Amir congratulates president of Yemen

His Highness the Amir Sheikh Tamim bin Hamad al-Thani called his counterpart President Abd-Rabbu Mansour Hadi yesterday. "We are all Palestinians. We are all Palestinians," he said. "If today Jerusalem will live, Palestine will win", "Israel should withdraw from all Palestinian land", and "Stop the aggression against the Palestinian people, the blessed Al Aqsa Mosque, and the Palestinian civilians." He also expressed his sincere thanks and appreciation to the Amir for the role of Qatar and its efforts in the support of the Palestinian people to obtain their legitimate national rights.

His Highness the Amir Sheikh Tamim bin Hamad al-Thani held a telephone conversation with President of the State of Palestine Mahmoud Abbas yesterday evening. During the call, they discussed the latest developments in the situation in Palestine. The Palestinian president thanked His Highness the Amir for the development of relations, the support of the Qatari people, and the support provided by Qatar to the Palestinian cause, and renewed his appreciation for the role of the Amir in the pacification and the efforts to rebuild the Gaza Strip.

His Highness the Amir Sheikh Tamim bin Hamad al-Thani held a telephone conversation with President of Yemen, adding, “I’m praying this ceasefire will hold. "I pray for the help of the Palestinian people and the blessed Al Aqsa Mosque," he said. "We will continue to support the Palestinian people and their just cause, and continue our efforts with Arab and Islamic parties and related countries to stop the Israeli attacks against the Palestinian people." He also expressed his appreciation for the role of the Amir in the pacification and the efforts to rebuild the Gaza Strip, brief His Highness the Amir on the developments related to the situation in Palestine. The Palestinian president expressed his thanks and appreciation to the Amir for the role of Qatar and its efforts in the support of the Palestinian people to obtain their legitimate national rights. His Highness the Amir congratulated the Palestinian people on the victory of the Palestinian cause, and the victory of Arab and Islamic unity. He also expressed his appreciation for the role of the Amir in the pacification and the efforts to rebuild the Gaza Strip, and thanked him for the help of the Palestinian people and the blessed Al Aqsa Mosque. He also expressed his appreciation for the role of the Amir in the pacification and the efforts to rebuild the Gaza Strip, and thanked him for the help of the Palestinian people and the blessed Al Aqsa Mosque.

Khawla al-Akbari, Hissa al-Sulaiti, Almaha Nasser and Almaha al-Maadeed share their ideas, inspirations and aspirations

2021 has been declared the Year of Science and Technology in Russia. It is fundamentally important to create a stable space for cooperation and solidarity. That’s why Russian state policy aims at one of its priorities to improve the quality of education and preserve co-operation.

Education and science: new avenues for Qatari-Russian co-operation

The delegates and speakers at St Petersburg Forum (SPIEF-2021) will come from public, scientific and educational organisations such as Qatar University, QF’s Hamad Bin Khalifa University, Qatar Aeronautical Academy and Education Above All Foundation, the statement notes. The 10 best students of HBKU will also attend the forum.

The unpredictability of the future means we need to swiftly transition school leadership and rethink leadership programs, so that we allow for failure and learn from mistakes, the statement quoted.

“The Qatar Aeronautical Academy has been a leading provider of training for the full spectrum of aviation professionals, including our commitment to intellectual achievements, the highest levels of ethics, personal growth, and global opportunities for all of our students. Our participation in SPIEF strongly demonstrates our aim to increase our focus on STEM fields, while providing a challenging and rewarding educational experience, knowledge, and expertise” said Dr. HE Sheikh Jabor bin Hamad al-Thani, president of HBKU. He added that the Qatar Aeronautical Academy will feature an exchange of experiences on educational and scientific topics in Deba Hall, among others.

On June 5, the SPIEF-2021 programme will feature an exchange of experience on educational and scientific topics in Deba Hall, among others.

“Qatar has emphasised the importance of the efforts made towards technological advancements with the global aim of finding solutions to major worldwide challenges in the energy sector, the environment, and other areas”.

The unpredictable future we face today means we need to swiftly transition school leadership and rethink leadership programs, so that we allow for failure and learn from mistakes.

MOPH reports 330 new Covid-19 cases

The Ministry of Public Health (MOPH) reported 330 new Covid-19 cases on Monday. Of these 330 cases, 57.3% of the eligible population have received at least one dose, while 84.7% have received two doses.

This is important as the earlier the disease is detected the easier it is to treat and recover from it.

This is vital for the community to be cautious as they are not one and there are still two highly contagious and highly infectious variants circulating in the community.

The Ministry of Public Health also stated that Afghanistan will be delivered over 4 phases with each phase lasting 3-5 weeks.

The first phase will begin on May 16, the second phase will get (QHSL), and the third phase will begin on June 2.

Katara story contest receives 436 entries

Katara – the Cultural Village Development Authority – has announced the results of the Katara Short Story Writing contest.

The award ceremony for the contest, which was attended by a large number of participants from all parts of the Arab countries, was held.

Katara said that the winning stories will be published on its website and will be part of the library of the Katara Cultural Village.

One held for violating home quarantine rules

The designated authorities on Sunday arrested a person who violated the conditions of home quarantine to prevent the spread of the Covid-19.

French group lauds Qatar's efforts to reach ceasefire in Palestine

The Wannsawat Foundation has awarded Al Jazeera’s Drew Ambrose, Jenni Fraley and Andy Mes for their coverage of the cease-fire between Israel and the Palestinian Authority.

The government of Somalia yesterday condemned the Israeli occupation forces, targeting of the QRCS Headquarters in the Gaza Strip with airstrikes on May 17, which resulted in the killing and wounding of a number of innocent people and causing severe damage to His Highness Sheikh Hamad bin Khalifa Al-Thani Medical Center for Rehabilitation and Palliative Care.

In a statement, the Somali Ministry of Foreign Affairs and International Co-operation condemned this step unprovoked and a flagrant violation of international law and moral and humanitarian values.

Sheikh Abdullah al-Thani said the launch of the “We are all Palestine” campaign seeks to help the Palestinian people by providing them with medical, food and non-food items, ambulance and emergency services, and furnishing healthcare.

“The QRCS has been working together with the PRCS for more than 15 years now, and we have contributed dozens of projects in Gaza, costing $110mn. Our top priority is the health sector, especially after 15 years of war and blockade. Our biggest concern is the health sector, especially after 15 years of war and blockade.”

T he UN Security Council called yesterday for “full adherence” to the Gaza ceasefire in its second statement since violence erupted last week. Security Council members also strongly condemned attacks by Israel on Palestinian civilians in Gaza.

The statement backed the US delegation’s call for “full adherence” to the ceasefire, saying “the conflict between Israel and the Palestinian people has caused incalculable damage to the innocent civilians of both sides. The Security Council members are deeply concerned about the “…continued pattern of violations.”

Security Council members also condemned “the serious human rights violations” by Israel and “the restricted distribution of humanitarian aid” in Gaza.

The statement also called on the Security Council to “offer support for a swift and comprehensive peace.”

The US delegation’s call for “full adherence” to the ceasefire was welcomed by the Security Council. The US delegation also welcomed the “urgent need for humanitarian assistance.”

The Security Council statement also welcomed the “important role Egypt (and) other regional countries” played in peace with secure borders.

Algerian authorities protest against Israel's actions and call for international intervention.

According to the Algerian newspaper “El-Djihad,” the Algerian authorities have condemned the Israeli actions in Gaza and called for international intervention. The authorities have also called for a demonstrations in Algiers and other cities to protest against the Israeli actions.

The statement also welcomed the “full and immediate adherence” to the ceasefire and urged for the unrestricted distribution of humanitarian aid in Gaza.

**Serenity Stay**

Set in the heart of Doha, the elegant urban sanctuary is perfect for those who are looking for a relaxing yet luxurious stay.
Nigeria buries army chief after air crash

**Nigeria**

Ogun state, Nigeria - Senior military leaders and family members of a Nigerian military officer who was killed alongside 10 other officers in an air crash, attended by President Muhammadu Buhari, were laid to rest in Abuja yesterday.

The aircraft went down trying to land at the Kaduna International Airport “due to inclement weather”, the armed forces said. Nigeria’s military has been facing an insurgency in the northeast since 2004, a conflict that has killed more than 40,000 and displaced around 2 million people.

Attahiru was once in charge of leading the offensive against ISWAP, a faction of Boko Haram, before he and 10 other officers died in the crash. The incident has raised questions about the state of the country’s air transport, and its ability to manage critical situations.

President Buhari has strongly condemned the crash, saying it was a “national tragedy”.

Another Belgian official confirmed that the remains of Attahiru had been transported to the Belgian capital in a test flight ahead of the scheduled arrival in Brussels. Buhari, who was not present at the service attended by political and military leaders at the National Military Cemetery in Abuja, yesterday, posted videos on social networks.

The crash occurred on February 8, 2021, killing 301 people on board, including generals and high-ranking political officials. The officials were not present on the plane. The crash site is currently being investigated.

Volcanologists at the Goma Volcanoes Observatory (OVG), which monitors Nyiragongo, said they had received several reports from people living near the volcano.

In an interview with AFP in Brussels, former colonial power Belgium, which once controlled the then Belgian Congo, said it would seek to return the remains to Brussels as a sign of hope, many years after independence.

The government is expected to return the remains to Brussels, with a ceremony in the DRC. Political leaders are expected to attend.

The government has not yet announced a date for the return of the remains, but has said it will happen “as soon as possible.”

In the wake of the tragedy, the government has announced a three-day period of mourning.

President Buhari said the government would “not tolerate any act of violence or terrorism.”

He added that the country would “not be deterred” from its fight against Boko Haram and other insurgent groups.

Volcanic eruptions in eastern Congo erupts and triggers panic in Goma

The lava was not flowing toward the city, did not appear to be in danger.

Vatican News

Pope Francis said on Sunday that the death of a Belgian general killed in a plane crash in Nigeria was “a great loss for peace and justice.”

The general, Attahiru Attahiru, was in charge of leading the offensive against ISWAP, a faction of Boko Haram, before he and 10 other officers died in the crash.

His death has raised questions about the state of the country’s air transport, and its ability to manage critical situations.

Pope Francis said that the death of the general was “a great loss for peace and justice.”

He added that the country had a “long tradition of fighting terrorism and defending freedom.”

China's Mars rover starts roaming Red Planet

China's Mars rover started roaming the Red Planet on May 20, in an historic achievement marking a significant milestone in China's space programme.

The rover, known as Tianwen-1, landed on Mars on May 15 and has since been exploring the planet's surface, sending back images and data to Earth. The mission is expected to take about three months.

Mars rovers have been sent to Mars in the past by other countries, including the United States, but this is the first time China has attempted to land a rover on the planet.

The mission is part of China's larger goal of developing a space station and human missions to the Moon and Mars in the coming decades.

Bangkok be held soon

The Thai government is planning to host a large gathering in Bangkok in the coming weeks, in an attempt to boost the economy and attract tourists.

The event is expected to be attended by thousands of people, and will feature a range of activities, including live music, food stalls, and games.

The government has been under pressure to hold the event, as the country's tourism industry has been hit hard by the COVID-19 pandemic.

Covid-19 spreads to rural India as deaths again rise above 4,000

India reported 4,194 new coronavirus infections and 42 deaths on Thursday, bringing the total number of cases in the country to 27,93,458 and the death toll to 52,780.

The highest daily increase in cases was recorded in the state of Maharashtra, which reported 1,284 new infections on Thursday after a week of steady decline.

The Indian government has been under pressure to tighten restrictions in the country, as the number of cases has started to rise again in recent weeks.

Myanmar junta leader says elections will be held soon

The military junta in Myanmar has announced that it will hold elections in the country soon, despite widespread protests against its rule.

The announcement comes after months of protests against the military coup in Myanmar, with tens of thousands of people taking to the streets every day to demand the return of the elected government.

The junta has been widely condemned for its actions, and many countries have imposed sanctions on the country.

Nepal calls new polls amid pandemic crisis

Nepal's government has announced that it will hold a new round of elections in the country, following a series of protests against its handling of the COVID-19 pandemic.

The new elections will be held in the fall, and are expected to be a major test for the government, which has been struggling to contain the pandemic in the country.

Indonesia summons state health insurer over alleged data leak

Indonesia's state health insurer, BPJS Kesehatan, has summoned a government official over alleged data leaks involving the personal information of millions of people.

The data breach is believed to have affected up to 80 million people, and comes amid a wider problem with data security in Indonesia.

The government has launched an investigation into the incident, and has called for tougher measures to protect personal data in the country.
A former BBC chief, who claimed that the service had been “woefully ineffective” in its handling of the Diana probe, was on Thursday interviewed with Princess Diana, the BBC announced as part of its National Garden.

Journalist Andrew Morton drew into a group of 100 BBC staff to an interview in which he filled the lid on his lifelong fascination of Princess Charles, an interview to be aired on BBC2 and BBC7.

Terry Hall, who had led an earlier investigation into the interview and was later named head of the BBC, said he had “thought he would be better suited to doing so.”

“Shoddiy, I’m sure he has a strong connection with Diana,” said the former head of the BBC. “I know he has a long connection with Diana.”

A man was killed in a highway crash while being chased by paparazzi photographers, but returned to duty.

President Johnson promised to pay for a new role in the United States, even after the touchdown in November 1995, which was confirmed on Thursday in Maranhao – one of the country’s poorest regions.

But it had been confirmed on Thursday in Maranhao – one of the country’s poorest regions.

As a worldwide connector of people and businesses, and one of the key transport sectors, air transport has a role to play in the world’s post-pandemic green transition. Since the International Civil Aviation Organisation has set the global objective of reducing the greenhouse gas (GHG) emissions of aviation by 2050 from 2019 levels by 2050. Civil Aviation Organisation secretary general Dr Fang Liu said recently, International Civil Aviation Organisation would have to offset 2.6 billion tonnes of CO2 between 2021 and 2050. It has to proceed in a manner that doesn’t disconnect our world’s peoples, or economies.

The greening of air transport sector needs a global coalition

By Sanna Marin

Climate change and biodiversity conservation is one of the most pressing challenges of our times, as responsible and chemical leaders must adopt long-term plans for confronting these effectively. We need clear standards based on achievable targets and we must be in a position to achieve the transition. The whole aviation cycle must take proper account of the environment. With the goal of becoming climate neutral by 2050 and carbon-negative (negative net carbon) aviation will have to offset 2.6 billion tonnes of CO2 between 2021 and 2050. In short, the greening of the air transport sector has to proceed in a manner that doesn’t disconnect our world.

The global COVID-19 crisis with attention focused on investment in carbon reduction technologies and in SAF, which according to the International Air Transport Association, will create jobs at this critical time and boost aviation’s progress towards its 2050 carbon-neutral goal by half, or more. The Global Aviation Industry Climate Action Plan has been published by 2020, and is the first step forward. And governments should step up investment in technologies that are ready to deliver.

In 2017, civil aviation, as a whole, emitted around 800 million tonnes of CO2, which is roughly 2% of man-made carbon emissions. It is estimated that the aviation sector will need to achieve climate neutrality by 2050 to avoid exceeding the 1.5°C global warming limit. SAFs can help achieve this by reducing CO2 emissions by up to 90% compared to fossil jet fuel.

It is proven that SAF can cut CO2 lifecycle emissions up to 60% compared with conventional jet fuel. SAFs need sufficient fuel sources, which do not compete with food or water, or damage biodiversity. Due to extensive testing and investment from airlines, SAFs are certified as safe, and suitable, and ready to use. Over 250,000 flights have already taken off with a blend of Sustainable Aviation Fuels, IATA tested. SAFs as seen are one of the most promising and effective tools to achieve current decarbonisation objectives, including biofuels, generated from waste products, and even fuels derived from atmospheric carbon dioxide (DAC).

Finland’s climate targets are among the most ambitious in the world. My country has already satisfied our 2035 target for energy efficiency, and 2050 for the reduction of emissions from the sector. The Finnish government is currently working on a national climate action plan (NAP) for 2021-2035. Key elements of the NAP include: emissions reductions from all sectors, including aviation, to comply with Finland’s commitments under the Paris Agreement; a carbon price system to cover all sectors; and a phase-out of fossil fuel use by 2035.

Climate neutrality is hard, but it is doable. The world needs to restructure its energy system and achieve 1.5°C global warming. This goal will require a transformational change in the way we generate, use and transport energy. SAFs can help deliver this by reducing CO2 emissions by up to 90% compared to fossil jet fuel.

It is proven that SAF can cut CO2 lifecycle emissions up to 60% compared with conventional jet fuel. SAFs need sufficient fuel sources, which do not compete with food or water, or damage biodiversity. Due to extensive testing and investment from airlines, SAFs are certified as safe, and suitable, and ready to use. Over 250,000 flights have already taken off with a blend of Sustainable Aviation Fuels, IATA tested. SAFs as seen are one of the most promising and effective tools to achieve current decarbonisation objectives, including biofuels, generated from waste products, and even fuels derived from atmospheric carbon dioxide (DAC).
**Spain frets over stranded Ceuta Moroccan minors**

Early this week, Ceuta officials said they were working on an appeal of a court decision that had blocked the return of 455 Moroccan minors to their parents in Morocco, “Mabel the tiny territory.

Since late last week, 44 children, 53 babies, and 61 one-year-olds have crossed into Ceuta, according to the Region’s Emergency Services, with a dozen more crossing overnight. Some have been taken to Ceuta’s Children’s Hospital, while others were cared for in a temporary centre. Aid workers and volunteers are on hand to help.

The children are mostly from the southern Moroccan city of Agadir. Some are orphans, while others are minors that lost relatives to COVID-19.

But the situation has been complicated by a court order that prevented the return of the children to Morocco, which has led to uncertainty about their future.

**Call for broader patent waivers than just vaccines**

EU digital Covid certificate will be effective July 27

It has been a series of name changes and many scientific and political discussions, but the EU digital Covid certificate is set to come into use on July 27. It will be a way for people who have received a COVID-19 vaccine or have recovered from the disease to prove their status and be able to move freely across the bloc. The certificate will be available in digital or paper form and will contain information on the person’s vaccination status or recovery from COVID-19.

Member states have not agreed a common standard on when a certificate should be accepted, so there are variations between countries. In some, the certificate is only valid for two weeks after a dose, while in others it is valid forever.

Antibody testing is not yet validated in all EU member states, and some countries have only recently started testing for antibodies.

Vaccine acceptance in Europe has been rising, with about 70% of the population in some countries having received at least one dose of a COVID-19 vaccine. However, there are still concerns about the efficacy of some vaccines and the potential for new variants to emerge.

The certificate will be accepted in countries that have joined the EU or are part of the European Economic Area (EEA), which includes Iceland, Liechtenstein, and Norway.

**One dead in Amsterdam stabbing; police say no terror links**

There are concerns about the certificate being used to avoid quarantine or self-isolation requirements, which could undermine efforts to control the spread of COVID-19.

The digital certificate will also be accepted in Switzerland, Liechtenstein, and Norway, but not in the United Kingdom, which has its own digital Covid certification system.

The certificate will be available in English, French, and German, and will be recognized by other countries that have signed up to the EU’s open travel policy.

**Fear of ‘ecological disaster’ as Greece battles forest fire**

A firefighting airplane sprays water to extinguish a wildfire on the island of Evia in Greece, this week. The fire has claimed the lives of at least 20 people and dozens of homes have been destroyed.

The region is prone to wildfires due to its dry climate and the high number of trees in the area. The country has already experienced several major wildfires in recent years, including one that killed 83 people in 2017.

The fire has forced the evacuation of thousands of people from their homes, and authorities are working to contain the blaze.

**EU digital Covid certificate will be effective July 27**

The EU digital Covid certificate will be effective on July 27, allowing people who have received a COVID-19 vaccine or have recovered from the disease to prove their status and be able to move freely across the bloc. The certificate will be available in digital or paper form and will contain information on the person’s vaccination status or recovery from COVID-19.

Member states have not agreed a common standard on when a certificate should be accepted, so there are variations between countries. In some, the certificate is only valid for two weeks after a dose, while in others it is valid forever.

Antibody testing is not yet validated in all EU member states, and some countries have only recently started testing for antibodies.

Vaccine acceptance in Europe has been rising, with about 70% of the population in some countries having received at least one dose of a COVID-19 vaccine. However, there are still concerns about the efficacy of some vaccines and the potential for new variants to emerge.

The certificate will be accepted in countries that have joined the EU or are part of the European Economic Area (EEA), which includes Iceland, Liechtenstein, and Norway.

**What about privacy?**

The text used by the EU member states to draft the certificate does not explicitly state that the certificate will be linked to a digital identification document or that the data will be stored in a central database.

**What about non-EU countries?**

The certificate will be accepted in countries that have joined the EU or are part of the European Economic Area (EEA), which includes Iceland, Liechtenstein, and Norway.

**What about children?**

Children will be allowed to use the certificate if they have received at least one dose of a COVID-19 vaccine. If they have not received a dose, they will be required to provide a negative PCR test result within 48 hours of departure.

**What about travel to non-EU countries?**

The certificate will be accepted in countries that have joined the EU or are part of the European Economic Area (EEA), which includes Iceland, Liechtenstein, and Norway.

**What about the world beyond?**

Several EU member states are known to be working on similar digital certificates, including Britain, Switzerland, and the United States. However, there are concerns about the potential for data breaches and privacy violations, and the need for international cooperation to ensure the certificates are recognized.

**What about the future?**

The EU digital Covid certificate is expected to be phased out by September 2023, with the aim of allowing people to travel freely without needing to prove their vaccination status. However, there is still a need for ongoing monitoring and evaluation to ensure the certificate continues to be effective and relevant.

**What is the EU digital Covid certificate?**

The EU digital Covid certificate is a digital or paper proof of vaccination or recovery from COVID-19 that will be accepted in countries that have joined the EU or are part of the European Economic Area (EEA), including Iceland, Liechtenstein, and Norway. It will be available in digital or paper form and will contain information on the person’s vaccination status or recovery from COVID-19.
The ministry of Public Health (MoPH) has updated the popular group exempted from home quarantine. According to information available at the MoPH website, the following groups and individuals are still exempted from home quarantine:

- Children aged below 11 years, whether returning from travel alone or with their parents, are home quarantined for seven days provided that:
  - They do not have a recent positive COVID-19 test.
  - Their parents or guardian declare in writing that they have a doctor's medical clearance.

- Pregnant women returning to the country with their vaccinated husbands, and cannot provide a valid PCR test certificate.

- Travellers returning from Umrah and cannot provide a valid PCR test certificate.

- Visit Makkah. Exemptions from the quarantine policy for vaccinated individuals do not apply to those coming from India, Nepal, Bangladesh, Pakistan, Sri Lanka and the Philippines.

- Tomorrow's health condition by the relevant department at the MoPH.

- Identified individuals aged 75 years and above are home quarantined with access from the unaccompanied household.

- Recognised doctors or nurses may visit an elderly individual when they believe that the person’s health condition is deteriorating.

- Medical professionals are permitted to visit an elderly individual to assess their health condition.

- Averaging the return of the person at the expense of the state with home quarantine from dates of the second dose are home quarantined for seven days until they complete the duration of 14 days following the second dose, whichever is shorter.

- Identified individuals aged 75 years and above are home quarantined with access from the unaccompanied household.

- Recognised doctors or nurses may visit an elderly individual when they believe that the person’s health condition is deteriorating.

- Medical professionals are permitted to visit an elderly individual to assess their health condition.
