In a statement yesterday, Qatar
Heed the Prime Minister and Minister
of Interior Sheikh Khalid bin Khalifa
HE the Prime Minister and Minister
of Interior Sheikh Khalid bin Khalifa
HE the Prime Minister and Minister
of Interior Sheikh Khalid bin Khalifa
HE the Prime Minister and Minister
of Interior Sheikh Khalid bin Khalifa

Kuwait has expressed its full
solidarity with Jordan, decisions and measures taken by
Jordan to preserve the security and stability and enhance the
security and stability in the two
countries and the region.

In a statement yesterday, Qatar
Nawaf al-Ahmad al-Jaber al-Sabah. (QNA)

He reiterated the ministry’s commitment
for students using modern technologies, adding
ments...Beyond Challenges’. Perfectly captured the
maintenance of the heart and community.

In brief
Demonstrators taking part in a ‘Kill The Bill’ protest against the Government’s Police, Crime, Sentencing
requirements on peaceful protests, including those they deem to be too noisy or a nuisance to the
community. Critics argue this infringes on the right to free and peaceful expression.

The public need to be able to carry out their activities without interference and without fear of being
stopped and fined for so doing, the Centre for Policy Studies said.

In a statement yesterday, the UK government said that it was not
in the public interest to legislate on
This is because the Bill is
clearly a matter for
parliament to decide on the
basis of evidence and on its
judgment of the public interest,
and because the Bill is
about the balance between
criminal justice and personal
freedoms. In particular, it
is about the balance between
the rights of the public and
the rights of the individual.

In brief
Demonstrators taking part in a ‘Kill The Bill’ protest against the Government’s Police, Crime, Sentencing
and Courts Bill listened to speeches on a street in the centre of Bristol, England, yesterday.
The police, crime, sentencing and courts bill would give police in England and Wales more power to impose
new measures on protesters, including preventing them from coming near an event, without needing to
have any evidence that their conduct would cause serious disruption to that event.

In brief
The Ministry of Education and Higher Edu-
cation (MoEHE) held yesterday the Virtual
Education Forum 2021 under the slogan
‘Visions and Aspirations...Beyond Challenges’. The forum aimed to develop goals and vi-
sions that would contribute to enhancing the
quality of education in Qatar and its contin-
ued development, and to find innovative solu-
tions...Beyond Challenges’. Perfectly captured the
essence of the goals of the Forum this year,
He noted that the ministry was more committed
to holding the forum this year, despite the Covid-19

He pointed out that during the pandemic, this
emergence was happening to our health and
medical facilities. It has become the main
challenge in the medical field, to ensure the
treatment of patients in the best way possible,
especially those with critical conditions. The
ministry’s efforts are aimed at ensuring the
best possible care for patients and their
families. The ministry is committed to contin-
uing to provide the best possible care for
patients and their families.

The latest Contactless payment solution on QIB page
QIB is pleased to announce the launch of Fitbit Pay, the latest
contactless payment solution on QIB page, allowing you to carry
out payments from your wrist without the need to take out your
QIB Credit Card.

Key Benefits
• Convenient and Easy to use
• Safe and Secure - Contactless Payment
• Accepted globally wherever contactless payments are accepted
• Easy access to a record of all your payments
Virtual Education Forum sheds light on innovation, solutions

From Page 1

Dr Hassan Rashid al-Derham, official
He stressed that the ministry, despite the pandemic, has achieved an important feat in ensuring that educational continuity is maintained albeit by adopting alternative solutions to compensate for the educational process. This decision was a prerequisite for the ministry to save the future of its students and come up with solutions that would serve the best interests of its students and to ensure that students would not be placed in a position where their tasks and some of the students’ managed to go to university as a result, the QNA report stated.

HE the Minister also attended the thanks to Qatar Foundation. The Qatar Debate Centre directed by Hatem al-Than for his active participa-
tion in the forum, and the lead-
ship of the board that supports the educational process in Qatar. For his part, Al-Shaibani highlighted the importance of improving the quality of education and science. She said that bringing change, change and change to strengthen the ability of individuals to take their tasks and some of the student’s managed to go to university as a result, the QNA report stated.

For his part, Qatar University President Dr Hassan bin Rashid al-Derham said that the forum is part of continuing mini-

The forum was held yesterday on the theme ‘The Educational Developments: Beyond Challenges/Education in the 21st Century: New Acceptance from around the world linked together—virtually—to discuss in a series of thematic sessions on the themes of the event. The session was moderated by Ali Al-Thani, English.

Moreover, we launched an ed-

Debating contest begins with focus on sustainability

The 10th International Schools Debating Championship in English and organized by QF Education City is one of the most important ways of instilling and addressing climate change, global warming and other environmental issues. The forum aims to highlight the issue of sustainability as one of the most important ways of teaching addressing climate change, global warming and other environmental issues.

The forum was held yesterday on the theme ‘The Educational Developments: Beyond Challenges/Education in the 21st Century: New Acceptance from around the world linked together—virtually—to discuss in a series of thematic sessions on the themes of the event. The session was moderated by Ali Al-Thani, English.

The opening ceremony, presided over by HE HE Dr Mohamed Abdul Wahed, included the presence of Dr Hassan Rashid al-Derham and English.

Al Meera opens branch in Jeryan

Al Meera Consumer Goods Company has inaugurated its latest branch, Jeryan Junaihat, in the presence of Meshal al-Nuaimi, Central Municipal Council member. The new store opening “is in line with the retail giant’s ambitious expansion plan to be present in every neighborhood in the country and as the largest retail chain in Qatar, bringing its total number of branches to 59,” the company has said in a statement.

On the occasion of the opening, Al Meera is offering exclusive deals where customers double points on all purchases from the branch during the first week until April 7. The branch is located in Qatar’s Jeryan neighborhood and will supply high-quality goods and services to the highly-populated area.

Customers in the area can now benefit from Al Meera’s renowned integrated shopping experience, which offers a wide range of high-quality products at competitive prices, the statement notes. Commenting on the opening of the new branch, Al Meera said: “We, as community members, are committed to bring Al Meera’s seamless shopping experience to areas throughout the country, especially those where communities require access to excellent facilities as per the highest international standards, alongside a range of quality products.”

“By continuously expanding to new areas, Al Meera supports the pillars of the Qatar National Vision 2030 towards the social and economic development of the country, providing high-quality products at the highest standards of service that another location in Qatar and looking forward to the opening of more branches this year,” the statement noted.

Al Meera continues to drive expansion throughout the country to economically viable locations and areas where the community deserves neighborhood retail services. This is in line with its vision to be present in every neighborhood in Qatar. This year, the retailer plans to launch three additional branches at new locations. The retailer is working in close coordination with the Ministry of Municipality and Environment to further contribute to the development and urbanization across districts and territories in Qatar as the country’s national retailer.
The US embassy in Doha, Qatar, has announced the hosting of the Virtual University Fair, which is a comprehensive platform designed to provide a unique opportunity for students and their families to learn about the advantages of pursuing higher education in the United States. The fair is set to take place on Sunday, April 4, 2021, and will be held virtually.

Qatar-USA 2021 Year of Culture

Mohamed Alhamad, Cultural Attache of the US embassy in Doha, said: “The Virtual University Fair is an excellent opportunity to reach out to Qatar's students and their families to support them in making informed decisions about higher education in the US. It will showcase the diversity of US higher education institutions, provide valuable information on scholarships and student visas, and give students a chance to interact directly with university and graduate students, as well as American Consulate officers and alumni.”

The fair will feature representatives from over 425 international US higher education institutions, including universities, colleges, and graduate programs. Participants will gain valuable information about academic programs, financial aid, immigration procedures, and study options in the United States.

In addition to the fair, the US embassy set to host a virtual fair at this link: https://acfairs.embassy.qa. This virtual fair makes it easy for students to interact with university representatives, learn about opportunities, and apply for scholarships in real-time.

On behalf of the Qatar-USA 2021 Year of Culture, Dr. Ali, notes that partnering with the US embassy and Ministry of Education and Higher Education (MoHE) will host the EducationUSA Qatar Virtual University Fair. “As we are bound in the United States, we see this as an excellent opportunity for students in Qatar to interact directly with university representatives from over 425 US colleges and universities, according to the official press release of the EducationUSA Qatar Virtual University Fair.

One of the key highlights is the partnership extension between Land Rover and Virgin Galactic. Virgin Galactic’s latest spaceship was unveiled recently, supported by a Range Rover Astronaut Edition. This virtual fair is an excellent opportunity for students to learn about the advantages of pursuing higher education in the United States and to meet with EducationUSA advisors about future college needs, the released notes.

Land Rover has announced that it will remain an integral part of the global partnership between Virgin Galactic’s latest spaceship and Land Rover. Beyond the introduction of its latest spaceship, Virgin Galactic has a team of eight highly-experienced pilots and is preparing for its next rocket-powered flight in New Mexico. "Creating new space for explorers worldwide is the next frontier,” he said. “We are delighted to be able to extend this strong partnership.”

With a shared pioneering spirit and a dedication to pushing the boundaries of what is possible, the partnership between Land Rover and Virgin Galactic provides invaluable support on the development of the spaceship. The partnership extends through the years and is a testament to the commitment of both companies and their ongoing support of educational opportunities around the world.

The partnership between Land Rover and Virgin Galactic is an excellent opportunity to showcase the importance of investing in education and the future of space exploration. The virtual fair is a platform for students and their families to learn about the benefits of pursuing higher education in the United States and to connect with university representatives directly.

The US embassy in Doha, Qatar, is committed to supporting students and their families in making informed decisions about higher education in the United States. The virtual fair is just one of the many initiatives that the US embassy and MoHE have implemented to support students and their families in Qatar as a result of the Covid-19 pandemic. The embassy is proactive in using technology to provide opportunities for students to study in the United States and to connect with university representatives.

REGION/ARAB WORLD/AFRICA |
COVID-19 vaccinations will be the tried-and-tested response to the surge in cases, with around 25 million Latin Americans having received their first dose. Mexico and Brazil are leading the way, with over 100,000 and 90,000 doses administered, respectively. The US has administered over 150 million doses, with over 100 million doses expected to be given by the end of this week. The European Union has administered over 60 million doses, while China has administered over 200 million doses. The WHO has set a goal of administering 2 billion doses by the end of the year, and the COVAX initiative aims to provide vaccines to low-income countries. The COVAX initiative aims to ensure that all countries have access to vaccines, and it is working with the countries that are falling behind to ensure that they catch up.

The US has authorized the use of the Pfizer/BioNTech vaccine for children aged 12-15, and the Moderna vaccine for children aged 16-18. The WHO has approved the use of the AstraZeneca vaccine for children aged 12-17, and the Johnson & Johnson vaccine for children aged 18 and over. The WHO has also approved the use of the Sinovac and Sputnik V vaccines for children aged 18 and over, and the Sinopharm vaccine for children aged 18 and over. The WHO has also approved the use of the Covaxin and Covishield vaccines for children aged 18 and over.

The US has also authorized the use of the Pfizer/BioNTech vaccine for adults aged 5-11, and the Moderna vaccine for adults aged 18 and over. The WHO has approved the use of the AstraZeneca vaccine for adults aged 18 and over, and the Johnson & Johnson vaccine for adults aged 18 and over. Philippines extends Covid lockdown in economic hub

People in Metro Manila – the national capital region – and four neighboring provinces will remain under lockdown for another two weeks unless they are essential workers, presidential spokesman said.

In a rare sign of goodwill from China, the government has ordered its authorities to step up their vaccine-sharing efforts to help the Philippines vaccinate its people as soon as possible in the face of the Covid-19 pandemic.

The train was packed with almost 500 people when it derailed in a tunnel just north of the city of Hualien to speak to family members of the victims, said a member of the Chinese Mission to the UN in New York.

The state’s chief minister, Lin Jinn-tsun, head of the Justice Ministry, said that the coup was not a surprise and that it had been anticipated. The government has ordered its soldiers and police to return to their barracks and to stay away from the capital.

Coup leader Gen. Min Aung Hlaing, who seized power in a coup two weeks ago, has been accused of carrying out a massacre in Myanmar’s second city, Mandalay, where protesters have been killed in recent days.

High Court judge Justice Yeung Wai-chung, who was presiding over the case, said that the coup leader had been “dealt a severe blow” by the court’s decision.

India braces for Covid-19 curbs as infections hit monthly high

India has reported more than 35,000 new Covid-19 cases in the last 24 hours, according to health officials, as the country braced for a possible new lockdown.

The government has intensiﬁed its vaccination drive in recent weeks as it struggles to contain the spread of the virus. India has more than 200,000 cases, the second-highest in the world after the US, and its death toll has risen to over 2,000.

The region’s governments must actively engage in solving regional and global challenges, and co-operate constructively with other regions.

By Lee Jong-Wha

The Covid-19 pandemic has not only seen the World Bank and most Western governments fail to contain the deadly infectious and resulting economic damage effectively. And by promoting inward-looking and protectionist policies, they have contributed relatively little to an effective international response to the devastating economic consequences that followed. As a background, one may regard the crisis as a tipping point that will accelerate Asia’s global resurgence. They point out that Asian countries managed the pandemic better than the West did, and argue that Asia’s resilience and abundant economic resources is testament to the superiority of the region’s economic systems. In fact, the twenty-first century will belong to Asia. Asia has the world’s largest population, and about 40% of global GDP. It is the world’s second largest economy. And with eight of the world’s ten most populous countries, India, Indonesia, Pakistan, Bangladesh, Laos, the Philippines, and Vietnam, Asia is more than just China. Moreover, India and Japan – the world’s third and fourth largest economies, respectively, in PPP terms – also are economic superpowers. Over the last 20 years, the per capita income of Japan, Singapore, South Korea, and Taiwan have more than doubled and are now among the highest global per capita income levels. And Asia is poised to continue growing strongly in the coming decade. McKinsey & Company forecasts that by 2040, 40% of global GDP and 45% of global consumption will be generated in Asia. Given that several domestic factors that could negatively impact the effectiveness of the vaccine, not to visit the drive-through centres before the due day of their second dose.

More than 870,000 doses of the Covid-19 vaccine have already been administered through more than 35 vaccination sites across Qatar and 180 additional spots are expected to open further, according to Hamad Medical Corporation.

Under the leadership of the Ministry of Public Health, hundreds of vaccination officials are working diligently, often under harsh weather conditions, to keep our population safe. They are also serving as role models, thanks and appreciation. Under the leadership of the Minister of Public Health HE Dr Hanan Mohamed al-Kuwari said the drive-through vaccination centres in Al Wakra have found these to be very useful. And Al Wakra facility in the second drive-through vaccination centre being opened in Qatar, following the success of the first one in Lusail. Al Wakra centre works in tandem to the same manner as the Lusail centre, with both facilities catering to people requiring their second dose of either the Pfizer-BioNTech or Moderna vaccine.

The Minister of Public Health Residents has advised residents not to visit the drive-through centres before the due day of their second dose. A senior health official said vaccination teams will not administer the second dose earlier than the due date as this could negatively impact the effectiveness of the vaccine. Individuals who have received the Pfizer vaccine, should attend for their second dose 21 days after the first dose, and for those receiving the Moderna vaccine the second dose is given 28 days after the first dose.

Safe and effective vaccines will be a gamechanger, but for the foreseeable future we must continue to wear masks, physically distance, avoid crowds and apply appropriate health measures.

Vaccination Centre has provided a convenient way for thousands of people to receive their second dose and has been an important part of our strategy to expand the vaccination programme,” the minister said.

The World Health Organization (WHO) insists that everyone, everywhere who could benefit from safe and effective Covid-19 vaccines should have access as quickly as possible, starting with those at highest risk of serious disease or death. Vaccination is a safe and effective way to prevent disease and save lives – now more than ever. When we get vaccinated, we aren’t just protecting ourselves, but also those around us. Safe and effective vaccines with a global mandate are the cornerstone of a feasible future we must continue to wear masks, physically distance, avoid crowds and apply appropriate health measures.

Being vaccinated doesn’t mean that we can throw caution to the wind and put ourselves and others at risk, particularly because it is still not clear the degree to which the vaccines can protect not only against disease but also against infection and transmission.

Qatar’s drive-through vaccination centres a boon for our people

Qatar’s latest Covid-19 drive-through vaccination centre at Al Jarash park in Lusail has come at the right time as the country steps up its vaccination administration since the onset of the national programme.

More than 870,000 doses of the Covid-19 vaccine have already been administered through more than 35 vaccination sites across Qatar and 80 additional spots are expected to open further, according to Hamad Medical Corporation. Under the leadership of the Ministry of Public Health, hundreds of vaccination officials are working diligently, often under harsh weather conditions, to keep our population safe. They are also serving as role models, thanks and appreciation.

Under the leadership of the Minister of Public Health HE Dr Hanan Mohamed al-Kuwari said the drive-through vaccination centres in Al Wakra have found these to be very useful. And Al Wakra facility in the second drive-through vaccination centre being opened in Qatar, following the success of the first one in Lusail. Al Wakra centre works in tandem to the same manner as the Lusail centre, with both facilities catering to people requiring their second dose of either the Pfizer-BioNTech or Moderna vaccine.

The Minister of Public Health Residents has advised residents not to visit the drive-through centres before the due day of their second dose. A senior health official said vaccination teams will not administer the second dose earlier than the due date as this could negatively impact the effectiveness of the vaccine. Individuals who have received the Pfizer vaccine, should attend for their second dose 21 days after the first dose, and for those receiving the Moderna vaccine the second dose is given 28 days after the first dose.

Safe and effective vaccines will be a gamechanger, but for the foreseeable future we must continue to wear masks, physically distance, avoid crowds and apply appropriate health measures.

Vaccination Centre has provided a convenient way for thousands of people to receive their second dose and has been an important part of our strategy to expand the vaccination programme,” the minister said.

The World Health Organization (WHO) insists that everyone, everywhere who could benefit from safe and effective Covid-19 vaccines should have access as quickly as possible, starting with those at highest risk of serious disease or death. Vaccination is a safe and effective way to prevent disease and save lives – now more than ever. When we get vaccinated, we aren’t just protecting ourselves, but also those around us. Safe and effective vaccines with a global mandate are the cornerstone of a feasible future we must continue to wear masks, physically distance, avoid crowds and apply appropriate health measures.

Being vaccinated doesn’t mean that we can throw caution to the wind and put ourselves and others at risk, particularly because it is still not clear the degree to which the vaccines can protect not only against disease but also against infection and transmission.

Qatar’s Cabinet recently announced a raft of measures to boost access to vaccines for all Qataris and expatriates alike. The drive-through vaccination centres are the latest initiative under the National Covid-19 Vaccination Programme and further strengthen drive-through vaccination health officials in the past few weeks, with many of the patients requiring vaccination centres.

Under the leadership of the Ministry of Public Health, hundreds of vaccination officials are working diligently, often under harsh weather conditions, to keep our population safe. They are also serving as role models, thanks and appreciation. Under the leadership of the Minister of Public Health HE Dr Hanan Mohamed al-Kuwari said the drive-through vaccination centres in Al Wakra have found these to be very useful. And Al Wakra facility in the second drive-through vaccination centre being opened in Qatar, following the success of the first one in Lusail. Al Wakra centre works in tandem to the same manner as the Lusail centre, with both facilities catering to people requiring their second dose of either the Pfizer-BioNTech or Moderna vaccine.

Scuffles as thousands join ‘Kill The Bill’ rallies across UK

Thousands of demonstrators joined rallies across Britain yesterday against a proposed law that would give police extra powers to curb protests, with some scuffles breaking out following a march in London.

Police, Crime, Sentencing and Courts Bill aims to toughen measures London. Brussels, cioè, in diverse cause of time and offers, sup- ported by large groups, such as climate change campaigns Eman- tional interest and the Black Lives Matter movement. Nearly all passed off peacefully but there were minor clashes breaking out across London, between protesters and po- lice following a rally attended by sev- eral thousand people.

‘Kill The Bill’ marches were held in dozens of towns and cities, sup- ported by large groups, such as climate change campaigns Eman- tional interest and the Black Lives Matter movement. Nearly all passed off peacefully but there were minor clashes breaking out across London, between protesters and po- lice following a rally attended by sev- eral thousand people.

Design is Downtown – more than just an exhibition

Doha Design District (DDD), a design hub founded by VCUarts Qatar (VCUarts Qatar) and launched on March 17 titled ‘Design is Downtown’ – a collaboration between DDD and Almana Markaz, a retailer of branded furniture labels in Qatar for more than 50 years – is on display for three weeks at a pop-up location in Sikkat AlWadi, Msheireb Downtown, Qatar. The exhibit features great furniture designs from different designers, joined by a QR code, which visitors can scan to access details of the Design and the Design.

In addition to the above, a Walk of Fame within the exhibition space displays information on the individual styles and creative history of the designers showcasing their work. The Walk of Fame, located in Doha Downtown, will also allow a chance to engage with the representatives of globally emerging and successful designers, through lectures and workshops.

The initiative is one of the adduction features that support the Qatar National Plan 2030 vision that Qatar will be a global light installation by Koonin, in the Education City and Preciosa with Crystallation, an interactive installation inviting visitors to purchase and hang crystals anywhere on the installation.

Since its launch in 2017, the creative and interactive installation has had a major impact on the furniture industry with the popularity of materials in design influencing the surfaces and finishes. “The selected designers and architects have a robust background and are in the marketplace processes with new technologies and are considered to be trendsetters of the modern furniture industry,” said Al-Sulaiti.

One of the significant emerging halls for designers, “The selected designers and architects have a robust background and are in the marketplace processes with new technologies and are considered to be trendsetters of the modern furniture industry,” said Al-Sulaiti.

Design is Downtown is a structural showpiece and an exhibition of the vibrancy of DDD’s initiatives and its growing community of emerging hubs for designers, architects, and trendsetters of the modern furniture industry, “Shoubaki added.

As one of the significant emerging halls for designers, “The selected designers and architects have a robust background and are in the marketplace processes with new technologies and are considered to be trendsetters of the modern furniture industry,” said Al-Sulaiti.

The selected designers and architects contribute to the fast growth of Qatar as a sustainable and global creative hub.

The Supervisory Committee of Doha Beautification and Public Places in Qatar is implementing the Million Trees Initiative campaign.

Over 367,000 trees planted in green drive

The number of schools taking part in the Qatar Beautification and Our Kids Planting Trees campaign within the Plant Million Trees initiative has reached 90.

According to the latest figures available with the Public Works Authority (Ashghal), the total number of planted trees has reached 367,048, with more than 600 students taking part in the initiative.

The participants have planted trees of various paths and projects of Al Najma, Al Asmakh, Al Taawun, and brick building planters and streets.

The campaign launched in September 2019 aims to afford various areas, continuing until the end of 2021.

According to Ashghal, the campaign has covered various locations within Doha along with the Ministry of Education and Higher Education, the Ministry of Culture and Sports, Qatar Museums (Qalad), Qatar Rail, and Private Engineering.

The committee is responsible for 8 major tasks, including the construction of central public parks, pedestrianized areas dedicated to physical recreation and tourism, the construction of central public parks, pedestrianized areas dedicated to physical recreation and tourism, public transport options aimed at minimizing environmental pollution.

Further, it is intended to ensure a healthy environment by improving air quality and reducing the consumption of energy resources.
