Labour ministry launches first phase of unified complaints online platform

The ministry of Administration Development, Labour and Social Affairs (MoAD) has launched a digital transformation project to provide red flags for complaints and reports. The platform, which is known as “Labour-Web”, is available on computer, tablets and smartphones.

In a statement, the ministry said that the new platform aims to enable community members – including employers, workers in the private sector, employers in the public sector, and others – to submit complaints online.

The system also provides a reporting service that enables all citizens and residents of the country to report violations of the Labour Law through the platform.

The platform allows users the ability to submit complaints in a number of different languages and forms, and through the personal number or work vacuum. It is noted that the mobile phone number is registered on the same card or visa number. The employer or worker can file a complaint by logging into the online account system available on the platform.

The platform also allows complaints to be submitted by other number through the platform. To receive notifications, such as text messages and email, to receive notifications about the complaint after submitting it with the ability to view the form and submit review.

Readers are encouraged to provide information about the complaint, including its description. The person can also attach documents and files to the complaint. The system also allows the possibility of submitting additional complaints related to the same case.

Class of 2020 & 2021

CONGRATULATIONS ON YOUR GRADUATION
HBKU marks graduation of over 400 from Classes 2020 and 2021

The diverse graduates include more than 130 Qatari citizens, with close to 60% of all graduates being women.
HBKU deans shine spotlight on achievements of graduates

D ear students, today I am thrilled to applaud your achievements and express my appreciation for your contributions to the HBKU community. As we navigate through the post-pandemic world, your resilience and determination have been remarkable. You have demonstrated the value of higher education in shaping the future and making a difference.

Dr. Ahmad Al-Malki, dean of the College of Science and Engineering, highlighted the importance of interdisciplinary learning and innovation. He emphasized that HBKU students have the opportunity to engage in cutting-edge research and development, which prepares them for leadership roles in the global community.

Dr. Emad El-Din Shahin, dean of the College of Social Sciences and Humanities, underscored the value of critical thinking and ethical leadership. He encouraged students to use their knowledge and skills to address pressing global issues and make a positive impact.

Dr. Sumaia Yahya, dean of the College of Science and Engineering, emphasized the importance of technological innovation and its role in shaping the future. She highlighted the college’s focus on research excellence and the importance of collaboration across disciplines.

Dr. Thomas O’Connell, dean of the College of Business and Economics, praised the graduates for their exceptional performance and their commitment to excellence. He emphasized the importance of leadership and entrepreneurship in today’s world.

Dr. Yousif Al-Rashid, dean of the College of Public Policy, congratulated the graduates for their achievements and emphasized the importance of ethical leadership and social responsibility.

Dr. Shaikha Al-Misned Hind Al-Khulaifi, dean of the College of Law, highlighted the importance of legal education and the role of graduates in shaping the legal profession and society.

Dr. Abdoul Ahad Lou, dean of the College of Arts and Humanities, emphasized the importance of the liberal arts education and the role of arts and culture in fostering creativity and innovation.

Dr. Leslie Fai, dean of the College of Public Policy, congratulated the graduates for their achievements and emphasized the importance of public policy and governance in shaping the future.

Dr. Nasser Al-Khulaifi, dean of the College of Medicine and Health Sciences, emphasized the importance of healthcare and the role of graduates in advancing medical knowledge and improving patient outcomes.

Call for investment in health systems and future pandemic prevention

The World Health Organization's Eastern Mediterranean Region has called on all member states to increase health investments, essential health services, and pandemic preparedness, particularly in low-income and middle-income countries.

The statement, which was delivered yesterday by the WHO Regional Director for the Eastern Mediterranean Region, Dr. Ruba al Donia, addressed the 142nd General Assembly of the United Nations in New York. The statement highlighted the urgent need for increased investment in health systems and pandemic preparedness.

Dr. al Donia emphasized that despite the COVID-19 pandemic, many low-income and middle-income countries have continued to face significant health challenges, such as malnutrition, maternal and child health issues, and communicable diseases.

Dr. al Donia called on member states to prioritize health investments, improve health services, and strengthen pandemic preparedness. She emphasized the need for increased funding and support for health systems, particularly in low-income and middle-income countries.

The WHO's Eastern Mediterranean Region has been at the forefront of global health initiatives, working closely with member states to strengthen health systems and improve health outcomes.

Dr. al Donia's statement underscored the importance of sustained investment in health systems and pandemic preparedness, particularly in low-income and middle-income countries, to ensure that all populations have access to quality health care and are prepared for future pandemics.

The 142nd General Assembly of the United Nations is the world's largest deliberative body and brings together representatives from all member states to discuss and address global challenges.

Dr. al Donia's statement was well-received by member states, who recognized the importance of increased investment in health systems and pandemic preparedness to ensure sustainable and equitable health outcomes.

The WHO's Eastern Mediterranean Region will continue to work closely with member states to strengthen health systems and improve health outcomes, particularly in low-income and middle-income countries.

Dr. al Donia's statement underscored the importance of sustained investment in health systems and pandemic preparedness, particularly in low-income and middle-income countries, to ensure that all populations have access to quality health care and are prepared for future pandemics.

Great response for QC’s Help Palestine drive

The Qatar Red Crescent Society (QRCS)’s representation mission in Gaza and the Palestinian Red Crescent Society (PRCS) held a meeting recently to follow up on the progress of the blood donation campaign last week.

After completing the registration and mandatory pre-screening of the donors at a number of the QRCS’s Blood Donation Centers, the donors were contacted for their blood donation, and for some, the mobile clinic was conducted at their work or residence site.

According to QRCS, the efforts of Qatar and other entities that have allocated part of their sales profits for Qatar to support the campaign, and urged donors to support it to provide aid to the people of Palestine.

As part of the relief drive, the QC initiative is aimed at helping the people of Palestine. It would build a total of 20,000 Palestinian families with homes ranging from around US$15,000 to another US$27,000 worth of relief and food.

The relief supplies will be distributed to around 40,000 Palestinian families. As announced by QC’s president Sheikh Abdullah bin Thani Al-Thani, the QC initiative was launched to respond to the impact of conflict on the people of Palestine.

The virtual conference included interactive online sessions for discussion and debate on the three-day conference. The three-day conference was launched, aiming to raise awareness in schools about the importance of education and related issues.

He also spoke about Qatar’s role in addressing the environment challenges. He said that Qatar has focused on the development of sustainable development, particularly in the area of education, and has made great strides in this area.

At the conference, Dukhan Bank named Thara’a draw winners.

Each month there are 42 winners per draw for the cash prize of QR5,000 each, and two winners for the cash prize of QR10,000.

Additionally, quarterly there are two winners per draw for the cash prize of QR5,000 each, and two winners per quarter per draw for the cash prize of QR5,000 each.

Dukhan Bank has named the winners of its 27th round of draw for its Shariah-compliant savings account Thara’a. Thara’a Bank has named the winners of this year’s draw.

In co-operation with the QRCS, the QC held an in-person and virtual blood donation campaign in Gaza in December 2022, which the QC has been supporting with Germany’s federal ministry for Education, Culture, Science and Development.

As part of the relief drive, the QC initiative is aimed at helping the people of Palestine.
MoPH reports 299 new Covid cases, 354 recoveries

The Ministry of Public Health (MoPH) reported yesterday 299 new confirmed cases of coronavirus. Of these, 71 were from community cases and 133 from travelers returning from abroad.

The designated authorities have referred 719 people to prosecution for violating Covid-19 preventive measures and the overall government restrictions and guidelines by the government. Among them, 504 people were referred to the prosecution for not wearing masks or keeping a safe distance and violating the maximum capacities of various facilities and 31 people were referred to the prosecution for not following the digital code of safe entry (Ehteraz app). Also, 10 people were referred to the prosecution for not installing the Ehteraz app and five for violating the rule on the number of people maintaining safe physical distancing. Also, 10 people were referred to the prosecution for not providing one or several items of Things (IoT) and other devices, speakers, latest mobile devices, and air pods, among others. An employee of another retail outlet for smart devices said they also received huge orders of IoT and smart devices last year. A lot of customers bought such items, including smart home solutions, smart home appliances, smart watches, mobile devices, and air pods, among others. They always run out of stocks so many have opted ordering from other shops in Qatar or overseas. There’s really huge demand, so the next product we sell is one product. An extra popular brand for smart phones and other mobile devices (such as laptops, tablets, and air pods) that have been in demand is Abu Dhabi, where Raca said yesterday.

BYH 2021 exhibition was completed to hold Build Your House Exhibition to be held from Sept 20

The MoPH recorded 354 recoveries from the virus during the past 24 hours, bringing the total number of recoveries in Qatar to 22,368.

Staff Reporter
By Joey Aguilar

The decision came after the Ministry of Municipality and Environment (MME) announced three days ago that it has started a follow-up mechanism for the byelaws and standards that regulate fishing by Qatari fishermen. It has also provided them with financial assistance of Qatari dinars and have been able to relocate their families to safe places that are away from the Qatari fishermen. The topics, interventions and discussions in the conference will be open to all interested parties and discussion a few comments on strategic plans that are required to be made for the future of the sector. The purpose of the conference is to discuss the current challenges and opportunities in the Qatari fisheries sector. The conference will be held on May 26 and 27, 2021, at the Qatar National Convention Center, Doha. The conference will be open to all interested parties and discussion a few comments on strategic plans that are required to be made for the future of the sector. The purpose of the conference is to discuss the current challenges and opportunities in the Qatari fisheries sector.
**Qatar to deliver most accessible World Cup**

The SC said it is working closely with local organisations to ensure that content on its website, mobile apps and digital documents can be enjoyed by all fans, irrespective of their accessibility needs.

The SC's Accessibility Forum – comprising people from across Qatar's disability community – has proved vital in supporting organisations to deliver the most accessible World Cup in the tournament's history. "The Accessibility Forum is very important as it enables us to work closely with people with disabilities and ensure that the accessibility standards we have put in place across initiatives and digital content meet all their needs," said HE Maha al-Mansouri, assistant secretary general for public transport and services at the SC.

"Accessibility forms a central part of the Qatar 2022 sustainability strategy, which applies to all functional areas and projects involved in preparations for the tournament," she added. "This includes enabling people with disabilities and those with limited mobility, while facilitating accessibility across physical infrastructure, public transport and services in Qatar."

**Community College of Qatar admissions for Fall 2021 open**

The Community College of Qatar (CCQ) announced that admissions for Fall 2021 are now open. Applications for programmes from June 6 to 27.

Qatar’s Ministry of Municipality and Environment (MME) has warned that the majority of the peak summer heat - which is expected around the middle of July - could cause difficulties for people with disabilities. "There are strict measures in place to limit the number of people who can be exposed to the heat, and we are working closely with CCQ to ensure that the admission process is accessible for everyone."

Al-Khater added: "We want to ensure that everyone has the opportunity to pursue their dreams and achieve their goals in education. We are committed to making sure that all students, regardless of their abilities, can access high-quality education and training programs."

**Qatar takes part in LDC5 preparatory panel meeting**

The Qatari delegation was represented at the preparatory panel meeting of the Least Developed Countries (LDCs) yesterday. "Qatar has been active in supporting efforts to deliver the most accessible World Cup in history. This year, we have worked closely with the CCQ team to ensure that all aspects of the tournament are accessible, including websites and apps that share Qatar 2022 specific information as well as content that will be used to broadcast flights and live events."

Another founding member of the Accessibility Forum – and a key partner in bringing the SC's e-accessibility efforts to life – Ma'mal - Accessible Technology Centre (Ma'mal) had established in 2020, Ma'mal had been leading the country's digital accessibility efforts, with its work recently recognised at the global level.

"Recently, the State Department office of the Global Evaluation and Coordination, for their contribution to the work of the Accessibility Forum – has proved vital in supporting efforts to deliver the most accessible World Cup in the tournament's history. "The Accessibility Forum is very important as it enables us to work closely with people with disabilities and ensure that the accessibility standards we have put in place across initiatives and digital content meet all their needs," said HE Maha al-Mansouri, assistant secretary general for public transport and services at the SC.

Wuhan lab staff ‘sought hospital care before Covid outbreak revealed’

**Features**

Three researches from the Chinese government's Wuhan Institute of Virology had sought hospital care in the days before the coronavirus outbreak revealed, a report said on Monday.

The researchers, who have been named in the US government's press briefing last Friday, had sought medical attention in the days before the COVID-19 pandemic first appeared in Wuhan, a World Health Organization (WHO) official said. The US government has said that the Wuhan lab had two researchers who sought medical attention shortly before the pandemic emerged, raising the possibility of a lab leak.

China has denied claims that it covered up the outbreak of COVID-19 at the Wuhan lab, saying that all scientific research is conducted under strict national regulations.

The US government has not disclosed the identities of the researchers or the nature of their symptoms. However, it has said that the researchers were not exposed to COVID-19 from another source, such as another lab or patient.

The WHO has said that it is important to understand the origins of COVID-19, but that the issue is outside its mandate.

**Israel-Palestinian tensions simmer ahead of Blinken visit**

The Israeli government has banned a visit by US Secretary of State Antony Blinken to Jerusalem, citing concerns about the ongoing conflict with the Palestinian Authority. The US government has not yet announced its plans for a visit by Blinken.

Meanwhile, Israeli forces have arrested several Palestinian protesters near the West Bank city of Hebron, following a demonstration against the proposed eviction of Palestinians from their homes in the area.

The Israeli government has said that it is committed to the two-state solution, but that it also needs to maintain its security interests.

**Tunisia: WHO after access denied to medical center**

WHO officials have been denied access to a medical center in Tunisia where COVID-19 patients were reportedly being treated.

The WHO has said that it requires access to medical centers to monitor the spread of COVID-19 and to ensure that patients receive appropriate care.

The Tunisian government has said that it is committed to respecting patients' rights and ensuring their safety.

**Egypt: Mass evictions begin as cyclone forms off India**

Egyptian authorities have begun mass evictions of residents from coastal areas as a cyclone forms off the coast of India.

The government has said that it is necessary to move people to safer areas to protect them from the cyclone, which is expected to make landfall in the next few days.

The cyclone has already caused damage in some coastal areas, with several deaths reported.

**Ethiopia: Over 200 more injured in Malaysia train crash**

At least 200 people were injured in a train crash in Malaysia on Monday, the country's transport minister said.

The accident occurred on the outskirts of Kuala Lumpur, where a train derailed during a test run.

There were no immediate reports of fatalities, but the minister said that many people were injured, including children.

**Suu Kyi in court**

Myanmar’s deposed leader Aung San Suu Kyi appears in court on Monday for the first time since her arrest.

Suu Kyi had been under house arrest for nearly two years before she was arrested on February 1, accused of corruption and breaches of immigration laws.

The military coup that overthrew Suu Kyi’s government has been heavily criticized by rights groups and the international community.

**Iran, UN nuclear monitor extends inspection deal**

The UN nuclear watchdog said on Monday that an inspection deal with Iran’s government will be extended for another six months.

The extension of the deal was brokered by China and Russia, who have been key players in the Iran nuclear talks.

The agreement allows the International Atomic Energy Agency (IAEA) to continue monitoring Iran’s nuclear activities.

**Pakistan: Drone attacks continue despite US offer to help**

The US government has offered to help Pakistan in its fight against drone attacks, but the Pakistani government has remained committed to its own policies.

Pakistan has been hit by a wave of drone attacks in recent months, with some targeting government officials and military figures.
Atletico Madrid's players ran through the stadium and out onto the car park on Saturday to celebrate with fans they had not seen all season because of the pandemic. These thousand supporters had gathered outside Jose Zorrilla Stadium in on tinfoil hats, only to confide and add to the joy.

They watched on their phones while Atletico led 10-0 in 90 minutes before Real Madrid won the title on a 2-1 home delivery, only to claim the championship thanks to Luis Suarez’s 18-minute winner. Atletico’s manager Diego Simeone had been tucked onto shoulders at a car was dropped off the neck of the 20-year-old Jose Gimenez.

Central defender Jose Gimenez formed a crowd and long after the crowds had gone, Atletico fans in France turned to throw at fans to say they were unable to find it in Europe.

But with some astute additions, Atletico could next season defy the odds to throw away a weight, without pressure

China has largely avoided this pitfall of modern technology, though not without cost and criticisms, by controlling online crime and the echo chamber. But its success has not avoided America’s media-funded influence. Over the past few years, the US-China relationship has reigned significantly, and the global free-trade system has been pushed to the brink of collapse.

China’s leadership has largely avoided this pitfall of modern technology, thanks not without cost and criticisms, by controlling online crime and the echo chamber. But its success has not avoided America’s media-funded influence. Over the past few years, the US-China relationship has reigned significantly, and the global free-trade system has been pushed to the brink of collapse.

As US media embraced increasingly focused, targeted strategies, deep polarisation became all but inevitable. This, together with US politicians’ new incentives to appeal to the ideological extremes, has tied the fabric of American society, feeding inequality and conflict, resulting in the US’s current political crisis and growing urgency. The US-China competitive dynamic was thus oversimplified, with the US pushing China into a box.

In a matter of just a few years, the US-China relationship has transformed from a strategic rivalry to a cooperative one – especially since the 2013 G20 summit in Hangzhou. Two features of this shift stand out: how quickly it occurred, and the extent to which Americans and their leaders have accepted it.

Ironically, the problem is partly rooted in American geopolitical rhetoric, which has implied that great powers will co-operate with China – together with a broader embrace of free trade and economic openness – would be highly beneficial:

the anti-China narrative has thus continued to sound common ground to American politics. Unfortunately, Americans are engaging in an idea that doesn’t work. What the US should be focusing on is how to benefit from globalisation and technological progress and manage the risks arising from the associated pressures.

The anti-China narrative has thus continued to sound common ground to American politics. Unfortunately, Americans are engaging in an idea that doesn’t work. What the US should be focusing on is how to benefit from globalisation and technological progress and manage the risks arising from the associated pressures.

L ast month, the US Senate Foreign Relations Committee officially backed the Strategic Competition Act of 2021, which labels China as a strategic competitor in a number of areas, including trade, technology, and security. China’s bipolar geopolitical system – as identified by former US Secretary of State Henry Kissinger long ago – is likely to persist well into the 21st century, with either Madrid or Barca having won the title, the other when Atletico last clinched the league in 2014.

It is the first time neither Madrid nor Barca have won either La Liga or the Champions League since 2004.

Inter, Real Madrid and Barcelona could both start next season with new managers and a fresh desire to reclaim the title.

After being top since December and after almost throwing away a 10-point lead in February, the title is Inter’s for the first time in their history, and Real Madrid and Barcelona could both start next season with new managers and a fresh desire to reclaim the title.

Atletico has never hidden from its history, internal or external, method welling to cast its team into mud to punish any claims or perceived advantage and the “deference” of other countries to “its political and economic advantage” and the “independence” of foreign technology and economic policies. This has pushed China to make a comprehensive strategy that will co-operate with China – together with a broader embrace of free trade and economic openness – would be highly beneficial.

But with some astute additions, Atletico could next season defy the odds to throw away a weight, without pressure

The Scottish government, which took office in May, has announced plans to introduce an unexplained wealth order (UWO) in Scotland which has been successfully used in England and Wales to seize the assets of people suspected of being involved in international organised crime.

The plan follows the success of a similar measure in England, where the Scottish National Party (SNP) was able to secure the creation of UWOs by using a combination of pressure from the UK government and by taking advantage of the devolution of certain powers to Scotland.

The UWO legislation, which is currently being debated in the English parliament, allows for the freezing of assets of individuals suspected of involvement in serious crime.

The Scottish government's announcement comes as part of its wider strategy to tackle organised crime, which includes the introduction of a new anti-money laundering and counter-terrorist financing law.

The move has been welcomed by anti-corruption activists, who have been calling for greater powers to be granted to the Scottish government to tackle this issue.

However, some have raised concerns about the potential impact of the measure on Scotland's economy, and the risk of it being used for political purposes.

The Scottish government has defended its plans, arguing that the measure is necessary to prevent the proceeds of crime being used to finance further criminal activity.

The first four winners of a photography contest, recently held by Gulf Times under the title ‘Spirit of Ramadan’, were awarded certificates and prizes yesterday.

Gulf Times advertising and marketing manager Hassan Al Ani announced that six winners were chosen from among 100 original submissions, making the final selection process extremely difficult for the panel of judges.

The photographs were judged on creativity and originality by Gulf Times professionals and professional photographers.

Commenting on the winners, Al Ani said that the company was pleased to recognize and encourage the talent and creativity of photographers and raise awareness about the essence of Ramadan.

The photographs were judged on creativity and originality by Gulf Times professionals and professional photographers and nine awesome photographs were shortlisted for the final stage.

The winners were asked to submit photographs capturing the spirit of Ramadan in Qatar.

The fourth prize-winning picture was by M F Mohd Shaker, Al-Bishri said MoEHE health

The third prize-winning picture by Saeed bin Khalid.

The second prize-winning picture by Shiraz Sithara.

The first prize-winning picture by Shamama Fatima.

The winners with Gulf Times Editor in Chief and Marketing Manager Thajudheen Kafood.

Khalid said: “I started photography following Shiraz Sithara, who is my close friend.

Shakeer said: “My photo shows a man offering Asr prayer during Ramadan, “ he expressed.

He added: “I have been taking part in different contests and competitions, I think that photographing was a good opportunity as during the coronavirus period, not much has been happening.

“Indeed there is love to highlight the fact that the Holy Qur’an is the light to the mankind “ he said.

“Photography is a way of expressing our thoughts and emotions about what we are witnessing, adding that Malaysians can be good for all if those accepted for performing the pilgrimage this year are vaccinated.

He said the designs of the sports fields are being assessed continuously and all the athletes have to attend the exams from Class I to Class XII.

In statements to online Malaysian newspapers, Katfo said that Qatar is moving forward in preserving the rights of the workers.

Similarly, school bus drivers have been sanitised before the trips and their temperatures are checked daily before they start work.

The same rule applies to bus drivers.
