Barca need fixing fast as patience with Valverde wears thin

El Chancho Valverde tried to give us a new identity on Tuesday night, but his plan didn’t work. What’s the point of Barca if they’re still playing a style of Pep Guardiola but he doesn’t like it? It’s like trying to be better without improving. We have to keep working — we have to improve. Wellington Ferreira

Manchester United

United are still without the injured Paul Pogba and do not have an alternative. The team is short of options and will be managed by interim manager, Timothy Vella. United will play in the Champions League for the first time since 2017, but they have been eliminated in the group stage. The best they can hope for is a place in the Europa League. But they want to be really in trouble with Van Gaal. “I don’t want to cancel competitions,” said Klopp. “I don’t understand that and I don’t like it.”

The Under-23s pool will split their squad and play five games in three days, but they have to improve. “We have to play five games in three days, let’s see how they do that,” said Klopp.

The problem is that the competitions were relying on the remaining matches being a boost for the games. United, who won the Champions League under former manager Alex Ferguson in 2008, are not confident in their performances. They are preparing for the second leg of their Europa League tie against Young Boys in Switzerland this week.

United are unbeaten in the group stage, but they want to be better than that.
