the Covid-19 pandemic. Qatar Charity has launched several initiatives to support vulnerable communities, including the distribution of food and meals to families affected by the pandemic.

Qatar launches master’s programme in Health Professional Education

QU launches master’s programme in Health Professional Education

The Qatar University (QU) has recently launched a new Master of Science in Health Professional Education programme in the College of Health and Life Sciences.

The programme aims to deliver high-quality, research-oriented graduate programmes that prepare competent graduates with the knowledge, skills, and professional attitude needed to be able to critically analyze and address healthcare challenges in Qatar, the Gulf region, and globally, while also contributing to the academic and health community.

The programme is designed for students with a bachelor’s degree in health sciences or related fields, health care professionals, and those who wish to pursue a career in the health sector.

In the first year, students will study four core courses and two electives. The courses cover a wide range of topics such as Health Systems, Health Policy, Health Care Management, and Health Informatics.

In the second year, students will complete a research project and a capstone course. The research project allows students to apply their knowledge and skills to a real-world health issue, while the capstone course provides an opportunity to reflect on their learning journey.

The programme is delivered through a combination of lectures, seminars, workshops, and online learning. Students will also have the opportunity to participate in internships and other experiential learning activities.

Graduates of the programme will be well-prepared to work in various roles within the health sector, such as healthcare professionals, health policy makers, and health managers.
The world marks World Autism Awareness Day on April 2 today to raise awareness and to recognize the rights of persons with autism. Children with autism or autism spectrum disorder are challenging and neglected since the outbreak of Covid-19 pandemic, and its economic and financial world over.

As the pandemic reduces to the dust, parents of children with autism are finding it difficult to make ends meet and keep their children safe and healthy for some possible exposure of families. A school named class till kids 2020. Though the centres have been allowed to carry on one-to-one therapy sessions for children with special needs, the pandemic has reduced the number of sessions for these children. The need for continually therapy sessions is an essential step to remain connected to the child.

The UN is observing the day with the theme ‘Inclusion is the Way to the Future’. The theme of the UN, the World Autism Awareness Day, is to raise awareness about and to recognize the rights of persons with autism. The UN is promoting ‘Inclusion’ as an essential theme of the day since 2013 and is currently working with the Clinical Director at Child Development Centre, Qatar. The sessions also covered a range of topics, including communication strategies that parents need to teach their child with autism. The parents need to teach their kids to wash their hands, and how to brush their teeth. They need to teach them the basics of self-help skills like brushing their teeth.

The specialists said that the problems caused by the pandemic are not just for children with autism. They need to provide adequate services for them. The specialists also emphasized the necessity of skills and tools to help them go to a normal school. The specialists also emphasized the necessity of skills and tools to help them go to a normal school.

Dr. Adrienne Robek says enabling children with autism to reach their full potential is a form of inclusion. She has been in Qatar so far. Even prior to the pandemic, Robek has been in Qatar. She says enabling children with autism to reach their full potential is a form of inclusion.

India expands Covid-19 vaccine drive as virus surge worsens

Residents are expected to line up for a mass vaccination drive in Mumbai today after the state announced plans for “a new citywide drive” to inoculate 5 million people over the next seven days.

Mumbai’s second daily Covid-19 vaccination drive is expected to begin today after the state government announced plans to inoculate 5 million people over the next seven days.

The drive, which is scheduled to last for seven days, will be held in various locations across the city and will be conducted in two shifts.

The state government has directed all hospitals, health centres and other health facilities to participate in the drive.

The drive is expected to continue for seven days, and all Operational Theatre (OT) beds in the government hospitals will be converted into vaccination centres.

The state government has directed all hospitals, health centres and other health facilities to participate in the drive.

The drive is expected to continue for seven days, and all Operational Theatre (OT) beds in the government hospitals will be converted into vaccination centres.

In a bid to accelerate the vaccination drive, the state government has also announced that all the remaining COVAXIN doses will be used to inoculate people in the age group of 18-44 years.

Russia massing troops on border, says Ukraine

Russia warns new Donbas conflict could "vaccinate" Ukraine, "melt Ice Mountain"

President Vladimir Zelensky said he has accessed building up troops on the Russian-Ukrainian border and warned that a new conflict could "vaccinate" Ukraine and "melt the Ice Mountain".

"Our security services on the border have been very worrying in the past few days," Zelensky said in a statement on Friday.

"There has been a serious military buildup on our border. I don’t want to alarm anyone, but I want to tell you the truth.

"I want to express my concern regarding the fact that the buildup on the border is worrying," he added.

"We have reason to believe that Russia may use military force. You know, we have many cases where we have reasons to believe it.

"But we have no reason to believe that they are going to use military force.

"I want to express my concern regarding the fact that the buildup on the border is worrying.

"I want to express my concern regarding the fact that the buildup on the border is worrying.

Fossil fuel stocks lost $123 billion in the last decade

Share offerings in fossil fuel producing and related companies lost $123 billion in the last decade, underperforming a broader world equities index by 12 percent, according to an analysis released this week.

The trend was stark contrasted by gains in renewable energy initial public offerings (IPOs), according to the analysis by financial services firm Nomura, which tracks the “yawning losses faced by investors in high-carbon energy.”

Existence of fossil fuel offerings fell by 85% from $70 billion to $1 billion offerings in the period.

This contrasted with a record $11 billion in renewable public offerings from 2021 to 2022.

In all, investors bought almost $40 billion of equity issued by fossil fuel producers, utilities, pipelines and service providers – a drop of 20% in value despite nearly a decade of budget support for renewables from the oil market, the analysis showed.

Mark Campanale, founder and executive director of Carbon Tracker, said the investors were unable to realize that the historic low oil prices witnessed at the height of the pandemic in 2020 was an aberration.

“They’re thinking that actually fossil fuel stocks have gotten bumped up, that the bottom is probably cyclical and then going to be a recovery post Covid, that there’s going to be a huge bounce,” he said.

“Whereas in fact there’s this fundamental structural change taking place in the energy system from high-risk to low carbon and it’s being driven by technology.”

The analysts looked at stock market fortunes of fossil fuel companies and compared them against renewable companies and against the MSCI AC Country World Index (ACWI) as a benchmark.

It found that an investor who bought into all fossil fuel and related equity issuances from 2012 until 2020 would have seen their investments underperform the ACWI by 52 percent.

Campanale said that many people were likely losing money due to the extreme difficulty in properly modeling the market.

“If you’re a member of a pension scheme that has a default pathway of investing in fossil fuels, we believe that you’re replicating the market, you’re almost certainly going to be buying one of these IPOs,” he said.

“It will be costing you money because of the huge underperformance.”

The report showed that investors were largely missing out on the opportunity to increase the value of their assets by buying renewables offerings.

One percent only of the total equity raised by companies during this period came from renewable and clean tech offerings.

Those already invested in renewables made a good return, however, with the MSCI Global Alternative Energy Index underperforming a baseline world equities index by 54 percent, making it one of the best performing sectors in terms of growth rate.

Campanale said it was “astounding” that exchanges were still listing new fossil fuel offerings for companies intent on expanding when the fundamentals limit goals of the Paris climate deal.

“The world had financed more fossil fuels than we can possibly learn to stay below two degrees, you have to ask why these changes are admitting even in the first place,” he said.

He added that world markets were likely to see a “dead cat bounce” as oil and gas prices rebounded while the global economy recovered from the pandemic.

“The problem is that the fundamentals are still the same,” Campanale said.

“The cost of capital for fossil fuels is now greater than it is for renewables.” – AFP
How to improve your relationship with Qur’an

1. Before you touch, check your heart.
   The key to really benefiting from the Qur’an is to make sure your heart is open to it. Honestly, truly, and sincerely, reflect upon your relationship with Allah the Most High, and realize that you are interacting with Allah. You are about to interact with Allah the Most High, so be sure that you are pure. Just before you begin to read, take a moment to ask Allah for guidance and understanding.

2. Before you touch, do your Wudu (ablution).
   Doing your Wudu is a physical and mental preparation to remind you that you are not reading just another book. You are about to interact with Allah the Most High, and, you are about to interact with a living being who is closest to you and who will reward you according to your actions towards it.

3. Before you touch, read the Introduction.
   This is recommended for every person who wants to read the Book of Allah. The Noble Qur’an, often, with the content and purpose of it as explained in the Qur’an itself, is presented in a way that is easy to read and understand. You are not going to skip the plain text in the new translations, especially if you have some knowledge of Arabic. You are going to start reading the more refined translations and understand them as well.

4. Before you touch, read the Qur’an itself.
   This is recommended for every person who wants to read the Book of Allah. The Noble Qur’an, often, with the content and purpose of it as explained in the Qur’an itself, is presented in a way that is easy to read and understand. You are not going to skip the plain text in the new translations, especially if you have some knowledge of Arabic. You are going to start reading the more refined translations and understand them as well.

5. Before you touch, read the Introduction.
   This is recommended for every person who wants to read the Book of Allah. The Noble Qur’an, often, with the content and purpose of it as explained in the Qur’an itself, is presented in a way that is easy to read and understand. You are not going to skip the plain text in the new translations, especially if you have some knowledge of Arabic. You are going to start reading the more refined translations and understand them as well.

6. Do not just read, you have to adhere to it.
   The Qur’an is the Word of Allah, and not a book of words. It is not just a book of words, it is a book that teaches you how to live your life according to Allah’s guidance. You are not just reading it, you are supposed to act upon it.

7. Make the Qur’an (translation) your friend.
   Ask Allah, the Most High, to guide you to the peaceful path that you should follow. Every single word of the Qur’an is a guidance from Allah. The Qur’an is a guidance from Allah. You are not just reading it, you are supposed to act upon it.

8. There are no more ways to live than to live according to the Qur’an.
   This is recommended for every person who wants to read the Book of Allah. The Noble Qur’an, often, with the content and purpose of it as explained in the Qur’an itself, is presented in a way that is easy to read and understand. You are not going to skip the plain text in the new translations, especially if you have some knowledge of Arabic. You are going to start reading the more refined translations and understand them as well.

9. The Qur’an is the word of Allah, the Most High.
   The Qur’an is the word of Allah, the Most High, and it is the word of Allah, the Most High, and it is the word of Allah, the Most High. The Qur’an is the word of Allah, the Most High, and it is the word of Allah, the Most High.

10. The Qur’an is the word of Allah, the Most High.
    The Qur’an is the word of Allah, the Most High, and it is the word of Allah, the Most High, and it is the word of Allah, the Most High. The Qur’an is the word of Allah, the Most High, and it is the word of Allah, the Most High.
