Shura Council election to be held on Oct 2

Amir issues Decree No 40 of 2021 setting the date for the elections. The date is effective from the date of issue and shall be published in the official gazette.

Covid vaccination: Qatar ranks second in world

T he latest statistics published by our World Health Organization’s publication comprising vaccination rates worldwide, around the world, show that Qatar ranks among the world’s top-performing countries for the vaccination campaign coverage.

Qatar is ranked second in the world in terms of the percentage of population that have received at least one Covid-19 vaccine dose, among countries with a population of more than 5mn, according to figures from Our World In Data set released on Friday. The campaign is expected to reach 90% of adults by the end of this year, which would account for more than 11mn doses, or 60% of the population of more than 1mn, according to statistics.

Taliban beat back crowds at Kabul airport after seven killed in crush

T he Taliban are racing to finish the air campaign and usher in a new era of rule before the US withdrawal process ends on August 30. A massive crush of crowds around the airport on Saturday as thousands tried to get to a flight, a week after the Taliban took control of the country. At least 13 people were killed and 40 hurt in the crush around the airport on a day when hundreds of people had tried to get to the airport. Some were shot and others died in stampedes, witnesses have said.

Japanese FM hails Qatar partnership

The FM of Japan has today praised the ongoing co-operation between Qatar and Japan, and the moves taken by both countries to further strengthen their relations.

The meeting was attended by Qatar’s ambassador to Japan, and Japan’s minister of foreign affairs.

He highlighted the achievements of joint projects in the Tokyo Olympics, congratulate Qatar athletes for their successes, and emphasised the importance of ongoing diplomatic relations.

He also spoke of the challenges that the world faced during the Covid-19 pandemic, and praised Qatar’s efforts to protect its citizens.

The FM of Japan also spoke of the importance of Qatar’s role in the region, and praised the country’s efforts to promote peace and stability.

He noted that the FM of Japan and Qatar had discussed a range of topics, including the ongoing cooperation between the two countries.

He concluded the meeting by thanking Qatar’s FM for his hospitality and for the warm welcome he had received during his visit.

Ooredoo explores benefits of work-life balance at latest knowledge-sharing event

According to a Qatar News Agency (QNA) report. In a statement yesterday, the MoPH stressed that it's "important to continue as the second wave is not yet over and there are still Covid-19-related precautions and measures that are as actively circulating in the community."

The third phase of the gradual lifting of precautionary restrictions is part of a four-stage plan to be implemented over the coming months, and will depend on the pandemic development and the degree of compliance on the part of community members with the current measures, restrictions and guidance issued by the government.

- "Creating an environment to be relatively balanced and free of other elements that can only be the benefit of both our employees and our organisations;"

Qatar News Agency's chief executive officer, Abdulla al-Thani focused on the benefits of a good work-life balance for employees and the organisation, and the opportunity to explore ways to achieve such balance without compromising either work or family life.

Qatar ranks 2nd in the world for vaccination

As announced by the Ministry of Public Health (MoPH) yesterday, 10.6% of the eligible population have received both doses of the vaccine, while 63.6% of the total population have received at least one dose of the vaccine.

In addition, 60% of the total population have received both doses, the statistics show.

The MoPH yesterday reported 10 new confirmed cases of Covid-19 among travellers, and two new positive cases of local transmission.

The MoPH also recorded 11 recoveries from the virus during the past 24 hours, bringing the cumulative number of recoveries in Qatar to 125,445, according to official sources.

The director of the Ministry of Public Health (MoPH) yesterday reported that 10.6% of the eligible population (those aged 12 and above) have now received both doses of the vaccine, while 63.6% of the total population have received at least one dose of the vaccine.

In addition, 60% of the total population have received both doses, the statistics show.

Qatar's vaccination coverage rate at 25.2%, the report said. The MoPH yesterday reported that 10.6% of the eligible population (those aged 12 and above) have now received both doses of the vaccine, while 63.6% of the total population have received at least one dose of the vaccine.

In addition, 60% of the total population have received both doses, the statistics show.

Wise focus on unemployment and obsolete jobs

The World Innovation Summit for Education (WISE) is highlighting "Raising a generation able to harness technology and opportunity when their turn comes" as part of a four-stage plan to be implemented over the coming months, and will depend on the pandemic development and the degree of compliance on the part of community members with the current measures, restrictions and guidance issued by the government.

"We need to harness their potential and ensure that every young person is able to access work opportunities", WISE said.

"With Covid-19 still a threat and restrictions expected to be in place for some time, we must continue to work towards ensuring that no one is left behind in the current crisis."

"We must enable them to find potential and ensure that everyone who is part of the young community can access work opportunities, as we accelerate our focus on employment and the education system to protect the current and future generations of learning."

The event – delivered in line with the Qatar National Vision 2030 agenda – underscored that every young person is able to access work opportunities in Qatar, as education and skills development will be important to enable this generation to take advantage of the opportunities that the WISE community is highlighting.

Joint drive launched to remove abandoned vehicles, equipment

Joint campaign to remove abandoned vehicles, equipment and hazardous waste from the road started yesterday. The campaign, which started on Monday, August 23, 2021, is expected to result in the removal of abandoned vehicles from the road identified by the Department of Municipalities and the Environment (MoME) in a statement.

The campaign is part of the continued efforts of the MoME to curb the spread of this uncanniness phenomenon that spoils the beauty of the county and to ensure a clean and safe environment for the road users to promote a safe conversation for the environment resulting from such practices.

Licensed by Al-Saboun, head of the general control section at Al-Shahin Municipality, and member of the committee on removing abandoned vehicles in the country, the task took part in the launch of the campaign alongside Al-Saboun's other members, the general director of the Ministry of Municipality, and the local government, aiming to remove old vehicles or other waste from the vicinity of the Al-Shahin Municipality's site.

Al-Saboun said the campaign targets the removal of all abandoned vehicles from the jurisdiction of Al Saboun Municipality, which is the only one in the country able to work in Al-Shahin Marsa territories, Al Daayen, and eventually Um Salalah, Al Daayen, and eventually Um Salalah.

Abandoned vehicles and equipment, according to the campaign's leaders, are considered a problem for the area.

The campaign will continue for a week and until all abandoned vehicles detected are removed.

Al-Shahin Municipality will coordinate with the MoME and the Department of Municipalities and the Environment to determine the location of abandoned vehicles and equipment.

The campaign is underway and the number of members of the committee on removing abandoned vehicles in the country, the task took part in the launch of the campaign alongside Al-Saboun's other members, the general director of the Ministry of Municipality, and the local government, aiming to remove old vehicles or other waste from the vicinity of the Al-Shahin Municipality's site.

**Lecture raises productive families’ tax awareness**

The Ministry of Administrative Development, Labour and Social Affairs, supervised by the Department of Tax Affairs under the General Authority of Customs, organized an awareness lecture to the public on Microsoft Azure.

The lecture was presented by the Director of the Public Relations and Communication Department Bandar Mansour Al-Hawban, and the Head of the Taxpayer Support Department of the General Tax Authority Nasser Mohamed Radi, with the participation of regional tax authorities, and representatives of productive families at the ministry.

The lecture aimed at educating productive families on the services of the General Tax Authority. It touched upon the methods of submitting a simplified tax return. All-female assisted owners of small and medium enterprises (SMEs) that have business premises and any commercial activity covered by a Qatari individual not subject to tax, however, it stipulated that a Qatari individual who has an alternative commercial registry or is obligated to register on the website (electronic tax portal) to submit the declaration, adding that this must be submitted by the end of this month, after which they will have to pay an administrative penalty.

Biden thanks UAE for support in evacuation operations

US President Joe Biden thanked Crown Prince of Abu Dhabi, Sheikh Mohamed bin Zayed al-Nahyan, for assisting in the evacuation operations from Afghanistan, a United Arab Emirates media official, Afra al-Hameli, said on Twitter yesterday.

Biden expressed “appreciation for the UAE support for ongoing evacuations from Afghanistan,” she said. “This collaborative effort reflects the enduring and strong strategic partnership between the two close allies.”

The UAE said on Friday it had agreed to host 5,000 Afghan nationals to be evacuated from the country for 10 days at the request of the United States.

Dubai sets up court to fight money laundering

Dubai has established a specialised court focused on combating money laundering, in a move to “strengthen the global competitiveness of the UAE as a centre of excellence in financial services,” the government said on Tuesday.

The UAE, home to the Middle East financial hub Dubai, has worked over the last five years to overcome a perception it is a hot spot for illicit money.

In February the government created an Executive Office for Anti-Money Laundering and Counter Terrorism Financing.

“The establishment of the court is aimed at further raising the UAE’s and Dubai’s global competitiveness by strengthening the rule of law and upholding the values of justice and transparency,” the media office said.

Raisi urges Japan to free frozen funds

Iranian President Ebrahim Raisi yesterday called on Tokyo to release the Islamic republic’s funds that have been frozen in Japan because of US sanctions over its nuclear programme.

“The release of Iran’s assets in Japanese banks is unjustifiable,” Raisi told visiting Japanese Foreign Minister Toshimitsu Motegi, the government website reported.

Japanese and a larger number of other countries are both major exporters of technology, and hold billions of dollars in Iranian assets. These funds have been frozen since the former US president Donald Trump unilaterally withdrew Washington from a landmark nuclear deal and re-imposed sanctions on Tehran in 2018.

Washington said in mid-July that it was allowing Iran to use the frozen funds to settle debts in South Korea and Japan, but insisted that it did not allow any to be transferred to Tehran itself.

Talks between Iran and world powers aimed at reviving the 2015 accord have stalled since late June. The United States has been involved indirectly in the talks.

Motegi arrived in Tehran early yesterday after visiting Turkey and Iraq during a regional tour, and will also go to Qatar.

At a press briefing after meeting Raisi, Motegi told Japanese reporters that he had discussed the situation in Afghanistan, following the capture of Kabul by the Taliban.

Motegi arrived in Tehran after meeting with Turkey and Iraq on the need to cooperate to avoid Afghanistan becoming “a further destabilising factor”.

Nigerian gunmen release 15 abductees

Gunmen who kidnapped more than 150 children and students in a forest in southeastern Nigeria have released the students and teachers, officials said.

The abduction of students and teachers was expected to cause a local reaction, raising concerns locally as bandits who have long terrorized southeastern and central Nigeria, hosting cattle and kidnapping for ransom.

The children, aged between 10 and 17, had been kidnapped from the Bethel Baptist Secondary School in the town of Yawa in central Niger State, four of whom had been killed in a gun battle between Nigerian military and the kidnappers.

Among those released yesterday were three students with marks of torture on their bodies, Nigerian Red Cross Society stated.

The release was confirmed by the government of Niger State, which requested the help of the military to retrieve the students and their parents.

Nigerian President Muhammadu Buhari has expressed concern over the release of students and teachers, saying if the group is being held by a non-state actor, he was being informed immediately.

The group of bandits released on Friday is expected to gain a sense of the situation and to try to use their children as leverage to negotiate ransom.

The group has released 12 students during its earlier phase of the hostage crisis, after holding them for ransom.

Meanwhile, the impact of the group's hostage crisis has been felt across the region, with tension escalating as the group demands ransom.

There have been no claims of responsibility for the abduction.

Prime Minister Mustafa al-Kadhemi went to Karbala yesterday amid revulsion over the government's wave of killings.

A man who murdered a senior Iraqi official in the capital Baghdad has been given a life sentence in the country's criminal court, which examined the crime and sentenced him to death by hanging.

According to the Supreme Court, the man was found guilty of the murder of a member of the judiciary.

The man was on foot supervising a survey of unauthorised buildings, Court of Iraq said in a statement.

He was caught by the police after a wave of inspections in the capital Baghdad.

The death sentence, which can only be executed by a special court, is expected to be overturned by the Appeal Court of Iraq's capital Baghdad.

President Barham Saleh also has to sign an order for the execution.

The rights group says it recorded more than 45 executions there in 2020, including many of people accused of terrorism.

There have been no claims of responsibility for the abduction.

climb turned the day into aProc. Of the 211 Americans evacuated, 126 had been flown out of Afghanistan since August 28. That was the day the US military gave the final word to the evacuees: the US was leaving.

Betancourt said that “it’s mathematically impossible” to evacuate so many people on the type of aircraft used.

British Defense Secretary Ben Wallace was expressing concerns on the evacuation, warning that “not everyone will be able to get out”.

The woman was part of a group receiving the Taliban’s evacuees on board the airlift. The US diplomat named the airlift operation “the US bid for the chaos of the airport”.

“There is peace and calm all over the country, but there is chaos only at Kabul airport”, said the first aide.

President Joe Biden had allowed entry to 650 US citizens and diplomatic personnel at risk.

The US embassy in Kabul said yesterday that the country had been evacuated to Qatar; while 8,500 have gone to the UAE.

Military planes and helicopters were also used to transport Afghans in and out of the country, as well as to set up logistic operations for evacuation.

As of midday yesterday, about 610 people, Americans and Afghans, had arrived at the US’s Ramstein base in Germany.

In total, about 17,000 people had been evacuated, many from Kabul via Qatar and UAE, with dozens more as well as Afghans from third countries being flown into Qatar.

A new plane was on its way to Kabul yesterday, with three others due to take off yesterday to evacuate Afghans.

British has evacuated nearly 450 people in just a week as it steps up to deliver aid.

The previously reported toll was 2,189. More than 200,000 houses were destroyed and 1,200 people were killed, and around 850,000 injured. The death toll is expected to rise over 2,200.

The death toll in the major earthquake that struck the Haitian capital yesterday, as aftershocks are expected over the next few days, as well as the ongoing crisis in Afghanistan, will bring relief to survivors.

There have been widespread reports of活着的and injured people since late Tuesday, but the toll is believed to be the highest.

Haitian authorities said roughly 300 people were directly affected by the disaster, as well as those in need of urgent humanitarian assistance.

Efforts to deliver food, water and medical assistance for victims have been complicated by the disruption and bridge damage in the area, making aid delivery difficult.

We have a security problem that’s about to become worse,” said President Jovenel Moïse, the head of the state.

We literally facing a problem and we’re working flat out with the police, who are returning unfruitful efforts to reach the victims.

It is not known how many people are still left, but the authorities have launched a search operation.

Some of the worst damage was in Jeremie, which is a tourist destination, and La Saline, where a hospital was damaged.

The authorities said that medical teams were working on the patients who were injured or affected by the quake.

Dozens of buildings have collapsed in the city of Port-au-Prince, and the authorities have called for international assistance to help in the rescue efforts.

In the town of Jeremie, located about 120 kilometers southeast of Port-au-Prince, several buildings have collapsed and at least 30 people are believed to be trapped in the rubble.

The earthquake was felt across a large portion of the country, including the capital Port-au-Prince, where buildings shook and people ran into the streets.

At least 10 people have been killed, including a child, and 86 people injured in the earthquake in Port-au-Prince.

A bus carrying 30 passengers was crushed by a building collapse in the city of Les Cayes.

Dozens of people are feared trapped under the debris and authorities are searching for survivors.

Haitian officials said they were coordinating with local authorities and the United Nations to ensure that aid is delivered to those in need.

The authorities have also called for international assistance to help in the rescue efforts and to provide medical and food assistance to the affected communities.

People have started to gather at a hospital in Port-au-Prince to receive medical treatment.

The authorities have also announced that they will be opening centers to provide food and shelter to those affected by the earthquake.

A sixth flight is expected later in the day.

Malaysia opposition urged to join Covid effort

**Kamala Harris in Singapore**

US Vice President Kamala Harris is greeted by Singapore Foreign Minister Vivian Balakrishnan and his delegation, as she arrives at Paya Lebar Air Base in Singapore yesterday.

**New Zealand govt admits setback in Covid fight**

New Zealand’s director-general of health Ashley Bloomfield speaks to the media before receiving his first dose of a Covid-19 vaccine at the Pipitea Marae vaccination centre in Wellington yesterday.

**High Covid-19 cases should not delay Australia’s reopening: PM**

Duterte orders the health and budget minister to advise on the feasibility of health workers’ benefits. Duterte gave the 30-day moratorium and 15-day transition period for the benefit package of doctors, nurses and other healthcare workers in public and private hospitals.

**Duterte orders the health and budget minister to advise on the feasibility of health workers’ benefits.**

**Florida plagues hundreds in Covid quarantine**

The Florida government announced 8,700 confirmed Covid cases for the first time since the surge began in early August.

**Australian chickens banned from the Philippines**

The Philippines has banned chicken imports from Australia following a case of bird flu.

**Filipino workers can soon enter Hong Kong**

The Philippines has agreed to let overseas Filipino workers (OFWs), who previously could not enter the country due to the virus, to be deployed to Hong Kong. OFWs have been waiting to be deployed to Hong Kong for more than two years due to the pandemic.

**Filipino workers have been vaccinated in the Philippines**

Anthony Dy, 36, a Pinoy worker in Australia, received his first dose of a Covid-19 vaccine in the Philippines on Wednesday, August 30. Mr Dy’s wife and three children are also due to receive their jabs in the Philippines from early September.

**Malaysia opposition urged to join Covid effort**

Malaysia is one of the last Southeast Asian nations to open its borders to vaccinated overseas Filipino workers (OFWs) after it decided to temporarily suspend their arrival.

**South Korea to get more Moderna Covid shots**

South Korea’s health ministry said Moderna will supply the country with over 100,000 doses of continuous vaccines by the first week of September. South Korea’s vaccine rollout has been slower than expected.

**Thailand monarchy budget survives rare calls for cuts**

The Thai government on Thursday, August 20, rejected parliamentary questions that called for a reduction of 25% in the royal budget. The government lawmakers did not comment on cost-cutting measures although it was revealed that 20% of Covid-related royal salary cuts were canceled.

**High Covid-19 cases should not delay Australia’s reopening: PM**

Australia’s Prime Minister Scott Morrison said delays to the country’s Covid reopening would not be a consequence of the spike in cases.

**Filipino workers can soon enter Hong Kong**

Within two weeks, Filipinos could soon enter Hong Kong, securing the deployment of about 3,000 workers waiting to be deployed to Hong Kong.

**High Covid-19 cases should not delay Australia’s reopening: PM**

Australia’s plan to reopen and end the vaccine mandate does not depend on the country achieving a 70% or 80% vaccination rate as predicted by Dr Anthony Fauci.

**Filipino workers can soon enter Hong Kong**

The Philippines will sacrifice its Covid elimination strategy, conceding its ambitious "Covid zero" objective.

**US Vice President Kamala Harris is greeted by Singapore Foreign Minister Vivian Balakrishnan and his delegation, as she arrives at Paya Lebar Air Base in Singapore yesterday.**

**New Zealand govt admits setback in Covid fight**

The melting sheets: How Greenland is warming rapidly

The discussions and debates about global warming and the rise in the global mean sea level have reached a crux with the first ever recorded rainfall in Greenland's ice sheet summit causing "widespread" melting. It was the heaviest rainfall on the ice sheet since record keeping began in 1910. Nearly 80% of the island's melt water was from this event from July 14 to say, researchers. On August 14, rain was observed at the highest point for several hours, and at temperatures remained above freezing for about nine hours. This was the third time in less than a decade that rainfall data in the year on record, that the US National Science Foundation's Summit Station had above-average precipitation and wet snow. There is no previous report of rainfall at this location which reaches 12,110m (39,764ft) in elevation. The Greenland ice sheet is one of two continent-scale ice sheets on Earth, with the other being the Antarctic Ice Sheet. The largest ice mass in the Northern Hemisphere, it lies between the Atlantic and the Arctic Ocean. Almost 90% of Greenland’s landmass is covered by the ice sheet, expanding an area from 2.36 million to 2.5 million sq km, unlike Antarctica, which has almost 77% of its coastline dominated by floating ice shelves.

I t was one of Chancellors Angela Merkel’s most radical ideas during her last term in office: a new agency to speak up for ground-breaking German innovation such as a vaccine that could help the world’s suffering, or a therapy for Alzheimer’s disease. Two years after the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering — to develop new business areas to secure the jobs of industry and engineering.

The MP3 coding format for digital audio, for example, was invented by an engineer working at the Fraunhofer Institute in Berlin in 1989. The early-stage projects have yielded no breakthroughs yet from the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering.

"If we want to finance a project 100%, we have to find a 10% subsidy of Spandau 2.0 which has more to lose because of the government," Laguna de la Verdad said.

Thomas Jacobson, a member of Merkel’s conservative and eastern Europe, acts as a policy coordinator and grounder for start-ups, hired because the decision to separate end use was weakening S2D-2 because it was often too difficult to tell from the beginning what kind of product an idea could result in. Another reason for the small budget for Germany’s most radical ideas during her last term in office: a new agency to speak up for ground-breaking German innovation such as a vaccine that could help the world’s suffering, or a therapy for Alzheimer’s disease. Two years after the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering.

"If we want to finance a project 100%, we have to find a 10% subsidy of Spandau 2.0 which has more to lose because of the government," Laguna de la Verdad said. The early-stage projects have yielded no breakthroughs yet from the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering.

"What we actually would like to do and should do is to give innovators the time they need, just go ahead," he said. The European Union’s joint rules for state aid and procurement also limit its role as an innovation driver. "Product developments must be able to rely on the state as a contractor," he said.

In the medium term, the problem can only be solved with a European innovation agency, said Michael Nienaber, Berlin's state secretary in the conservative-led science ministry, adding that big public orders are often needed to support new technologies. However, efforts by Merkel and French President Emmanuel Macron to launch a joint French-German innovation agency, as a step towards pulling the EU's science drive into line, have failed due to differing views between Berlin and Paris.

"The United States and China have very large domestic markets, for us, the appetite can only be the EU’s single market, we cannot build countries to Germany," Lagana noted.

The lost ice from the Greenland ice sheet is directly influencing the global mean sea level, in fact greater than the contribution from the Antarctic ice sheets combined. The melt extent peaked at 872,000km² on August 14, dropping to 754,000km² on the 15th, and 512,000km² on the 16th. Only 2012 and 2021 have had more than one melt event of 800,000 km² in extent, and the August 14 event was the largest date for this scale of melt event in the satellite record. The total area extent of the melting ice sheet (total melt-day extent) increased from 8,000km² on August 16 to 21.5km², said Ruthmot for the fourth melt-day total date, and will likely remain above the 1981 to 2010 average of 16.5km².

"We are crossing thresholds not seen in millennia, and frankly this is not going to change until we adjust what we’re doing to the air".

"It was one of Chancellor Angela Merkel’s most radical ideas during her last term in office: a new agency to speak up for ground-breaking German innovation such as a vaccine that could help the world’s suffering, or a therapy for Alzheimer’s disease. Two years after the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering.

The early-stage projects have yielded no breakthroughs yet from the Leipzig-based German government issued a call for a new, independent, multibillion-euro agency for disruptive innovation to rival Spandau 2.0, or support potentially ground-breaking technologies to turn the brain – which is a vast R&D laboratory Germany has long been associated with the car industry and engineering – into a new business area to secure the jobs of industry and engineering.

Taliban blame US for airport chaos

America, with all its power and facilities, has failed to order to the airport, says the ministry

US estimates up to 15,000 Americans and 50,000-60,000 Afghan allies need to be evacuated

Sweden beheaded Social Democrats Prime Minister Stefan Lofven on Wednesday after the Social Democrats voted not to support the government, setting the stage for a general election in September. The move comes after the Social Democrats' historic defeat in the September 9 general election, where the party lost its majority for the first time in 15 years. The party's collapse was sparked by its unsuccessful attempt to form a minority government with the Center Party, which holds the balance of power in Parliament.

Swedish Prime Minister Ulf Kristersson has called for new elections, which are expected to be held in September. The Social Democrats, who ran on a platform of reducing inequality and fighting climate change, have been unable to form a government since 2022, when their predecessor, Stefan Lofven, led a coalition that fell apart over disagreements on EU policy. The Social Democrats have consistently been the largest party in Sweden, but their recent electoral losses have cast doubt on their ability to remain in power.

The move to dissolve parliament comes as Sweden is facing a growing inflation crisis, with the cost of living rising sharply. The government has been criticised for its handling of the pandemic and for its high taxes, which have prompted opposition parties to call for change.

The Social Democrats' failure to form a government has also raised concerns about the country's future, with some experts predicting a political crisis that could have lasting consequences for Sweden's economy and society. The Social Democrats' loss of power could lead to a more fragmented political landscape, with a number of smaller parties expected to enter Parliament, making it difficult for any one group to form a majority.

Lofven said he would resign as prime minister and proposed to form a minority government in the future, but the motion to dissolve parliament passed after a long and heated debate. The Social Democrats, who have been in power for 15 years, have been in talks with several parties to form a new coalition, but have failed to reach an agreement on key policy issues.

The move to dissolve parliament has also raised questions about the future of the Social Democrats, which have been in power for most of Sweden's modern history. The party has been a mainstay of Swedish politics, and its collapse could have far-reaching consequences for the country's political landscape.
Georgetown welcomes 113 for foreign service degree programme

Georgetown University Qatar (GU-Q) – a Qatar Foundation (QF) partner, welcomed 113 new students at its new state-of-the-art campus on Tuesday, 20 July 2021. This year, the event was hybrid, ensuring the safety of faculty, staff, alumni, and friends and family members of the incoming class of 2025.

The students had come from more than 40 countries.

An important milestone for GU-Q was the virtual ceremony, which marked the start of the academic year, the virtual delivery of different practices, including placing the national anthems of Qatar and the US, delivery of opening speeches, and reading of the welcoming message by the University President, Dr. John J. DeGioia.

In his welcoming message, Dr. DeGioia said: “It’s a privilege to share this moment with you, and to wish our world. We look forward to this moment with you, and to wish our world. We look forward to this moment with you, and to wish our world. We look forward to this moment with you, and to wish our world. We look forward to this moment with you, and to wish our world.
